SEC. 3. (a) The Congress requires that no State which conducts an election for expression of a preference for the nomination of individuals for election to the office of President provide by law for such election to be conducted except in accordance with the provisions of this Act.

(b) Five regional primaries shall be held during each Presidential election year. The first regional primary shall be held on the second Tuesday of March, and an additional regional primary shall be held on the second Tuesday of each of the four succeeding months. Seventy days before the date of the first regional primary, the Commission shall determine by lot the region in which that primary is to be held. The Commission then shall determine by separate lot, conducted seventy days before the date of each subsequent regional primary except the last, the region in which each subsequent regional primary is to be held.

(c)(1) At each such regional primary, there shall appear on the ballot, together with the name of the political party with which he is affiliated, the name of each individual who is generally recognized in national news media throughout the United States as a candidate for nomination by a political party for election to such office, as determined by a majority of the members of the Commission.

(2) An individual whose name is not placed on a regional primary ballot by the Commission under paragraph (1) may have his name and the name of the political party with which he is affiliated appear on the ballot, if he is eligible for election to the office of President, notifies the Commission in writing that he is a candidate for nomination by a political party (specifying which

political party) for election to the office of President, and—

(A) present the Commission with a petition supporting his candidacy for such nomination, signed by 1 per centum of the registered voters eligible to vote in the primary (not more than 25 per centum of the signatures necessary shall come from any State within that region); or

(B) pays a filing fee of $10,000 which should be refunded if he receives a 5 per centum or more of the total number of votes cast by members of his political party in the regional primary.

The notification and presentation or payment shall be made to the Commission by such date before the primary as the Commission may prescribe, but not earlier than forty-five days or later than thirty-five days prior to the date on which the primary is to be held in that region.

(3) The Commission shall announce—

(A) a tentative list of individuals for whom votes may be cast at a regional primary seventy days before the date of that primary; and

(B) a final list of individuals for whom votes may be cast at a regional primary thirty days before the date of that primary.

(d) The Commission shall not include on the ballot of any regional primary the name of any individual who executes and files with the Commission the following affidavit, executed under oath:

"I, _____, being duly first sworn, do depose and say that I am not, and do not intend to become, a candidate for nomination for election, or for election, to the office of President of the United States.

"State of _____

"County or city of _____

"Subscribed and sworn to before me this _____ day of _____, 19_____.

"_____
"Name

"(Seal)"

"_____
"Title

"My commission expires _____, 19_____."

(e) Nothing in this Act prohibits the casting of votes for candidates whose names are written on the ballot by voters in accordance with the requirements, if any, of the law of the State in which the election is held.

(f) Subject to such guidelines as the Commission may promulgate, the regional primary shall be conducted in each State which chooses to hold a primary by officials of that State charged with conducting elections. Voters in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislature. Each voter shall be eligible to vote only for a candidate for nomination by the party of that voter's registered affiliation. Each such state shall make provision for the registration of voters by party affiliation.

(g) The chief executive officer of each state shall certify the results of the regional primary held in his State to the Commission within a period of time after such date, not exceeding fifteen days, prescribed by the Commission.

APPOINTMENT OF CONVENTION DELEGATES

SEC. 4. (a) A candidate who receives 5 per centum or more of the votes cast by members of his political party in a regional primary shall appoint delegates from States within the region within which the primary was held to the national nominating convention held by the political party whose nomination he seeks.

(b) The number of delegates which a candidate shall appoint in any state within that region is a number which is a percentage of the total number of delegates from that State to his party's national nominating convention equal to the percentage of the votes cast by members of his party in that State received by him in the primary.

(c) If a candidate receives less than 5 per centum of the votes cast by members of his political party in a regional primary, he may not appoint a delegate from any State within that region. The percentage of the votes cast for such a candidate by members of his political party in any State within that region shall be (1) apportioned among the other candidates of the same political party who received votes in that State on the basis of the number of votes received by each of such other candidates and (2) added to the percentage of the votes received by each of such other candidates in that State for the purpose of determining the number of delegates they may each appoint under subsection (b).

(d) If a candidate fails or refuses to appoint delegates to which he is entitled in any State within a reasonable time, as prescribed by the Commission, the Commission shall, with the consent of the State government involved, appoint delegates pledged to support such candidate at the national nominating convention held by his party. Such delegates shall be bound, to support such candidate at the convention to the same extent as if they had been appointed by that candidate.

CONVENTION BALLOTING

SEC. 5. (a) A delegate to a convention held by a political party for the nomination of a candidate for election to the office of President shall vote for the nomination of the candidate who appointed him or for whom he was appointed until—

(1) two ballots have been taken; or

(2) such candidate receives less than 20 per centum of the vote on a ballot; or

(3) such candidate releases him.

(b) If an individual receives a majority of the votes cast on a ballot, he shall be the nominee of that party for election to the office of President. A subsequent ballot may be taken to reflect the support of the entire convention for such candidate, but the result of the subsequent ballot shall not, in such case, result in the nomination of a different individual for election to such office.

(c) The individual who will be the candidate for a political party for election to the office of Vice President shall be selected by the convention held by that party in accordance with such procedures as it may adopt.

REIMBURSEMENT OF STATES FOR COSTS OF PRIMARY

SEC. 6. Upon application therefor, the Commission shall reimburse each State, which held a presidential primary in 1976, to make future primaries within that State conform to the provisions of this Act. No other costs incurred shall be reimbursed. Applications for reimbursement shall be submitted at such times and in such form, and shall contain such information, as the Commission shall require.

DUTIES OF THE FEDERAL ELECTIONS COMMISSION

SEC. 7. (a) The Commission shall meet prior to each regional primary and at such other times as it deems necessary, and shall—

(1) publish tentative and final lists of the individuals for whom votes may be cast in each regional primary ballot and furnish a certified list of such individuals to the appropriate officials of each State thirty days before a regional primary is to be held in that State;

(2) determine the sufficiency of any petition presented to the Commission under section 3(c);

(3) prescribe the date, after the date of a regional primary, on which the chief executive officer of each State shall certify the results of the regional primary held in his State to the Commission;

(4) promulgate guidelines and procedures to be followed by the States in conducting regional primaries;

(5) review applications for reimbursement submitted under section 6, prescribe the time of submission, from, and information content of such applications and determine and pay the amount to be reimbursed to each State under such section:

(6) consult and cooperate with State officials in order to assist them in conducting regional primaries;

(7) determine by lot in accordance with section 3(b) the order in which the regional primaries are to be held;

(8) receive and hold any filing fee paid under section 3(c)(2)(B) and—

(A) refund that fee to the candidate who paid it if he receives a number of votes in the regional primary with respect to which he paid it equal to 5 per centum or more of the total number of votes cast by members of his political party in that primary; or

(B) pay the fee into the general fund of the Treasury if it is not refundable under clause (A) of this paragraph;

(9) appoint delegate when necessary under section 5(d); and

(10) take such other actions as may be necessary to carry out the provisions of this Act.

(b) The Commission shall report to the Congress and the President not later than one hundred and eighty days prior to the date of the first regional primary to be held under this Act on the steps it has taken to implement the provisions of this Act, together with recommendations for additional legislation, if any, which may be necessary in order to carry out the regional primary system established under this Act.

DEFINITIONS

SEC. 8. As used in this Act. the term—

(1) "Commission" means the Federal Election Commission;

(2) "region" means any of the following five regions:

(A) Region 1 comprises Maine, Massachusetts, New Hampshire, Rhode Island, Vermont, Connecticut, New York, Pennsylvania, New Jersey, and Delaware.

(B) Region 2 comprises Michigan, Illinois, Indiana, Ohio, West Virginia, and Kentucky.

(C) Region 3 comprises the District of Columbia, Maryland, Virginia, North Carolina, South Carolina, Tennessee, Mississippi, Alabama, Georgia, Florida, the Commonwealth of Puerto Rico, the Virgin Islands, and the Canal Zone.

(D) Region 4 comprises North Dakota, South Dakota, Minnesota, Wisconsin, Iowa, Nebraska, Kansas, Missouri, Oklahoma, Arkansas, Texas, and Louisiana.

(E) Region 5 comprises Washington, Oregon, Montana, Idaho, Wyoming, California, Nevada, Utah, Colorado, Arizona, New Mexico, Alaska, Hawaii, and Guam.

(3) "regional primary" means an election held in accordance with the provisions of this Act for the expression of a preference for the nomination of individuals for election to the office of President;

(4) "candidate" means an individual who is a candidate for nomination by a political party as its candidate for election to the office of President;

(5) "national nomination convention" means a convention held by a political party for the nomination of candidates for election as President and Vice President; and

(6) "State" means the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Canal Zone, and each of the United States.

AUTHORIZATION OF APPROPRIATIONS

SEC. 9. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

By Mr. PROXMIRE (for himself and Mr. PERCY):

S. 1209. A bill to reorganize the executive branch of the Government by consolidation of functions and to increase efficiency and coordination in the area of disaster assistance, emergency preparedness, mobilization readiness, and for other purposes; to the Committee on Governmental Affairs.

FEDERAL EMERGENCY ASSISTANCE AND PREPAREDNESS ADMINISTRATION ACT OF 1977

Mr. PROXMIRE. Mr. President, the U.S. emergency preparedness measures are totally inadequate, duplicative, and wasteful. Therefore, I am introducing a bill together with the Senator from Illinois (Mr. PERCY) to consolidate emergency preparedness powers in one agency instead of the three departments that now exist. The result will be better protection and service to Americans during times of national emergencies—and a savings of $15 million annually.

Right now our Federal preparedness programs are disjointed, duplicative, inefficient, wasteful, and at times even conflicting. Three different agencies, the Federal Preparedness Agency of the General Services Administration, the Federal Disaster Assistance Administration of HUD, and the Defense Civil Preparedness Agency of DOD, all unsuccessfully compete for time and attention. The result is mass confusion.

Forty-three Governors have reported to the Joint Committee on Defense Production that this confusion causes severe problems in administering State emergency programs. One witness told the committee that his State agency had to prepare 7 pounds of paperwork in order to get Federal assistance in obtaining a $50 siren.

There are literally dozens of committees, interagency task forces, and study groups all working on Federal preparedness planning. But no one is commanding the ship. No one is coordinating or making overall policy decisions. No one in the executive branch can even determine exactly how much the Government is spending each year on preparedness programs—not even the Director of the Federal Preparedness Agency, who has theoretical control.

This bill will have a net effect of eliminating two unnecessary Federal agencies and saving $15 million annually. There will be significant savings by reductions in overhead costs and possibly some manpower efficiencies as well. At the same time the essential national emergency preparedness programs will be upgraded and improved.

Under this bill a new agency will be created called the Federal Emergency Assistance and Preparedness Administration with a Director as a permanent member of the National Security Council. The new agency would have responsibility in cases of major disasters including hurricanes, tornadoes, storms, floods, high water, wind-driven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, drought, fire, explosion, civil disturbance, sabotage or any other catastrophe which causes or may cause substantial damage or injury to civilian property or persons. It also has jurisdiction over mobilization of the civilian economy—in times of war—and civil preparations for nuclear attack.

Mr. President, this measure is, to a large degree, an outgrowth of an extensive review of the Nation's preparedness effort undertaken last year by the Joint Committee on Defense Production. Among several major problems which that inquiry revealed in the civil preparedness area was the problem of organization at the Federal level. A forthcoming report of the Joint Committee will detail these organizational shortcomings in specific terms. The present bill is based on the Joint Committee's recommendations for remedying these organizational deficiencies.

In a very real sense, this bill is not so much an effort to reform the organization of the Federal preparedness effort as it is to restore it to a form which it has had in the past and which, through a variety of ill-considered changes, it has now lost.

For many years the civil preparedness program—including preparedness for natural disasters, economic crises, industrial and transportation accidents, for industrial mobilization, and for civil defense—has been based on the concept of a partnership between the Federal Government and staff and local governments on the other hand. In furtherance of this concept, the Federal Government encouraged States and communities to form single agencies to carry out all emergency services within their jurisdictions. By the same token, the Federal Government maintained a centralized policy and planning mechanism in the old Office of Emergency Preparedness in the Executive Office of the President.

Certain program functions relating to Federal continuity of government or to the specific missions of other departments and agencies were carried on within those agencies. Yet the Office of Emergency Preparedness retained policy and planning control, as well as budgetary control, which it exercised through a mechanism known as "delegate agency funding." This meant that Government leaders had a comprehensive overview of all of the emergency preparedness activities and spending of the Federal Government. It also meant that there was a single source of guidance and liaison for the State and local emergency preparedness units.

Under this former system the close connection between emergency preparedness, especially in terms of civil defense and industrial mobilization, and national defense was fully recognized in that the Director of the Office of Emergency Preparedness had a seat on the National Security Council. This is no longer the case today.

The wisdom underlying this approach to civil emergency preparedness was apparently lost sight of, for the current picture of our Federal preparedness effort is one of disjointed organization, diffusion of authority and responsibility, inadequate budget control, bureaucratic confusion and duplication, conflicting priorities, and general neglect of preparedness at the highest levels of Government, except after a disaster occurs.

Let me review some of the more salient findings of the joint committee's yearlong oversight inquiry.

First, there is no one in the executive branch who can state exactly how much the Government is spending each year on its preparedness efforts. So nominal is the policy control of the Director of Federal Preparedness that when the administration decided to make deep cuts in the civil defense budget, it failed to inform the Director of FPA, much less seek his advice on the planned reductions.

Second, the authority for many preparedness activities—authority formerly delegated to the Director of Emergency Preparedness—have been retained by the President under a new Executive order issued in 1973. It is unrealistic to expect a man as busy as the President to devote time on an ongoing basis to these important but not always pressing responsibilities. The result is that they have been neglected.

Indeed, in its hearings, the joint committee found that many preparedness functions assigned to Cabinet-level departments have been neglected. This appears to be a consequence of both overdelegation and underdelegation. In the press of other business, the President and his staff are unable to keep an eye on emergency preparedness activities. That authority which has been delegated has been distributed in so diffuse a way that accountability has been lost. Simply stated, the problem is one of a lack of centralized policy and planning control.

Third, the committee found that splitting up the preparedness effort into three separate agencies located in three larger departments—the Federal Preparedness Agency in the General Services Administration, the Federal Disaster Assistance Administration in the Department of Housing and Urban Development, and the Defense Civil Preparedness Agency in the Department of Defense—had two negative results. First, it submerged these agencies so deep in departments with essentially nonemergency missions that they were unable to get the attention they needed at the Cabinet level. Lack of access has hampered their effectiveness. At the same time, the three-way split has confounded State and local agencies in their efforts to work with the Federal Government.

This three-agency situation requires special comment. Under the partnership concept, coordination among the various units involved in preparedness planning and programs is of critical importance. There must not only be coordination among Federal, State and local governments, but among the many units of the Federal Government which might play a role in an emergency. Finally, there needs to be coordination between the Government and the many private institutions—ranging from private relief organizations such as the Red Cross to private industry such as the electric

power utilities—that also play a role in disaster preparedness.

Yet the existence of three separate agencies frustrates the coordination that is so vital to effective emergency preparedness. During our oversight review, all of the State and territorial Governors were queried about the Federal preparedness program. Forty-three Governors reported that this Federal preparedness troika causes severe problems in administering State emergency programs and only one reported that this three-way split causes no problems at all.

In its hearings, the joint committee heard from State emergency services directors, who told us specifically how their own efforts were frustrated by the duplication of agencies at the Federal level.

According to the State directors, the biggest sources of trouble are the conflicting priorities and hence conflicting directives of the Federal preparedness organizations, as well as the duplication of paperwork which the State agencies must process.

We found several dozen committees, interagency task forces and study groups trying to sort out the work of the many bureaucracies involved in preparedness programs but we did not find any central coordinating and policymaking authority.

In other hearings, the joint committee learned about erosion of the defense mobilization base. This has come about for many of the same reasons that have undermined Federal efforts to cope with natural disasters. Various parts of the defense industrial base planning system are strewn throughout the Government—in the Commerce Department, in the General Services Administration, in the Labor Department, in the Department of Defense, and elsewhere. Centralized control of these activities is largely a fiction. The lack of a central, authoritative organization for overseeing the defense implications of the peacetime civilian economy means that the agencies spend precious time and resources trying to harmonize their own interests rather than monitoring and coordinating the activities of the industrial base. Here, as with other aspects of civil emergency preparedness, conflicts in the program priorities of different departments and agencies lead to lack of agreement about preparedness priorities and thus to misallocated resources, programmatic confusion, and ineffectiveness.

Mr. President, the fragmented Federal emergency preparedness effort is not responsive to the needs of our citizens; it is not effective. It has not kept pace with the many new types of disaster or crisis that threaten life and property in a complex, modern society. Among these are large-scale transportation accidents, sudden resource shortages, nuclear powerplant accidents, sabotage, and terrorism.

And, as presently constituted, the Federal emergency preparedness effort wastes money. How much, we cannot be sure, because there are no fully accurate figures on total disaster preparedness spending. But the administration of three preparedness agencies duplicates overhead costs. And we can be sure that there is something wrong in our spending priorities when one Federal agency can spend millions to build an underground bunker for storing currency against a nuclear attack, while the State and local governments have difficulty getting funds for drought relief or surplus Federal equipment to aid in coping with other natural disasters.

The bill which we are introducing will go a long way toward eliminating these problems, conflicts and inequities. It will provide a central administration for all types of emergency preparedness policy, planning, and programs. It will give this administration policy and budget control over preparedness activities which, for practical reasons, should be carried out by other departments and agencies. It provides for a unified and comprehensive approach to all preparedness planning. It recognizes that the security of life and property is endangered by many types of natural and manmade events by restoring to the National Security Council the official of Government primarily responsible for emergency preparedness. And it mandates savings in overhead costs by providing spending ceilings for the new Federal Emergency Assistance and Preparedness Administration.

This legislation is based on a long and careful study of the past development and present condition of American emergency preparedness organizations and programs. It seeks to build on the wisdom of our past experience in this area, and to take account of the many more recent developments that affect the safety of our lives and property. I commend this bill to the careful consideration of my colleagues. I believe they will find that it answers our national preparedness needs very well and deserves expeditious consideration.

Mr. President, I would like to take this opportunity to thank my distinguished colleague, the senior Senator from Illinois, and staff from the Governmental Affairs Committee for their considerable efforts in assisting with this bill.

Mr. President, I ask unanimous consent that, following Senator PERCY'S remarks, an outline of the legislation and the text of the legislation be printed in the RECORD.

Mr. PERCY. Mr. President, I am pleased to introduce today, along with my distinguished colleague, Senator PROXMIRE, the Federal Emergency Assistance and Preparedness Administration Act of 1977, legislation to reorganize the emergency preparedness and disaster assistance functions of the Federal Government.

Mr. President, this year of 1977 has witnessed an unprecedented sequence of national emergencies. There has been an exceptionally severe winter causing unexpected shortages in heating fuel, industrial shutdowns, and millions of dollars of property damage as well as personal hardship; an equally severe drought in the western part of the country necessitating water rationing and other emergency measures; and a series of disastrously large oil spills. They have all focused the attention of the Nation on how this Government prepares itself for and reacts to the occurrences of unexpected emergency situations.

A number of studies conducted this past year, including those of the General Accounting Office, the Joint Committee on Defense Production, and others, have documented the utter chaos characterizing the institutional structures of our Government responsible for emergencies. Emergency preparedness and disaster assistance is perhaps the single worst organized functional area in the entire Federal Government.

At the present time, there is, in fact, no single agency of the Government responsible for dealing with emergency situations. Nor is there any single coordinating body with the authority to orchestrate the activities of the literally dozens of subagency fragments with responsibilities in this area. Rather, "lead" agency responsibilities have been vested in not one but three subagency units: First, the Defense Civil Preparedness Agency of the Department of Defense, second, the Federal Disaster Assistance Administration of the Department of Housing and Urban Development, and, third, the Federal Preparedness Agency of the General Services Administration. None of these are recognized by congressional statute, none of them holds coordinating authority over the other two, none of them wields sufficient power to assert leadership and establish direction.

The current remarkably chaotic state of affairs, Mr. President, is the product of a long parade of Executive orders and reorganization plans spanning the past 27 years. Since 1950, Congress has enacted a number of significant statutes, creating Federal responsibilities for preparing for and reacting to emergency situations. The situations covered range from civil defense against nuclear military attack and emergency relief in case of floods or tornadoes or other natural disasters, to the continuity of government subequent to nuclear annihilation. However, in drafting these various statutes, Congress has failed to address itself to the question of how to organize these varying responsibilities within the executive branch. Rather, statutes by and large have simply vested authorities in the President himself, to delegate as he pleases.

For example, in 1969, through a single Executive order (E.O. 11490), President Nixon distributed emergency preparedness responsibilities to 28 different agencies—since grown to 37—of the Federal Government. At that time, an Office of Emergency Preparedness existed in the Executive Office of the President to oversee these 37 agencies in their implementation of those responsibilities. However, just 4 years later, this Office was abolished through still another reorganization plan—plan No. 1 of 1973—and its functions were decentralized to less authoritative entities within the Government. As a result, each of those 37 agencies is currently answerable only to the General Service Administration in their performance of these functions, an agency with no statutory authority whatsoever to exercise supervision or

dictate uniform policy over this esoteric archipelago of officialdom.

Another sign of institutional fragmentation is found in the structure of disaster relief programs. The "Catalogue of Domestic Assistance" published by the Office of Management and Budget now lists over 45 programs administered by 15 departments and agencies of the Government, again without centralized supervision. State emergency relief agencies often find themselves in a state of utter confusion in dealing with such an arbitrary array of bureaucracy. There is no central point of contact available to applicants for Federal emergency assistance. Forms and qualifications and procedures differ from agency to agency. As a result localities are often frustrated in obtaining necessary assistance, and American citizens suffer needlessly in their hour of misfortune.

While clearly we have the programs to deal with emergency disaster situations, the haphazard and chaotic structuring of those programs has frustrated the goals Congress has set for them.

As if these difficulties were not enough, Mr. President, sharp splits have developed between those agencies of the Government responsible for preparing and planning for emergencies, and those responsible for reacting to them. Preparedness functions have been isolated in those agencies, particularly DCPA and FPA, which are primarily concerned with civil defense and wartime preparedness, to the exclusion of natural disasters or other more commonplace emergencies. However, the major source of State preparedness funding emanates from just these agencies, and particularly DCPA preparedness grants. In the past, States and localities have used DCPA funds to establish procedures and organizations for both civil defense and natural disaster preparedness. Last year, however, in an effort toward organizational "reform," the States were forbidden from using DCPA funds for any purpose other than wartime civil defense preparedness. As a result, virtually all Federal assistance for natural disaster preparedness has dried up. The potential loss of life resulting from this single bureacratic squabble is incalculable.

The legislation that I am introducing today together with Senator PROXMIRE will undertake a long-overdue revamping of the emergency-related institutions of the Federal Government. For the first time, a single congressionally authorized Administration will be responsible for both planning and reacting to emergencies and disasters. All functions and programs currently scattered among the Defense Civil Preparedness Agency, the FDAA, and FPA, and the Office of Industrial Mobilization of the Department of Commerce, will coalsece in this new Administration. All other programs, functions, and activities of the Government remaining outside the new Administration will fall within its supervisory or coordinating authority.

As best as we can estimate, Mr. President, the current pricetag for Federal agencies included within this reorganization stands at $179.7 million. I believe that through centralized management and improved coordination, this figure can be drastically reduced. For that reason, we have set in this legislation a spending ceiling of $164.7 million, or a decrease of $15 million from the current total, to force the new administration to implement these savings. We have designed this spending ceiling, however, to assure that in no case would the administration have its hands tied in grappling with an unexpected emergency situation should it arise.

Upon passage of this legislation, Mr. President, this country would enjoy a single coherent emergencies policy and program with a unified organizational structure capable of implementing it in a rational manner.

This legislation, developed by the staffs of the Governmental Affairs Committee and the Joint Committee on Defense Production working in close cooperation, represents a major step toward bringing order to a most confused and chaotic sector of the Federal bureaucracy. The need for such legislation is acute. Already this year in just 3 months, Mr. President, more than 15 Presidential Declarations of Major Disaster Areas or States of Emergency have been issued. In these areas seven Government operations are decreased and have efficient and effective implementations of government policy.

There being no objection, the bill and outline were ordered to be printed in the RECORD, as follows:

S. 1209

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, This Act may be cited as the "Federal Emergency Assistance and Preparedness Administration Act of 1977".

Sec. 12.—Amendment of Preparedness Programs

DEFINITIONS

SEC. 2. As used in this Act—

(1) the term "emergency preparedness" refers to all programs, functions, activities, or expenditures of the Federal Government undertaken for the purpose of preparing, warning, planning, stockpiling, training, or otherwise establishing contingency measures against damage or danger to life, limb, property, the environment, or the economy, or the mitigation of such damage or danger which might result from the occurrence of any one or a combination of—

(A) a major disaster or emergency as defined in the Disaster Relief Act of 1974;

(B) an industrial, transportation or similar accident;

(C) an economic crisis resulting from any commodity shortage (including an energy shortage), industrial shutdown, or other disruption caused by any occurrence referred to in this subsection or by any other fortuitous or uncontrollable circumstance resulting in severe personal, business, or community hardship;

(D) the effect on life or property of an act of sabotage or terrorism;

(E) an accident involving radioactive material;

(F) any such emergency or disaster occurring outside the United States or its territories for which the United States might wish to donate assistance; or

(G) the effect on civilian life and property of a military or industrial mobilization or an attack upon the United States involving either conventional or nuclear weapons;

(2) the term "disaster assistance" refers to all programs, functions, activities, or expenditures of the Federal government undertaken for the purpose of facilitating recovery from or repair of damage inflicted by or providing immediate relief during the course of any of the occurrences enumerated in clause (1); and

(3) the term "Federal agency" means any department, agency, or other authority of the executive branch of the government or any subdivision or office thereof.

ESTABLISHMENT

SEC. 3. There is hereby established as an independent establishment of the executive branch of the Government the Federal Emergency Assistance and Preparedness Administration (hereinafter referred to as the "Administration").

DIRECTOR

SEC. 4. (a) The Administration shall have a Director and Deputy Director who shall be appointed by the President, by and with the advice and consent of the Senate, without regard to political affiliation and solely on the basis of fitness to perform the duties and functions of the office. The Deputy Director shall act for and exercise the powers of the Director during the absence or disability of the Director.

(b) The Director shall be responsible for the exercise of all powers and the discharge of all duties of the Administration. The Director shall have the authority and control of all of the staff of the Administration and their activities. The Director shall maintain budgets and allocate available funds as appropriate in carrying out the provisions of this Act.

(c) The Director shall be a permanent member of the National Security Council and shall report to the President through his Domestic Council for other than national security matters.

(d)(1) Section 5314 of title 5, United States Code, is amended by adding at the end thereof the following:

"(66) Director, Federal Emergency Assistance and Preparedness Administration.".

(2) Section 5315 of title 5, United States Code, is amended by adding at the end thereof the following:

"(114) Deputy Director, Federal Emergency Assistance and Preparedness Administration.".

ORGANIZATION

SEC. 5. (a) For purposes of carrying out his responsibilities under this Act, the Director may delegate such of his duties and authorities as he sees fit to subordinates within the Administration and to the Deputy Director.

(b) The Director shall establish within the Administration the following Offices to assist him in carrying out the provisions of this Act and the functions transferred to the Administration by this Act:

(1) An Office of Director Assistance Operations to implement those functions of the Administration relating to emergency relief for areas declared by the President pursuant to his authority under the Disaster Relief Act of 1974 to be major disaster areas or areas under states of emergency.

(2) An Office of Emergency Preparedness to implement those functions of the Admin-

istration related to preparing the American people against contingencies as defined in section 2(1).

(3) An Emergency Information Center to implement the responsibilities of the Administration under section 6(10), 6(11), 8(a)(4), and 8(a)(6).

(4) An Office of Program Evaluation to review on a continuing basis all programs, functions, and activities of the Administration, including both those under the direct authority of the Administration and those within the supervisory or coordinating functions of the Director under section 7 of this Act, and to make recommendations, based on its review, to the Director for the improvement of such programs, functions, and activities through better coordination, consolidation, institutional realinement, programmatic amendment, or otherwise through legislation or agency action.

FUNCTIONS

SEC. 6. The Administration shall—

(1) implement all Federal disaster assistance programs and authorities transferred to the Administration by section 9;

(2) implement all Federal emergency preparedness programs and authorities transferred to the Administration by section 9;

(3) coordinate all programs, functions, and activities of the Federal Government related to emergency preparedness and disaster assistance;

(4) develop and implement a coherent overall policy framework encompassing all functions of the Administration, and in such framework:

(A) identify priorities for Federal activity,

(B) integrate the preparedness and assistance functions of the Administration to provide a unified approach to Federal emergency activities,

(C) provide adequate emphasis to civil defense and other nuclear preparedness programs, and

(D) identify and integrate the roles of the states and localities in the overall emergency preparedness and disaster assistance effort;

(5) carry out comprehensive planning and policy formulation with respect to industrial mobilization, economic readiness, and such other civil preparedness functions as may be assigned by the President for emergencies and contingencies relating to the national defense and for supervising and coordinating the implementation of federal economic and industrial mobilization programs;

(6) develop, in coordination with other branches, departments, and agencies or the Federal government, contingency plans for the continuity of the Federal government and for supervising the implementation of these plans;

(7) establish and maintain training programs for personnel from public agencies and private institutions concerned with predicting, planning for, and preparing for emergencies and disasters or with providing assistance before, during or after the occurrence of such emergencies and disasters;

(8) develop, and where appropriate implement, in consultation with representatives of appropriate Federal agencies contingency plans for fulfilling its responsibilities under this Act, in a manner which

(A) reflects priorities established under clause (4)

(B) concentrates available resources against those needs most common and costly, and

(C) incorporates the full range of contingency and emergency situations within the jurisdiction of the Administration;

(9) initiate reviews of Federal emergency preparedness and disaster assistance programs and make periodic recommendations regarding how such programs can be improved through greater consolidation, coordination, institutional realignment, programmatic amendment, or otherwise by legislation or Federal agency action;

(10) undertake research and development activities leading to the improvement of programs under the cognizance of the Administration, including generic studies of disasters, emergencies, crises, and other contingencies which adversely affect life and property, and provide the results of such research and development activities to Federal, State, local and private agencies, as appropriate; and

(11) monitor all programs, functions, and activities of the Federal government concerned with collecting and analyzing data on natural, economic, industrial, agricultural, technological, scientific and other phenomena and trends, including data on materials availability and consumption, for the purpose of assisting in the fulfillment of the Administration's responsibilities for predicting, planning for, and preparing for industrial and economic mobilization, strategic stockpiling, economic crises, and emergencies and disasters as defined under section 2 (1) of this Act, and assemble and maintain current information relevant to such purposes in a central location and make available to the public and to interested public and private agencies on a periodic basis new information assembled pursuant to this clause.

COORDINATION WITH OTHER FEDERAL AGENCIES

SEC. 7. (a) All expenditures related to emergency preparedness and mobilization authorities under the Defense Production Act of 1950, as amended, as delegated and assigned to federal agencies under Executive Order 11490, as amended, shall be included within the annual budget and appropriation of the Administration, and the Director shall be responsible for coordinating and supervising the implementation of programs and activities pursuant to such authorities.

(b) Upon a declaration by the President, pursuant to the Disaster Relief Act of 1974, of a major disaster or a state of emergency, the Director shall coordinate and supervise all programs, functions, and activities of the Federal government to provide assistance under such declaration. The head of each Federal agency having jurisdiction of any such program, function, or activity shall cooperate with the Director in fulfilling his responsibilities under this section.

(c) The head of each Federal agency which has jurisdiction of a program or function relating to emergency preparedness or disaster assistance, including those referred to in subsection (b) of this section, shall, within 30 days of the enactment of this section and thereafter at least annually, report to the Director on the status, funding, and activities of each such program or function. The Director, at least annually, shall cause to be published a compilation of reports submitted to him under this subsection. Such compilation shall be made available to the public on such terms as the Director shall prescribe.

(d) The head of each Federal agency which has jurisdiction of a program, function, or activity relating to emergency preparedness or disaster assistance, including international disaster assistance, shall assist and cooperate with the Director in developing contingency plans under section 6(6) and 6(8), and shall likewise assist and cooperate in the implementation of those plans where so requested by the Director.

(e) The head of each Federal agency which has jurisdiction of any program, function, or activity concerned with collecting and analyzing data described in section 6(11) shall cooperate with the Director in fulfilling his responsibilities under that subsection.

COORDINATION WITH STATES AND LOCALITIES

SEC. 8. (a) The Director shall assist States and localities in applying for and participating in all Federal programs relating to emergency preparedness and disaster assistance. This assistance shall include—

(1) providing relevant information and materials to applicants and participants;

(2) maintaining a library of current information to be made available to States and localities;

(3) providing education services and programs to States and localities;

(4) monitoring all Federal agencies concerned with studying natural phenomena and predicting natural occurrences and potential natural disasters, and providing such information on a regular basis to States and localities;

(5) establishing within the Administration a single point of contact for all State, local, and private preparedness or relief organizations in order to facilitate coordination of programs and standards among different types of government and organizations and to improve the provision of Federal services;

(6) providing on a regular basis such information as shall have been assembled under section 6(11) of this Act which might be useful to States and localities in predicting, planning for or preparing for emergencies or disasters; and

(7) providing liaison services to other Federal agencies.

(b) The Director shall develop improved avenues of Federal-State cooperation, including those authorized under the Joint Funding Simplification Act of 1974, and implement these methods where applicable.

(c) The Director shall consult with States and localities in carrying out his functions under this section.

TRANSFERS OF FUNCTIONS AND AUTHORITIES

SEC. 9. All functions, authorities, files, and accounts of the Defense Civil Preparedness Agency in the Department of Defense, the Federal Disaster Assistance Administration in the Department of Housing and Urban Development, the Office of Industrial Mobilization in the Department of Commerce, and the Federal Preparedness Agency, the Stockpile Storage Division and such other elements as are related to stockpiling in the General Services Administration, are hereby transferred to and vested in the Administration.

SEC. 10. (a) Not later than December 31 of each year, the Director shall report to the President and the Congress on activities pursuant to the provisions of this Act during the preceding fiscal year. Such reports shall include—

(1) an analysis of all funds expended or obligated under each of the programs or activities assigned to the Administration by this Act;

(2) an assessment of the Administration's efforts in providing assistance following each declared major disaster or state of emergency, including an accounting of assistance provided, and progress that has been made in facilitating recovery from such declared major disaster or state of emergency;

(3) progress under emergency preparedness programs assigned to the Administration;

(4) a description of activities undertaken by the Administration toward improving coordination and cooperation among agencies of the Federal government and between the Federal and state and local governments relating to activities under this Act;

(5) recommendations, as appropriate, of the Office of Program Evaluation under section 5(b)(4); and

(6) such other recommendations as the Director deems appropriate and such information as may be useful in assessing the progress of the Administration.

(b) Each report required to be submitted to the Congress by this Act shall be referred

to the standing committee or committees having jurisdiction over any part of the subject matter of the report.

AUTHORIZATION OF APPROPRIATIONS

SEC. 11. There are authorized to be appropriated to the Federal Emergency Assistance and Preparedness Administration through the close of fiscal year 1981—

(1) for all expenses, except those set forth under paragraphs (2) and (3), $126,700,000 for fiscal year 1978, $129,700,000 for fiscal year 1979, $132,700,000 for fiscal year 1980, and $135,700,000 for fiscal year 1981;

(2) for expenses in carrying out the functions of the Administration under the Disaster Relief Act of 1974 not including administrative expenses, such sums as may be necessary; and

(3) for expenses in carrying out the functions of the Administration under section 7 (a) of this Act, $38,000,000 for each of the fiscal years 1978, 1979, 1980, and 1981.

AMENDMENT OF PREPAREDNESS PROGRAMS

SEC. 12. (a) Section 2 of the Federal Civil Defense Act of 1950 (50 U.S.C. App. 2251) is amended—

(1) by striking out ", in this thermonuclear age," in the first sentence of such section; and

(2) by inserting "or from major disasters" immediately after "from attack" in the second sentence of such section.

(b) Section 3 of the Federal Civil Defense Act of 1950 (50 U.S.C. App. 2252) is amended—

(1) by inserting immediately after paragraph (a) the following:

"(b) The term 'major disaster' means any hurricane, tornado, storm, flood, high water, wind-driven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, drought, fire, explosion, civil disturbance sabotage, or other catastrophe in any part of the United States which causes, or which may cause, substantial damage or injury to civilian property or persons.";

(2) by redesignating paragraphs (b), (c), (d), (e), (f), and (g) as paragraphs (c), (d), (e), (f), (g), and (h), respectively;

(3) by amending paragraph (c) (as redesignated by paragraph (2)) by—

(A) inserting "or by a major disaster" in clause (1) immediately after "attack upon the United States"; and

(B) inserting "or major disaster" after "attack" each place it appears in such paragraph after clause (1); and

(4) by amending paragraph (d) (as redesignated by paragraph (2)) by striking out the period at the end of the first sentence and all that follows through "civil defense plans".

(c) Section 201 of the Federal Civil Defense Act of 1950 (50 U.S.C. App. 2281) is amended—

(1) by striking out "of enemy attacks to the civilian population" in paragraph (c) and inserting in lieu thereof "to the civilian population of any attack or major disaster";

(2) by inserting "and major disasters" in paragraph (d) immediately after "effects of attacks";

(3) by striking out "June 30, 1976" in the second proviso to paragraph (e) and inserting in lieu thereof "September 30, 1980";

(4) by inserting "or major disaster" in paragraph (g) immediately after "attack" each place it appears;

(5) by striking out "June 30, 1976" in the fourth proviso to paragraph (h) and inserting in lieu thereof "September 30, 1980";

(6) by striking out "quarterly" in the tenth proviso to paragraph (i) and inserting in lieu thereof "annually".

(d) Section 205 of the Federal Civil Defense Act of 1950 (50 U.S.C. App. 2286) is amended—

(1) by inserting "and the areas which may be affected by major disasters" in paragraph (d) (1) immediately after "target and support areas"; and

(2) by striking out "June 30, 1976" in subsection (h) and inserting in lieu thereof "September 30, 1980".

(e) Section 307 of the Federal Civil Defense Act of 1950 (50 U.S.C. App. 2297) is amended by striking out "June 30, 1974" and inserting in lieu thereof "September 30, 1980".

OUTLINE: FEDERAL EMERGENCY ASSISTANCE AND PREPAREDNESS ADMINISTRATION ACT OF 1977

I. This legislation would create a Federal Emergency Assistance and Preparedness Administration (FEAPA) as an independent establishment of the Executive Branch of the government by combining the following units:

A. The Defense Civil Preparedness Agency of the Department of Defense;

B. The Federal Disaster Assistance Administration of the Department of Housing and Urban Development;

C. The Federal Preparedness Agency of the General Services Administration;

D. The Office of Industrial Mobilization of the Department of Commerce;

E. 37 independent emergency preparedness Offices attached to various departments and agencies of the government by Executive Order. These would become "delegate agencies of the new Administration (see IV below).

The Administration would be under the coordinate all other programs, functions, and activites of the government relating to disaster assistance or emergency preparedness.

II. Structure:

The Administration would be under the contrcl of a Director and a Deputy Director appointed by the President and confirmed by the Senate. The Director would be authorized to delegate responsibilities within the Administration as he sees fit. The following sub-agency units would be established to implement specialized functions of the Administration:

A. An office of Disaster Assistance Operations;

B. An Office of Emergency Preparedness;

C. An Emergency Information Center;

D. An Office of Program Evaluation.

The Director would become a statutory member of the National Security Council and report to the President through his domestic Council.

III. Functions:

The Administration would be responsible for all disaster assistance and emergency preparedness functions of the government. All functions of the four agencies combined into the Administration would vest directly in the Director. Among the responsibilities of the Administration would be:

A. Disaster assistance functions under the Disaster Relief Act of 1974;

B. Civil Defense, emergency preparedness, and continuity of government functions under the Civil Defense Act of 1950;

C. Industrial Mobilization functions under the Defense Production Act of 1950;

D. Training and assistance grant programs to the states for civil defense and disaster assistance;

E. Development and implementation of a unified coherent policy and program framework for all functions of the Administration;

F. Coordination of all other emergency functions and programs of the Federal government;

G. Information collection and dissemination, research and development, and program evaluation functions in the emergency preparedness and disaster assistance fields.

IV. Coordination with other Governmental Units:

The Administration would serve as a single point of contact for state and local governments in dealing with the Federal government on emergency matters. The Administration would provide liaison and information services and work with the states and local governments in developing improved avenues of cooperation and coordination.

The Administration would be responsible for coordinating the total Federal effort in the emergency preparedness and assistance fields. Agency heads with functions or activities in this area would be directed to cooperate with the Director in this effort. In cases of Presidentially declared emergencies or disasters, the Director would have direct supervisory authority over all Federal agencies responsible for providing assistance.

The 37 small emergency preparedness Offices attached to different agencies of the government under Executive Order 11490 (1969) would become "delegate agencies" of the Administration. The Director would have both budgetary and supervisory control over these Offices, though they would remain within their home agencies for purposes of retaining necessary agency expertise.

V. Effect on Substantive Programs:

This legislation makes only one substantive change in Federal emergency programs. Currently, Defense Civil Preparedness Agency (DCPA) preparedness grant funds to the states are limited to nuclear civil defense purposes. States are technically forbidden from using these fundfs for coping with natural disasters. This restriction would be removed.

Aside from this single substantive change, the new Administration would be charged with reviewing and recommending proposals to streamline and harmonize the variety of programs within its jurisdiction. Further substantive changes will, of course, require further legislation.

VI. Authorization of Appropriations:

The authorization for the Administration is designed to result in savings of $15 million stemming from the general reorganization. However, actual emergency assistance funds would not be included in this restriction so as not to cripple the ability of the government to react to an unforeseen emergency situation. Total authorization for the Administration, not including emergency assistance funds, would total $164.7 million in the first year, as opposed to a current cost of $179.7 million.

By Mr. STENNIS (for himself and Mr. TOWER) by request):

S. 1210. A bill to authorize appropriations during the fiscal year 1978, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength for each actvie duty component and of the Selected Reserve of each Reserve component of the Armed Forces and of civilian personnel of the Department of Defense, and to authorize the military training student loads, and for other purposes; to the Committee on Armed Services.

S. 1211. A bill to authorize appropriations during the fiscal year 1979, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength for each active duty component and of the Selected Reserve of each Reserve component of the Armed Forces and of civilian personnel of the Department of Defense, and to authorize the military training

student loads, and for other purposes; to the Committee on Armed Services.

DEPARTMENT OF DEFENSE AUTHORIZATIONS, 1978 AND 1979

Mr. STENNIS. Mr. President, by request, for myself and the senior Senator from Texas (Mr. TOWER), I introduce, for appropriate reference, two bills to authorize appropriations during the fiscal year 1978 and fiscal year 1979 respectively, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength for each active duty component and of the Selected Reserve of each Reserve component of the Armed Forces and of civilian personnel of the Department of Defense, and to authorize the military training student loads and for other purposes.

I ask unanimous consent that a letter of transmittal requesting consideration of these legislative measures and an explanation of their purpose be printed in the RECORD immediately following the listing of these bills.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

GENERAL COUNSEL OF
THE DEPARTMENT OF DEFENSE,
Washington, D.C., March 9, 1977.

Hon. WALTER F. MONDALE,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: There is forwarded herewith legislation, "To authorize appropriations during the fiscal year 1978, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength for each active duty component and of the Selected Reserve of each Reserve component of the Armed Forces and of civilian personnel of the Department of Defense, and to authorize the military training student loads and for other purposes."

We are also submitting herewith, as separate legislation, a similar request for authorization of appropriations for fiscal year 1979.

These proposals are part of the Department of Defense legislative program for the 95th Congress and the Office of Management and Budget has advised that enactment of the proposals would be in accordance with the program of the President. These proposals are being sent to the Speaker of the House of Representatives.

The enclosed request for FY 1978 which reflects the President's budget revisions submitted to Congress on February 22, 1977 supersedes the previous request for that fiscal year which was submitted as separate legislation along with the FY 1977 appropriation authorization request. Because Congress did not act on the FY 1978 proposed legislation and in order to update our original request to make necessary changes reflecting, for example, Congressional action on our 1977 request, we believe it is appropriate to resubmit the proposed Department of Defense authorization legislation for fiscal year 1978.

Title I provides procurement authorization for the military departments and Defense agencies in amounts equal to the budget authority included in the President's budget for fiscal year 1978.

Title II provides for the authorization of each of the research, development, test, and evaluation appropriations for the military departments and the Defense agencies in amounts equal to the budget authority included in the President's budget for fiscal year 1978.

Title III of the proposal prescribes the end strengths for active duty personnel in each component of the Armed Forces as required by section 138(c)(1) of title 10, United States Code, in the numbers provided for by budget authority and appropriations requested in these components in the President's budget for fiscal year 1978.

Title IV of the proposal provides for average strengths of the Selected Reserves of each Reserve component of the Armed Forces as required by section 138(b) of title 10, United States Code, in the numbers provided for by budget authority and appropriations requested for these components in the President's budget fo rfiscal year 1978.

Title V of the proposal provides the civilian personnel end strength for the Department of Defense as required by section 138 (c)(2) of title 10, United States Code, in the numbers provided for by budget authority in appropriations requested for the Department of Defense in the President's budget for fiscal year 1978.

Title VI of the proposal provides for the average military training student loads as required by section 138(d)(1) of title 10, United States Code, in the numbers provided for this purpose in the President's budget for fiscal year 1978.

Title VII of the proposal provides for the Defense Civil Preparedness Agency as required by the amendment to the Federal Civil Defense Act by section 804(b) of the Department of Defense Appropriation Authorization Act for fiscal year 1977.

In accordance with the Budget Control Act of 1974, we are also submitting, in the form of a separate bill, authorizations for appropriations for fiscal year 1979.

Sincerely yours,

L. NIEDERLEHNER,
Acting General Counsel.

By Mr. ABOUREZK (for himself, Mr. MCGOVERN, and Mr. HUMPHREY):

S. 1214. A bill to establish standards for the placement of Indian children in foster or adoptive homes, to prevent the break-up of Indian families, and for other purposes; to the Select Committee on Indian Affairs.

Mr. ABOUREZK. Mr. President, many Americans and the Congress are becoming more aware of the difficulties Indian communities face in a broad range of areas: Health, education, land, and water rights, economic development, and others. But there are few who are aware of the difficulties American Indians face in a matter of vital concern to them; namely the welfare of their children and their families.

It appears that for decades Indian parents and their children have been at the mercy of arbitrary or abusive action of local, State, Federal, and private agency officials. Unwarranted removal of children from their homes is common in Indian communities. Recent statistics show, for example, that a minimum of 25 percent of all Indian children are either in foster homes, adoptive homes, and /or boardings schools, against the best interest of families and Indian communities. Whereas most non-Indian communities can expect to have children out of their natural homes in foster or adoptive homes at a rate of 1 for every 51 children, Indian communities know that their children will be removed at rates varying from 5 to 25 times higher than that.

Because of poverty and discrimination Indian families face many difficulties, but there is no reason or justification for believing that these problems make Indian parents unfit to raise their children: nor is there any reason to believe that the Indian community itself cannot, within its own confines, deal with problems of child neglect when they do arise.

Up to now, however, public and private welfare agencies seem to have operated on the premise that most Indian children would really be better off growing up non-Indian. The result of such policies has been unchecked: Abusive child removal practices, the lack of viable, practical rehabilitation and prevention programs for Indian families facing severe problems, and a practice of ignoring the all-important demands of Indian tribes to have a say in how their children and families are dealt with.

Officials seemingly would rather place Indian children in non-Indian settings where their Indian culture, their Indian traditions and, in general, their entire Indian way of life is smothered. The Federal Government for its part has been conspicuous by its lack of action. It has chosen to allow these agencies to strike at the heart of Indian communities by literally stealing Indian children. This course can only weaken rather than strengthen the Indian child, the family, and the community. This, at a time when the Federal Government purports to be working to help strengthen Indian communities. It has been called cultural genocide.

This bill is derived from hearings which I chaired on April 8 and 9 of 1974. I do not mean to suggest that this bill will relieve all of the problems that Indian families and Indian communities face. What I do mean is that this pattern of discrimination against American Indians is the responsibility of the Congress. We as elected leaders cannot lay back and allow these practices to continue. It is the responsibility of the Congress to take whatever action is within its power to see to it that American Indian communities and their families are not destroyed; to see to it that Indian people receive equal justice and the support of the Federal Government. We must commit ourselves to a course in Indian child welfare which will eliminate the abuses and injustices and which will begin the long, overdue process of helping, rather than handicapping, Indian children and their families.

I introduced this bill in the last Congress. It has been modified pursuant to comments from the Indian community. I ask unanimous consent that a summary along with the full text of the bill be printed in the RECORD. Joining me as cosponsors of this much needed legislation are my colleagues Senators HUMPHREY and MCGOVERN.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1214

Be it enacted by the Senate and House of Representatives of the United States of

America in Congress assembled, That this Act may be cited as the "Indian Child Welfare Act of 1977".

FINDINGS

SEC. 2. Recognizing the special relations of the United States with the Indian and Indian tribes and the Federal responsibility for the care of the Indian people, the Congress finds that—

(a) An alarmingly high percentage of Indian children, living within both urban communities and Indian reservations, are separated from their natural parents through the actions of nontribal government agencies or both individuals or private agencies and are placed in institutions (including boarding schools), or in foster or adoptive homes, usually with non-Indian families.

(b) The separation of Indian children from their biological families frequently occurs in situations where one or more of the following circumstances exist: (1) the natural parent does not understand the nature of the documents or proceedings involved; (2) neither the child nor the natural parents are represented by counsel or otherwise advised of their rights; (3) the Government officials involved are unfamiliar with, and often disdainful of, Indian culture and society; (4) the conditions which led to the separation are not demonstrably harmful or are remediable or transitory in character; and (5) responsible tribal authorities are not consulted about or even informed of the nontribal government actions.

(c) The separation of Indian children from their natural parents, including especially their placement in institutions or homes which do not meet their special needs, is socially and culturally undesirable. For the child, such separation can cause a loss of identity and self-esteem, and contributes directly to the unreasonably high rates among Indian children for dropouts, alcoholism and drug abuse, suicides, and crime. For the parents, such separation can cause a similar loss of self-esteem, aggravates the conditions which initially gave rise to the family break-up, and leads to a continuing cycle of poverty and despair. For Indians generally, the child placement activities of nontribal government agencies undercut the continued existence of tribes as self-governing communities and, in particular, subvert tribal jurisdiction in the sensitive field of domestic and family relations.

DECLARATION OF POLICY

SEC. 3. The Congress hereby declares that it is the policy of this Nation, in fulfillment of its special responsibilities and legal obligations to the American Indian people, to establish standards for the placement of Indian children in foster or adoptive homes which will reflect the unique values of Indian culture, to discourage unnecessary placement of Indian children in boarding schools for social rather than educational reasons, to assist Indian tribes in the operation of tribal family development programs, and generally to promote the stability and security of Indian family life.

DEFINITIONS

SEC. 4. For purposes of this Act—

(a) "Secretary", unless otherwise designated, means the Secretary of the Interior.

(b) "Indian" means any person who is a member of, or who is eligible for membership in, a federally recognized Indian tribe, as defined in subsection (c) hereof.

(c) "Indian tribe" means any Indian tribe, band, nation, or other organized group or community of Indians, including any Alaska Native region, village, or group as defined in the Alaska Native Claims Settlement Act (85 Stat. 688), which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

(d) "Indian organization" means any group, association partnership, corporation, or other legal entity owned and controlled by Indians, or a majority of whose members are Indians.

(e) "Tribal court" means the Court of Indian Offenses, any court operated and maintained by an Indian tribe and any other tribunal which performs judicial functions in the name of an Indian tribe within an Indian reservation.

(f) "Nontribal government agency" means any Federal, State, or local government department, bureau, agency, or other office, including any court, and any private agency licensed by a State or local government, which has jurisdiction or which performs functions and exercises responsibilities in the fields of social services, welfare, and domestic relations, including child placement.

(g) "Child placement" means any proceedings, judicial, quasijudicial, or administrative, voluntary or involuntary, and public or private, under which an Indian child is removed from the custody of his natural parent or parents or his Indian adoptive parent or parents, and is either offered for adoption or is placed in a foster home or other institution.

(h) "Natural parent" means the biological parent of a child and also any Indian who has adopted a child.

(i) "Blood relative" means any grandparent, aunt or uncle (whether by blood or marriage), brother or sister, brother or sister-in-law, niece or nephew, or stepparent, whether by blood, marriage or adoption, over the age of eighteen or otherwise emancipated, or as defined by tribal law or custom.

TITLE I—CHILD PLACEMENT STANDARDS

SEC. 101. (a) In the case of any Indian child who resides within an Indian reservation, no child placement shall be valid or given any legal force and effect, except temporary placements after emergency removal under circumstances where the physical or emotional well-being of the child is immediately threatened, unless made pursuant to an order of the tribal court, where a tribal court exists within such reservation which exercises jurisdiction over child welfare matters and domestic relations.

(b) In the case of any Indian child who is domiciled within an Indian reservation, or who resides within an Indian reservation which does not have a tribal court, no child placement shall be valid or given any legal force and effect, except temporary placements under circumstances where the physical or emotional well-being of the child is immediately threatened unless the Indian tribe occupying such reservation has been accorded thirty days' written notice of, and a right to intervene as an interested party in, the child placement proceedings. For the purposes of this Act, an Indian child shall be deemed to be domiciled where his natural parent or parents, or the blood relative in whose care he may have been left by his natural parent or parents, is domiciled.

(c) In the case of any Indian child who is not a resident or domiciliary of an Indian reservation, no child placement shall be valid or given any legal force and effect, except temporary placements under circumstances where the physical or emotional well-being of the child is immediately threatened, unless the Indian tribe of which the child is a member, or is eligible for membership, has been accorded thirty days' written notice of, and a right to intervene as an interested party in, the child placement proceedings.

(d) No Indian child shall be removed from the custody of his natural parent or parents, Indian adoptive parent or parents or blood relative in whose custody the child has been placed by the private actions of any private individual, corporation, group or institution for a period of more than thirty days without written notice served upon the tribe of which the child is a member or is eligible for membership in or upon whose reservation the child resides or is domiciled. The notice shall be in writing signed or acknowledged by the child's natural parent or parents, Indian adoptive parent or parents, or blood relative, and the child's temporary guardian, notorized or signed by two witnesses, stating the names of all the parties, their addresses, the expected length of removal, the purpose of removal and the extent to which custody over the child is transferred to the temporary guardian. This section shall not apply if the tribe has enacted or enacts its own law governing private placements. No placement shall be valid or given any legal force and effect if made in violation of this section.

(e) It shall be the duty of the party seeking a change of the custody of an Indian to notify the relevant tribal governing body by mailing written notice to the chief executive officer or such other person as the tribe may designate: *Provided further*, That the judge or hearing officer at any child placement proceeding shall make a good faith determination of whether the child involved is Indian and, is so, which tribe must be notified.

SEC. 102. (a) No placement of an Indian child, except as provided in section 101(d) of this Act, shall be valid or given any legal force and effect, except temporary placements under circumstances where the physical or emotional well-being of the child is immediately threatened, unless (1) his natural parent or parents, or the blood relative in whose care the child may have been left by his natural parent or parents, has been accorded thirty days' written notice of the child placement proceedings and a right (A) to intervene in the proceedings as an interested party through counsel or, alternatively, in a tribal court, through a lay advocate, (B) to submit evidence and present witnesses on his or her own behalf, and (C) to examine all reports or other documents and files upon which any decision with respect to child placement may be based; and (2) the nontribal government agency seeking to effect the child placement affirmatively shows that alternative remedial services and rehabilitative programs designed to prevent the break-up of the Indian family have been made available and proved unsuccessful.

(b) Where the natural parent or parents of an Indian child, who falls within any of three classes mentioned in section 101 of this Act, or the blood relative in whose care the child may have been left by his natural parent or parents, opposes the loss of custody, no child placement shall be valid or given any legal force and effect in the absence of a determination, supported by an overwhelming weight of the evidence, including testimony by qualified professional witnesses, that the continued custody of the child by his natural parent or parents, or the blood relative in whose care the child has been left, will result in serious emotional damage, or in the absence of a determination, supported by clear and convincing evidence, including testimony by a qualified physician, that the continued custody of the child by his natural parent or parents, or the blood relative in whose care the child has been left, will result in serious physical damage. In making such determinations, poverty, including inadequate or crowded housing, misconduct, and alcohol abuse on the part of either natural parent, or the blood relative, shall not be deemed prima facie evidence that serious physical or emotional damage to the child has occurred or will occur. The standard to be applied in any proceeding covered by this Act shall be

the standards of the Indian community in which the natural parent or parents, Indian adoptive parent or parents, or blood relatives reside.

(c) In the event that the natural parent or parents or Indian adoptive parent or parents of an Indian child consent to the loss of custody, whether temporary or permanent, no child placement shall be valid or given any legal force and effect, unless such consent is judge of a court having jurisdiction over child placements, and accompanied by the witnessing judge's certificate that the consent was explained in detail, was translated into the natural parent's native language, and was fully understood by him or her. If the consent is to a nonadoptive child placement, the natural parent or parents or Indian adoptive parent or parents may withdraw the consent at any time for any reason, and the consent shall be deemed for all purposes, except temporary custody, as having never been given. If the consent is to an adoptive child placement, and the child is over the age of two, the natural parent or parents or Indian adoptive parent or parents may withdraw the consent for any reason at any time before the final decree of adoption: *Provided further*, That no final decree of adoption may be entered within ninety days after the natural parent or parents, Indian adoptive parent or parents, or blood relative has given consent to the adoption. A final decree of adoption may be set aside only upon a showing that the child is again being placed for adoption, that the adoption did not comply with the requirements of this Act or was otherwise unlawful, or that the consent to the adoption was not voluntary. Consent by the natural parent or parents of an Indian child given within ninety days of the birth of the child shall be presumed to be involuntary.

(d) No placement of an Indian child, except as provided by section 101(d) of this Act, shall be valid or given any legal force and effect, except temporary placements under circumstances where the physical or emotional well-being of the child is immediately threatened, unless the child has been represented in the placement proceedings by counsel or, alternatively, in a tribal court, by a lay advocate, and unless his natural parent or parents, Indian adoptive parent or parents, or the blood relative in whose care the child may have been left by his natural parent or parents, or Indian adoptive parent or parents, has been represented by separate counsel or lay advocate.

SEC. 103. (a) In offering for adoption an Indian child, every nontribal government agency shall grant a preference to members of the child's extended Indian family, which shall be defined by tribal law or custom.

(b) In otherwise placing an Indian child, every nontribal government agency, in the absence of good cause shown to the contrary, shall grant preferences in the following order: (1) to the child's extended Indian family, (2) to a foster home, if any, licensed or otherwise designated by the Indian tribe occupying the reservation of which the child is a resident or domiciliary; (3) to a foster home, if any, licensed by the Indian tribe of which the child is a member or is eligible for membership; (4) to any other foster home within an Indian reservation which is recommended by the Indian tribe of which the child is a member or is eligible for membership; (5) to any foster home run by an Indian family; and (6) to a custodial institution for children operated by an Indian tribe, a tribal organization or nonprofit Indian organization: *Provided, however*, That each Indian tribe may modify or amend the foregoing order of preferences, and may add or delete preference categories, by resolution of its government body. Every nontribal government agency shall maintain a record evidencing its efforts to comply with the order of preferences provided under this subsection in each case of an Indian child placement.

(c) Where an Indian child is placed in a foster or adoptive home, or in an institution, outside the reservation of which the child is a resident, pursuant to an order of a tribal court, the tribal court shall retain continuing jurisdiction over such child placement until the child attains the age of eighteen.

SEC. 104. After an Indian adoptive child attains the age of eighteen, upon his or her application to the court which entered the final adoption decree, and in the absence of good cause shown to the contrary, the child shall have a right to learn the names and last known address of his natural parent or parents and siblings who also have attained the age of eighteen, their tribal affiliation and the grounds for the severance of their family relations.

SEC. 105. In any proceeding within the jurisdiction of this Act the United States, any Indian Reservation, State, Commonwealth, territory or possession thereof shall give full faith and credit to the laws of any Indian tribe involved in a proceeding under the Act and any Tribal Court orders issued in such proceeding.

TITLE II—INDIAN FAMILY DEVELOPMENT

SEC. 201. (a) The Secretary is hereby authorized under such rules and regulations as he may prescribe, to make grants to, or enter into contracts with, Indian tribes for the purpose of assisting such tribes in the establishment and operation of Indian family development programs, as described in section 202, and in the preparation and implementation of child welfare codes.

(b) The Secretary is further authorized, under such rules and regulations as he may prescribe, to carry out, or to make grants to or contracts with Indian tribes to carry out, a special home improvement program to upgrade: (1) the housing conditions of Indian foster and adoptive parents, if such housing conditions are substandard; (2) the housing conditions of Indians who seek Indian foster or adoptive children, where improved housing would enable such Indians to qualify as foster or adoptive parents under tribal law or regulations; and (3) the housing conditions of Indian families facing disintegration, where improved housing would contribute significantly to family stability.

(c) The Secretary is also authorized, under such rules and regulations as he may prescribe, to carry out, or to make grants to or contracts with Indian organizations to carry out, off-reservation Indian family development programs, as described in section 203. In the establishment, operation, and funding of off-reservation Indian family development programs, the Secretary may enter into agreements or other cooperative arrangements with the Secretary of Health, Education, and Welfare, and the latter Secretary is hereby authorized for such purposes to use funds appropriated for similar programs of the Department of Health, Education, and Welfare.

(d) There are authorized to be appropriated $21,792,000 during fiscal year 1978, $23,700,000 during fiscal year 1979, $25,120,000 during fiscal year 1980, and such sums as may be necessary during each subsequent fiscal year in order to carry out the purposes of this section.

SEC. 202. (a) Every Indian tribe is hereby authorized to establish and operate an Indian family development program, which program may include some or all of the following features:

(1) a system for licensing or otherwise regulating Indian foster and adoptive homes;

(2) the construction, operation, and maintenance of family development centers, as defined in subsection (c)(2) hereof;

(3) family assistance, including homemakers and home counselors, day care, after-school care and employment, recreational activities, and respite services;

(4) provision for counseling Indian families and Indian children;

(5) a special home improvement program, as defined in section 201(b);

(6) the employment of professional and other trained personnel to assist the tribal court in the disposition of domestic relations and child welfare matters;

(7) education and training of Indians, including tribal court judges and staff, in skills relating to child welfare and family assistance programs, and the granting of scholarships for such education and training; and

(8) a subsidy program under which Indian adoptive children are provided the same support as Indian foster children.

(b) Where an Indian tribe has implemented a licensing or other regulatory system pursuant to subsection 202(a)(1), any Indian foster or adoptive home so licensed or designated (1) may accept Indian child placements by a nontribal government agency and State funds in support of Indian children, (2) shall have a first preference in the placement of an Indian child who is a resident or domiciliary of such tribe's reservation in accordance with subsection 103(b)(1) of this Act, and (3) shall have a second preference in the placement of an Indian child who is a member of, or eligible for membership in, such tribe in accordance with subsection 103(b)(2) of this Act.

(c)(1) The objective of every Indian family development program shall be to prevent the break-up of Indian families and, in particular, to insure that the permanent removal of an Indian child from the custody of his natural parent or parents, or the custody of any blood relative in whose care he has been left by his natural parent or parents, by a tribal court or nontribal government agency shall be effected only as a last resort.

(2) In furtherance of this objective, every Indian tribe is authorized to construct, operate, and maintain a family development center which may contain, among other features:

(A) facilities for counseling Indian families which face disintegration and, where appropriate, for the treatment of individual family members;

(B) facilities for the temporary custody of Indian children whose natural parent or parents are temporarily unable or unwilling to care for them or who otherwise are left temporarily without adequate adult supervision by a blood relative; and

(C) facilities for the temporary custody of Indian parents, where so ordered by a tribal court, in lieu of incarceration for public intoxication or the commission of any other minor offense.

SEC. 203. Off-reservation Indian family development programs, operated either directly by the Secretary or through grants and contracts with local Indian organizations, may include, but shall not be limited to, the following features:

(a) a system for regulating, maintaining, and supporting Indian foster and adoptive homes, including a subsidy program under which Indian adoptive children are provided the same support as Indian foster children;

(b) the construction, operation, and maintenance of family development centers providing the facilities and services set forth in paragraphs (2) (A) and (B) of section 202(c) of this Act;

(c) family assistance, including homemakers and home counselors, day care, after-school care and employment, recreational activities, and respite services;

(d) provision for counseling and treatment both of Indian families which face disintegration and, where appropriate, of Indian foster and adoptive children;

(e) an Indian child defense program, as

defined in section 204(b), and other representation of Indian children before the courts; and

(f) furnishing guidance, representation, and advice to Indian families involved in child placement proceedings before nontribal government agencies.

SEC. 204. (a) The Secretary is hereby authorized and directed, under such rules and regulations as he may prescribe, to undertake a study of the circumstances surrounding all child placements which have occurred during the sixteen years preceding the effective date of this Act, where the Indian child so placed still is under the age of eighteen on such date. If the Secretary has good cause to believe, on the basis of this study, that a child placement was or may be invalid or otherwise legally defective, and if either natural parent, Indian adoptive parent or the blood relative previously having custody of the Indian child so requests, the Secretary is authorized, in his discretion, to institute a habeas corpus action or other appropriate legal proceeding in the name of the United States on behalf of such parent, Indian adoptive parent or blood relative in the United States district court for the district in which the child resides for the purpose of challenging the child placement and, if it is found invalid or legally defective, of restoring custody of the Indian child to its natural parent or parents, Indian adoptive parent or parents, or to the blood relative in whose care the child had been left.

(b) The Secretary is further authorized and directed, under such rules and regulations as he may prescribe, to operate, or to make grants or contracts with Indian tribes or Indian organizations to operate, an Indian family defense program which shall provide representation by an attorney or, alternatively, in a tribal court, by a lay advocate for any Indian child who is the subject of a child placement proceeding, or, if appropriate, for his natural parent or parents, or the blood relative in whose care the child may have been left by his natural parent or parents.

(c) The Secretary also is authorized and directed, under such rules and regulations as he may prescribe, to collect and maintain records in a single, central location of all Indian child placements which either are effected after the date of this Act or are the subject of the study required under subsection (a) hereof, which records shall show as to each such placement the name and tribal affiliation of the child, the names and addresses of his natural parents and the blood relative, if any, in whose care he may have been left by a natural parent, the names and addresses of his siblings, and the names and locations of any tribal court or nontribal government agency which possesses files or information concerning his placement. Such records shall not be open for inspection or copying pursuant to the Freedom of Information Act (80 Stat. 381), as amended, but information concerning a particular child placement shall be made available in whole or in part, as necessary: (1) to an Indian adoptive child over the age of eighteen for the purpose of identifying the court which entered his final adoption decree and furnishing such court with the information specified in section 104; (2) to the adoptive parent of an Indian child or to an Indian tribe for the purpose of assisting in the enrollment of an Indian adoptive child in the tribe of which he is eligible for membership; and (3) to the adoptive parent of an Indian child for the purpose of establishing or continuing his tribal affiliation or a relationship with his siblings. The records collected by the Secretary pursuant to this section shall be privileged and confidential and shall be used only for the specific purposes set forth in this Act.

(d) There are authorized to be appropriated $18,000,000 during fiscal year 1979, $20,000,000 during fiscal year 1980, $22,000,000 during fiscal year 1981, and such sums as may be necessary during each subsequent fiscal year in order to carry out the purposes of this section, including the payment of attorney fees.

SEC. 205. (a) The Secretary is authorized to perform any and all acts and to make such rules and regulations as may be necessary and proper for the purposes of carrying out the provisions of this Act.

(b)(1) Within six months from the date of enactment of this Act, the Secretary shall consult with Indian tribes, Indian organizations and Indian-interest agencies in the consideration and formulation of rules and regulations to implement the provisions of this Act.

(2) Within seven months from the date of enactment of this Act, the Secretary shall present the proposed rules and regulations to the Select Committee on Indian Affairs of the United States Senate and the Committee on Interior and Insular Affairs of the United States House of Representatives, respectively.

(3) Within eight months from the date of enactment of this Act, the Secretary shall publish proposed rules and regulations in the Federal Register for the purpose of receiving comments from interested parties.

(4) Within ten months from the date of enactment of this Act, the Secretary shall promulgate rules and regulations to implement the provisions of this Act.

(c) The Secretary is authorized to revise and amend any rules or regulations promulgated pursuant to this section: *Provided*, That prior to any revision or amendment to such rules or regulations, the Secretary shall present the proposed revision or amendment to the Select Committee on Indian Affairs of the United States Senate and the Committee on Interior and Insular Affairs of the United States House of Representatives, respectively, and shall, to the extent practicable, consult with the tribes, organizations, and agencies specified in subsection (b)(1) of this section, and shall publish any proposed revisions in the Federal Register not less than sixty days prior to the effective date of such rules and regulations in order to provide adequate notice to, and receive comments from, other interested parties.

SUMMARY OF PROPOSED INDIAN CHILD WELFARE ACT OF 1977

INTRODUCTORY SECTIONS

Section 1 sets forth the title of the Act.

Section 2 contains a number of findings, based upon Congressional hearings, that an alarmingly high percentage of Indian children are separated from their natural parents and placed in foster and adoptive homes, that such family break-ups frequently occur as a result of conditions which are temporary or remediable or under circumstances where the Indians involved do not receive a full and fair hearing, and that the placement of Indian children in institutions or homes which do not meet their special needs is socially undesirable.

Section 3 would declare the policy of Congress to assist Indian tribes in the operation of family development programs, to establish standards for the placement of Indian children and, generally, to promote the stability and security of Indian family life.

Section 4 sets forth a series of definitions for terms used in the Act, including definitions for "Indian", "Indian tribe", "nontribal government agency", "child placement" and "natural parent".

TITLE I. CHILD PLACEMENT STANDARDS

Section 101 would give effect to the underlying premise of the Act that Indian tribes, as local governmental institutions, have a vital role to play in any decision about whether an Indian child should be separated from his family. Specifically, subsection (a) provides that, in the case of any Indian child who resides within an Indian reservation, no child placement shall be valid "unless made pursuant to an order of the tribal court, where a tribal court exists within such reservation which exercises jurisdiction over child welfare matters and domestic relations." With respect to all other placements of Indian children, subsections (b) and (c) provide that the appropriate Indian tribe shall be given thirty (30) days notice of, and a right to intervene in, the placement proceedings. An exception from these requirements is allowed for temporary placements where the physical or emotional well-being of the child is immediately threatened.

Section 102 is intended to assure that Indian families will be accorded a full and fair hearing when child placement is an issue. Thus, subsection (a) provides that the natural parents, or the blood relative in whose custody a child may have been left by his natural parents, shall have actual notice of any child placement proceeding and a meaningful opportunity to participate therein, and that no child placement shall be valid unless the moving agency "affirmatively shows that alternative remedial services and rehabilitative programs designed to prevent the breakup of the Indian family have been made available and proved unsuccessful." Subsection (b) provides that an Indian child placement shall not be effected over family opposition in the absence of overwhelming evidence, including expert testimony, that continuation of the status quo will result in serious physical or emotional damage to the child. Finally, subsection (c) provides that any consent by a natural parent to loss of a child's custody shall be both informed and voluntary, and, except in certain cases after a final adoption decree, also may be later withdrawn.

Section 103 establishes priorities in the placement of Indian children, with a first preference given to members of the child's extended Indian family, and other preferences to homes licensed by Indian tribes or maintained by Indians and institutions operated by Indian tribes and organizations. When a child placement is accomplished through an order of a tribal court, the court will retain continuing jurisdiction over the placement until the child reaches 18.

Section 104 provides that, in the absence of good cause to the contrary, an Indian adoptive child upon reaching the age of 18 shall be entitled to learn particulars about his adult natural family.

TITLE II. INDIAN FAMILY DEVELOPMENT

Subsection 201(a) would authorize the Secretary of the Interior to make grants to, or enter into contracts with, Indian tribes for the purpose of assisting such tribes in the establishment and operation of Indian family development programs. Pursuant to subsection (b), such programs would include a special home improvement program where better housing would contribute significantly to family stability or the improved facility would be used as a foster or adoptive home. Subsection 201(c) would also authorize the Secretary of the Interior to carry out or to make grants to, or enter into contracts with, Indian organizations to carry out, off-reservation Indian family development programs, and would permit the Secretary of Health, Education and Welfare to assist in the financing of such programs.

Section 202 describes some of the major features which may be incorporated by an Indian tribe into its Indian family development program, including under subsection (c) the construction, operation and maintenance of family development centers. Where an Indian tribe has implemented a licensing or other regulatory system, any Indian foster

or adoptive home so licensed or designated may accept Indian child placements by a non-tribal government agency and State funds in support of Indian children, and shall have a preference in child placements in accordance with subsection 103(b) of the Act.

Section 203 describes some of the major features which may be included in off-reservation Indian family development programs.

Section 204 directs the Secretary of the Interior to undertake a study of past child placements and, if he has good cause to believe on the basis of this investigation that the placement may be invalid or legally defective, and if the child's family so requests, to institute appropriate legal proceedings challenging the placement. The Secretary is further directed to operate, or to make grants or contracts with Indian tribes or Indian organizations to operate, an Indian family defense program which shall provide representation by an attorney for every Indian child, or its parents, who is the subject of a child placement proceeding.

Section 205 establishes procedures for promulgating rules and regulations necessary to carry out the Act.

By Mr. KENNEDY:

S. 1217. A bill to regulate activities involving recombinant deoxyribonucleic acid; to the Committee on Human Resources.

Mr. KENNEDY. Mr. President, today I am pleased to introduce the administration's legislation regarding the urgent necessity to regulate and control recombinant DNA research. This legislation grows out of the recommendation of a broadly based interagency committee, which was chaired by the Director of the National Institutes of Health, Donald Frederickson. The need for such legislation is aslo recognized by the scientific community both here and abroad.

Mr. President, as chairman of the Senate Subcommittee on Health and Scientific Research, I have scheduled hearings on this and related legislation next Wednesday, April 6, 1977. These hearings are specifically designed to elucidate the relevant issues regarding this kind of genetic research so that it will be possible to promptly report a comprehensive bill from the committee to the Senate.

Recombinant DNA research has captured the attention and raised the anxiety of the Nation more than any other area of biomedical research in history. The potential to purposefully transform the nature of living organisms, for good or ill, is both an exhilarating and frightening prospect. The concern is not over current benefits or current risks—but over uncertain future benefits and uncertain future risks.

The questions of potential benefits and hazards of this research extend beyond the walls of the laboratory and the realm of freedom of scientific inquiry. These questions involve every citizen, scientist and layman alike. The assessment of risk and the judgment of how to balance risk against benefit of recombinant DNA research are responsibilities that clearly rest in the public domain. And it follows that these issues must be decided through public processes. The vigorous discussion and debate amongst both the scientific community and the general public over this issue is very beneficial to the policy-making process. However, as the dialog unfolds throughout the Nation, I believe that there is a growing concensus throughout the country that regulatory legislation is necessary.

The legislation that I am introducing today presents the administration's views on regulating recombinant DNA research. I believe that the approach taken by the administration leaves several unresolved issues. First, I think that there is need for an alternative definition of recombinant DNA research to that given in the administration's proposal. I suggest that we define recombinant DNA research as any research, study, investigation, experiment, or act in which molecules or segments of molecules of deoxyribonucleic acid—DNA—that are not known to be otherwise capable of being propagated in a particular species of living cell are rendered capable of propagation in that species by joining them by any method outside of living cells to another DNA molecule or segment of DNA molecules. I would like the witnesses at the hearing to comment on this definition.

Second, I strongly feel that the public has a right to participate in the decisions concerning this area of research. I would like the witnesses at the hearing to consider whether a commission within the Department of Health, Education and Welfare, should be established and be composed of a majority of individuals who are not involved in biomedical research.

Third, I have concern about the scope and nature of the standards to be promugated under the administration's bill. Why should the thrust of the standards be limited to the production or possession of recombinant DNA? Why not include recombinant DNA research and include standards for the responsibilities and qualifications of those who both own research facilities and those who actually do the research.

In this regard, I take exception with the apparent limitation under the administration's approach. Should not the failure to comply with the standards be a ground for revoking a license. Is it not the main purpose of licensure to assure that the standards are met?

I believe that there must be a legislative standard under which the decision to grant a license is made. Therefore, I would like those who will be before my subcommittee next week to consider if a license should only be granted when the Government is satisfied that the research to be authorized by a license will be conducted in a manner as to assure the health and welfare of the persons to engage in the research, the environment, and the population of the surrounding community.

Finally, I would like to raise the following questions for consideration at the hearing:

First. Should there not be a comprehensive, thoughtful study which will consider and evaluate the ethical, societal, and legal implications of recombinant DNA research. I think that a group such as a subcommittee of the National Commission for the Protection of Human Subjects could be formed with the charge to study these long-range implications and make periodic reports to the Nation.

Second. Does the public not have a right to know who is conducting this type of research, where it is being conducted, and under what conditions?

Third. How much funding will this entire effort require and how many positions?

Fourth. Should there be a limit on how many facilities are to exist at the highest level of physical containment?

Fifth. Why should this research be exempt from environmental impact requirements?

Sixth. What information should be required to be submitted to the Government and what information should be disclosed to the public?

These are some of the concerns I have and I encourage the witnesses at the hearing next Tuesday to comment on the administration's proposal, the issues I have raised and to express their own concerns.

I ask unanimous consent that the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1217

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Recombinant DNA Regulation Act".

FINDINGS

SEC. 2. The Congress finds that—

(1) work with recombinant DNA will improve the understanding of basic biological processes and offers many potential benefits,

(2) there exists, however, a possible risk that microorganisms containing recombinant DNA may cause disease or alter the environment,

(3) microorganisms containing recombinant DNA could spread throughout the United States and to other countries, adversely affecting human health, the environment, industry, and agriculture.

(4) the only effective way to minimize the risk to health, the environment, industry, and agriculture is by regulating activities involving recombinant DNA, whether or not those activities are in interstate commerce, and therefore,

(5) all activities involving recombinant DNA either affect or are in interstate commerce.

GENERAL REQUIREMENTS

SEC. 3. (a) Except as provided in subsection (b), no person may possess or engage in the production of recombinant DNA unless—

(1) the production or possession complies with the standards promulgated under section 4,

(2) the production or possession occurs in a facility licensed under section 5, or the possession occurs while transporting recombinant DNA from one such facility to another and

(3) the production or possession occurs as part of a project that has been registered under section 6.

(b) The Secretary may exempt from some or all of the requirements of subsection (a) any category of activities he finds poses no significant risk to health or the environment (1) because of the nature of those activi-

ties, or (2) because the category is adequately regulated under other Federal law.

STANDARDS

SEC. 4. (a) For purposes of protecting the health and safety of individuals who work with recombinant DNA, the health and safety of the public at large, and the integrity of the environment, the Secretary—

(1) shall, no later than 90 days after the enactment of this Act, promulgate (without regard to section 102(2)(C) of the National Environmental Policy Act of 1969 or 5 U.S.C. 553) as interim standards applying to the production or possession of recombinant DNA the Recombinant DNA Research Guidelines (41 Fed. Reg. 27901 (1976)), with such modifications as he finds are needed,

(2) shall, no later than 180 days after the promulgation of interim standards under clause (1), initiate procedures to promulgate final standards applying to the production or possession of recombinant DNA,

(3) shall, no later than one year after the promulgation of interim standards under clause (1), promulgate final standards applying to the production or possession of recombinant DNA, and

(4) may, from time to time, promulgate (A) new standards applying to the production or possession of recombinant DNA, and (B) amendments to standards promulgated under this section.

(b)(1) Any person adversely affected by an action of the Secretary under this section may obtain review of the action in the United States Court of Appeals for the District of Columbia. The petition for review must be filed within sixty days of the action. Review shall conform to chapter 7 of title 5 of the United States Code.

(2) An action with respect to which review could have been obtained under paragraph (1) shall not be subject to judicial review in any other proceeding.

LICENSING OF FACILITIES

SEC. 5. (a) The Secretary may issue or renew a license for a facility to permit the production or possession (or certain categories of production or possession) of recombinant DNA at that facility only if (1) the facility submits an application therefor containing or accompanied by such information concerning recombinant DNA activities at that facility as the Secretary may prescribe, (2) the facility agrees and the Secretary determines that such production or possession (including the transportation of recombinant DNA to or from that facility) will comply with the standards promulgated under section 4 and such ancillary conditions as he may prescribe, and (3) the facility agrees and the Secretary determines that such production or possession will occur only as part of a project registered under section 6.

(b) The Secretary may require payment of a fee from a facility for the issuance or renewal of a license under this section to cover all or part of the costs of administering this Act in respect to that facility.

(c) A license issued or renewed by the Secretary under this section is valid for the period prescribed by the Secretary, not to exceed three years.

(d) The Secretary may permit an appropriate State or local agency or a licensing or accrediting body to issue and renew licenses for facilities to permit the production or possession (or certain categories of production or possession) of recombinant DNA at those facilities if and for so long as the Secretary determines that the agency or body—

(1) requires a facility to comply with the standards promulgated under section 4 and such ancillary conditions as the Secretary may prescribe,

(2) requires a facility to permit the production or possession of recombinant DNA only as part of a project registered under section 6, and

(3) has the capacity to and does make provision for assuring that the requirements of clauses (1) and (2) continue to be met.

(e) The Secretary may revoke, suspend, or limit a license issued under this section if he finds, after notice and opportunity for a hearing to the facility, that the facility—

(1) has misrepresented any material fact in obtaining the license,

(2) has engaged or attempted to engage or represented itself as entitled to perform any activities involving recombinant DNA not authorized by its license,

(3) has failed to comply with any of the terms or conditions of the license,

(4) has failed to comply with a request of the Secretary for any information or materials the Secretary finds necessary to determine the facility's continued eligibility for its license or to evaluate the possible effects on health or the environment of activities involving recombinant DNA,

(5) has failed to comply with a request of the Secretary to inspect any portion of the facility, its operations, or its records, which are related to activities involving recombinant DNA, or

(6) has violated or aided and abetted in the violation of any requirement established under this Act.

REGISTRATION

SEC. 6. The Secretary shall register any project involving recombinant DNA if the request for registration is accompanied by such information as the Secretary may prescribe concerning recombinant DNA activities which are part of that project.

INSPECTIONS

SEC. 7. An individual designated as an inspector by the Secretary, upon presenting appropriate credentials to the owner, operator, or agent (if any of these be present) in charge of a facility at which the inspector has reasonable grounds to believe that recombinant DNA is present or is being produced may enter that facility at reasonable times, and inspect, at reasonable times and in a reasonable manner, the facility and all things at (or being transported to or from) that facility which he has reasonable grounds to believe are involved with recombinant DNA and obtain appropriate samples of such things. When an inspector has completed such an inspection he shall, before he leaves the facility, inform the owner, operator, or agent in charge of the facility of any conditions or practices which in the inspector's judgment constitute a violation of any of the requirements of this Act. The inspector shall also prepare a written report of his findings and send it to the owner, operator, or agent in charge of the facility within a reasonable time.

RECORDS AND SAMPLES

SEC. 8. Each facility at which recombinant DNA is produced or located shall keep and make available to the Secretary such records (including medical records of personnel) and samples involving recombinant DNA at (or being transported to or from) that facility as the Secretary may prescribe.

REPORTS

SEC. 9. Each facility at which recombinant DNA is produced or located shall submit to the Secretary such reports concerning recombinant DNA at (or being transported to or from) that facility as the Secretary may prescribe.

EFFECT ON STATE AND LOCAL REQUIREMENTS

SEC. 10. (a) Except as provided in subsection (b), no State or political subdivision of a State may establish or continue in effect with respect to recombinant DNA activities any requirement which is different from, or in addition to, any requirement applicable under this Act to such activities.

(b) Upon application of a State or political subdivision of a State, the Secretary shall exempt from subsection (a) a requirement of that State or political subdivision applicable to recombinant DNA activities if he determines that the requirement is, and will be administered so as to be, as stringent as, or more stringent than, a requirement under this Act. The Secretary may not withdraw any such exemption for so long as he finds that such requirement remains unchanged and continues to be so administered.

EMPLOYEE PROTECTION

SEC. 11. (a) No employer may discharge any employee or otherwise discriminate against any employee with respect to the employee's compensation, terms, conditions, or privileges of employment because the employee (or any person acting pursuant to a request of the employee) has—

(1) commenced, caused to be commenced, or is about to commence or cause to be commenced a proceeding under this Act,

(2) testified or is about to testify in any such proceeding, or

(3) assisted or participated or is about to assist or participate in any manner in such a proceeding or in any other action to carry out the purposes of this Act.

(b)(1) Any employee who believes that the employee has been discharged or otherwise discriminated against by any person in violation of subsection (a) of this section may, within 30 days after such alleged violation occurs, file (or have any person file on the employee's behalf) a complaint with the Secretary of Labor (hereinafter in this section referred to as the "Secretary") alleging such discharge or discrimination. Upon receipt of such a complaint, the Secretary shall notify the person named in the complaint of the filing of the complaint.

(2)(A) Upon receipt of a complaint filed under paragraph (1), the Secretary shall conduct an investigation of the violation alleged in the complaint. Within 30 days of the receipt of such complaint, the Secretary shall complete such investigation and shall notify in writing the complainant (and any person acting on behalf of the complainant) and the person alleged to have committed such violation of the results of the investigation conducted pursuant to this paragraph. Within ninety days of the receipt of such complaint the Secretary shall, unless the proceeding on the complaint is terminated by the Secretary on the basis of a settlement entered into by the Secretary and the person alleged to have committed such violation, issue an order either providing the relief prescribed by subparagraph (B) or denying the complaint. An order of the Secretary shall be made on the record after notice and opportunity for agency hearing. The Secretary may not enter into a settlement terminating a proceeding on a complaint without the participation and consent of the complainant.

(B) If in response to a complaint filed under paragraph (1) the Secretary determines that a violation of subsection (a) of this section has occurred, the Secretary shall order (i) the person who committed such violation to take affirmative action to abate the violation, (ii) such person to reinstate the complainant to the complainant's former position together with the compensation (including back pay), terms, conditions, and privileges of the complainant's employment, (iii) compensatory damages, and (iv) where appropriate, exemplary damages. If such an

order is issued, the Secretary, at the request of the complainant, shall assess against the person against whom the order is issued a sum equal to the aggregate amount of all costs and expenses (including attorney's fees) reasonably incurred, as determined by the Secretary, by the complainant for, or in connection with, the bringing of the complaint upon which the order was issued.

(c)(1) Any employee or employer adversely affected or aggrieved by an order issued under subsection (b) may obtain review of the order in the United States Court of Appeals for the circuit in which the violation, with respect to which the order was issued, allegedly occurred. The petition for review must be filed within sixty days from the issuance of the Secretary's order. Review shall conform to chapter 7 of title 5 of the United States Code.

(2) An order of the Secretary, with respect to which review could have been obtained under paragraph (1), shall not be subject to judicial review in any criminal or other civil proceeding.

(a) Whenever a person has failed to comply with an order issued under subsection (b)(2), the Secretary shall file a civil action in the United States district court for the district in which the violation was found to occur to enforce such order. In actions brought under this subsection, the district courts shall have jurisdiction to grant all appropriate relief, including injunctive relief and compensatory and exemplary damages. Civil actions brought under this subsection shall be heard and decided expeditiously.

(e) Subsection (a) of this section shall not apply with respect to any employee who, acting without direction from the employee's employer (or any agent of the employer), deliberately causes a violation of any requirement of this Act.

CONSULTATION

SEC. 12. In administering this Act, the Secretary shall consult with the Secretaries of Agriculture, Commerce, Defense, Labor, and Transportation, the Administrators of the Environmental Protection Agency and Veterans' Affairs, the Director of the National Science Foundation, other appropriate officials, and such interagency committees and other advisory bodies as the Secretary may establish, concerning the promulgation of standards and of amendments to standards, the avoidance of duplicative requirements, and such other matters which may be of mutual interest.

ENFORCEMENT

SEC. 13. (a) Upon petition by the Secretary, the district courts of the United States may restrain violations of this Act.

(b)(1) Any person who violates a provision of this Act (other than in section 11) may be assessed a civil penalty by the Secretary of not more than $5,000 for each violation.

(2) No civil penalty shall be assessed unless the person charged shall have been given notice and opportunity for a hearing on such charge. In determining the amount of the penalty the Secretary shall consider the appropriateness of such penalty to the gravity of the violation.

(3) In case of inability to collect such civil penalty or failure of any person to pay all, or such portion of such civil penalty as the Secretary may determine, the Secretary shall refer the matter to the Attorney General, who shall recover such amount by action in the district court of the United States for the district in which that person resides or has his principal place of business.

(c) Any person who knowingly or willfully violates any provision of this Act (other than in section 11) shall be subject, upon conviction, to a fine of not more than $5,000, or to imprisonment for not more than one year (and not more than ten years for a related series of violations), or both.

(d) Each day a violation of this Act continues shall constitute a separate violation for purposes of this section.

EMERGENCY PROCEDURE FOR HAZARDOUS RECOMBINANT DNA

SEC. 14. The Secretary may commence a civil action, by process of libel or otherwise, in an appropriate district court of the United States for the seizure or destruction of hazardous recombinant DNA or for other appropriate relief to prevent its production, movement, or spread.

ADMINISTRATIVE RESTRAINT OR SEIZURE

SEC. 15. If during an inspection under section 7 an inspector finds material he has reasonable grounds to believe is hazardous recombinant DNA, he may order the material not to be moved or may seize the material. Within twenty days after such action by an inspector the Secretary must commence a civil action under section 14 with respect to the inspector's action, unless the owner of the material has agreed otherwise.

TRAINING

SEC. 16. The Secretary may conduct and support training in the safe handling of recombinant DNA.

REPRESENTATION BY ATTORNEY GENERAL

SEC. 17. The Attorney General shall appear and represent the Secretary or the Secretary of Labor at any civil or criminal action initiated under this Act.

DEFINITIONS

SEC. 18. For purposes of this Act—

(1) "Secretary" (except as used in section 11) means the Secretary of Health, Education, and Welfare,

(2) "DNA" means deoxyribonucleic acid,

(3) "recombinant DNA" means DNA that consists of different segments of DNA which have been joined together in a cell-free system and that has the capacity to infect and replicate in some host cell either autonomously or as an integrated part of the host's genome,

(4) "hazardous recombinant DNA" means recombinant DNA which either—

(A) poses a significant risk to health or the environment, or

(B)(i)(I) is neither located at a facility licensed under section 5 nor being transported from one such facility to another, or

(II) is likely to be moved or to spread from such a facility or transportation to a location not at such a facility or part of such transportation, and

(ii) is not known not to pose a significant risk to health or the environment,

(5) "person" means any individual, partnership, corporation, association, or any Federal, State, or local governmental entity,

(6) "district court of the United States" includes the District Court of Guam, the District Court of the Virgin Islands, the highest court of American Samoa, and a similar or equivalent court in any other United States territory or possession or in the Trust Territory of the Pacific Islands, and

(7) in relation to transportation to or from a facility, a suitable facility in a foreign country shall be treated as a facility licensed under section 5.

GEOGRAPHIC APPLICABILITY OF ACT

SEC. 19. This Act applies to the United States, its territories and possessions, and the Trust Territory of the Pacific Islands.

RELATIONSHIP TO OTHER FEDERAL LAWS

SEC. 20. (a) This Act shall not affect the authority of any Federal agency to regulate under any other Act activities involving recombinant DNA.

(b) In exercising any authority under this Act, the Secretary, or any person acting on his behalf or pursuant to the provisions of this Act, shall not, for purposes of section 4(b)(1) of the Occupational Safety and Health Act of 1970, be deemed to be exercising statutory authority to prescribe or enforce standards or regulations affecting occupational safety and health.

(c)(1) Upon request by the Secretary, each Federal agency is authorized—

(A) to make its services, personnel, and facilities available (with or without reimbursement) to the Secretary to assist the Secretary in the administration of this Act, and

(B) to furnish to the Secretary such information, data, estimates, and statistics, and to allow the Secretary access to all information in its possession, as the Secretary may reasonably determine to be necessary for the administration of this Act.

(2) Upon request by any Federal agency, the Secretary is authorized—

(A) to make the services, personnel, and facilities of the Department of Health, Education, and Welfare available (with or without reimbursement) to that agency to assist the agency in the administration of any Act with respect to activities involving recombinant DNA, and

(B) to furnish to that agency such information, data, estimates, and statistics, and to allow that agency access to all information in the Secretary's possession, as the agency may reasonably determine to be necessary for the administration of any Act with respect to activities involving recombinant DNA.

SEPARABILITY

SEC. 21. If any provision of this Act is held invalid by reason of being inconsistent with the Constitution, all provisions of this Act which are separable from that invalid provision shall remain in effect.

EFFECTIVE DATE AND EXPIRATION DATE OF ACT

SEC. 22. (a)(1) This Act is effective upon enactment, except that sections 3(a), 10(a), and 18(4)(B) are effective 180 days after enactment.

(2) Upon promulgation of standards under section 4, no person may possess or engage in the production of recombinant DNA unless the production or possession complies with those standards.

(b) This Act shall expire five years after its enactment except with respect to records made within that period.

By Mr. BAYH:

S. 1218. A bill to amend the Juvenile and Delinquency Prevention Act of 1974, and for other purposes; to the Committee on the Judiciary.

CARTER ADMINISTRATION URGES EXTENSION OF 1974 JUVENILE JUSTICE AND DELINQUENCY PREVENTION ACT

Mr. BAYH. Mr. President, today I am pleased to introduce by request, President Carter's proposal to extend the Juvenile Justice and Delinquency Prevention Act of 1974 through fiscal year 1980. Like my own bill, S. 1021, introduced last month, the President's bill, which incidentally has been thoughtfully shepherded by Attorney General Bell, would provide the stability and revitalization so essential to the implementation of the 1974 Act which passed this body by a vote of 88 to 1 and the House of Representatives by a vote of 329–20.

I am proud that this bipartisan congressional initiative was strongly endorsed in my party's national platform in the following unequivocable manner:

A Democratic Congress in 1974 passed the Juvenile Justice and Delinquency Prevention Act to come to grips with the fact that

serious crimes in the United States, and to remedy the fact that federal programs thus far have not met the crisis of juvenile delinquency. We pledge funding and implementation of this Act, which has been ignored by the Republican Administration.

Never have we had a more opportune setting to fulfill these commitments.

I was especially heartened and gratified by President Carter's February 22, 1977, message to the Congress on the revisions to the fiscal year 1978 budget. The President noted that there were important goals that the revision did not reflect and then, relative to the changes made to date, Jimmy Carter said:

The 1978 budget is essentially still President Ford's budget, with only such limited revisions as my administration has had time to make. But these revisions do reflect our careful choices among many possible options; they are important first steps toward a Federal Government that is more effective and responsive to our people's needs.

Among those "careful choices" and "important first steps—more responsive to our people's needs" is the first clear Presidential endorsement of the Juvenile Justice and Delinquency Prevention Act of 1974.

Mr. President, the Carter administration has requested "additional funds for juvenile justice and delinquency prevention programs that have a high potential for reducing crime and delinquency" specifically the requested amount for fiscal year 1978 restores the 1977 level of $75 million.

Although I am very pleased by this particular change in White House policy I was not surprised. When candidate Jimmy Carter was asked last October by the American Bar Association whether he favored an increased share of LEAA and other Federal funds for juvenile justice and delinquency prevention he responded in the affirmative and added:

Both the commentators and the statistical evidence now point to the fact that court reform, corrections, and juvenile justice are the critical elements in improving crime control.

For one who has struggled to establish such Federal priorities these words and the budget revisions reflecting a commitment to them are indeed sweet music.

Similarly, Attorney General Griffin Bell made a strong commitment to such priorities and to the full implementation of the Juvenile Justice and Delinquency Prevention Act during the Senate Judiciary Committee's confirmation hearings. In response to my inquiries as to whether, if confirmed as Attorney General, he would provide juvenile justice and juvenile crime prevention the priority it deserves and that the 1974 law and the 1976 amendment require, Judge Griffin Bell said that he would and then continued by noting:

If we are going to do anything about crime in America, we have to start with the juvenile.

He also added the following observation:

I have never known that our country on a national level had a criminal justice policy. I plan to establish one. If you do have a criminal justice policy, the most important part of it would be juvenile justice—how to prevent juvenile crime—I have a deep interest in that.

The measure that I introduce today will extend and strengthen the Office of Juvenile Justice. It will strengthen and revitalize the program designed to accomplish the very priority on juvenile justice and juvenile crime prevention underscored by President Jimmy Carter and Attorney General Griffin Bell.

Mr. President, I ask unanimous consent that the bill and accompanying materials be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1218

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Juvenile Justice and Delinquency Prevention Amendments of 1977.".

SEC. 2. Title II, Part A of the Juvenile Justice and Delinquency Prevention Act of 1974 is amended as follows:

(1) Section 201(g) is amended by deleting the word "first" and inserting the word "second" in lieu thereof.

(2) Section 204(b)(5) is amended by inserting in the first sentence after the words "Advisory Committee" the words "and the Coordinating Council".

(3) Section 204(b)(6) is amended by inserting after the words "Advisory Committee" the words "and the Coordinating Council".

(4) Section 204(f) is amended by inserting after the words "appropriate authority," and before the words "departments and agencies" the word "Federal".

(5) Section 204(g) is amended by deleting the word "part" and inserting the word "title" in lieu thereof.

(6) Section 204(j) is amended by inserting after the word "agency," the word "organization,", and by deleting the word "part" and inserting the word "title" in lieu thereof.

(7) Section 204(k) is amended by deleting the word "part" and inserting the word "title" in lieu thereof, and by deleting the words "the Juvenile Delinquency Prevention Act (42 U.S.C. 3801 et seq.)" and inserting the words "Title III of this Act" in lieu thereof.

(8) Section 206(d) is amended by deleting the word "six" and inserting the word "four" in lieu thereof.

(9) Section 208(e) is amended by deleting the words "to the Administrator" and "the Administration of".

PART B—FEDERAL ASSISTANCE FOR STATE AND LOCAL PROGRAMS

SEC. 3. Title II, Part B of such Act is amended as follows:

(1) Section 221 is amended by deleting the words "and local governments".

(2) Section 221 is further amended by inserting after the word "through" the words "grants and".

(3) The third sentence of Section 222(c) is amended by deleting the words "local governments" and inserting the words "units of general local government or combinations thereof" in lieu thereof.

(4) Section 222(d) is amended by deleting the words "or kind" in the second sentence and by inserting after the words "by section 261" the words "except that assistance extended to private nonprofit organizations may be up to 100 per centum of the approved costs of any assisted program or activity". Immediately after section 222(d) insert the following new paragraph:

"(e) The requirement of cash match in subsection (d) may be waived by the Administrator, in whole or in part, if the State planning agency makes a formal determination that a demonstrated and determined good faith effort has been made to obtain cash match and cash match is not available."

(5) Section 223(a)(4) is amended by deleting the words "local governments" the first time they occur and inserting the words "units of general local government or combinations thereof" in lieu thereof.

(6) Section 223(a)(5) is amended by inserting after the words "local government" the words "or combinations thereof".

(7) Section 223(a)(6) is amended by deleting the words "local government" and inserting the words "unit of general local government" in lieu thereof.

(8) Section 223(a)(6) is further amended by inserting after the words "local government's structure" and before the words "(hereinafter in this part" the words "or to a regional planning agency".

(9) Section 223(a)(8) is amended by inserting after the word "programs" in the second sentence a period followed by the words "Programs and projects developed from the study may be funded under section 223(a)(10) provided that they meet the criteria for advanced technique programs as specified therein".

(10) The first sentence of section 223(a)(10) is amended by deleting the words "or by the local government".

(11) The first sentence of section 223(a)(10) is further amended by inserting after the words "or through" the words "grants and".

(12) Section 223(a)(10) is further amended by deleting all of subparagraph (D) and redesignating subparagraphs (E), (F), (G), and (H) as subparagraphs (D), (E), (F), and (G), respectively.

(13) Section 223(a)(12) is amended by deleting the word "must" and inserting the word "may" in lieu thereof.

(14) Section 223(c) is amended by inserting the following sentence at the end thereof: "Failure to achieve compliance with the section 223(a)(12) requirement within the two-year time limitation shall terminate any State's eligibility for funding under this subpart unless the Administrator determines that the State is in substantial compliance with the requirement and has made, through appropriate executive or legislative action, an unequivocal commitment to achieving full compliance within a reasonable time.".

(15) Section 224(a)(5) is amended by deleting the word "and" the last time it occurs.

(16) Section 224(a)(6) is amended by placing a comma after the words "develop and implement" and inserting thereafter the words "in coordination with the United States Office of Education, Department of Health, Education, and Welfare,".

(17) Section 224(a)(6) is further amended by deleting the period at the end thereof and inserting in lieu thereof a semicolon followed by the word "and".

(18) Immediately after paragraph (6) of Section 224(a) insert the following new paragraph:

"(7) develop and support programs stressing advocacy activities aimed at improving services to youth impacted by the juvenile justice system.".

(19) Section 227(a) is amended by deleting the words "State, public or private agency, institution, or individual (whether directly or through a State or local agency)" and inserting the words "public or private agency, organization, institution, or individual (whether directly or through a State planning agency)" in lieu thereof.

(20) Section 227(b) is amended by deleting the words "institution, or individual un-

der this part (whether directly or through a State agency or local agency)" and inserting the words "organization, institution, or individual under this title (whether directly or through a State planning agency)" in lieu thereof.

(21) Section 228(b) is amended by deleting the words "under this part" and inserting the words "by the Law Enforcement Assistance Administration" in lieu thereof.

(22) Section 228(b) is further amended by deleting the words "25 per centum of".

(23) Section 228(c) is amended by deleting the word "part" and inserting the word "title" in lieu thereof.

(24) Immediately after Section 228(d) insert the following new paragraphs:

"(e) In the case of a grant under this part to an Indian tribe or other aboriginal group, if the Administrator determines that the tribe or group does not have sufficient funds available to meet the local share of the cost of any program or project to be funded under the grant, the Administrator may increase the Federal share of the cost thereof to the extent he deems necessary. Where a State does not have an adequate forum to enforce grant provisions imposing liability on Indian tribes, the Administrator is authorized to waive State liability and may pursue such legal remedies as are necessary.

"(f) If the Administrator determines, on the basis of information available to him during any fiscal year, that a portion of the funds granted to an applicant under this part for that fiscal year will not be required by the applicant or will become available by virtue of the application of the provisions of section 509, of title I of the Omnibus Crime Control and Safe Streets Act of 1968, that portion shall be available for reallocation under section 224 of this title.".

PART C—NATIONAL INSTITUTE FOR JUVENILE JUSTICE AND DELINQUENCY PREVENTION

SEC. 4. Title II, part C of such Act is amended as follows:

(1) Section 241 is amended by deleting all of subsection (e). Subsections (f) and (g) are redesignated as subsections (e) and (f) respectively.

(2) Redesignated section 241(f) is amended by inserting after "(4)" and before the words "enter into contracts" the words "make grants and".

(3) The subsection lettered "(b)" immediately following redesignated section 241(f) is redesignated subsection "(g)".

(4) Redesignated section 241(g) is amended by deleting "(g)(1)" which appears immediately after the word "subsection" and inserting "(f)(1)" in lieu thereof.

(5) Section 248 is deleted.

PART D—AUTHORIZATION OF APPROPRIATION

SEC. 5. Title II, part D of such Act is amended by redesignating the title of Part D "Administrative Provisions" and as follows:

(1) Section 261 is amended by deleting subsection (a) and inserting in lieu thereof the following:

"To carry out the purposes of this title there is authorized to be appropriated $75,000,000 for the fiscal year ending September 30, 1978, and such sums as are necessary for each of the fiscal years ending September 30, 1979, and September 30, 1980. Funds appropriated for any fiscal year may remain available for obligation until expended."

(2) Section 262 is amended by deleting all of subsections (a) and (b) and inserting in lieu thereof the following:

"The Administrative provisions of title I of the Omnibus Crime Control and Safe Streets Act of 1968, designated as sections 501, 504, 507, 509, 510, 511, 516, 518(c), 521, and 524 (a) and (c) of such Act, are incorporated herein as administrative provisions applicable to this Act.".

(3) Section 263 is amended by deleting the words "subsection (b)" in subsection (a) and inserting the words "subsections (b) and (c)" in lieu thereof.

(4) Section 263 is further amended by adding after subsection (b) as new subsection (c) as follows:

"(c) The amendments made by the Juvenile Justice and Delinquency Prevention Amendments of 1977 shall take effect on and after October 1, 1977."

AMENDMENT TO THE OMNIBUS CRIME CONTROL AND SAFE STREETS ACT

SEC. 6. Section 203(a)(1) of title I of the Omnibus Crime Control and Safe Streets Act of 1968, as amended, is amended by adding at the end thereof the following new sentence: "The chairman and at least two additional members of any advisory group established pursuant to section 223(a)(3) of the Juvenile Justice and Delinquency Prevention Act of 1974 shall be appointed to the State planning agency as members thereof. These individuals may be considered in meeting the general representation requirements of this subsection."

OFFICE OF THE ATTORNEY GENERAL,
Washington, D.C.

The VICE PRESIDENT,
U.S. Senate,
Washington, D.C.

DEAR MR. VICE PRESIDENT: It is my pleasure to forward for your consideration a legislative proposal entitled the "Juvenile Justice and Delinquency Prevention Amendments of 1977."

This proposed bill would amend the Juvenile Justice and Delinquency Prevention Act of 1974 and extend the authority of the Law Enforcement Assistance Administration to administer the Act for an additional three years. The bill would provide additional funding to the Law Enforcement Assistance Administration to coodinate Federal juvenile delinquency programs and activities and to assist States, units of general local government, and private nonprofit agencies, organizations, and institutions in their efforts to combat juvenile delinquency and improve the juvenile justice system.

The legislative proposal includes a number of amendments designed to strengthen the coordination of Federal efforts. The Federal Coordinating Council established by the 1974 Act would be authorized to assist in the preparation of LEAA annual reports on the analysis, evaluation, and planning of Federal juvenile delinquency programs. LEAA runaway programs would be coordinated with Department of Health, Education, and Welfare programs funded under the Runaway Youth Act.

Title I of the Omnibus Crime Control and Safe Streets Act would be amended to require that the chairman and at least two other members of each State's planning agency supervisory board. This will insure that the supervisory board receives the benefit of advisory group input in carrying out its duties and responsibilities.

The legislative proposal also makes significant changes in the formula grant program. The 1974 Act requires that status offenders be deinstitutionalized within two years of a State's participation in the formula grant program. The Administrator would be granted authority under the proposed bill to continue funding to those States which have achieved substantial compliance with this requirement within the two-year statutory time limitation for deinstitutionalization and evidenced an unequivocal commitment to achieving this objective within a reasonable time. The use of in-kind matching funds would be prohibited. However, assistance to private nonprofit organizations would be authorized at up to 100 percent of the approved costs of any assisted program or activity. In addition, the Administrator would be authorized to waive the cash match requirement, in whole or in part, for public agencies upon a determination that a good faith effort has been made to obtain cash match and cash match is not available. No change would be made to the provision requiring that programs receiving satisfactory annual evaluations continue to receive funds.

The proposal would require that Special Emphasis school programs be coordinated with the United States Office of Education. A new category of youth advocacy programs would be added to the listing of Special Emphasis programs in order to focus upon this means of bringing improvements to the juvenile justice system.

The proposal would also authorize the Administrator to permit up to 100 percent of a State's formula grant funds to be utilized as match for other Federal juvenile delinquency program grants. This would increase flexibility and permit maximum use of these funds in States which have been unable to fully utilize available Federal fund sources. The Administrator would also be authorized to waive match for Indian tribes and other aboriginal groups where match funds are not available and to waive State liability where a State lacks jurisdiction to enforce grant agreements with Indian tribes.

The proposal would authorize $75 million for Juvenile Justice Act programs in Fiscal Year 1978 and such sums as are necessary for each of the Fiscal Years 1979 and 1980. The maintenance of effort provision, applicable to juvenile delinquency programs funded under the Omnibus Crime Control and Safe Streets Act, would be retained. The retention of this provision underscores the Administration's commitment to juvenile justice and delinquency prevention programming at the Federal level.

Finally, the proposal would incorporate a number of the administrative provisions of the Crime Control Act as administrative provisions applicable to the Juvenile Justice and Delinquency Prevention Act. The addition of these provisions would permit LEAA to administer the two acts in a parallel fashion. These provisions would include formalized rulemaking authority, hearing and appeal procedures, civil rights compliance, recordkeeping requirements, and restrictions on the disclosure of research and statistical information. The incorporation of the civil rights provisions added by the Crime Control Act of 1976 would strengthen LEAA's ability to assure nondiscrimination in programs and projects funded under the Juvenile Justice and Delinquency Prevention Act.

I recommend the prompt and favorable consideration of the proposed "Juvenile Justice and Delinquency Prevention Amendments of 1977." In addition to the bill, there is enclosed a section-by-section analysis.

The Office of Management and Budget has advised that enactment of this proposed legislation would be consistent with the Administration's objectives.

Sincerely,

GRIFFIN B. BELL,
Attorney General.

SECTIONAL ANALYSIS

Section 1 provides that the Act may be cited as the "Juvenile Justice and Delinquency Prevention Amendments of 1977".

Section 2 amends Title II, Part A of the Juvenile Justice and Delinquency Prevention Act of 1974 in nine ways:

(1) Section 201(g) is the subject of a technical amendment.

(2) Section 204(b)(5) is amended to mandate the assistance of the Coordinating Council in the preparation of the annual analysis and evaluation of Federal juvenile delinquency programs.

(3) Section 204(b)(6) is amended to mandate the assistance of the Coordinating Council in the preparation of the annual comprehensive plan for Federal juvenile delinquency programs.

(4) Section 204(f) is amended to clarify that the Administrator's authority to request information, reports, studies, and surveys is limited to Federal departments and agencies.

(5) Section 204(g) is amended to authorize the Administrator to delegate his functions under all of Title II to any officer or employee of the Administration.

(6) Section 204(j) is amended to authorize the Administrator to utilize grants and contracts to carry out the purposes of Title II.

(7) Section 204(k) is amended to require appropriate coordination between LEAA activities funded under Title II and Department of Health, Education, and Welfare programs funded under the Runaway Youth Act.

(8) Section 206(d) is amended to require a minimum of four annual meetings of the Coordinating Council.

(9) Section 208(e) is amended to make the title of the National Advisory Committee Subcommittee on Standards consistent with the subcommittee title used in section 247.

Section 3 amends Title II, Part B of the Act through twenty-four separate provisions related to Federal assistance programs:

(1) Section 221 is amended to reflect that the Administrator has authority to make formula grants only at the State (State planning agency) level.

(2) Section 221 is further amended to clarify that States have authority to make formula grant funds available to both public and private agencies through subgrants as well as contracts.

(3) Section 222(c) is amended to conform with the definitions of "units of general local government" and "combination" set forth in Section 103(8) and (9) of the Act.

(4) Section 222(d) is amended to prohibit the use of in-kind match and to provide that formula grant assistance to private nonprofit organizations may be up to 100 percent of assisted program or activities. For public agencies, the Federal share may not exceed 90 per centum of the approved costs of any assisted program or activity. However, Section 222(e) provides that the Administrator may waive the cash match requirement for public agencies, in whole or in part, if the State planning agency determines that a demonstrated and determined good faith effort has been made to obtain cash match and cash match is not available.

(5) Section 223(a)(4) is amended to conform with the definitions of "unit of general local government" and "combination" set forth in Section 103(8) and (9) of the Act.

(6) Section 223(a)(5) is amended to provide that funds expended through programs of local government include programs sponsored or administered by combinations of local government.

(7) Section 223(a)(6) is amended to conform with the definition of "unit of general local government" set forth in Section 103 (8) of the Act.

(8) Section 223(a)(6) is further amended to clarify that regional planning bodies may be designated by local chief executives as the "local agency" to perform planning and administration functions on behalf of the unit of general local government.

(9) Section 223(a)(8) is amended to provide that programs and projects developed from a State's detailed study of needs may be funded as advanced technique programs under Section 223(a)(10) provided that they meet the criteria established for designation as advanced technique programs.

(10) Section 223(a) (10) is amended to again reflect that formula grants are made only at the State (State planning agency) level.

(11) Section 223(a)(10) is further amended to again clarify that States have authority to make formula grant funds available to both public and private agencies through subgrants as well as contracts.

(12) Section 223(a)(10) is further amended to delete drug and alcohol abuse programs from the list of advanced technique programs.

(13) Section 223(a)(12) is amended to clarify that status offenders may, but need not, be placed in shelter facilities.

(14) Section 223(c) is amended to provide that the Administrator may continue to approve State plans, where a State has failed to achieve compliance with Section 223(a)(12), upon a determination that: (a) the State is in substantial compliance; and (b) the State has made an unequivocal commitment to achieving full compliance within a reasonable time.

(15) Section 224(a)(5) is the subject of a technical amendment.

(16) Section 224(a)(6) is amended to mandate coordination with the United States Department of Education in the development of Special Emphasis School programs.

(17) Section 224(a)(6) is also the subject of a technical amendment.

(18) Section 224(a) is amended by adding a new paragraph (7) authorizing the use of Special Emphasis funds for youth advocacy programs.

(19) Section 227(a) is amended to add public and private organizations to the list of entities affected by this subsection.

(20) Section 227(b) is amended to add public and private organizations to the list of entities affected by this subsection.

(21) Section 228(b) is amended to prohibit the use of formula grant funds to match LEAA funds.

(22) Section 228(b) is further amended to permit up to 100 percent of a State's formula grant funds to be used as match for other Federal juvenile delinquency program grants.

(23) Section 228(c) is amended to permit the Administrator to require a matching contribution from recipients of National Institute grants and contracts under Part C of the Act.

(24) Section 228 is amended by adding two new subsections: (a) subsection (e) authorizes the Administrator to waive the non-Federal match for grants to Indian tribes or other aboriginal groups where they have insufficient funds. In addition, where a State lacks jurisdiction to enforce liability under State grant agreements with Indian tribes, the Administrator may waive the State's liability and proceed directly with the Indian tribe on settlement matters; and (b) subsection (f) provides for reallocation, as Special Emphasis funds, of any funds not required by a State or which become available following administrative action to terminate funding.

Section 4 amends Title II, Part C of the Act in five separate amendments related to the National Institute for Juvenile Justice and Delinquency Prevention:

(1) Section 241 is amended to delete the subsection (e) provision for delegation of authority by the Administrator to employees of the Institute and to redesignate subsections (f) and (g) as subsections (e) and (f).

(2) Redesignated section 241(f) is amended to clarify the Institute's authority to make grants as well as enter into contracts for the partial performance of Institute functions.

(3) Erroneously lettered subsection (b) is redesignated subsection (g).

(4) Redesignated subsection (g) is the subject of a technical amendment.

(5) Section 248 is deleted to remove duplicative restrictions on disclosure or transfer of juvenile records gathered for purposes of the Institute.

Section 5 amends Title II, Part D of the Act by changing the title of Part D to "Administrative Provisions" and in four other respects:

(1) Section 261 is amended by deleting subsection (a) relating to level of authorized funding and substituting a three-year authorization at an appropriation level of $75,000,000 for fiscal year 1978, and such sums as are necessary for each of the fiscal years ending September 30, 1979, and September 30, 1980. Funds appropriated are to remain available for obligation until expended.

(2) Section 262 is deleted and language substituted that incorporates the administrative provisions of Sections 501, 504, 507, 509, 510, 511, 516, 518(c), 521, and 524 (a) and (c) of the Omnibus Crime Control and Safe Streets Act into the Act as administrative provisions.

(3) Section 263 is the subject of a technical amendment.

(4) Section 263 is further amended to provide that the amendments made by this Act shall be effective on and after October 1, 1977.

Section 6 amends Section 203(a)(1) of the Omnibus Crime Control and Safe Streets Act to provide that the chairman and at least two other members of the advisory group established pursuant to Section 223(a)(3) of the Juvenile Justice and Delinquency Prevention Act shall be appointed to the State planning agency supervisory board.

ADDITIONAL COSPONSORS

S. 4

At the request of Mr. DOLE, the Senator from Ohio (Mr. METZENBAUM) was added as a cosponsor of S. 4, to amend the Internal Revenue Code.

S. 124

At the request of Mr. GLENN, the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of S. 124, to amend the Internal Revenue Code.

S. 294

At the request of Mr. MELCHER, the Senator from Wyoming (Mr. WALLOP) was added as a cosponsor of S. 294, to amend the Meat Import Quota Act of 1964.

S. 310

At the request of Mr. MATSUNAGA, the Senator from Alabama (Mr. SPARKMAN) was added as a cosponsor of S. 310, relating to the medicare and medicaid programs.

S. 590

At the request of Mr. THURMOND, the Senator from Kansas (Mr. DOLE) was added as a cosponsor of S. 590, to confer Cabinet status on the Veterans' Administration.

S. 779

At the request of Mr. BURDICK, the Senator from Rhode Island (Mr. CHAFEE) was added as a cosponsor of S. 779, to amend the Internal Revenue Code.

S. 803

At the request of Mr. HELMS, the Senator from Arkansas (Mr. BUMPERS) was added as a cosponsor of S. 803, to amend the Internal Revenue Code.

S. 919

At the request of Mr. RIEGLE, the Senator from Oklahoma (Mr. BELLMAN), and the Senator from Utah (Mr. GARN)

were added as cosponsors of S. 919, a bill to establish certain vehicle emission standards and for other purposes.

S. 1001

At the request of Mr. DOMENICI, the Senator from Oklahoma (Mr. BARTLETT) was added as a cosponsor of S. 1001, relating to awards of legal fees and related expenses in certain litigation.

S. 1008

At the request of Mr. RIEGLE, the Senator from New Hampshire (Mr. DURKIN), the Senator from Vermont (Mr. LEAHY), and the Senator from Wisconsin (Mr. PROXMIRE) were added as cosponsors of S. 1008, a bill to amend section 107 of the Energy Reorganization Act of 1974 to delegate power to State legislatures to veto Energy Research and Development Administration site selection for radioactive waste storage.

SENATE RESOLUTION 105

At the request of Mr. NELSON, the Senator from Vermont (Mr. LEAHY), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Alaska (Mr. GRAVEL) were added as cosponsors of Senate Resolution 105, calling for a White House Conference on Small Business.

SENATE JOINT RESOLUTION 13

At the request of Mr. RANDOLPH, the Senator from New Mexico (Mr. SCHMITT) and the Senator from North Dakota (Mr. YOUNG) were added as cosponsors of Senate Joint Resolution 13, designating Energy Conservation Month.

SENATE CONCURRENT RESOLUTION 17—SUBMISSION OF A CONCURRENT RESOLUTION RELATING TO THE ESTABLISHMENT OF AN INTERNATIONAL NUCLEAR FUEL AUTHORITY

(Referred to the Committee on Foreign Relations.)

Mr. GLENN submitted the following concurrent resolution:

S. CON RES. 17

Whereas it is United States policy to encourage worldwide development of energy resources and to discourage the spread of nuclear weaponry;

Whereas it is the objective of all countries with nuclear power programs to obtain an assured supply of nuclear fuel as well as appropriate storage facilities for spent fuel;

Whereas pursuit of such assured supply has resulted in actions by some non-nuclear weapons states to achieve a national enrichment or reprocessing capability;

Whereas high enrichment and reprocessing of nuclear fuel have the serious potential for accelerating nuclear weapons development;

Whereas it is in the interests of the United States, from the viewpoint of preventing nuclear weapons proliferation, to engage in concerted action with other supplier nations to avoid the development of enrichment or reprocessing capabilities on a national basis by non-nuclear weapons states;

Whereas the legitimate needs of all nations for an assured supply of nuclear fuel and spent fuel storage facilities can be met through international contractual arrangements include use by all present suppliers of a single distribution channel;

Whereas such arrangements obviate the need for national enrichment or reprocessing facilities by countries not currently possessing them; and

Whereas international cooperation in this area is desirable, possible, and practical: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the President of the United States is requested to enter into negotiations as soon as is practicable, with all foreign countries possessing nuclear fuel production facilities, for the purpose of drafting a treaty with provisions for the following:

(1) Establishment of an International Nuclear Fuel Authority (hereafter referred to as INFA), headed by a Board of Directors representing all major supplier nations and the IAEA, with responsibilities for allocation and distribution of an agreed upon share of fuel produced from nuclear fuel production facilities in accordance with agreements between INFA and recipient countries.

(2) A set of conditions under which INFA services will be provided, and which will insure, to the satisfaction of all INFA members, that the transferred materials cannot or will not be used for weapons or explosions.

(3) The use of plant facilities constructed under INFA auspices for the storage of spent nuclear reactor fuel.

(4) The return of spent fuel to INFA from recipient countries as a result either of an arrangement whereby fuel is leased or, in the case of outright sale, credit is given in the form of equivalent new fuel for the energy content of the plutonium contained in the spent fuel.

(5) An appropriate formula for distribution of proceeds from INFA transactions.

(6) Penalties for violations and abrogation.

SEC. 2. The President is requested to report in writing to the Speaker of the House of Representatives and the President pro tempore of the Senate within 6 months after the adoption of this resolution, and at intervals not to exceed 6 months thereafter, with respect to the progress that has been made in the requested negotiations.

Mr. GLENN. Mr. President, today I am submitting a concurrent resolution and two amendments designed to deal with the problem of the proliferation of nuclear weapons capability. These are proposed against a background of depressing facts and statistics.

One. Only three out of six nuclear weapons states have signed the nuclear nonproliferation treaty.

Two. About half of all nonweapons states have not signed the NPT, including "near-weapons" states such as Argentina, Brazil, Israel, and South Africa.

Three. Nonweapons states with the potential for building or otherwise obtaining reprocessing plants including Argentina, Belgium, Brazil, the Federal Republic of Germany, Iran, Italy, Japan, Pakistan, South Korea, and Taiwan.

Four. By the year 2000, the world may be producing enough plutonium in power reactors for 200,000 bombs per year.

Five. Under present rules, as Dr. Albert Wohlstetter has pointed out, a nonweapon state can come closer to exploding a nuclear weapon today, without violating an agreement not to make a bomb, than the United States was 30 years ago.

Clearly, the battle against proliferation cannot be said to be going well. The inexorability of technological progress means that some nations that could be considered "near-weapon" states last year are "nearer-weapon" states this year. And the number of states desiring fuel cycle facilities from which fissile materials can be produced is growing. The reason for this sorry state of affairs can be traced to the three major incentives for nations to obtain their own fissile materials. These are:

One. A perceived increase in national security.

Two. A desire for energy independence with respect to their nuclear power programs.

Three. A perceived increase in national prestige.

Until the nuclear weapons states make some concrete progress toward nuclear disarmament thereby channeling their own bases of national pride away from acquisition of nuclear weapons or weapons potential, we shall see little progress in reducing the perceived national security or prestige incentives toward acquiring fissile materials by nonweapons states. Of more immediate amenability toward solution is the proliferation emanating from the legitimate desire of a nonweapons state to have a reliable supply of nuclear fuel for its power reactors; that is, for nuclear energy independence.

To meet this legitimate need, the United States, acting in concert with the other nuclear suppliers, must endeavor to provide a reliable fuel supply to all nations adhering to strict safeguards on all their nuclear facilities. In so doing, the need on the part of such nations for national enrichment or reprocessing facilities vanishes. Accordingly, I am offering today two proposals. The first is in the form of a resolution calling upon the President to enter into international negotiations for the purpose of developing a treaty establishing an International Nuclear Fuel Authority which would contract with suppliers to receive shipment of low-enriched nuclear fuel for distribution to recipient countries in accordance with binding agreements.

The resulting lack of need of any nonweapons state to import a reprocessing facility motivates my second proposal, which provides that any nation importing or exporting any such facility suffers an immediate cutoff of American military and economic assistance unless the President determines it is not in the national interest to do so, and the Congress fails to override him by joint resolution. This proposal is a stepped up version of the so-called Symington amendment which was passed in the last Congress. Under that amendment military and economic assistance will be cut off if any country imports or exports a reprocessing facility unless the recipient country places all of its nuclear activities under IAEA safeguards and places the reprocessing facility under international control if any such control mechanism is available. My proposal would impose the cutoff in the case of the importation of a reprocessing plant whether or not the conditions of the Symington amendment are met. In other words, my proposal takes the position that the transfer of such facilities to countries not now pos-

sessing them is of such danger to international security that we should attempt to prohibit the transfer regardless of the conditions under which it takes place.

I am offering this proposal in the form of an amendment both to S. 897, the nuclear nonproliferation legislation now before the Governmental Affairs Committee, and to S. 1160, the foreign military assistance bill now being considered by the Foreign Relations Committee.

I believe these proposals are effective supplements to existing nonproliferation laws and other proposals on this subject currently before the Congress. I look forward to hearings and extensive discussions on these proposals.

SENATE RESOLUTION 134—SUBMISSION OF A RESOLUTION AUTHORIZING PRINTING OF THE REPORT OF THE NATIONAL FOREST RESREVIEW COMMISSION

(Referred to the Committee on Rules and Administration.)

Mr. TALMADGE submitted the following resolution:

S. RES. 134

Resolved, That the annual report of the National Forest Reservation Commission for the fiscal year ended September 30, 1976, be printed with an illustration as a Senate document.

SENATE RESOLUTION 135—SUBMISSION OF A RESOLUTION CONCERNING RECOMMENDATIONS OF THE AMERICAN INDIAN POLICY REVIEW COMMSSION

(Referred to the Select Committee on Indian Affairs.)

Mr. ABOUREZK for himself, Mr. DECONCINI, Mr. HATFIELD, and Mr. BARTLETT) submitted the following resolution:

Whereas the Congress, in recognition that Federal policy toward American Indians is in need of extensive revision, created the American Indian Policy Review Commission; and

Whereas the American Indian Policy Review Commission, pursuant to legislative requirements, conducted a Bureau of Indian Affairs management study; and

Whereas the Congress is aware of an absence of managerial and organizational capacity in the Bureau of Indian Affairs; and

Whereas the Congress finds that long-range planning capabilities are nonexistent in the budget process and that the organization of the budget and the planning function is fragmented and ineffective; and

Whereas the Congress finds that for the Indian community to have a meaningful input in the budget process there must be a comprehensive tribal needs analysis and long-range plan which the system would use as the vehicle to guide allocation of capital and human resources into strategic areas; and

Whereas the Congress recognizes that almost every area of the Bureau of Indian Affairs personnel management is inadequate; promotes poor attitudes; that the present interpretation of the Indian preference policy in employment adversely affects all personnel actions; that Indian preference should be modified to ensure effective operation without impeding progress toward the fullest employment of Indians; that a comprehensive manpower planning system should be developed to determine proper staffing; that aggressive recruiting and training programs should be improved and upgraded at all levels; and

Whereas the Congress recognizes that due to inadequate and unreliable measurement information, officers and employees of the Bureau of Indian Affairs can do little to control people or programs; that the type of information available cannot be used effectively to evaluate, manage and motivate people, make decisions or measure program quality; that more sophisticated management control requires performance standards as a basis of comparison; that insufficient standards and measurements are prime reasons for line manager, program and employee control problems; and

Whereas, the Congress finds that the present Bureau of Indian Affairs structure does not meet the needs of Indian people who require a variety of services; that the current organization is characterized by a lack of communication, excessive spans of control and ineffective leadership; that there is little preparation for future impact of Indian self-determination, minimal Indian input or proximity to decisions and excessive Bureau response time: Now, therefore, be it

Resolved, That it is the sense of the Senate, that the Secretary of the Interior and the Commissioner of the Bureau of Indian Affairs, should, as soon as practicable but in no event later than one year following the approval of this resolution, implement and cause to be implemented all of the recommendations of the American Indian Policy Review Commission's Bureau of Indian Affairs Management Study, and that the moneys saved or equivalent thereof during each fiscal year by reason of the implementation of such recommendations should be directed by the Congress into program services which directly benefit Indians at the tribal level.

SEC. 2. The Secretary of the Senate is directed to transmit a copy of this resolution to the Secretary of the Interior and the Commissioner of the Bureau of Indian Affairs.

Mr. ABOUREZK. Mr. President, Congress created the American Indian Policy Review Commission for the purpose of seeking recommendations from which to legislate meaningful approaches to fulfilling the present and future needs of Indian people. One of the charges of the Commission was to do a management study of the Bureau of Indian Affairs. This management study has been completed and adopted by the Commission.

This study covered the need for changes, because of the inadequacies of the Bureau of Indian Affairs, in the budget process, personnel administration, management information, and organizational structure. If implemented it will go far to meet the needs of efficiency, effectiveness, and reasonable cost in the operation of the Bureau of Indian Affairs.

The changes called for in this report will restructure the Bureau of Indian Affairs and change the manner in which it deals with American Indians. The restructuring would result in redirecting on a one-time basis about $20 million and on an annual basis an estimated $122 million to services at the tribal level.

This means gains for the Congress in establishing a sound American Indian policy, gains for the American Indian tribes in program effectiveness, and gains for the American taxpayer in Government efficiency.

This also is in line with President Carter's policy of restructuring and making more efficient the Federal Government.

I ask unanimous consent to have printed in the RECORD a summary of the Bureau of Indian Affairs management study.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SEC. V. DIGEST OF RECOMMENDATIONS

Recommendations	Action required	Financial impact	Estimated amount
BUDGET PROCESS			
1. Establish a formal planning system within BIA and integrate it into the present budget process.	Executive		
2. Reorganize budgeting, planning, and intergovernmental relations into 1 integrated organization.	do		
3. Stimulate Indian participation in the budget process.	do		
4. Include all nonbanded area programs except trust funds in the agency budget formation process by fiscal 1979.	do	1-time cost	$50,000
5. Make the budget function responsible for variance analyses and performance reviews.	do		
6. Emphasize Indian participation and band analysis in the BIA budget review to the Department, OMB, President, and Congress.	do		
7. Establish annual project planning at area and agency levels for all continuing programs and monitor performance quarterly on a personal basis, altering the plan to reflect status changes.	do	Annual saving	250,000
PERSONNEL MANAGEMENT			
8. Strengthen Indian preference to improve BIA effectiveness while continuing to hire, train and upgrade Indians for Bureau employment.	do		
9. Develop a human resources planning system using industrial engineering techniques to establish appropriate staffing levels and position requirement.	do	Annual saving 1-time cost	75,000,000 430,000
10. Develop an aggressive recruiting program to secure qualified or trainable Indians.	do	Annual cost 1-time cost	150,000 50,000
11. Reorganize the employment classification system to improve credibility.	do		
12. Improve BIA employee relations practices	do	1-time cost	100,000
13. Develop training programs to meet specific BIA requirements.	do	Annual cost 1-time cost	80,000 200,000
14. Continue regular civil service evaluations and upgrade personnel-management quality through Department of the Interior project manager appointments.	do	Annual cost	42,000

SEC. V. DIGEST OF RECOMMENDATIONS—Continued

Recommendations	Action required	Financial impact	Estimated amount
MANAGEMENT INFORMATION			
15. Establish and install performance measurement standards.	do	Annual saving	$15, 000, 000
16. Initiate a program to improve and facilitate general communications between central office and field supervisors.	do		
17. Develop a concise statement on critical issues	do		
18. Improve the management by objectives program.	do		
19. Expedite the automatic data processing modernization study to insure completion by Jan. 1, 1977.	do	Annual cost Avoidance	$10, 000, 000
20. Complete application analysis section of the modernization study by Oct. 1, 1976.	do		
21. Add remote access and interactive capabilities to reduce processing time and increase computer program development efficiency.	do		
22. Develop an inventory system for a comprehensive equipment management system.	do	Annual saving	6, 600, 000
23. Develop standardized material and supply inventory systems.	do	Annual saving 1-time saving	5, 000, 000 20, 000, 000

SECTION I. EXECUTIVE SUMMARY

The mandated Indian preference policy in personnel actions is being implemented, although with some harmful effects on overall bureau effectiveness. Indian participation in the budget process is a positive step toward achieving self-determination. Procedures are being issued to implement the contracting provisions of Public Law 93-638.

The Division of Automatic Data Processing is also conducting a comprehensive modernization study to update its services. A personnel management project director has been employed recently to spearhead specific improvements in personnel practices. In addition, Management by Objectives (MBO) techniques are being used in a number of locations.

PRIOR ASSESSMENTS OF BIA

Numerous studies have been carried out over the years by other task force groups, committees, consultants, Indian organizations, federal agencies and individuals. All have identified problems and made specific recommendations. In establishing the objectives for this study, it became obvious that a comprehensive review of these materials should be made.

A search of prior reports on BIA operations was implemented to pinpoint recurring references to topics tentatively identified as potential problem areas. The purpose was to establish a basis for comparison with findings of the current study and to ensure that all pertinent problem areas would be covered.

Over 75 representative reports written during the past 25 years were evaluated, including several comprehensive studies and subsequent updates plus a large number of topical reviews made in the last 5 to 10 years. With occasional exceptions, the studies were initiated by Senate and House committees or the Executive Branch. In general, the reports were prepared by staff groups within these branches including the House Appropriations Committee, Civil Service Commission and BIA. Occasionally, special task forces were established while, in other cases, members of the private sector studied Indian problems.

For this analysis, 75 reports were grouped into 23 categories which combined similar short reviews. These are indicated in Appendix Exhibit I, Prior Assessments—Listing of Titles and Title Categories. Of the more than 60 topics of specific interest identified by the report review, five general areas were summarized which apply to the broad subject of management as shown in Appendix Exhibit II, Summary of Prior Management Assessments. The five major management topics considered relevant to this current study are:

Management, including administration, authority, organization, planning and the like. Nineteen of the 23 report categories identify problems in these areas.

Accounting, which includes the budget process in its eight subject areas, was treated in nine categories.

Management information on all administrative levels was referenced in nine categories.

Personnel management and 15 related matters pertaining to the effective utilization of human resources were found to be a problem issue in 15 categories.

Intergovernmental relations, including BIA's relations with other Executive Branch agencies, Congress, state and local governments, were identified in 14 categories.

A sixth major topic encompasses programs, facilities, natural resources, government policies and financing. This general area is detailed in Appendix Exhibit III, Summary of Prior Service Assessments. The analysis has shown that prior studies directed somewhat more attention to this area than to the management practices and related functions which provide the services. Appendix Exhibit IV, Details of Management and Service Assessments, lists all 60 problem areas within the six general topics.

The results of the search indicate that many areas of potential problems have been previously identified. Within the management classification, management practices, personnel administration and intergovernmental relations received the most attention. Accounting, including the budget process, and management information—both extremely important to effective management—received substantially less emphasis.

An evaluation of prior studies strongly suggests that findings related to the management principles of planning, organizing, leading and controlling have not been given sufficient emphasis. Elements which require increased attention are:

Recognition that management ability is just as essential to program success as capital.

Provision of executive leadership at all organizational levels.

Development of comprehensive, timely information for use by bureau personnel to ensure effective planning and control.

Installation of an improved communications system throughout the bureau.

Utilization of long-range planning to direct bureau activities.

Implementation of recommendations.

Many of the prior assessments of the BIA identified similar problems and resulted in appropriate recommendations. However, these past efforts fell short of their objectives because the apparatus for implementation was not present. As a result of these findings, the recommendations of this review team are presented with an implementation section to overcome potential obstacles.

CONCLUSIONS

During this nine-week intensive examination, the following conclusions were reached. There is a notable absence of managerial and organizational capacity throughout BIA. Decisions are made on a day-to-day basis with little long-range planning. Communication among the organizational levels is poor as are agency-tribe relationships.

Evidence of critical analysis and determination of appropriate performance standards for key positions is almost nonexistent and achievements in most areas are not measured against appropriate yardsticks. There is a critical absence of information essential to efficient administration. Frequently, data as basic as simple performance comparisons were not available. Directories and organization charts were often out of date.

Employee attitude and overall morale suffer dramatically as a result of these inadequacies. The situation is further aggravated by the effects of implementing Indian preference, uncertainty over the effects of Public Law 93-638, poor personnel practices and inadequate career development.

RECOMMENDATIONS

The proposals presented in this report are meant to serve as the basis for specific improvement of BIA operations, policies and procedures. Recommendations have been made on the most critical areas of bureau management policy, especially those issues which would produce the greatest impact for Indian people. These areas include budget, personnel, management information and structure.

The budget process is unique to the extent that the client is supposed to formally participate in the budget request through Band Analysis. However, long-range planning capabilities do not exist while the organization of the budget and the planning function is fragmented and ineffective. To increase the effectivenes of the budget cycle, a formal planning system must be created as part of the budget process. It must include comprehensive tribal needs analyses and long-range plans. This formalized planning system should act as the vehicle to guide allocation of capital and human resources into strategic areas.

The functions of budgeting, planning and intergovernmental relations should be consolidated. This new central office organization would report directly to the Commissioner of Indian Affairs and should have functional responsibility for similar operations at lower organizational levels. This would improve coordination of these related activities. Throughout the preparation and presentation process, the bureau should foster increased Indian participation in the development of budget information and materials. Implementation will provide increased visibility for Indian needs and plans.

Almost every area of personnel management in the bureau is inadequate. The present interpretation of the Indian preference policy adversely affects all personnel actions taken by the bureau. The application of Indian preference should be modified to ensure effective operation without impeding progress toward the fullest employment of Indians in the bureau. A planning system should be developed utilizing industrial engineering techniques to determine proper staffing levels and position requirements. Savings in administrative costs could be redirected to program areas. An aggressive recruiting program must also be put into effect to secure both qualified and trainable Indians. The current classification function must be reorganized to restore integrity.

Employee relations practices require substantial changes. The means to accomplish this effectively is through consistent, formal training. Since training activities need improvement at all levels, a comprehensive need analysis should be undertaken and programs developed to meet specific requirements. The

Civil Service Commission should continue to review personnel management activities in BIA. The project manager's assignment to correct deficiencies in personnel management must be continued and emphasized.

A modernization study is underway to update the data processing function. However, the estimated implementation schedule should be moved ahead 50% while equipment revision should include multi-processing and communication abilities. Automated inventory systems should be developed on a centralized basis. The potential financial benefits would be substantial.

Management by Objectives must be revised to set goals flowing upward from lower operating levels with guidelines flowing downward from upper management. It should be integrated into the budget process along with employee performance evaluations.

The present structure of the bureau is better suited to serve a single, common need, client base. However, Indian people have differing needs which require a variety of services. The current organization is characterized by a lack of communication, excessive spans of control and ineffective leadership. There is little evidence of preparation for the future impact of Indian self-determination. Indian input and proximity to decisions is minimal while bureau response time is excessive.

A new organization concept has been developed to move decisionmaking closer to the tribal level and provide dramatic leadership. The recommended approach is based upon separation of functional and administrative responsibilities. This concept will permit the elimination of 12 area offices and the creation of six regional service centers. This calls for a major change in the responsibilities assigned to new regional service center managers. Agency offices would have more responsibilities and a change in name to local service centers. Two consolidated functions—Human Resources and Natural Resources—would be established at the central office. The reporting relationship between school superintendents and the bureau would be strengthened and a mechanism for Indian participation in educational decisions would be established. Conflicts between the bureau and the Department of the Interior can be partially resolved by elevating the commissioner's position to that of an Assistant Secretary.

The bureau must have its own legal staff to provide timely attention to Indian needs. Establishing a separate entity in BIA will overcome existing conflict of interest problems in the Department of the Interior.

BENEFITS

As a result of this study, 23 recommendations have been formulated to improve management activities in the bureau. These are detailed in the following sections. Implementation can be accomplished by executive action.

The primary objective of the review was to focus on problem areas needing immediate attention. Whenever posible, exact dollar savings were quantified. Improved efficiency is anticipated as a result of all recommendations. Similarly, anticipated costs of implementation have also been included. Both savings and expenditures were projected on the basis of brief analyses and may not reflect all elements involved. The total annual financial impact of the recommendations is shown in the following table:

ANALYSIS OF POTENTIAL BENEFITS

	Annual	One-Time
Savings	$112, 800, 000	$20, 000, 000
Cost avoidance	10, 000, 000	
Cost	272, 000	830, 000

These figures include average annual savings of $11-million which can be attained through implementation of the suggestions on organization structure. Savings and costs related to staff levels were calculated on the basis of average bureau salaries. It is anticipated that most staff reductions can be implemented through attrition or reassignments to other federal agencies.

IMPLEMENTATION

A number of problems which reduce BIA effectiveness have been identified in this study. Proposed solutions and anticipated benefits are described in following sections. To preempt the possibility this study will suffer from lack of implementation, Congress must act to develop a positive vehicle to expedite accomplishment. First, Congress must give the report formal, general endorsement of concept and interest. Then, a Management Improvement Implementation Review Office—organizationally located in an appropriate management division of the Office of Management and Budget (OMB)—should be established.

Quarterly reports and interim updates in special situations should be distributed to the Commissioner of Indian Affairs, the Secretary of the Interior, appropriate congressional committees and the Executive Office. These official documents will indicate implementation progress and pinpoint delays and problems. In addition, management team members should provide counsel and periodically review implementation strategy with review office personnel. Finally, the commissioner and the Secretary of the Interior should be required to highlight essential features of these reports in annual budget presentations to Congress.

AMENDMENTS SUBMITTED FOR PRINTING

TAX REDUCTION AND SIMPLIFICATION ACT OF 1977—H.R. 3477

AMENDMENT NO. 180

(Ordered to be printed and to lie on the table.)

Mr. BUMPERS (for himself, Mr. HOLLINGS, Mr. STONE, and Mr. GOLDWATER) submitted an amendment intended to be proposed by them jointly to the bill (H.R. 3477) to provide for a refund of 1976 individual income taxes and other payments, to reduce individual and business income taxes, and to provide tax simplification and reform.

U.S. POLICIES ON NONPROLIFERATION—S. 897

AMENDMENT NO. 181

(Ordered to be printed and referred to the Committee on Foreign Relations and the Committee on Governmental Affairs, jointly.

Mr. GLENN submitted an amendment intended to be proposed by him to the bill (S. 897) to strengthen the U.S. policies on nonproliferation and to reorganize certain export functions of the Federal Government to promote more efficient administration of such functions.

FOREIGN ASSISTANCE ACT—S. 1160

AMENDMENT NO. 182

(Ordered to be printed and referred to the Committee on Foreign Relations.)

Mr. GLENN submitted an amendment intended to be proposed by him to the bill (S. 1160) to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act, and for other purposes.

NOTICES OF HEARINGS

COMMITTEE ON BANKING, HOUSING AND URBAN AFFAIRS

Mr. PROXMIRE. Mr. President, I should like to announce that the Committee on Banking, Housing and Urban Affairs will hold hearings April 18 through April 22, 1977, on reauthorizations and extensions of housing and community development programs, many of which are due to expire at the end of this fiscal year.

The hearings will be held in room 5302, Dirksen Senate Office Building and will begin at 10 each morning.

The committee would welcome statements for inclusion in the record of hearings.

HEARING NOTICE CHANGE—COMMITTEE ON SMALL BUSINESS

Mr. NELSON. Mr. President, the hearings scheduled on the restrictive and anticompetitive practices in the eyeglass industry for April 5 and 6 at 9:03 a.m., will be held in the Small Business Committee hearings room, 424 Russell Building rather than 318—caucus room—of the Russell Building as previously announced.

GOVERNMENTAL EFFICIENCY HEARINGS ON GENERAL ACCOUNTING OFFICE REPORT ON FLOOD INSURANCE PROGRAM

Mr. EAGLETON. Mr. President, the Subcommittee on Governmental Efficiency of the Governmental Affairs Committee will be holding hearings on April 11, 20, and 22 on the General Accounting Office report on weaknesses in the financial controls on the national flood insurance program. The hearings will be held in room 6226, Dirksen Senate Office Building. Witnesses will include representatives of GAO, Arthur Andersen & Co., the National Flood Insurers Association, and the Department of Housing and Urban Affairs.

SUBCOMMITTEE ON FEDERAL SPENDING PRACTICES AND OPEN GOVERNMENT

Mr. CHILES. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of 2 days of public hearings before the Governmental Affairs Subcommittee on Federal Spending Practices and Open Government.

The hearing is scheduled for April 13, 1977, in Tampa, Fla., beginning at 9:15 a.m. in the city council hearing room, and April 18, 1977, in Orlando, Fla., beginning at 9:15 a.m. in the city council hearing room.

Testimony is invited regarding the spending and procurement practices of the Small Business Administration in connection with the 8(a) program.

For further information regarding the hearings you may wish to contact Bob Harris of the subcommittee staff at 224–0211. Those persons wishing to testify or submit a written statement for the record should write to the Subcommittee

on Federal Spending Practices, Committee on Governmental Affairs, Washington, D.C. 20510.

ADDITIONAL STATEMENTS

HANDICAPPED PEOPLE AND AFFIRMATIVE ACTION

Mr. BURDICK. Mr. President, each year the North Dakota Committee on Employment of the Handicapped of the Governor's Council on Human Resources sponsors an "Ability Counts" writing contest for high school students. First-place winners represent North Dakota in the national competition and are invited to attend the annual meeting of the President's Committee on Employment of the Handicapped in Washington, D.C.

This year North Dakota's winner is Susanne Arnold of Pleasant Lake, N. Dak. She is an 18-year-old senior in the Wolford, N. Dak., Public Schools. Her faculty sponsor, who will attend the Washington conference with her, is Ms. Evelyn Glenn.

Ms. Arnold's paper, entitled "Handicapped People and Affirmative Action," discusses her survey of efforts in her community to hire handicapped citizens. It is an interesting and perceptive essay, and I ask unanimous consent that it be printed in the RECORD so that others may have the opportunity to review her findings.

There being no objection, the essay was ordered to be printed in the RECORD, as follows:

HANDICAPPED PEOPLE AND AFFIRMATIVE ACTION

What does my community think about affirmative action to hire handicapped persons? Do they actually carry out their beliefs in their business and social life? Do the handicapped people of my community think they are being treated fairly? These are only a few of the questions I attempted to answer. Due to the size of my community, is was difficult to find people to interview. I interviewed ten employers, four handicapped persons, and ten people of the area. Through this cross-section of people, I attempted to "sound out" the attitudes and ideas of my entire community.

Of the four handicapped persons I interviewed, all four felt that they had been helped a great deal by the Rehabilitation Act. Mrs. June Richards, activity director of the geriatrics ward in a local hospital, said, "If it had not been for these regulations, I am certain I would not have gotten this job." Three of the four were working in jobs they had not originally been trained for. Three also felt that there was at least some hesitation on the part of employers to hire them. All four expressed great satisfaction at the cooperation they received from fellow workers. Two of the four had some difficulty procuring their jobs. Kathy Miller, a receptionist at a rest home said, "I probably wouldn't be working here right now if I wouldn't be afraid of not being able to find another job." All four knew of the President's Committee for the Employment of the Handicapped, and appreciated that it was there to protect them.

Among the employers I interviewed were: the manager of a hospital, a bank president, and the personnel manager of a creamery. Seven of the ten interviewed had voluntarily hired handicapped persons in their business. Five were aware of the Rehabilitation Act and its requirements. Nine employers felt it was not unprofitable to hire handicapped people. "Definitely not. They perform their duties as efficiently as anyone else." Stated the manager of Otter Tail Power Company. Eight of the ten, however, did have at least some trouble applying the Rehabilitation Act specifically to their own business.

All of the individuals of the community that I visited with felt that the Rehabilitation Act was definitely a necessary and very important regulation.

A handicapped woman I visited with captured, what I felt, was the essence of successfully dealing with a handicap. She found that by learning to meet each day cheerfully, and dealing only with that single day's disappointment and inconveniences, could she cope with her handicap. "Some days, just not being able to bowl is a big thing. Said Mrs. June Richards.

In view of all the data and ideas I accumulated through personal interviews, telephone conversations, letters, questionnaires, and lots of just plain listening to what was said, and what was not said, I gained a tentative impression of my community's attitude toward handicapped people. I say tentative because it is impossible for one person to fully understand another's thoughts and motives; only what that person allows you to observe. Yet, I found complete cooperation and encouragement in my research. I feel that the community of Rugby, North Dakota, merits high points in nearly every aspect of Handicapped People and Affirmative Action.

THE LEGISLATIVE PRESENTATION OF AMVETS

Mr. THURMOND. Mr. President, the Senate Committee on Veterans' Affairs was recently presented the AMVETS' 1977 legislative program by that organization's national commander, the Honorable Thomas J. McDonough.

AMVETS is a great organization. Founded in 1944, its membership consists of veterans from World War II, Korea, and Vietnam. Through its various programs, AMVETS stresses Americanism, patriotism, devotion to God and country, and service to one's fellowman.

In his presentation before the Veterans' Affairs Committee, Commander McDonough expressed AMVETS' concern over the need for a continued independent Veterans' Administration and veterans health care system to administer to the needs of the Nation's veterans, their survivors, and their dependents. He also stated his organization's concern over the continuing need to adjust existing programs to offset the increases effected by inflation. The national commander also made numerous specific recommendations dealing with taxation of veterans benefits, non-service-connected disability and death pensions, education and training, proposals which would authorize the judicial review of final determinations by the Administrator of Veterans' Affairs, and other general areas of interest to veterans and their families.

Mr. President, in order to share the concerns of AMVETS with my colleagues, I ask unanimous consent that the 1977 legislative program be printed in the RECORD.

There being no objection, the legislative program was ordered to be printed in the RECORD, as follows:

AMVETS' 1977 LEGISLATIVE PROGRAM, MARCH 25, 1977

(Statement of Thomas J. McDonough)

Mr. Chairman and Members of the Committee: To be accorded the privilege of appearing before this Committee is a singular honor in and of itself. In my capacity as the leader of a major veterans' organization, I am extremely proud in the knowledge that you recognize AMVETS as an inlet to the vast reservoir of matters for your consideration.

In view of this, I wish to express my personal gratitude and the gratitude of the entire membership of AMVETS and its Auxiliary to the Committee for this and past kindnesses, and our commendations on your fair and realistic approaches to the problems confronting our Nation's veterans and their dependents. The progress made during the 94th Congress illuminates the sound and fair approach taken to the vital matters with which you are concerned.

Since it is not our intent to consume an unreasonable share of your valuable time, our Testimony will be as brief as possible, touching on the highlights of our 1977 legislative goals with only the minimal amount of detail necessary to illustrate the important points which follow.

VA MEDICAL CARE PROGRAM

Of foremost consideration by AMVETS is the continuation of top quality medical care for our veterans. The VA's Department of Medicine and Surgery functions admirably in its performance of that mission. Through the VA Hospital System, the medical needs of veterans are served by extremely competent and highly-trained medical personnel. This specialized service has historically been provided by the Department of Medicine and Surgery. Our organization will relentlessly pursue the continuation of the VA Medical System as it currently exists and will strongly oppose any future attempts to encompass it within any other national health care program.

AMVETS commends this Committee and the individual efforts of its members and their colleagues for the positive approach taken to H.R. 2735 during the final days of the 94th Congress which resulted in the passage of the Veterans' Omnibus Health Care Act of 1976 (P.L. 94-581). We are gratified that this action satisfied, to a large degree, the concerns of AMVETS over the expanding needs for VA nursing care beds and the availability of quality care through community-based nursing facilities as expressed in our testimony before this Committee in 1976.

In addition to our continued and specific support of the VA Medical System as it now exists, we wish to reaffirm our strong opposition to the almost constant attempts to subvert and minimize the authority and mission of the Veterans' Administration as a whole. We shall never relent in our pursuit of the preservation of the Veterans' Administration as a separate and independent agency of the Federal Government and the functions, authority and responsibilities with which it is currently charged.

COMPENSATION AND DIC

The passage of the Veterans' Disability Compensation and Survivor Benefits Act of 1976 reflects that consideration was given to our 1976 Testimony wherein AMVETS requested an increase in VA compensation rates. At that time, we requested also that your Committee address the need for an increase in statutory awards for those veterans who are most seriously disabled.

H.R. 14299, which resulted in P.L. 94-433, provided for an 8-percent increase in compensation rates for both of these categories in addition to an 8 percent increase in Dependency and Indemnity Compensation (DIC) benefits for surviving spouses and de-

pendent children of deceased veterans when the death of the veteran is caused as a result of a service-connected disability. We are gratified that this legislation became reality. We believe, however, that this "eleventh hour" legislation was not responsive to the cost-of-living increases experienced prior to the enactment of P.L. 94–433. Therefore, we strongly urge that automatic future increases in compensation and DIC be provided in tempo with cost-of-living indices.

Prior to the convening of the 95th Congress, AMVETS submitted to this Committee an outline of Legislative goals and Objectives which we would be pursuing during 1977. Among these proposals, consideration of amendatory legislation was requested in the area of eligibility for DIC benefits. We restate our request that favorable consideration be given to legislation to amend Title 38, U.S. Code, Chapter 13, Section 410(b), to provide that, a veteran who is totally disabled (100 percent) at the time of death shall be considered to have died of a service-connected disability. This would establish the criteria for eligible survivors to receive DIC and attendant benefits. We urge further that the current twenty year time period required for the preservation of a total disability, as described in Section 110 of Title 38, U.S. Code, be reduced to a more realistic period of ten years. We will support legislation directed to that end with the provision that frequent reevaluation examinations would not be required, but we would have no objection to the inclusion of marital criteria as a condition for eligibility.

We reaffirm our opposition to any attempts directed to Federal taxation of VA compensation, DIC, pension or other VA monetary benefits. We commend also the instruction given to the Administrator of Veterans' Affairs to conduct a thorough study to determine whether DIC benefits should be based on the former military pay grade of the deceased veteran. AMVETS has long considered such a base to be an inequity in view of the fact that the cost-of-living is no greater for the survivors of a deceased General or Flag Officer than it is for those of deceased enlisted personnel of the lowest rank.

AMVETS endorses the intent of H.R. 2295 which would provide out-patient dental services and treatment to any veteran who has a service-connected disability rated at 60 percent or more.

NON-SERVICE-CONNECTED DISABILITY AND DEATH PENSION

AMVETS is in support of legislation which would provide for the exclusion of social security benefits as countable income for VA pension purposes. In full realization, however, of the fact that non-service-connected pension is based on need, we would lend our total support to proposals such as H.R. 904 which, if adopted, would exclude any part of social cost-of-living increases as countable income for calendar years after 1972.

As described in our preliminary statement of Legislative Goals for 1977 dated November 1, 1976, We bring attention again to our request for consideration to increase the current $1,200 unearned income limitation of the spouse to $2,200 which would equate the cost-of-living increases experienced in the last four years.

Among other inequities in the VA pension program as it currently exists, is one provision which has caused AMVETS considerable concern over the years. The rate tables direct that a living veteran with three or more dependents shall receive the maximum pension allowable in accordance with his/her income from other sources. On the other hand, a widow with more than three dependents, at the same income level, may receive VA pension at the same rate with additional allowances for each dependent child over three. We question the rationale behind this principle.

AMVETS lauds the action taken by this Committee which resulted in the enactment of the Veterans' and Survivors' Pension Adjustment Act of 1976 (P.L. 94–432). The provision of this law to make permanent the 8 percent increase in pension rates provided for in P.L. 94–169 and due to expire on September 30, 1976 in the absence of additional legislative action, confirms our opinion of the diligence and fairness of your members and their colleagues. We congratulate you also on the additional increase in pension rates, annual income limitations, housebound eligible veterans 78 years of age or older.

We urge your prompt attention to amend Title 38, U.S. Code, Section 503(a)(12) to additionally exclude educational benefits under Chapter 34 as income for pension purposes.

EDUCATION AND TRAINING

AMVETS is pleased with the increase in rates and the removal of the undergraduate use restriction as it pertains to nine additional months of entitlement contained P.L. 94–502 but we are concerned with the January 1, 1977 cutoff date for educational benefits. We fear that the elimination of education and training benefits will adversely affect the future recruitment of military personnel. Should a future *"draft"* become necessary, we will strongly support the implementaion of a "G.I. Bill" providing for improved benefits and embracing those members of the military who served after January 1, 1977.

AMVETS takes the realistic stand that flight training benefits should be eliminated. Whereas these benefits are programmed to provide funding for an activity which is largely avocational in nature and provides no assurance that the beneficiary will pursue this field of endeavor as a profession or as a means of employment, we hold that the monies allocated thereto could be best utilized in direction of sincere vocational rehabilitation, education and training programs.

PERIODS OF WAR

AMVETS is in agreement with the language of H.R. 240 which would amend Title 38, U.S. Code, to include as wartime veterans those persons who served during certain "expeditionary" actions, thus allowing those veterans to receive VA benefits to which they are not presently entitled.

JUDICIAL REVIEW OF BVA DECISIONS

AMVETS is opposed to any attempts to implement judicial review of claims beyond the authority of the Board of Veterans' Appeals. We believe that such review would place an unreasonable additional onus on our already over-burdened judicial system and would be extremely costly and difficult to administer and would not be in the best interests of the veteran.

BURIAL AND PLOT ON INTERMENT ALLOWANCES

We are in strong opposition to any attempts to eliminate or reduce the current allowances provided for the burial of wartime veterans.

NATIONAL CEMETERY SYSTEM

We reiterate our stand against the class burial concept at Arlington National Cemetery and again urge positive action directed toward the removal of the present restrictions and to allow for the burial of any Honorably Discharged veteran as long as plot space remains available.

AMVETS restates our recommendation that a National Cemetery be established in each state and that Federal funds be provided to the states for this purpose.

G.I. HOME LOANS

An increase in the current maximum VA Home Loan Guarantee Entitlement is held to be in order at this time. The maximum entitlement was increased in 1974 from $12,500 to the current $17,500, representing an increase of $5,000. Real estate costs have soared in tempo with all other facets of the cost-of-living index. Lending institutions are hardput to advance loans without sufficient guarantee of repayment in view of the current economic situation. Additionally, many homes purchased under the G.I. Loan programs after World War II and the Korean Conflict are in need of repair or improvement. The ending of the Viet Nam War puts additional emphasis on the need for suitable veterans' housing. AMVETS believes that these facts lend sufficient substantiation to the need for an increase in G.I. Loan Entitlement.

VETERANS' EMPLOYMENT

AMVETS is gravely concerned over the high unemployment rate, especially as it pertains to Viet Nam Era veterans. The current economic crisis has understandably created joblessness in all segments of our population. However, the unemployment ratio of the younger, the disabled and the minority veteran is severely disproportionate to the overall picture. We laud the steps taken during the 94th Congress in this connection, particularly the establishment of the position of Deputy Assistant Secretary of Labor for Veterans' Employment. We shall continue our efforts toward the improvement of veterans' employment practices and policies and have submitted to the Administration the following proposal, among others, and would urge affirmative Congressional action and support if and where needed.

AMVETS has particular concern over the grim situation facing many of our older veterans caught in the wake of industrial shutdowns and relocations. Unemployed and untrained in other skills, this segment of our veteran population is confronted with an almost hopeless future in the absence of retraining programs which will provide the necessary skills for meaningful employment in other fields. It should be noted that these veterans, for the most part, have contributed continuously to our society through their maintaining of steady employment over the years and are now in need of assistance which was previously unnecessary. We propose that such re-training programs be implemented.

Before concluding the employment portion of our testimony Mr. Chairman, we wish to call your attention to the following critical items relative to the employment problems of America's veterans.

AMVETS is disappointed that a Deputy Assistant Secretary of Labor for Veterans' Employment, as called for by P.L. 94–502, has not yet been appointed and we urge prompt attention to this important matter. AMVETS believes the selection of the Deputy Assistant Secretary for Veterans' Employment should be based on the individuals knowledge of the problems, programs and services available to our veteran community. We believe the criteria for this position should be based on experience, ability, knowledge and acceptability to veterans groups without regard to race, creed, color or political associations.

AMVETS further recommends that the Veterans' Employment Service be elevated from its present position in the United States Employment Service to a management level with direct contact to the Assistant Secretary of Labor for Employment and Training and that the office be totally funded to administer the Department of Labor's Veterans' Employment Programs.

In addition, we firmly believe that the Office of Veterans' Reemployment Rights and Office of Federal Contract Compliance should be combined and placed within a single agency charged with the administration of veterans' employment programs in the Department of Labor.

GENERAL AREAS OF INTEREST

AMVETS continues to espouse the necessity to maintain and improve a strong and formidable National Defense policy. We would strongly oppose with all means at our disposal any attempts to cut the Defense Budget and support with equal vigor affirmative action directed at implementing the production of the B–1 bomber, the cruise missile and the allocation of additional funds for the continued procurement of the Air Force's new F–16 fighter.

We must reiterate our total opposition to any attempts directed at the unionization of the Armed Forces or to the granting to military personnel of any collective bargaining rights not provided for in the uniform code of military justice as that code currently exists. It must be made clear that AMVETS does not dispute or oppose the principle of organized labor, but does question the effects such a practice would have on military discipline should military personnel be given the right to question or disobey the lawful orders of their superiors.

We strongly oppose any proposals directed at deferring payment of military retirement pensions until the retiree reaches a more "normal retirement age of 55 or 60." A regulation of this nature could do nothing but discourage potential personnel from pursuing military careers.

We continue to be adamantly and irrevocably opposed to the President's amnesty/pardon action. We recognize the Presidential pardoning powers as contained in Article II, Section 2 of the United States Constitution as the law, but advocate concurrently a Constitutional amendment to limit that power in the interests of the "equal justice under law" concept which is the foundation of the American system of government.

AMVETS vigorously supports the efforts of the FBI, the CIA and other security agencies whose mission is to maintain the security and integrity of our country within the intent and framework of the law.

The issue concerning U.S. sovereignty over the Panama Canal remains as a top priority area of concern for AMVETS. We will continue our efforts to defeat any attempts at the surrendering of that sovereignty.

We urge Congressional support to Senate Concurrent Resolution 5 which would continue to oppose United Nations membership for the Socialist Republic of Viet Nam until a satisfactory accounting of American persons listed as "Missing-in-Action" is received. We have, additionally, asked the President to appoint representatives of the major veterans' organizations to the newly created "MIA" Task Force.

We support the proposal to allocate funds to erect a monument at Arlington National Cemetery in memory of those Americans who did not return from the war in Southeast Asia.

We are mandated to oppose any effort directed to lowering the established criteria, relative to the issuance of an Honorable Discharge.

We reiterate AMVETS opposition to reduce in size or scope of activity or to eliminate the commissary system as it is now constituted.

The allocation of additional funds to support the U.S. Soldiers and Airmen's Home in Washington, D.C. continues to be an important pursuit of AMVETS.

We are mandated by Convention Resolution to strongly recommend that Memorial Day be restored to its original traditional date of May 30th and we will support legislation to restore other traditional American holidays to their original dates.

The interest of AMVETS to other legislative matters affecting veterans and the Nation will continue to be of priority importance and we shall be honored to submit future testimony on those and other matters of concern before your Subcommittees.

CONCLUSION

In conclusion, Mr. Chairman, may I cite the positive action taken recently to preserve the Senate Committee on Veterans Affairs and the support given in strength by AMVETS and other major veterans' organizations. We assure the Congress, collectively, that we will oppose, with renewed and additional vigor, any future attempts to subvert or reassign the authority of or to eliminate or reduce in size, the Committee on Veterans Affairs of both Houses of the Congress.

Again, and finally, we offer our heartfelt appreciation for the personal courtesies extended by this Committee on this and prior occasions.

Mr. Chairman, my staff and I will be pleased to answer any questions the Committee members may wish to ask.

BLOOD DONORS

Mr. SPARKMAN. Mr. President, the students of Austin High School in Decatur, Ala., collected 1,728 pints of blood yesterday. I understand this exceeds the former world's record by some 200 pints.

I commend Alan Smith and Cathy Williams who spearheaded the drive, along with the entire student body and faculty of Austin High School. I am always pleased to bring the accomplishments of our young people in Alabama to the attention of my colleagues and the public. I am particularly proud of these high school students in my native Morgan County for their monumental achievement.

CURRENT U.S. POPULATION

Mr. PACKWOOD. Mr. President, I wish to report that, according to U.S. Census Bureau approximations, the total population of the United States as of April 1, 1977, is 216,790,461. In spite of widely publicized reductions in our fertility levels, this represents an increase of 1,521,519 people since April 1 of last year. It also represents an increase of 96,169 people since March 1, 1977, that is, in just the last month.

Over the year, therefore, we have added enough people to fill the combined cities of Minneapolis, Minn., Fort Worth, Tex., and Jacksonville, Fla. And in just 1 short month, our population has grown enough to more than fill the city of Racine, Wis.

FISCAL 1977 ECONOMIC STIMULUS APPROPRIATION ACT: FUNDING FOR OLDER WORKER PROGRAMS

Mr. CHILES. Mr. President, I support the adoption of the fiscal 1977 Economic Stimulus Appropriations Act, a measure which is needed to stimulate our economy and to provide additional job opportunities for unemployed persons.

I am especially pleased that the Senate Appropriations Committee—of which I am a member—included a $59.4 million funding increase for the title IX senior community service employment program.

All Americans have been affected in one form or another by the 1974–75 recession, but older workers have been especially hard hit. A recent Committee on Aging working paper reveals that persons 55 or older run a much greater risk of being unemployed for a long period of time after they lose their jobs. Others find themselves going down the occupational ladder in attempting to remain employed.

The harsh reality is that advancing age is a serious employment barrier.

However, the title IX senior community service employment program provides meaningful employment for low-income persons 55 or older. For many older Americans, it offers a dignified means to help themselves by helping others in their communities. For others, it provides a second career in purposeful activity.

Nearly 15,000 individuals are now employed in title IX programs throughout the Nation. The Senate Appropriations Committee bill would raise this total to 37,400.

In my home State of Florida, 690 individuals 55 or older are employed in four title IX programs: Green Thumb, Senior Aides, Senior Community Service Aides, and the Forest Service. The funding increase in the Senate Appropriations bill would create an additional 22,600 jobs for older workers, including almost 1,200 for Floridians 55 or older.

In addition, the Senate bill would extend 71 older worker projects originally funded by the Administration on Aging under the title X job opportunities program of the Public Works and Economic Development Act.

These projects provide employment opportunities for 4,811 persons 50 years or older in a wide range of capacities, including environmental aides, home health aides, parks and recreation aides, legal services aides, ombudsmen, and preretirement counselors.

Equally important, title X has helped to deliver essential services while providing much-needed income for unemployed older Americans.

In Florida, 577 individuals are employed in projects administered by the Florida Office on Aging, the National Farmers Union, the National Council on the Aging, and the National Retired Teachers Association-American Association of Retired Persons.

Many older Americans now believe that advancing age shuts them off from gainful activity. But this need not—and it should not—be the case.

The later years can also be a time for service and continued self-development. Why should our Nation attempt to stifle activity when inactivity may be the elderly's greatest enemy?

Most older Americans have led productive lives during their younger years. They should continue to have the opportunity to remain active during their later years.

The title IX and title X older worker employment programs provide aged and aging Americans greater latitude in engaging in purposeful activity, as well as a means to supplement their limited incomes.

For these reasons, I reaffirm my support for the funding in the Economic Stimulus Appropriations Act to develop job opportunities for older workers.

NATIONAL WATER POLICY

Mr. DOMENICI. Mr. President, yesterday morning the Committee on Environment and Public Works began hearings on national water resources. In April I will travel to New Mexico where the committee will hold similar hearings in the field. Other members of the committee will journey to their States to assess the needs of their constituents with respect to water resources. It is my profound hope that out of this effort will emerge a legislative package which will form the nucleus of a national water policy, which this country gravely needs.

Last week, Gov. Richard D. Lamm of my neighboring State of Colorado, offered an editorial on water which appeared in the Washington Post. This editorial sets forth a view which is rarely heard on this water-rich east coast. Governor Lamm cites some alarming facts, for example—the inland West, which comprises more than half of the land mass of the United States, receives less than 15 percent of the total national precipitation.

At the same time, we in the West are being asked to make major contributions to production of food and energy which will sustain this Nation and others into the future. We simply have got to have a sound national water policy—and that policy must embrace the very special and critical problems of the West.

I ask unanimous consent that this excellent editorial be printed in the RECORD, Mr. President, so that my colleagues may benefit from its point of view.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE VIEW FROM THE MOUNTAINS

(By Richard D. Lamm)

John Gunther once wrote about Colorado: "Touch water, and you touch everything; about water, the state is as sensitive as a carbuncle." This needs to be truly understood when judging the reaction of the West to the President's attempted cancellation of a number of Western water projects.

Water in the West is a precious and quixotic substance. Scientists have established that the High Plains experience a drought of serious proportions according to a relatively fixed 20-year cycle. We stand at the threshold of a new drought and for the first time since the 1930s, we see giant dust storms. The nightmares of the '30s increasingly haunt us.

But even in the normal years, water in the West is never available in abundant supply. Draw a vertical line between Kansas and Missouri and 73 per cent of the nation's precipitation falls *east* of that line. Of the remaining 27 per cent, about half falls in the Columbia River Basin, leaving 14.2 per cent of the nation's total rainfall to be divided by 14 Western states comprising over half the land mass of the United States.

This situation of continuous scarcity places grave demands on the semiarid state of Colorado. Yet, we do not get to keep even the limited precipitation that we have. The old proverb, "He who controls the mountains controls the rivers," was obviously written before the day of interstate water compacts. Some 11 other states depend in whole or in part on Colorado's water runoff. Ultimately, Colorado gets to use less than half of its annual precipitation.

Like many Western states, Colorado gets most of its water by runoff over a 60-day period in the spring. We capture it or we lose it; thus, reclamation becomes a major issue in the West. Our social and economic fabric depends on effective utilization of the small amount of water we have, and effective utilization depends to a considerable extent on reclamation projects.

The era of developing large, new water sources is coming to a close. Few people today realistically talk to large-scale diversion of Canadian or Columbia River water or hope to start endless new reclamation projects. The Bureau of Reclamation did, in fact, "make the deserts bloom" in years past, but the possibility of a large number of additional projects is neither politically nor economically possible.

But we do want existing obligations fulfilled.

Much of the economic and political history of the West is written in water. John Wesley Powell, the great explorer, told the Mountain Constitutional Convention in 1889 that "all the great value of this territory has ultimately to be measured in acre feet." We may become the rallying point of the West. If the South felt like a stepchild of the United States until President Carter, the West does now.

The federal government owns 50 per cent of the West; yet it expects us to produce large quantities of coal, shale oil, uranium, produce and wheat, all of which requires massive amounts of water. It waits until we get in the middle of our driest year in recorded history, and then stops numerous water projects already under construction.

It is not an auspicious start.

President Carter has lived through and experienced sectional discrimination; he is a sensitive man and clearly wants to be even-handed. But his vision should not be limited by sectional experience. Water projects may be regarded as little more than boondoggles in the East. Perhaps some of the Western water projects are unjustifiable and deserve close scrutiny. But it is the Western states that will have to live with these projects, and when, as in Colorado, they had been subjected to intensive ecological and economic analysis before receiving the state's imprimatur, it is unfair and unwarranted for the federal government to suddenly initiate yet another review process.

For Coloradans, these projects represent economic viability to a large number of agriculturalists and a hedge against drought to many small towns whose municipal water supplies are currently totally dependent upon yearly rainfall. Small wonder that water is, one of the state's residents stated recently, a "get-your-gun" issue.

We are all victims of our history—Southerner or Westerner. The West is willing to develop its natural resources for the nation's benefit, as long as that development pays its own way and does not despoil the land. Yet, if that is to be accomplished, the West must develop many of these existing reclamation projects.

People tend to forget just how fragile the Western environment really is. One can still see the wagontracks from the Oregon Trail of the 1840s—the land has never healed. The West is willing to accommodate itself to the continuous scarcity of moisture. All we ask is that we are given the tools to develop and manage effectively the little water we have.

FULL LIABILITY FOR NUCLEAR POWER

Mr. GRAVEL. Mr. President, Federal District Judge James B. McMillan of Charlotte, N.C., has ruled that the Price-Anderson Act is unconstitutional. He said the act, which limits the public liability of nuclear power companies in the event of catastrophic accident at a power reactor, is a deprivation of property without due process.

In plain language, a nuclear power accident could conceivably cause billions of dollars in damages to the public—up to $14 billion, according to a recent authoritative estimate. But the power company whose reactor caused such an accident would be exempt from paying full damages in such an accident.

Nuclear proponents have tried for years—with remarkable success, I might say—to disguise the basic inequity of this act. Their argument has relied on two irrelevancies:

First, they say, the chance of nuclear accident is "vanishingly remote."

Second, the Government has provided increasing amounts of indemnity in the event of such an accident.

The fact is that the fundamental injustice of the Price-Anderson Act has nothing to do with these assertions—dubious as they prove, under examination, to be.

The function of third-party liability in our society is to put responsibility for hazardous activities on those who carry out the hazardous activities—those who, presumably, stand to profit from the activities. By requiring a power company and its insurer to be responsible for full damages, you force it to assess the danger involved in relation to the profits to be gained.

This is the beauty of our liability system—its self-regulating nature. Under this system, the company itself compares the degree of hazard with the possibility of profit. This is a very efficient way of making a real-life cost-benefit analysis of a hazardous activity. It leaves Government a minimal role, and it puts the decision into the hands of those who really know most about the subject.

To see the injustice and overall social undesirability of the Price-Anderson Act, one need not assail the Government-sponsored assessments of the chances of nuclear catastrophes; one need not show that in uninflated dollars, Government indemnification has decreased, not increased.

One need only see how it benefits society on the whole to place full liability for damages on those who cause the damages. A natural system of checks and balances occurs in this instance.

In this specific case, nuclear power grew with unnatural speed as a result of Price-Anderson—and the fact that the nuclear industry is now in economic ill-health has a great deal to do with the fact that it grew largely as a result of Price-Anderson—almost, in fact, by Government fiat.

Had Government not artificially induced nuclear power growth by exempting this industry from the checks and balances of public liability, the growth of the industry would have been based not on wishes for cheap, abundant energy, but on realistic appraisal of the limitations—both technological and political—of atomic energy.

Many in the nuclear industry claim that reactors will continue to be built without Price-Anderson protection. The important thing is that, if Judge McMillan's decision is upheld, the decisions of the industry will be laid on sounder foundations.

In December 1975, 35 Members of the Senate supported my amendment to impose full third-party liability on the nuclear industry. Their votes were consistent with Judge McMillan's decision.

I believe we only stand to benefit from the reimposition of full liability on the nuclear industry.

LEGISLATIVE PRESENTATION OF THE VETERANS OF WORLD WAR I

Mr. THURMOND. Mr. President, the Senate Committee on Veterans' Affairs was recently privileged to receive the legislative concerns of the Veterans of World War I of the U.S.A., Inc. Appearing before the committee were the national commander of the Veterans of World War I, the Honorable Bruce Bennett, and the national legislative director, Mr. Harold B. Say.

The Veterans of the World War I of of the U.S.A., Inc. was founded in 1949 and has more than a quarter of a million members. Through its legislative program and service programs, this great veterans' organization stresses Americanism, advocates a strong national defense, and sponsors service programs to veterans of World War I, their widows, and dependents.

In his presentation before the committee, Mr. Say emphasized that the Veterans of World War I are interested in the maintenance of an independent Veterans' Administration and VA health care system to continue administering to the needs of the veterans and their families. Other important concerns of this veterans' organization, as expressed in the presentation before the committee, were the need for an adoption of a meaningful pension measure for World War I veterans, the necessity of adjusting existing programs by periodic cost-of-living increases, the necessity of adopting innovative approaches to care for our Nation's elderly veterans, and a variety of other recommendations designed to meet the changing needs of our veterans population.

Mr. President, in order to share the legislative concerns of the Veterans of World War I with my colleagues, I ask unanimous consent that their legislative statement be printed in the RECORD.

There being no objection, the legislative statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY VETERANS OF WORLD WAR I OF THE U.S.A., INC.

(By Harold B. Say)

Firstly, Mr. Chairman, I repeat our thanks and appreciation for opportunity to appear before you today to present our general desires in the field of veterans' legislation. And again, our appreciation for what this Committee has done in bettering the status of veterans of World War I. Our organization is highly pleased that the Committee was kept intact.

In frank honesty the number one point of interest of our members is the enactment of a general, meaningful pension bill for men who served in World War I and for their widows. We are aware of the fact that this Committee in general has a philosophy of a "needs" measurement before granting a pension. Reasoning of our own organization is based on "equity"; of giving World War I veterans something to compensate for the billions given later veterans—approximately 40 billions in educational aid alone. We will expand on this phase in later portions of our presentation or argument.

Our organization is interested in all angles of legislation affecting veterans, particularly in that bearing on the Veterans Administration and its work. In our mind, it is a magnificent organization, depite any shortcomings.

Veterans of World War I have been concerned with distant rumbles which have suddenly grown louder in the precincts of those who would erode the veterans' structure; who would toss them in the same basket with all other social welfare cases and groups. Some of these social planners would do away with veterans' hospitals. We have complete faith that this Committee will resist any efforts to erode the status of the veteran or the institution his government built to assist and care for him when in need of care and assistance.

National Health Insurance is under the jurisdiction of other committees. However, whatever is evolved in this field can have direct bearing on the welfare of veterans and their kin. We hope you will stand firm against any steps carrying hazard for the fine Veterans Administration program of medical care for veterans and the pension system.

We would urge that clear language be written into any legislation on the subject specifically guaranteeing that the VA medical program be kept intact and exclusively for the care of veterans. We want no merger of the VA system into a general national health care program.

On the existing "needs" or welfare pension program, we again urge that Social Security income not be counted in arriving at income limitation totals. Again this year we have been deluged with letters, many of them starkly pitiful, from veterans or widows who have had their pensions cut due to increases in Social Security. Social Security increases theoretically were for the purpose of increasing incomes of all the elderly. This these increases accomplished except in the case of the veteran on pension. In his case the government gave with one hand and took away with the other.

This Committee has before it S. 107 by Senator Pearson which would correct this injustice. We hope this Committee will report it or a similar measure out favorably.

Our organization appreciates that this Committee recognized cost of living jumps by upping pension rates at intervals. We would urge that pensions be increased at least six percent this year to meet cost of living increases.

This same principle should apply in the disability compensation program. The disabled veteran must have some way of meeting increased costs in groceries, quarters and other living expenses.

We are not in position to have exact facts and figures, but we know with the size of the veteran population today and because all of them are growing older that added hospital facilities and increased medical services in the immediate years ahead will be imperative. Such information as we have indicates that at least 1,000 additional personnel are needed now if patients in VA hospitals are to have the highest quality care. I am certain we do not need to urge this Committee to concern itself with such items as hospital and medical facilities.

Old hospitals ultimately have to be replaced or renovated. Money is required for either.

World War I veterans now have an average age of around 82 years. Most of our widows are past the age of 72. Obviously, at these advanced ages, health considerations are most important. Therefore, we would like to recommend that in the framework of the existing pension program that there be a presumption of "housebound" at age 78 for veterans so that any World War I veteran would receive $60 per month plus his regular pension on achieving this advanced age. In addition, we would like to recommend that a housebound rate of $40 per month be instituted for the widow who reaches age 75.

Since our primary concern is the problem of advanced age and accompanying health problems, we would like to recommend for the Committee's consideration that a deduction from gross countable income of 20 percent be applied automatically to offset additional expenses for health and special dietary needs associated with advanced age. We recommend that the veteran or widow be given the option of deducting 20 percent for the purpose of covering unusual medical expenses, special dietary needs and other expenses which are attendant to advancing age or, if the veteran or widow has exceptional medical expenses exceeding 20 percent in a given year, the individual be accorded the privilege of deducting the higher amount.

Our organization would urge that legislation be drafted providing that Veterans of World War I receive the same treatment as do Spanish American War Veterans in the matter of admission to VA hospitals and in outpatient medical and dental care. Our organization at its 1976 convention passed unanimously a resolution urging such legislation.

Everyone knows that a dollar today does not buy what it did a scant ten years ago. This fact applies with elements connected with death. We would urge this Committee and the Congress to increase burial allowance from $250 to $300; allowance for a plot from $150 to $200.

Veterans of World War I would like to see enacted a minor change in the matter of supplying cemetery markers. It would urge the Congress to authorize the furnishing of memorial markers for graves in private cemeteries in "instances wherein the remains of an honorably discharged serviceman are not recoverable".

Inheritance tax exemption on farm lands has been $60,000. In many cases parts of a farm must be sold to pay inheritance taxes. Our 1976 convention passed a resolution urging that this exemption be raised to $250,000.

A paragraph I enter now is rather a side matter but it concerns a case of some badly overlooked veterans—the women telephone operators of the AEF Signal Corps in 1917–18. General Pershing on arrival in France in 1917 perceived at once that he would need some 300 women telephone operators, mostly able to speak French. Army Regulations of 1917 specified that a member of the Army, other than a nurse, must be a male.

The General did not stop and wait until he could get the law changed. His Army officers at his direction simply swore them into the Army. Overseas, they were under strict Army discipline; wore Army uniforms and insignia.

When the war was over, these women went back to civilian work or to that of housewives, raising babies and such. Their war work was done.

Not until many years later did it occur to them that they were veterans and should

be so classed. Only about 60 of the approximate 300 of these telephone girls of 1918 are alive today. Numerous bills have been introduced to give them veterans' status. They have repeatedly been turned down on the grounds that they were civilians on contract status. Last year Brock Adams, then a Representative from the State of Washington, now Transportation Secretary, when he entered a bill proposing veterans' status for the women, called upon the Pentagon to produce a copy of a contract with any of these women. The Pentagon could not produce one for the simple reason that none existed. The women were sworn directly into the Army.

We feel a deep injustice has been done to this group of fine women, and hope this Committee will give genuine consideration when a bill reaches you.

Reverting to the issue of pension for veterans of World War I, we would point out that veterans of all wars previous to World War I received a pension. Veterans of World War II and later conflicts have received bounteous benefits. These facts leave 1917–18 men standing alone and largely overlooked. We cannot feel they are less deserving than other veterans. Had veterans of 1917–18 received what later veterans have been granted by their government, we would agree to the philosophy of "needs" only in granting a pension. But they have not received such benefits. At the risk of boring you with repetition from previous years, we would again point out that the War I veteran received $60 on day of discharge; later an average of $547.50 in adjusted service certificate compensation. Sixty dollars in 1919 would just about pay for a suit of civilian clothes. And these two sums totaling $607.50 were all he received in the way of a reward for service. Because of the vicious depression of the thirties many veterans had to borrow on their certificates at high rates, and never realized the face value.

World War II veterans under the GI education aid legislation received $16,576,939,000. They and later veterans have received nearly 40 billion dollars in educational aid alone.

Our World War I veterans do not begrudge this aid to later veterans. A fraction of these billions would have been a vast aid to War I men had it been available to further their education. It is generally agreed that their educational level was about sixth grade. It is undoubtedly accountable for the fact that so many of them are in dire straits today. War I men were too early for fine pension plans in effect today. Also their age made many of them too late to realize maximums in Social Security.

We know a vast number of them are hard pressed to exist. A general pension of around $150 a month would be a heavenly gift to great numbers of them.

Our numbers are dropping rapidly. Not one-fifth of those who went to war in 1917–18 are alive today. Fifteen years from now their average age will be that of the Spanish War veterans—around 96, and fifteen years hence only about 12,000 of them will be on earth.

To benefit this dwindling band, a pension will have to come soon. We repeat that we would have no grounds on which to plea for a pension had our people enjoyed benefits approaching those bestowed on later veterans. It is too late to send World War I men off to school at $250 or more a month. The only path toward partial equity is a pension. We hope this Committee can come to this conclusion.

Your Committee has before it S. 317 by Senator McGovern and S. 450 by Senator Durkin, both of which would establish a general pension of $150 a month for a veteran with a dependent; $135, if alone. Our organization would be happy with either bill or one akin.

We are hopeful that you can agree with the logic of our argument on this pension phase. Thank you.

Respectfully,

HAROLD B. SAY,
Legislative Director, Veterans of World War I of the U.S.A.

EXTENSION OF THE EMERGENCY UNEMPLOYMENT COMPENSATION ACT

Mr. RIEGLE. Mr. President, the passage and enactment of H.R. 4800, a bill to extend the Emergency Unemployment Compensation Act for 1 year, is vital to hundreds of thousands of unemployed Americans who are unable to find work. This legislation extends the Federal supplement benefit program and allows unemployed workers to receive unemployment benefits after they have exhausted their 39 weeks of regular and extended benefits. This means they will be able to continue with the unemployment compensation system that has proven so valuable during the recent recession and lagging recovery.

The unemployment compensation system is especially effective for several reasons and they deserve to be mentioned during the current debate:

First. It has a built-in self-destruct feature; as people return to work, the program diminishes automatically;

Second. It stimulates the economy by bolstering personal income and consumption. It generates a higher level of general commercial activity—increasing jobs and boosting tax receipts;

Third. Almost every incremental dollar spent converts directly to purchasing power in the hands of people who need it most;

Fourth. Unemployment compensation does not destroy a person's psychology or take away his pride. It does not destroy his incentive to return to work.

And our unemployed citizens do want to work. Many of those receiving benefits have worked for 20 to 30 years and contributed to our economic vitality. They are now unemployed through no fault of their own and are seeing years of hard work and effort going down the drain.

We are recovering from the worst recession this country has experienced since the Great Depression of the 1930's. The recovery is much slower than the economists predicted with 7.6 million workers still unemployed. Even the most optimistic forecasts do not project the unemployment rate to drop drastically in the next year or so. This is not the time to eliminate a program that provides a minimum level of income security protection to so many of our citizens. And the amount it provides is certainly not exorbitant. In my own State of Michigan, the average payment is $88 a week.

We are constantly reminded that the unemployment insurance system was never designed to handle nationwide unemployment on the scale we have experienced over the past few years. As a result of the state of the economy and the severe unemployment rate, 24 States have had to borrow a total of $4.4 billion from the unemployment compensation loan fund. My own State of Michigan has had to borrow $624 million. One important aspect of H.R. 4800 is that it includes a deferral of these State debts for an additional 2 years.

Considering the recent two-tenths of 1 percent increase in the FUTA tax required by H.R. 10210, and current and projected economic conditions, it would be a real hardship for businesses in a State like Michigan to have their taxes raised by an additional three-tenths of 1 percent each year to pay off a debt incurred during a long-term recession. It is easy to see where an imposition of this tax would lead. Businesses will simply decide it is not worth it to come to States that are in a deficit, and national corporations that are based in States that owe the Government money are not going to expand them in a State that has not been hit this way.

That might sound attractive to someone from a State that has not been affected. That might mean more jobs for another State. But it is not that simple. In my judgment, there is an enormous national cost to this kind of basic dislocation. In addition, the States that are the winners this time around on that kind of inequitable system could very well be the losers next time. That is why I feel it is important that we develop a comprehensive cost equalization/reinsurance proposal that will tie all of the 50 States together so that we all share the risks of another recession and long-term unemployment.

A 2-year deferral of the debt repayments will give us time to develop and enact comprehensive cost equalization/reinsurance legislation. Let me take a moment to explain what I mean by that. Cost equalization is intended to assist those States that are experiencing benefit costs in excess of a national standard that would be applicable uniformly to all States. States would receive reimbursement for a portion of their excess costs—those costs which exceed the national standard. Reinsurance is intended to provide assistance to a State whose current benefit cost experience is unusually severe when measured against the State's own historical experience. Again, a State would be reimbursed for only a portion of the excess costs—those costs which exceed the historical experience by a specified level. Legislation containing these basic elements would go a long way toward restoring a sound, equitable unemployment compensation system.

One final point I would like to make is the importance of general revenue financing of Federal supplemental benefits as included in this legislation. An unemployed worker should no longer be considered the responsibility of his employer after 39 weeks. By taxing an employer for these benefits we are really penalizing him for a long-term recession that is a result of national economic policies. General revenue financing will help to lift the heavy burden these employers are experiencing.

In conclusion, I would like to reemphasize the importance of a sound, comprehensive unemployment insurance system that equally shares the benefits and risks among all the 50 States. How-

ever, we must keep in mind that the ultimate and most practical solution to this long-term problem must be the adoption of a full employment policy that puts our people back to work.

OUTSTANDING CHOICE TO HEAD THE NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION: JOAN CLAYBROOK

Mr. PERCY. Mr. President, it is a tribute to the capabilities of the many public-interest lawyers who have been working so effectively in Washington for the last decade, that President Carter has recognized those talents and sought to bring them into his administration.

Many of these recent nominees have already spent time working in the Federal Government, some for the agency or department they have been selected to head. This experience will serve them well as they now assume the great responsibilities of executive level decisionmaking.

One nomination in particular deserves the highest commendation—that of Joan Buckler Claybrook to head the National Highway Traffic Safety Administration. Ms. Claybrook's qualifications for that position are superb. As the director of Consumer Watch, she has testified before congressional committees on numerous occasions and has always impressed me with her substantive contributions, her intelligence and her integrity.

Even before she began working on safety legislation at NHTSA as executive assistant to the first administrator of the 10-year old agency, Ms. Claybrook had begun to develop a valuable expertise in both highway safety and the legislative process. Dr. William Haddon, Jr., president of the Insurance Institute for Highway Safety and the first head of the traffic safety agency, credits Ms. Claybrook with having an important role in the enactment of the Automobile Safety Act of 1966. That measure established the National Highway Traffic Safety Administration. Now, she will have the opportunity to put her hard-earned experience and uncanny enthusiasm to work as administrator of the $180 million agency. In that role, I am confident she will serve the public interest well.

Ms. Claybrook has shown herself an effective administrator at Consumer Watch and a resourceful spokesperson for the American consumer. Her consumer advocacy, however, will not preclude her from being an honest arbiter of Federal safety regulations. The automobile industry can expect to be treated fairly and with consideration. I am certain that Ms. Claybrook recognizes the great achievements of that industry and its importance in the implementation of national traffic safety standards.

Just as Ms. Claybrook was a respected consumer spokesperson, she will be an equally respected and independent head of the NHTSA. As Automotive News, a trade publication, has said, "We believe Claybrook will be beholden to nobody, including Ralph Nader or any other special interest group, and look forward to seeing someone at the head of NHTSA who understands the workings of the department." I share these sentiments, and look forward to her leadership and success.

Mr. President, I ask unanimous consent that the New York Times article announcing Joan Claybrook's nomination to head the National Highway Traffic Safety Administration be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LOBBYIST FOR NADER TO HEAD SAFETY UNIT

(By Ernest Holsendalph)

WASHINGTON, March 18.—Joan Buckler Claybrook, an experienced advocate of consumer causes and Ralph Nader's chief lobbyist here, was formally nominated today by President Carter to head the National Highway Traffic Safety Administration.

The 10-year-old agency has been involved in setting safety standards for automobiles and other vehicles as well as designing a program of fuel economy standards for vehicles.

A pressing concern of the agency is a reevaluation, starting next month, of Government policy toward the controversial system of airbag restraints for automobiles much admired by most safety-oriented consumer organizations and Miss Claybrook but strongly resisted by the large automakers.

The Ford Administration had signed agreements with the automobile companies to equip only a limited number of cars in the future with airbags, even though the traffic safety agency found them practical for use as lifesavers in vehicle crashes.

REACTIONS VARIED, BUT STRONG

Reports that Miss Claybrook, who served as an executive assistant to the first administrator of the safety agency, was favored for the post stirred strong but mixed reactions. In an interview today, Miss Claybrook, evidently on instructions from the Department of Transportation, declined to discuss her ideas on vehicle safety beyond saying she had "a deep and abiding interest in the subject."

S. L. Terry, vice president for public responsibility and consumer affairs at Chrysler, said he found the prospect of her appointment "appalling."

"She has always been against the industry," he said. "It certainly does not seem to be an even-handed appointment. I would not expect that the Department of Transportation would appoint an auto executive, but likewise I also wouldn't expect the appointment of an industry critic or a Nader supporter. There must be a lot of people better qualified."

Late today, Thomas A. Murphy, chairman of General Motors, issued a statement, saying, "We hope that she will approach the responsibilities of the position with an open mind, fairly considering all legitimate points of view."

Martin J. Caserio, vice president and group executive at General Motors, observed: "There will be some criticism and, I suppose, some accolades if she is appointed. She has been quite critical of the industry—she will be quite a change."

Clarence Ditlow, who heads the Center for Auto Safety here, said she was "extremely hardworking and an aggressive individual who will enforce the law."

HELPED WRITE SAFETY ACT

Dr. William Haddon, Jr., president of the Insurance Institute for Highway Safety and the first head of the safety energy, praised Miss Claybrook for her knowledge of the field, adding that she had a substantial hand in writing the automobile Safety Act of 1966 that gave rise to the traffic safety agency. "She is one of the best lobbyists on the Hill," he said.

Proponents of a more aggressive automobile safety policy say they expect the Administration, for the first time since it was granted in 1976, to exercise the subpoena power of the agency to obtain accurate cost figures for meeting safety standards, eliminating defects and making other improvements. Also, they hope that information about the number of serious complaints by vehicle users can be obtained.

They also will press for measures to improve pedestrian safety by adopting standards to remove sharp edges from vehicles and promote designs that will pitch pedestrians atop vehicle hoods rather than under the wheels in an accident.

Perhaps most important, a more active department would monitor compliance with standards more closely, said Mr. Ditlow of the Center for Auto Safety, which is associated with Mr. Nader.

Miss Claybrook, who now directs the work of Congress Watch, which lobbies on a variety of Nader causes, was born 39 years ago in Baltimore. She grew up there, received her undergraduate degree from Goucher College, in Towson, Md., and later earned a law degree from Georgetown University here.

She worked for six years in the legislative department of the Social Security Administration in Baltimore before moving to Washington in 1965 on an American Political Science Association fellowship. She then did legislative staff work on the Hill, including a stint for then Senator Walter F. Mondale.

WORKED IN SAFETY AGENCY

Subsequently, she worked on safety legislation and served in the highway traffic safety agency until 1970, when she left to work briefly for then Representative Paul S. Sarbanes, now a Senator from Maryland. She then entered consumer work.

"I did work on a variety of issues, including procedural rights in the legal system, consumer protection, toxic substances, 'sunshine' legislation and antitrust amendments last year," she said today.

Even though most spokesmen for the automobile industry have been at least wary of Miss Claybrook, the Feb. 21 issue of Automotive News, a trade publication, sounded an accommodative note:

"We hope that the auto industry will give Claybrook a period of grace before those certain slings and arrows are fired at her. We must take exception to the label that is being put on Claybrook as being in Ralph Nader's hip pocket. When Dr. James Gregory left Union Oil Company to head N.H.T.S.A., we didn't hear anyone shouting that he would be in the oil companies' hip pockets.

"We believe Claybrook will be beholden to nobody, including Ralph Nader or any other special interest group, and look forward to seeing someone at the head of N.H.T.S.A. who understands the workings of the department."

Other appointments announced today by the White House included Frank Press, 52, to be President Carter's science and technology adviser, and William Peckham, 36, a black deputy mayor of Detroit to be Assistant Secretary for Administration of the Treasury Department.

TESTIMONY OF THE INTERRELIGIOUS TASK FORCE ON U.S. FOOD POLICY—A COMPREHENSIVE LOOK AT DEVELOPMENT

Mr. HUMPHREY. Mr. President, last week, Mr. George A. Chauncey, chairman of the Interreligious Task Force on U.S. Food Policy, testified before my Foreign

Assistance Subcommittee on our bilateral development and humanitarian assistance programs. He was accompanied by Mr. Larry Minear.

The testimony was particularly relevant to our consideration of U.S. aid programs. The statement submitted to the committee by the task force probably represents the most comprehensive and thoughtful document ever developed by a nongovernmental organization on a particular area of human need—in this case meeting the needs of the poor majority in the developing countries.

We should not lose sight of the significance of the task force's statement. The Interreligious Task Force represents a broadly based network of religious denominations which have strong grassroots ties in this country.

As I noted in the hearings, the Interreligious Task Force has made several invaluable contributions to our consideration of development issues, particularly in the areas of Public Law 480, human rights, and strengthening the "New Direction" mandated by Congress in 1973. The knowledge and concern the task force brings to these issues have been indispensable to congressional efforts aimed at strengthening our role as a Nation in meeting the needs of the poor majority in the Third World.

Rather than go into the task force's statement in great detail, I will let the document speak for itself. The task force is to be commended for the thoughtfulness and comprehensive nature of their concerns as expressed in this document, for it truly represents the concerns of a vast number of Americans.

Mr. President, I ask unanimous consent that Mr. Chauncey's statement, on behalf of the Interreligious Task Force on U.S. Food Policy, be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

TASK FORCE TESTIMONY ON THE DEVELOPMENT ASSISTANCE ACT OF 1977

INTRODUCTION

The Interreligious Taskforce on U.S. Food Policy welcomes this opportunity to present testimony on United States international development assistance policy.

We are a team of Washington-based staff of national religious agencies who work together to witness for, and to help the American religious community witness for, a morally responsible U.S. food policy. We speak for ourselves and not for the two dozen Protestant denominations and national Roman Catholic, Jewish, and ecumenical agencies which cooperate in our work. However, our very existence as a group with broadly-based national interreligious support symbolizes the widespread concern in the American religious community with hunger at home and abroad, and particularly with its political dimensions.

Practically every major religious body in this country has in recent years declared hunger a primary moral concern and programmatic priority. There is probably no single human need about which there is more widespread concern in the churches and synagogues of this land. The Judeo-Christian faith compels its adherents—as a matter of religious obligation—to seek bread and justice for all people.

Our written statement is in four parts. In Part One we discuss developments affecting the Third World since the enactment of the International Food and Development Assistance Act of 1975 (H.R. 9005). In Part Two we summarize recent surveys of American attitudes toward the poor nations of the world. In Part Three we assess the implementation in U.S. bilateral assistance of the "New Directions" mandated by Congress in 1973. In Part Four we offer Taskforce recommendations in eleven areas of U.S. international development assistance policy.

Part One: Recent developments affecting the Third World

A. World Hunger and Development Assistance

Recent developments offer both good news and bad. Generally good harvests in 1975 and 1976 have improved the short-run world food situation to the point where there is now more discussion of surpluses than of shortages. Grain stocks have been substantially increased, both in the major exporting countries and in a number of developing countries. World grain carryover is expected to amount to about 13 percent of annual consumption by mid-1977, a significant increase from the low point of about 9 percent at the time of the World Food Conference, but still considerably less than the 17–18 percent deemed the minimum safe level by the UN's Food and Agriculture Organization (FAO).

Food production worldwide increased by 2 percent in 1975 and by an estimated 2–3 percent in 1976. Production in the developing countries was up by 4.2 percent in 1975 and by an estimated 2–3 percent in 1976. However, increases in the developing world have averaged about 2.5 percent per year in the 1970's, well below the World Food Conference target level of 3.6–4.0 percent. Production increases both worldwide and in the developing countries have been largely offset by population increases (of 1.9 percent worldwide and 2.6 percent in the developing countries). As a World Food Council report notes, "Sustained increases (in food production) will be needed for many years if there is to be any real and lasting effect on the nutritional situation. Any change in this situation would depend not only on increased production but also on changes in the distribution of income."

The countries designated by the United Nations as Most Seriously Affected (MSA) by the food, fuel, and fertilizer crisis of the early 1970's have had generally improved crops over the past two years, but continued to require food imports amounting to 19.7 million tons in crop year 1974/75 and an expected 18.5 million tons in 1975/1976. Over 70 percent of these imports are expected to be in the form of commercial sales and less than 30 percent in the form of food aid.

There has been some forward progress on the part of the international community towards the goals set by the World Food Conference. The World Food Council, created by the Conference, has monitored global food and hunger issues and has sought to translate Conference pledges into international and national action. A Global Food Information and Early Warning System has been set up under the auspices of FAO aimed at quickening and otherwise improving world responses to food emergency situations in the future. Most recently, the International Fund for Agricultural Development, proposed by the OPEC countries at the World Food Conference and funded jointly by OPEC and the industrialized countries, has met its initial target of $1 billion in pledges, and is expected to begin making disbursements soon for projects aimed at strengthening Third World agriculture. Overall multilateral and bilateral aid for agriculture in the less developed countries (LDCs) increased by almost 180 percent between 1972 and 1975 (although the net gain in constant prices was about 65 percent, and 1976 disbursements appear to have been less than in 1975). In many cases, aid has been more clearly targeted on the poor and on meeting basic human needs than in the past.

Substantial obstacles remain in the way of building long-term food security. Not the least of these is the problem of increasing food production in developing countries, which is often impeded by factors such as artificially low prices for producers, insufficient capital and credit for small and moderate-sized farmers, inadequate on-farm or locally available storage facilities and lack of accessible markets, and unjust land tenure patterns. Among the developed food-exporting countries, little progress has been made in building either national or international grain reserves. The absence of well-planned reserves continues a paradoxical situation in which "surplus" production results in depressed prices for farmers and ultimately in production cutbacks, while years of poor harvests force food prices out of the reach of many consumers in developing and developed countries alike.

B. The Economic Situation and Development Assistance

Trade, investment, and other economic policies affect the poor and the hungry at least as much as do agricultural production and aid programs. Third World leaders have in recent years achieved unprecedented agreement on the broad outlines of proposals toward a "New International Economic Order" (NIEO). Their proposals call for: (a) international recognition of full rights of national sovereignty, including the right to nationalize foreign investments subject only to domestic laws; (b) improvement of terms of trade in favor of the developing countries, involving stabilized prices at higher levels for Third World export commodities and preferential entry for developing country exports into developed country markets; (c) an international code of conduct for multinational corporations; (d) increased access for developing countries to technologies now controlled by developed countries and/or multinational corporations through an easing of patent rights and other measures; and (e) international monetary reforms which would assure some automatic transfers of financial resources from the "Northern" developed countries to the less developed "South."

Proposals for a New International Economic Order in various still-evolving forms have been debated in a number of international settings, most notably the Sixth and Seventh Special Sessions of the UN, the Conference on International Economic Cooperation (CIEC), and at the Fourth Session of the United Nations Conference on Trade and Development (UNCTAD IV) last May. Since UNCTAD IV, negotiations have centered around the demand of developing countries for a "common fund" to support buffer stock arrangements which would in turn backstop a loosely linked series of international commodities agreements. The common fund proposal is a considerable toned down version of earlier demands for "indexing" or linking Third World commodity prices to changes in the prices of the North's industrial products. Under the common fund proposal, stocks of various commodities exported by the developing countries would be bought up and stored by the managers of each commodity agreement when prices fell to a certain level and sold when prices rose to an agreed upon higher level.

Proposals for moving toward the new international economic order on which many nations (some with serious reservations) reached agreement at the Sixth Special Ses-

sion, have generally met with skepticism and resistance from many developed countries. Even the relatively mild common fund proposal has been, until recently, opposed by the U.S. on the grounds that it would interfere with the operation of free market forces, an argument which ignores the existence of U.S. held stockpiles of a number of key commodities and U.S. participation in a number of specific international commodity agreements in the past.

U.S. spokesmen have recently proposed increased U.S. aid to developing countries in FY 78, primarily through international financial institutions, as an alternative to U.S. participation in the common fund. The idea that aid will substitute for rather than supplement U.S. action on broader economic issues fails to be responsive to the views of developing nations, which continue to stress that reforms in the trade realm are of considerably greater urgency and scale than the provision of aid, however welcome it may be. (Developing nations rely on trade for 80 percent of their foreign exchange, on aid and private investment for 10 percent each.) We hope that President Carter's remarks at the United Nations signal a new openness on the part of the Administration on the common fund and related international economic issues.

The need for a new global economic system is evident from a review of how the present system affects the poor of the world. According to the Overseas Development Council, the gap between the world's poor and its affluent is wide and growing wider:

In 1974, over 100 developing countries in Africa, Asia, and Latin America, with 67 percent of world population, accounted for only 14 percent of the global world product. In contrast, the 25 or so developed countries in Europe and North America, with only 25 percent of the world's population, accounted for nearly 72 percent of global world product in 1974.

Between 920 million and 1,200 million people in the developing countries are "living in a state of serious or absolute poverty."

About 35 percent of the developing world's labor force was unemployed or underemployed in 1975.

Real prices of commodities produced by developing nations have fluctuated wildly. Developing nations as a group had a negative trade balance of about $26 billion in 1975; the 49 developing countries with per capita GNP of $300 or less had a negative trade balance of $5.67 billion. While in 1960 the revenue from 25 tons of rubber was sufficient to purchase six tractors, the same quantity of rubber could purchase only two tractors in 1976.

Total outstanding external public debts of developing countries have been rising sharply, from about $19 billion in 1960 to about $140 billion at the end of 1975. Additional private debts brought total indebtedness to about $165 billion by the end of 1975. Continued heavy borrowing indicates that the total debt of developing countries is now probably over $190 billion.

Unfavorable terms of trade, inflation, indebtedness, and low levels of development assistance from the developed countries have combined to result in virtual stagnation of the developing nations' economies. A recent World Bank projection underscores how bleak the immediate prospect is. According to the Bank's projections, average per capita income of the 675 million people in developed countries will increase over the ten-year period of 1970–1980 by some $900, from $3,100 to $4,000. Average per capita income of the 725 million people living in the middle-income developing countries (excluding the OPEC countries) will increase by $130, from $410 to $540. Average per capita income of the billion people living in the poorest nations of the world will increase by only $3, from $105 to $108. Per capita GNP in the lowest income countries, measured in constant dollars, is actually declining.

While economic indicators such as GNP and balance of payments do not tell the whole story of development, or frequently even the geater part of it, it is indisputable that many developing countries are facing an extremely severe economic situation. This situation cannot be solved simply by either aid or internal reform measures alone—systemic changes in the international economic order are required. An Tanzanian President Julius Nyerere has noted:

However great an effort the poor nations make, they cannot overcome their own poverty in the foreseeable future. This is not strange; none of the industrialized countries started their progress without injections of external capital, even when world technology was much less complicated and costly than at present. Nor can redistribution within the poor societies solve their problem. . . . (The) truth is that, however much we reorganize our economic system to serve the interests of the mass of the people, and however much our government tries to weight the income distribution in favor of the poorest people, we are merely redistributing poverty, and we remain subject to economic decisions and interests outside our control.

If it has become more and more clear that development aid by itself can do relatively little to meet the pressing needs of the world's poor, it is also now apparent that aid which directly helps to meet the basic human needs of the world's poor—in combination with equity measures within developing countries and substantive reforms in the world economic order—is needed as much today as at any previous point in history.

Part Two: Attitudes of Americans Toward the Third World

In recent years the American public has become increasingly aware of and concerned about United States relations with the Third World. The end of the Vietnam War, the advent of the energy crisis, and the famines of 1973–4 underscored for many the interdependent world in which the U.S. is set. Americans, concerned about both the economic situation at home and the suffering of the poor abroad, are more and more questioning the purposes and impacts of American policies toward the Third World. Americans clearly want to protect their jobs and the prices of the goods they buy, but they also want their government's policies to serve justice and reduce suffering in the world.

From February to April of 1976, the State Department conducted a series of "Town Meetings" in five cities across the country in order to hear the views of interested private groups and citizens on foreign policy. The Department also sponsored public opinion polls in each of the five areas. In each of these meetings and in the polls, participants expressed a strong concern for moral issues. They had a clear sense of the values and principles they want American policy to uphold, and they felt that those values and principles were not receiving sufficient or serious attention from policymakers.

The issue of world hunger and United States aid, the global economy, the activities of multinational corporations, human rights, and arms sales figured prominently on the Town Meeting agenda. Majorities ranging from 65 percent in Portland to 73 percent in San Francisco considered "stopping world hunger" a "very important" objective, and equally clear majorities felt that American aid should not be restricted to "countries that will help us to do what we want" or to "countries that have democratic governments." State Department officials reported "general acceptance of the legitimacy of the demand by underdeveloped countries for enhanced standing in the global economy" Participants also expressed strong suspicion of the activities of multinational corporations in the Third World.

Participants regretted the State Department's seeming lack of attention to human rights and wanted the United States to exercise moral leadership in promoting human dignity. They envisioned the United States as promoting peace in the world, but saw current U.S. arms sales policies as standing in glaring contradiction to this view. The Town Meeting Program indicated that the American public is concerned about morality in foreign policy and is disillusioned with policies that seem to be formulated without regard to moral questions.

This finding was confirmed in a series of hearings on "Foreign Policy Choices for the Seventies and Eighties," held in 1975 and 1976 by the Senate Foreign Relations Committee. Witnesses represented many different sectors of the American public and offered a wide variety of views and recommendations. In general, however, they underscored the finding of the Town Meeting Program that the American public wants United States foreign policy to reflect clearly its values and character.

George Gallup, Jr. testified that the public supports United States efforts to respond to global problems: "We apparently feel it is our duty—as a rich and powerful nation—to help less fortunate people, even countries unfriendly to the U.S." Gallup further reported that Americans favor participation in the United Nations and support the concept of international cooperation in decision-making. Louis Harris reported that 60 percent of the American people regard combatting world hunger as a top national priority; that 58 percent favor foreign economic aid; and that the latter figure would rise to 79 percent "if guarantees could be given that the economic aid would actually reach the people it is meant to help, instead of lining the pockets of predatory foreign rulers." Harris summed up his testimony with this comment:

Leadership which has the courage to ask the public here in this country to make sacrifices to help the lot of people around the world, which believes that a sense of genuine morality should guide our foreign policy, which goes beyond the simple balance of power considerations in choosing our allies, will find a responsive public out there.

There are other significant straws in the wind which confirm the existence of a growing, although not yet organized, constituency for forthcoming approaches by the U.S. in its dealings with developing nations. We reported in testimony two years ago that hunger abroad (as well as at home) had become a major concern and programmatic priority for most major religious bodies in this country and that there was increasingly widespread recognition of the roles played by public policy in alleviating or aggravating human hunger. In the past two years, most major religious bodies in the U.S. have continued and deepened their involvement in the hunger issue—a commitment reflected in private giving to voluntary agencies, in religious educational emphasis and materials, and in attention by religious groups to issues of public policy. While a "development assistance lobby" parallel to that of the environmentalists or certain other public interest groups has not yet emerged, we are confident that there is a growing constituency in this country which wants and will support improved and expanded U.S. aid to the neediest nations.

Part Three: New Directions, 1973–1977

1973 Reforms

In 1973, Congress began the process of legislating what has become known as the "New Directions" strategy for U.S. development assistance. Initiated by the House Foreign Affairs (now International Relations) Com-

mittee, the reforms represented an effort to move U.S. bilateral aid away from "trickle-down" theories of development and toward a more grass-roots, people-oriented approach. The 1973 reforms concentrated bilateral aid in three "functional categories"—food production and nutrition, population planning and health, and education and human resources. The objective was to channel technical assistance and resources directly into meeting critical development problems. The "poor majority" within the developing countries were to receive particular attention and to be involved increasingly as participants in the development process. AID was directed to focus, in the language of the House Committee's report, on "meeting the basic human needs of the poorest people in the developing countries, in order to enhance their opportunities for employment, to improve the distribution of wealth, and to increase social justice." Moreover, "large-scale capital transfers" and "projects which aim at development through a 'trickle-down' approach" were in the future to be funded, if at all, by international lending institutions and private investment, the Committee concluded.

The 1973 New Directions called for maximizing the role of the private sector in development aid, "particularly those institutions which already have ties in the developing areas such as educational institutions, cooperatives, credit unions, and voluntary agencies" (H.R. Report 93-388). The Percy Amendment to the 1973 foreign assistance authorization bill mandated increased emphasis on aid projects designed to integrate women into development processes.

1975 Revisions

Congress extended and consolidated the New Directions approach through the International Development and Food Assistance Act of 1975. The mandate for participation by the poor, for focus on human needs, and for bottom-up rather than top-down development strategy was made more explicit. The U.S. food aid program was amended so as to be more clearly targeted at human and development needs. A new functional category, technical assistance, energy, research, reconstruction, and selected development projects, was added, in order to coordinate and focus aid programs not included in the three primary categories, again with emphasis on basic human needs in key development areas. "Appropriate technology" was given particular attention, with start-up funds provided for a special semi-public, semi-private institute for appropriate technology in development, and with encouragement given to the rapid expansion of intermediate-level technologies in U.S. aid. A cut-off of economic aid to countries engaging in "consistent patterns of gross violations of internationally recognized human rights" was mandated unless such aid could be shown to be of direct benefit to needy people.

The 1973 and 1975 reforms represented important departures from previous aid bills. They challenged the stagnant and largely discredited "foreign aid" programs of the past, which had stressed rapid economic growth in narrowly defined terms of gross national product, and which had frequently served U.S. political and strategic interests more than the development goals of needy nations. They formulated an alternative strategy which stressed integrated rural development, job creation, and the participation of the poor in the development process. And they raised hope among persons and groups concerned with international development that U.S. development assistance would now move significantly into the New Directions.

Implementation of the New Directions

Implementation of the New Directions has been disappointingly slow and uneven. A 1975 report from AID to the Congress, "Implementation of New Directions in Development Assistance," included some welcome reports of changes at the project level, but cautioned that it was unrealistic to expect "dramatic results on a large scale in a short period of time." While the report gave more attention to theoretical concerns than to actual project level specifics, the Taskforce and many others at that time felt, in evaluating New Directions implementation, that AID should be given the benefit of the doubt, because the far-reaching changes called for by Congress would doubtless require time for implementation at every level of the bureaucracy.

Recent reports, however, indicate that implementation still leaves much to be desired. For example, a February, 1977 staff report of the Senate Subcommittee on Foreign Assistance examined U.S. development assistance in Pakistan, the Philippines, and Indonesia. In each case, projects which clearly met the New Directions criteria were found to be the exception rather than the rule. The report indicates that political relations between the U.S. and recipient countries and domestic political considerations in the recipient countries have been the most frequent obstacles in the way of forthright implementation of New Directions types of development projects. Both the U.S. and the governments of Pakistan, the Philippines, and Indonesia have apparently preferred to steer away from development projects which involve and directly benefit the poor whenever such projects appear to threaten political relationships.

Roy Prosterman and C. A. Taylor of the University of Washington independently monitored AID field projects in selected countries in August and September, 1976. They reported "that AID/Washington had, apparently, not even bothered to explain major elements of the 'New Directions' mandate to those in the country missions—and the process of project approval that goes forward in Washington clearly has done nothing to bring predictability, or a reasonably assured level of compliance with the law, into existence." (In fairness to AID, it should be noted that an AID circular of April, 1976 to field staff contains a thoughtful and sensitive discussion of ways and means for implementing the New Directions mandate at the country program and project level. However, the same document conceded that progress was then uneven and that more discussion and coordination was needed between AID/Washington and AID missions.)

In 1976, the Interreligious Task Force sent a field survey questionnaire to 125 religious agency personnel in six developing countries whose work was closely related to development and who were in contact with U.S. (and sometimes multilateral and other bilateral) aid projects. Sixty-four responses were received, many with extensive comments. While our sampling was not scientifically selected and may be too small to be statistically significant, a pattern of generally consistent comments about AID from our respondents is worthy of mention:

AID appears to be giving much more attention now than previously to meeting the needs of the poor majority, though much improvement is still needed. Many respondents mentioned the particular need for developing agricultural credit mechanisms suited to subsistence farmers.

AID appears to be giving more attention to an integrated approach in its development programs, but needs to place much higher priority on training local people.

AID appears to be devoting much more attention now than previously to the use of appropriate technology, although bottlenecks frequently appear based on AID's ignorance of local conditions. Some respondents mentioned cases where technology requiring electricity was introduced in areas where no electricity was available. Others mentioned a tendency for projects involving appropriate technology to favor wealthier farmers or more highly educated individuals requiring less training in the use of the equipment provided.

AID generally does not appear to work well at the village level. Many respondents made comments about AID staff's poor language skills, lack of understanding of local culture, unwillingness to leave comfortable lifestyles to travel to the countryside for even short periods of time, and disinclination to work through indigenous organizations.

AID is giving very little attention to the role of women in development, although AID's efforts in selected countries appear to be improving.

AID field staff appear to have a fairly cautious attitude toward working more closely with private and voluntary organizations (PVOs), particularly religious-affiliated ones.

AID is generally thought to do a poor job of monitoring its programs in the field. Many respondents feel that AID's effectiveness could be enhanced by much more attention to monitoring project implementation.

Other suggestions for improving AID's programs include expanding rural credit programs; supporting projects on a longer-term basis; increasing significantly the direct involvement of local people in project design, implementation, and follow-up, with more reliance on community organizations as compared with governmental institutions; and increasing links between local AID missions and expatriate and indigenous private voluntary organizations.

In sum, while further refinements and clarifications in legislation are doubtless needed in furthering the New Directions process, a primary focus for aid reform should now clearly be on the implementation of the existing legislative mandate, both at the Washington administrative level and at the field level.

Part Four: Taskforce recommendations

1. The Scale and Character of U.S. Official Development Assistance.

The Taskforce recommends:

A. That the United States commit itself to the goal of providing 0.7 percent of its Gross National Product as Official Development Assistance (ODA);

B. That the United States take concrete steps in FY 78 and 79 to increase the level of ODA toward the 0.7 percent goal;

C. That the United States provide a larger proportion of its ODA through multilateral channels; and

D. That development assistance be separated in both authorization and appropriations legislation from security-supporting and military aid.

Testifying in mid-1975 on the development assistance authorization bill for FY 76-77 (H.R. 9005), the Taskforce recommended that the U.S. commit itself to provide at least 0.7 percent of its GNP for official development assistance (ODA) by 1980 and 1.00 percent by 1983, taking steps in FY 76 and 77 to move systematically toward those goals. The 0.7 percent GNP target represents the goal set by governments in the U.N. General Assembly in 1970 at the beginning of the Second Development Decade although never affirmed by the U.S. in U.S. law nor achieved in subsequent practice. Congress in 1975 did not affirm the target, nor has U.S. development assistance policy since then moved substantially in the recommended direction.

The facts are basically these. U.S. development assistance program levels remained relatively constant in fiscal years 1974–77. The program levels for bilateral development assistance in AID's basic functional accounts (such as food production and nutrition, population planning and health) were $877.6 million in FY 74 and $934 million in FY 77. Program levels of U.S. voluntary contributions to international organizations were $146.2 million in FY 74, $244 million in FY 77. Other AID development assistance programs, exclusive of P.L. 480,[1] brought total development assistance program levels funded through AID from $1.154 billion in FY 74 to $1.697 billion in FY 77. In addition to this total were U.S. contributions in the form of paid-in capital to international financial institutions such as the World Bank. U.S. budget resources devoted to these were $620 million in FY 74 and an estimated $794.1 million in FY 77. Program levels of security assistance increased during the same period from $633 million to $1.76 billion. Some individual increases in FY 76–77 are worthy of particular note, such as the authorization and appropriation of $200 million in U.S. contributions to the new International Fund for Agricultural Development and the appropriation for the International Development Association of the fully authorized $375 million in FY 77 (as opposed to only $320 million in FY 76).

The Carter Administration has requested Congressional approval for some long overdue increases in development assistance programs in FY 78. Program levels of bilateral development assistance in the basic functional accounts through AID would rise above FY 77 levels by 22 percent to $1.140 billion and U.S. voluntary contributions to international organizations by about 5 percent to $256 million. Despite these increases, total development program levels would remain roughly constant at $1.7 billion since a multiyear appropriation for IFAD is credited to FY 77. The value of the P.L. 480 program ($1.364 billion) is at about FY 77 levels.

U.S. contributions of paid-in capital to international financial institutions would increase from $819 million in FY 77 to $1.602 billion in FY 78. Because beginning with FY 78 all callable capital is to be appropriated, major increases in the size of callable capital appropriations for these institutions are being requested (from $266 million in FY 77 to $1.014 billion in FY 78). Only the paid-in portion of U.S. contributions qualifies as official development assistance. Program levels of security assistance would increase from $1.76 billion in FY 77 to $1.89 billion in FY 78.

Early projections are that in FY 78, even with the proposed increases in both development and security supporting assistance, U.S. official development assistance as a percentage of its GNP will decrease relative to that of other donors.

During the same FY 74–77 period, there has been progress toward channeling an increasing proportion of development assistance multilaterally, as we urged in 1975 because of our view that such aid tends to be less political in character. The percentage for multilateral institutions proposed for FY 78 is considerably higher, reflecting in large measure the substantial and welcome increases proposed for IDA and the other international financial institutions. AID has also made progress in increasing the proportion of grants in relation to loans available to the neediest countries. It notes in its FY 78 Congressional Presentation that it is "increasingly softening the terms of aid to the poorest countries and hardening them to the better-off developing countries," with all assistance to nations on the UN's list of Least Developed Countries (LDCs) to be in grant form.

The modest increases in U.S. ODA described above were offset, as a percentage of GNP, by U.S. economic growth generally as well as by inflation. The U.S. comparative standing among other industrialized nations, calculated in relation to per capita GNP, remained 12th of 17 countries in 1974 and in 1975, although as a percentage of U.S. GNP, our ODA slipped from 0.27 to 0.26. While actual FY 76 and 77 and probable FY 78 percentages and relative standing are not yet available, estimated figures would place the U.S. at 0.26, 0.24, and 0.23 percent of GNP, or 12th, 13th, and 13th, respectively.

In authorization legislation for FY 76 and 77, U.S. development assistance was separated from military and security supporting assistance, as we had recommended. However, both sorts of aid were funded in a combined appropriations bill in FY 76 and again in FY 77. It should be pointed out that U.S. Security Supporting Assistance, which is not covered by the New Directions mandate, is included as a part of U.S. official development assistance in calculating U.S. standing relative to that of other donors. Because much of such aid serves U.S. short-term political objectives rather than the longer-term development objectives of recipient countries, a "true accounting" of U.S. ODA would further still weaken the U.S. proportionate standing.

While applauding the increased aid levels proposed for FY 78, we underscore our view that aid must be not only more, but better. We note the contention of some aid supporters that current aid programs, both bilateral and multilateral, are so uneven and unsatisfactory in their effectiveness that large increases will simply undermine any chances for program improvements in current efforts. While their concern must be taken seriously, we feel that not to increase aid contributions would have far-reaching negative impacts. In some cases, additional funding cannot be absorbed at the moment and will need to be applied over time; in others, substantial increments can be pressed into use almost at once.

While we continue to urge more multilateral funding, we reiterate our view, expressed in 1975, that multilateral organizations themselves "should be continually reviewed in terms of the degree of decisionmaking power shared in them by the developing countries, the allocation of loans and grants, and the effectiveness of their operation." Such review is particularly necessary in view of the increased scale of their operations and the increased amounts of U.S. funds which will, we hope, be committed to them. With reference to the World Bank in particular, we note the absence of universality in its membership and the disincentive to larger OPEC contributions exercised by the current system of weighted voting. Other changes might also make it a more serviceable resource to developing nations.

U.S. contributions to organizations such as the International Development Association (IDA) and the regional international financial institutions should be seen as supplementary to, rather than as substitution for, broader U.S. efforts to make progress on issues such as commodity agreements, a common fund, market access and debt renegotiations. These institutions should also be encouraged to exercise an increasingly active development-stimulating role with respect to the poor majority, rather than serving to buffer the deepening exposure of U.S. commercial lending institutions in the LDCs.

It is with all of these factors in mind that we make the above recommendations on the scale and character of U.S. official development assistance.

2. Allocation According to Human Need:

The Taskforce recommends that allocations of U.S. development assistance be based first upon human need as judged by internationally accepted standards, and secondly on the extent of commitment by recipient countries to involving the poor in development and to distributing equitably its benefits.

HUMAN NEEDS

Over the years a number of groupings of less-developed countries has been devised by various international, national, and private organizations. Each list has sought to determine the countries which are neediest in one regard or another, based on impartial and objective assessment criteria. Among these lists have been:

The U.N.'s list of Least Developed Countries (LLDCs), created in 1971 and updated in 1975, which includes 29 countries with very low per capita GNP, negligible or minimal manufacturing sectors, and wide-spread illiteracy. The LLDC list is used by the U.N agencies for a number of purposes and by the United States as a determinant of countries to receive U.S. foreign assistance grants rather than loans.

The U.N.'s list of Most Seriously Affected Countries (MSAs), devised in 1974 in the wake of soaring food, fuel, and fertilizer prices in an effort to concentrate international assistance on countries with low GNPs and foreign reserves, import needs of essential commodities and extensive debts, and other serious economic difficulties. Revised in 1975 to include a total of 45 nations, the list served as the basis for the application of the 70/30 formula for U.S. Title I food aid in FY 1975.

The Food Priority Countries list, adopted in principle by the U.N. World Food Council in 1976, to provide a policy tool more indicative of human hunger and malnutrition than gross economic indicators allow. The 43 countries provisionally on the list have most of the following characteristics: annual per capita incomes in 1975 prices of $500 per year or less, annual cereal deficits projected to reach by 1985 at least 500,000 tons and/or 20 percent of estimated consumption, protein-calorie malnutrition on a significant scale, inadequate average food production gains over the past decade, the existence of the potential for rapid, efficient, and well-distributed increases in food production, and serious balance of payments constraints.

The World Bank's grouping of countries according to per capita GNP: countries with per capita annual GNPs of less than $200 (of which there are 33), of $200–$499 (42), of $500–$1999 (64), of $2000–$4999 (29), and of $5000 or more (19). The Bank's latest published figures are for 1974. The United States currently uses World Bank figures of countries with $300 per capita annual GNPs or less as a criterion for determining the recipients of at least 75 percent of concessional food aid under P.L. 480 Title I.

The groupings of the World Bank's International Development Association (IDA), which, based on the above World Bank data, are entitled "low income developing countries" (the 33 nations with annual per capita GNPs of $200 or less), "middle income developing countries (the 56 nations with GNPs of $375 or less), and the "higher income developing countries" (nations with GNPs above $375). IDA focuses its programs on the first group (to which it committed 82 percent of its total resources during 1972–74) and, to a lesser extent, the second group (which received 16 percent during the same period).

The Consultative Group on Food Production and Investment in Developing Countries' list of 18 countries which have chronic and widespread malnutrition and in which development assistance may bring substantial food production and nutritional gains.

The listings of the International Food Policy Research Institute, a private organization whose research is widely used by inter-

national organizations, which has identified four categories of food-deficit countries, of which the two most critical are "very severe food-deficit countries" and "serious food problem countries."

There is thus substantial international consensus as to the core group of countries which should generally be the focus of development assistance efforts, although the variety of groupings is on the face somewhat confusing.[3] Internationally recognized standards of human need such as are reflected in these various lists should in our view be the primary determinant in U.S. development aid allocations.

We do not feel the need at this time for the Congress to require mandatory use of one or more of the above lists for bilateral economic aid allocations purposes. AID since 1973 has succeeded in shifting bilateral assistance increasingly to the poorest countries. Over 75 percent of official development assistance (other than security supporting assistance) is to go in FY 78 to countries with per capita GNP of $300 or less. We do feel, however, that regular consideration by AID of the various lists could result in a more careful targeting of aid for specific needs-related purposes.

COMMITMENT TO EQUITY MEASURES

Measures to benefit and involve the poor majority through broadly based, human needs-oriented development strategies are key to AID's New Directions mandate and to the work of most international development organizations and agencies. Assessing the commitment of governments to such measures necessarily involves some evaluative judgments.

In enacting subsections 102(c) and (d) of the Foreign Assistance Act, Congress in 1975 began the process of devising standards for measuring development progress in aid recipient countries as judged by New Directions standards. These subsections specify that "greatest emphasis" in the U.S. aid program is to be given to "countries and activities which effectively involve the poor in development" and which "help the poor toward a better life." Congress instructed the Executive Branch to establish criteria for evaluating the progress of aid recipients in five key areas: increasing labor-intensive agricultural productivity, reducing infant mortality, controlling population growth, promoting greater equality of income distribution, and reducing rates of unemployment and underemployment. U.S. aid allocations are subsequently to be "increasingly concentrated" in countries making good progress in some or all of these areas.

AID summarizes its progress in developing and refining such criteria in its FY 78 presentation to Congress and in a more detailed separate report. AID is still in the initial stages of fashioning assessment mechanisms and of obtaining assessments from it missions in LDCs. It reports that available data on progress in the five key areas is uneven and sketchy and that international agencies are themselves not very far along in assessing countries of greatest need. AID observes that qualitative judgments as well as quantitative indicators are needed and that even after that data are in, "the overall political and economic interests of the U.S. in the recipient country" will play a significant role.

We welcome the current attempt of Congress and AID to focus bilateral aid more carefully. We are, however, still concerned that U.S. political and economic interests might override what we see as the primary considerations for development aid allocation—human need and commitment to key development objectives. As we have said in other contexts, neither development assistance nor food aid should be used as a political weapon; both should represent resources made available first and foremost in response to human need, wherever it exists, and to serve developmental objectives.[4]

Commitment to the meeting of basic human needs and to involving the poor majority in development are objectives which are indeed hard to measure in quantitative terms, and, as AID has noted, "Quantitative measures will always need to be used as support for, rather than replacement of, informed judgments as a basis for . . . allocations decisions." On the other hand, if the New Directions approach is to be taken seriously, priority in determining relative funding allocations for U.S. development assistance must clearly be given to countries and programs involving measures consistent with the legislative mandate. However, even countries which are progressing very slowly or sporadically in making internal reforms ought not to be totally excluded from receiving U.S. aid. Instead they should be encouraged to move toward participatory and needs-oriented development strategies through dialogue, through more responsive and more multi-year U.S. development assistance, and through earmarking of aid away from trickle-down projects. Most importantly, aid could be made available in increased and sustained amounts for any country willing to proceed on the often politically risky route towards equity and involvement of the poor.

Human rights and population planning, two important concerns which also bear on development assistance allocations decisionmaking, are considered in the subsequent two sections.

3. Human Rights—

The Taskforce recommends:

A. That Congress retain the current human rights language regarding bilateral development assistance in the Foreign Assistance Act and encourage its even-handed application to all recipient countries.

B. That Congress apply identical language to concessional food aid programs under Title I of PL 480 and to the activities of the Export-Import Bank, and apply similar language to U.S. participation in international organizations and international financal institutions; and

C. That Congress, to assure that human rights considerations become an enduring cornerstone in U.S. foreign policy, upgrade human rights concerns within the structure and work of the State Department and AID and within the work of international bodies such as the United Nations and the Inter-American Commission on Human Rights.

Present statutes allow development assistance to go to developing countries the governments of which have engaged in consistent patterns of gross violations of internationally recognized human rights provided that such aid can be shown to be of direct benefit to needy people. Military and security aid is to be cut off or reduced when gross violations of human rights are found to exist.

We welcome the increased prominence and attention given by the Carter Administration to human rights concerns. We applaud its decision to reduce or deny military aid to Argentina, Ethiopia, and Uruguay. However, the projected allocations of economic and military aid for FY78 still remain heavily skewed toward countries the governments of which are widely alleged to have engaged in consistent patterns of gross violations of internationally recognized human rights, including the Republic of Korea, the Philippines, Indonesia, Brazil, Haiti, and Ethiopia. We urge that U.S. aid to such governments be reviewed with an eye to a consistent application of human rights concerns.

We offer three observations regarding the intricate and sometimes paradoxical relationships between human rights and development assistance. One, U.S. development assistance should not be a means through which repressive governments tighten their hold over their people. Two, the basic objectives of development assistance themselves are less likely to be realized when the rights of the poor and of those committed to social change are not respected. Improvements in the quality of life for the poor majority through, for example, reforms in land tenure or credit access arrangements, bear a direct relationship to the freedom of citizens to seek such reforms—and there may be a role for development assistance in helping to secure those rights.

Finally, the need for development assistance to hasten the realization of certain social and economic rights, such as the right to food and decent housing, to education and medical care, sometimes exists in tension with the need to protect civil and political rights. In some situations, U.S. aid can be instrumental in helping to realize the right to food, even in nations where basic political rights are not respected. There are no easy or universal answers. What is required is the sensitive application of the language of the Foreign Assistance Act to the particular situation of any given country.

Against this background, the Taskforce recommends that the human rights language currently applicable to U.S. bilateral aid not be changed. We oppose both sorts of changes which have been suggested: striking the human rights safeguards altogether, or tightening them to prevent any aid to needy persons in a country with a repressive government. We do urge that the language of Section 116 be broadened to include U.S. concessional food aid under Title I of PL 480 and Export-Import Bank programs.

With respect to U.S. contributions to international organizations (such as the UN Development Program and UNICEF) and international financial institutions (such as the World Bank and the regional banks), we welcome the congressional concern expressed in recent years over the activities of such bodies in countries with governments which have exhibited consistent patterns of gross violations of internationally recognized human rights. U.S. delegates to the Inter-America Development Bank and to the African Development Bank are now instructed by law to vote against loans to such governments for projects which do not directly benefit needy people. Since this standard makes possible discussion of both human rights in recipient countries and the relevance of projects to needy people, the Taskforce recommends that Congress apply similar language to U.S. participation in international organizations and international financial institutions (including the World Bank, IDA, and the regional development banks).

With respect to military assistance, we reiterate the support we expressed in 1975 for a cut-off of military aid to governments such as these since such aid lacks the direct benefits to needy people which the pass-through provision in development aid allows.

We also recommend that Congress give more priority to human rights concerns within the structure and work of the State Department and AID and within the work of international bodies such as the UN Commission on Human Rights and the Inter-American Commission on Human Rights.

4. Population Planning—

The Taskforce recommends:

A. That the United States continue to give priority to funding through bilateral and multilateral channels for population planning, fully integrated into the broader developments strategy of recipient nations;

B. That the United States, in light of the internationally recognized right of all citizens to know about and have access to family-planning services, encourage all nations to provide their citizens with that information and access;

Footnotes at end of article.

C That the United States refuse to provide population aid to programs that employ involuntary sterilization or any other contraceptive method without informed consent as a means to limit childbearing.

D. That the United States not deny development assistance and food aid to countries that have not already succeeded in reducing their birth rates nor to these that place a higher priority on other developmental objectives.

Many Americans believe that U.S. development assistance should be directed primarily or even exclusively to the moderation of birth rates in developing countries. Some have suggested that U.S. development assistance and food aid should be made available only to those nations which are seeking to, or succeeding in, controlling their birth rates and should be denied to other nations which are not actively engaged in population limitation programs. It is frequently suggested that in the absence of the early and drastic reduction in population growth in developing nations, the benefits of U.S. development assistance and food aid will be nullified.

As noted with Recommendation 2 above, the effort of countries to control population growth is one of the factors which the President is directed to consider in establishing criteria for allocating funds among nations. U.S. assistance can clearly play a constructive role in supporting such efforts by developing countries. The reference in the statutes to population planning is indeed one appropriate factor in U.S. decision-making regarding allocations among countries, provided that it is not translated into a narrow requirement that a recipient government set population goals and institute family planning services in order to receive U.S. development assistance.

The 1974 World Population Conference in Bucharest helped to create an international consensus concerning the interactions between population growth and the social and economic policies and planning of governments, in rich and poor nations alike. With respect to the demography of poorer nations, it was generally agreed that not only do population variables influence development, but also that development achievements affect population growth. Moreover, a more adequate understanding of those development variables which are most integrally related to the lowering of fertility rates is now emerging.

There remains, however, continued uncertainty about the relative impact on fertility rates of programs to reduce infant mortality, to include women in the development process, and to provide greater employment opportunities and greater economic stability for the poorest in a society. These and other development features, allied with good family planning and health services, are known to contribute in some instances to a lowering of fertility rates and in turn of population growth rates. In the state of Kerala in South India, a significant decline in the birth rate took place during a recent ten-year period. Kerala has the lowest per capita income of India's states but the highest literacy rate, the highest per capita consumption of nutritionally important foods, the highest percentage of villages with protected water supplies, the lowest infant mortality rate, the highest life expectancy, and a total death rate (9 per 1,000) lower than that of Germany or Great Britain. However these factors interacted with population growth rates, it seems clear that improved nutrition and education played an important role.

One of the most rapid social changes in recent history, highlighted by the recent U.N. Conferences on Population and on Women, has been the movement toward acceptance of the need to make family planning education and means available to all people. Governments have now affirmed that "Individuals and couples have the right freely and responsibly to determine the number and spacing of their children and to have the information and the means to do so." Progress in recent years toward implementing this right has meant a major advance in the health of women. The broader realization of freedom of choice in the control of fertility is playing a major role in their liberation.

More research is clearly needed on the relative importance of different developmental variables to fertility rates, so that limited aid funds may be used to maximum effect. However, enough is now known to point toward the need for the full integration of population planning into the broader development picture. Family planning services should be integrated wherever possible into total health planning and programming. Such integration requires a movement away from an approach which would carry out population planning measures in isolation or which would make developing country action on population a precondition for receiving U.S. development assistance and food aid.

In our view, the United States should strongly encourage all nations to provide their citizens with the means of family planning in fulfillment of the internationally recognized human right of all citizens to know about and have access to family planning services. (This right is among those acknowledged in the U.N.'s Teheran Declaration on Human Rights (1968), the World Population Plan of Action (1975), and the World Conference of the International Women's Year (1976).) At the same time, the United States should refuse to provide population aid to programs which employ measures to limit child-bearing which are destructive of human rights and human dignity.

5. Women and Development Assistance:

The Taskforce recommends that Congress reiterate its concern for development assistance programs sensitive to the needs of women and direct AID to report on its implementation of existing legislative policy in its next presentation to Congress.

As noted above, most development assistance programs until recently have been directed toward economic growth and industrialization as measured by GNP and other economic indices. Such indicators ignore economic activity which occurs along traditional lines, frequently not even involving cash exchange. In many areas of the developing world, the economic activity of women is primarily of this sort. Women grow, process, and serve food for their families' consumption; they produce handicrafts, clothing and household goods for home use and for barter; they carry water and firewood long distances for their families' use; they care for children and the sick; and they trade and barter their own and others' products at local markets which they themselves frequently operate. Much of this productive labor, however economically and socially necessary, is invisible to those development planners who rely solely on GNP as a measure of economic activity.

American and other Western development planners, in ignoring or minimizing the economic activity of women, have often undermined the status of women in aid-receiving societies. Frequently assuming that agriculture is primarily the work of men, these planners have directed efforts to modernize agricultural production toward men, even in cultures in which women perform most of the agricultural labor. Western influence on traditional land tenure patterns has sometimes resulted in male monopolies on land ownership and thus on control of agricultural products, although women may perform most of the agricultural labor. Assuming that men are the primary breadwinners for their families, Western agencies often provide alternative training and employment only for men when new technology displaces workers. Women responsible for supporting themselves and their children frequently lose access to their traditional employment without gaining access to jobs in the modern sector.

Development programs founded on Western cultural patterns and assumptions too often increase women's economic dependence on men, limit their options for participation in developing economies, and overemphasize the maternal and sexual aspects of their roles. The results have been harmful for the children dependent on these women, for developing societies as a whole, and most of all for the women themselves. When women responsible for food production lose access to employment or to land, both they and their children suffer. Moreover, land transferred from cultivation by women to cultivation by mean often also shifts from food to cash-crop production. Western ideas of womanhood, portrayed via highpowered advertising campaigns, have contributed to the decline of breastfeeding in developing countries, a trend which has had grave consequences for millions of infants. Many population analysts agree that fertility rates decrease as women gain higher status, greater economic independence, and a broader range of role options. Thus, changes in the role of women have profound consequences for the society as a whole. But the most important consequences are for the women themselves, who deserve just and equitable treatment as participating members of their societies.

Women's roles in developing societies have received increased attention in recent years, with calls for changes coming from many sources. The Percy Amendment to the Foreign Assistance Act of 1973 provides that development assistance "shall be administered so as to give particular attention to those programs, projects and activities which tend to integrate women into the national economies of foreign countries, thus improving their status and assisting the total development effort." There is, however, some question about how widely the Percy Amendment has been implemented. Respondents to the Interreligious Taskforce field survey described above frequently expressed the view that from their vantage point overseas, very little has yet been done.

To hasten the realization of this Congressional objective, AID, in our view, should undertake a concerted effort to evaluate the effects of its programs on the role and status of women, redesigning programs where necessary to serve better the needs of both women and men in recipient countries. Such an effort should take place with a view toward realizing the goals of: 1) increased economic and political independence for women; 2) a wider range of role and occupational options for women; 3) a more equitable sharing of the burdens of labor between men and women; 4) increased participation of women in planning and decisionmaking in all fields. Realizing these goals will require a concerted effort to provide education and training for women, especially since women constitute more than 60 percent of the world's illiterate population. A first step toward these goals, and probably a precondition for their full realization, would be an increase in the number of women in policymaking positions within AID, particularly among field staff.

6. Priority for Nutrition—

The Taskforce recommends:

A. That AID in its food production activities under Section 103 be directed to give more attention to explicit nutritional goals and benefits.

B. That the proportion of Section 103 funds spent on nutrition as compared with those spent on food production be increased substantially.

C. That the United States increase its support of multilateral nutritional efforts through agencies such as the U.N. Food and Agriculture Organization, UNICEF, and the World Health Organization.

D. That Congress provide appropriate legislative attention in the FY 78 authorization bill to the nutrition and health impacts of widespread infant formula use in developing countries.

"Food Production and Nutrition" (Section 103) represents AID's largest single bilateral program account, scheduled to receive more than 50 percent of AID's basic bilateral program funds in FY 78. However, the bulk of Section 103 funds go to food production-related efforts, with less than 10 percent (about $55 million) earmarked for direct nutrition-improvement projects. While the nutrition share is modest, it represents a steadily growing concern of AID and a decided improvement over FY 1973, when only $6.6 million was allocated to nutrition.

Responding to continuing criticism of the low level of nutrition funding, AID stated in its recent report to Congress on Implementation of Recommendations of the World Food Conference: . . . all of the funds which are appropriated under Section 103 of the Foreign Assistance Act are ultimately directed to the goal of improving nutritional levels whether they finance specific nutrition studies and projects or attack the underlying economic problems which must be resolved if nutritional levels are to be raised on a self-sustaining basis. The same is true for most of the PL 480 program . . .

The Taskforce heartily endorses the concept of attacking "underlying economic problems," and recognizes that improved food production and more equitable distribution are necessary prerequisites for adequate nutrition. However, the New Directions strategy demands more than a "trickle down" approach to nutrition.

Numerous studies have shown that increased food production and improved food supply do not necessarily translate into improved nutrition for the poor. Additional food produced in the developing countries may be exported, marketed entirely in urban areas, or hoarded by speculators or by farmers. Increased production of foods which are unsuited to the needs, tastes, or economic resources of the poor are not likely to be consumed by the poor. Several Central American countries have increased beef production substantially in recent years, but increased exports have resulted in lower domestic consumption of beef and higher malnutrition rates. Brazil's rapid growth in agricultural production has clearly brought little, if any, nutritional benefit to the severely improverished people of its Northeast. Even large-scale transfers of U.S. concessional food aid have had at best an uneven effect on the nutritional health of poor people in developing countries, AID's statement about PL 480 to the contrary notwithstanding. Adequate nutrition, then, must be seen as one of the primary and cross-cutting goals of development, with the nutrition component an integral dimension of each food production or other development undertaking.

If AID should avoid letting nutrition get lost in the food production shuffle, it should at the same time avoid too narrow a definition of nutrition. Nutritional gains in many situations do in fact depend on increased food production and related efforts, and especially on the successful involvement of small farmers and the landless poor in development. Social and economic factors should be considered as integral parts of nutrition. Activities not only in food production but also in population planning and health and in education and human resource development can have nutritional pay-offs, particularly if that objective is clear from the start.

We note with approval AID's funding of a substantive study on the problems posed by increasing infant formula use and declining breastfeeding in developing countries. A particular concern of many in the religious community, this trend has been flagged by respected nutritionists such as Alan Berg of the World Bank as a major contributing cause of infant malnutrition, illness, and mortality, and as a significant balance of payments costs for the developing world. Aggressive advertising by multinational infant formula manufacturers has helped persuade many Third World mothers to buy costly formula rather than to breastfeed. This has had particularly harmful effects in areas generally lacking in the resources necessary for wise formula use, such as clean water, refrigeration, sterile conditions, and basic literacy. The problem has been further complicated by inadequate understanding of its scope by health personnel, mothers and governments in the developing countries, and by some of the infant formula companies and their home governments.[5]

A joint resolution introduced in the 94th Congress by Rep. Michael Harrington and 28 co-sponsors underscored Congressional support for increased efforts by AID in this area, expressed the sense of Congress that U.S. businesses engaged in infant formula manufacturing or sales "have a responsibility to conduct their overseas activities in ways which do not have adverse effects on the nutritional health and well-being of people in developing countries," and called for an interagency study of the infant formula/breastfeeding situation in developing countries that would focus on corporate behavior as well as nutriton. The Taskforce urges that the issues raised in the Resolution be addressed by the Congress in the reauthorization of development assistance for FY 78–79.

7. The Geography of Aid Procurement:

The Taskforce recommends that the proportion of U.S. bilateral development funds spent in developing nations be increased, with steps taken to assure that at least one-half of such funds are spent in the developing nations during FY 70 and thereafter.

For many years AID's budget requests have stressed the benefits that accrue to U.S. businesses and to U.S. balance of payments from U.S. foreign aid spending. AID, unlike most other Executive Branch departments, can tell any Member of Congress or Senator the total dollar value of goods and services it purchases in his or her area, and in fact on occasion commits additional funds in order to assure a Member's support for a particular measure. For many years more than 90 percent of all AID's spending for personnel and materiel took place in the United States. As recently as 1975, 85 percent of AID funds were spent here. In 1976 the level declined to 70 percent, reflecting mainly increased purchases of goods and services in the aid-receiving countries. Urged by the Taskforce to accelerate the trend, AID has expressed its fear that Congressional support for development assistance may be weakened by increasing the percentage of spending overseas.

The Taskforce believes it imperative that U.S. aid programs give maximum encouragement to the development of local resources in developing countries so as to minimize reliance on external products and services. In mandating a New Directions strategy in which participation by the poor in their own self-development is central, Congress by implication recognized the necessity of encouraging local self-reliance and initiative. Aid tied to procurement in the U.S. undermines self-development in poorer nations inasmuch as imported goods and services are generally more capital-intensive and more geared to U.S. values and lifestyles than those which might be obtained through local procurement. Local procurement would promote the growth of indigenous enterprise, offer greater employment opportunities for Third World workers, and probably also help build up the kind of integrated developing country infrastructure needed to provide a sound base for long-term development. Unless foreign assistance encourages and otherwise promotes self-reliance, it will increasingly be recognized as useless and even counterproductive.[6]

While the approach we recommend may not satisfy those who justify "foreign aid" on the basis of its direct impact on the U.S. economy, we believe that a more farsighted approach would be to view development assistance as an investment in the sort of world in which we all wish to live. In that perspective, we urge that steps be taken to assure that an additional 10 percent of such funds be spent in LDCs in each of the next two fiscal years so that by FY 79 at least 50 percent of U.S. funds would be spent in the developing nations themselves.

8. Appropriate Technology and Technical Assistance—

The Taskforce recommends:

A. That Congress direct AID to incorporate appropriate technology concepts and practices into all of the functional categories of development assistance and into its work at every level.

B. That AID's policies regarding the use of pesticides and chemical fertilizer be reexamined and revised to prevent human and environmental damage.

In reviewing procurement patterns, the transferability of the technologies of the U.S. and other developed countries to the developing nations beomes a major issue. Are U.S. products generally appropriate for conditions in such countries? Complexity of products, patent rights, and other constraints frequently make advanced technologies and personnel with specialized skills both expensive and difficult to replicate in developing countries. The labor-saving aspect of advanced technology, viewed in the past as a major advantage, now appears frequently to constitute a liability for nations seeking to provide jobs for their people amid massive and chronic unemployment. Advanced technologies are increasingly questioned in the U.S. as well, as unemployment hovers around 8 percent and more becomes known about the environmental effects of "high" technologies. Lifestyles in developed countries generally, which result in the use of about 55 percent of the world's energy by 18 percent of the world's population, are now the subject of critical scrutiny. The juxtaposition of development planners and aid agency personnel has not gone unnoticed.

What is clearly needed in the area of technology are approaches adapted to local needs, relatively inexpensive and labor-intensive. This kind of "appropriate" or "intermediate" technology is fortunately receiving increased attention from AID and from international organizations. In response to a 1975 Congressional initiative calling for a new AID-funded private sector initiative in the field of appropriate technology geared to developing countries, AID has issued a thoughtful report, "Proposal for a Program in Appropriate Technology." It outlines ways in which private and voluntary organizations, academic institutions, the business community, and AID itself may cooperate in promoting and developing appropriate technology. The Taskforce field survey referred to above indicates that AID has increasingly incorporated appropriate technology concepts at the project level, although there continues to be room for considerable improvement. Partially in response to initiatives by the U.S. Congress, the Inter-American Development Bank (IDB) and Asian Development Bank (ADB) have also begun to emphasize projects employing appropriate technology.

To be sure, some developing countries have occasionally seen appropriate technology as "hand-me-down," obsolete, or cut-rate, designed to perpetuate their current roles as "drawers of water and hewers of wood" and to deflect their progress toward "modernization." But more frequently they have recognized their need for technologies which lie,

---

Footnotes at end of article.

in the words of E.F. Schumacher, somewhere "between . . . the hoe and the tractor, or the panga and the combine harvester," and which are well within their national budgets, generate local employment, and stimulate the development of local resources and self-reliance. While appropriate technology is not necessarily indigenous technology, it is inherently more readily transferable than its alternatives. In many cases, initially imported appropriate technology can soon be locally produced. Agricultural and industrial systems drawing largely on local resources, particularly human resources, offer much more hope for long-range, locally beneficial development than their alternatives.

For these reasons, it seems desirable and necessary for AID to incorporate appropriate technology concepts and practices into all of the functional categories of development assistance, and ultimately into virtually all of its development projects. Section 107 of the Foreign Assistance Act, which calls for an expanded and coordinated private sector program of appropriate technology, encourages AID in this direction. AID's previously mentioned "Proposal for a Program in Appropriate Technology" represents a good approach to the implementation of the Section. As its legislative history makes clear, the Section is meant to be complementary to an expanding emphasis on appropriate technology in all the functional categories. It could be undercut, however, by an uncritical endorsement of a major role for private enterprise in development (cf. Recommendation 10) and by present procurement patterns (cf. Recommendation 7).

We wish to comment in passing on a recent instance of glaringly inappropriate technology: AID's financing for use in developing countries of pesticides banned for environmental and health reasons in the United States. Heptachlor and chlordane, suspended by the Environmental Protection Agency because of suspected cancer-causing properties, were subsequently shipped to developing countries by AID. Leptothos, which has caused partial paralysis and other disorders of the central nervous system among U.S. pesticide plant workers, was shipped to South Vietnam and Indonesia under AID contracts. DDT has been used in a number of aid-receiving countries both for crop protection and for malaria control. In these and other instances, a number of severe illnesses and deaths are known to have occurred in connection with the use of AID-financed pesticides in developing countries. Too little is known of the long-term environmental effects of such chemicals, but what is known now suggests the need for serious rethinking of the use of hard pesticides, in the U.S. and abroad.

The need to utilize even very toxic "hard" pesticides has often been accepted as a given, both in the developed countries and, as the Green Revolution has spread, in the developing nations. The need to increase agricultural production has often been the sole or overriding determinant in rural development strategy. The undisputed need for control of malaria has led to the uncritical application and use of certain pesticides. In countries with serious pest and health problems, environmental concerns have often been seen as a luxury which only more advanced nations could afford to indulge in. A closer look at the fruits of the Green Revolution, however, has often resulted in more cautious views of pesticide use.

While some pesticides are generally beneficial if used with proper safeguards, AID has apparently moved with little selectivity in providing pesticides and related technical assistance. Some duties have shown that when chemical pesticides are applied with greatest intensity, crop losses from pest damage actually increase. Malarial mosquitos are known to become immune to DDT after several years' exposure. And the economic costs of chemical pesticides, which have been increasing rapidly in recent years, are frequently far beyond the means of small farmers in developing countries, making it highly unlikely that increased production from pesticides will actually benefit smaller farmers and others largely outside of cash markets.

There has been a growing consensus in recent years regarding the need to explore fully and implement wherever possible various alternatives to current practices of largely unrestrained application of chemical pesticides, herbicides, and fertilizers. The social and environmental costs of not doing so include continued loss of topsoil through increased runoffs, increased residues of deadly chemicals in food and water, eutrophication of lakes and pollution of rivers and streams, and the destruction of life forms other than the primary intended targets.

Integrated pest control strategies, involving techniques such as the development and use of pest-resistant plant strains, beneficial predator and parasite insects, diversification and increased rotation of crops, and the use of hormones and sterile insects often in combination with less deadly chemical pesticides, represent an increasingly attractive alternative. AID has given belated but welcome attention to such strategies, but has not yet indicated whether as a matter of U.S. aid policy integrated pest control will be given a major or relatively minor role in the future.

Other specific alternative technologies which deserve much greater attention include methane digestors, which compost human, plant, and animal wastes into both enriched fertilizer and methane gas at low costs, and the use of small-scale, low-cost wind and solar energy. Broad policy encouragement for such appropriate technology measures already exists, particularly in Section 106 of the Foreign Assistance Act, in the language of the House International Relations Committee's report on foreign assistance authorization levels for FY 1976–77, and in the language of the House Appropriations Committee's reports on the FY 1976 and 1977 foreign assistance appropriations bills.

9. Agricultural Research and Extension:

The Task force recommends that Congress monitor closely the performance of AID, and AID in turn the performance of U.S. educational institutions, in carrying out the expanded agricultural research activities enabled by Title XII of the Foreign Assistance Act.

In 1975 Congress passed a new Title, which strengthens and expands the agricultural research provisions of the Foreign Assistance Act and broadens the role of U.S. state and land-grant agricultural institutions in aiding developing countries. The Board for International Food and Agricultural Development specified in the Act is now fully operational, its members beginning with care and sensitivity the process of formulating the guidelines on which agricultural research grants to U.S. institutions will be based.

While many U.S. land-grant colleges have been active in developing countries and have actively sought to expand their activities as Title XII will provide, U.S. agricultural schools in the past have frequently been out of touch with the needs of smaller farmers and of consumers in our own country. The great bulk of research has been concentrated on gaining production increases, regardless of the socio-economic context of such increases, and generally with little consideration of measures to assure equitable distribution of economic benefits among farmers and consumers. Great sums have been spent on improving the appearance of food products, but relatively little has been spent on improving human nutrition.

In our view, Title XII could prove to be either a step towards increased self-reliance and improved agricultural output in the developing countries or a step in the direction of heightened dependency among recipient nations on U.S. technology and expertise. The success of Title XII will largely be determined by the extent of the commitment by AID and cooperating U.S. institutions to strengthening Third World institutions and to training Third World research and extension workers. The provisions of the law themselves require priority to the needs of small farmers, country-specific research, and extensive field testing and extension efforts. The inevitable temptation—to spend the major portion of Title XII funds in the U.S., on projects more beneficial to U.S. institutions and agriculture than to farmers in the developing countries—should be strongly resisted.

Responding to a concern expressed by the Taskforce that Title XII might well result in little beyond increased budgetary support for U.S. institutions, AID has noted that the enabling legislation, legislative history, and AID's guidelines and project approval procedures are "all explicit on the need to conduct agricultural research through [developing country] institutions when feasible." However, the Agency also said that limited institutional resources and skilled personnel in the developing countries effectively narrow the range of the "feasible." It is essential that at this formative stage of the new programs there be careful monitoring by Congress of AID and by AID of U.S. recipients of grants and contracts.

10. A More Circumscribed Role for Private Investment—

The Taskforce recommends:

A. That Congress call for a critical evaluation of the role and impact of U.S.-based private investment in developing countries and of the role of the U.S. Export-Import Bank and its impact on development;

B. That Congress allow authorization for the Overseas Private Investment Corporation to expire at the end of FY 77, with any clearly developmental programs under its authority being transferred to AID; and

C. That Congress direct AID to continue its "partnership" relationship with U.S. business and particularly U.S. agribusiness only to the extent that such a relationship is compatible with the New Directions mandate.

PRIVATE INVESTMENT

Until fairly recently, conventional wisdom in aid and development circles was that international private investment, while not as concessional as direct aid grants and loans, nonetheless represented a clearly developmental flow of resources from the rich developed countries to the poorer developing countries. Reports such as those of the Pearson and Peterson Commissions in the late 60's and early 70's placed great emphasis on the benefits of overseas investment by multinational corporations (MNCs) for developing countries—and for private enterprise and the developed countries.[1] Opinion in the Third World, never entirely unified, has generally taken a much more suspicious and often hostile view of the MNCs. Suspicion has increased in recent years, both in those countries and elsewhere, spurred largely by more careful scrutiny of the activities of MNCs and their impact on Third World development. Observers have noticed:

MNC investment in agriculture tends to involve the exporting of raw materials from developing countries, with relatively little value added through processing labor. Developing countries are thus locked into their traditional roles as cheap sources of supply for the developed countries, maintaining their vulnerability in trade relations. Multinational agribusiness, by increasing the practice of producing cash crops for export, often displaces small farmers and preempts prime land which would otherwise produce food for

---

Footnotes at end of article.

local production. Even when local small producers are raising cash crops for export, local economies are generally able to gain more from their purchasing and spending than they are from MNCs, which often buy and sell overseas and use labor-displacing technology.

Investment by MNCs tends to be heavily concentrated in the extraction of natural resources such as petroleum and metals. Again, relatively little processing or skilled labor occurs in the developing countries, partly as a result of trade barriers in the developed countries against processed products. Once a natural resource is exhausted, the developing host country is left without an ongoing source of revenue, while the private company can take its operations elsewhere in search of profits.

Instead of supplying external capital, MNCs have tended to utilize local capital, despite the conventional understanding of how they function. Over 75 percent of MNC investment capital in the 60's was from local sources rather than the company's base country. This places MNCs in direct competition with local businesses in developing countries for scarce capital resources, adding depletion of local capital to depletion of non-renewable natural resources.

MNCs engaged in marketing activities in developing countries have fostered the growth of consumer tastes which are often grotesquely inappropriate in developing countries. Richard Barnet and Ronald Muller in Global Reach cite cases of Latin American peasant farmers selling their meager supply of eggs in order to buy coca-cola—while their own children suffer from malnutrition. Similar instances can be cited in connection with the marketing of products such as cosmetics, drugs, and luxury foods.

Many multinational corporations have sales greater than the gross national products of the developing countries within which they operate. They often have monopolies over forms of technology through patent restrictions and frequently enjoy tax benefits from their base country and often from host countries as well. Transfer buying and selling between subsidiaries of a parent company can hide a full accounting of profits and losses from the public. Most developing countries find themselves unequal partners of the MNCs, unable to exercise control over multinational investment and its many effects on their societies.

It is not necessary to conclude that MNCs are inherently evil or somehow constitutionally opposed to the development of the Third World. With very rare exceptions, businesses exist in order to make profits, not to pursue social goals. Some companies undoubtedly prefer to be socially beneficial whenever they can do so and still make a profit. Others apparently have less concern for society as a whole. While some MNCs may be of help to some developing countries, particularly to those with sufficient economic and political strength to enter joint ventures as the equals of the powerful corporations, it should never again be assumed that private investment automatically serves development along "New Directions" lines.[8]

The Taskforce therefore recommends that Congress mandate a thoroughgoing and critical interagency evaluation of the actual and potential roles of private investment (especially U.S.-based) in developing countries.

THE U.S. EXPORT-IMPORT BANK

Similarly, the role of the U.S. Export-Import Bank (Eximbank) should be thoroughly reviewed. Eximbank provides financing through direct loans, guarantees, and insurance programs to U.S. and foreign businesses and to foreign governments in order to facilitate the exporting of U.S. goods. Loans are made at or close to commercial rates, although a concessional element is sometimes added through somewhat lowered interest rates or the extension of "grace periods" before loan repayments are required. While not generally considered a foreign assistance program, Eximbank is funded under foreign assistance appropriations legislation and is treated as such in some governmental discussions. Eximbank financing for developing countries amounting to $5.1 billion was authorized in FY 76—far more than the total of U.S. bilateral and multilateral official development assistance in recent years. Dollar flows of this magnitude clearly have a significant impact on development planning in the LDCs, an impact which could be assessed as part of the recommended study.

THE OVERSEAS PRIVATE INVESTMENT CORPORATION (OPIC)

OPIC was created in 1969 under the Foreign Assistance Act as a separate agency to "mobilize and facilitate the participation of United States private capital and skills in the economic and social development of less developed friendly countries and areas, thereby complementing the development assistance objectives of the United States." OPIC insures the investments of U.S.-based multinational businesses against the risks of currency inconvertibility, expropriation, war, revolution and insurrection, and also maintains a very small program of direct lending and loan guarantees aimed at facilitating investment in economically risky developing country situations.

OPIC's legislative mandate is to "encourage and support only those private investments in less developed friendly countries and areas which are sensitive and responsive to the special needs and requirements of their economies, and which contribute to the social and economic development of their peoples." In practice, however, OPIC has written insurance for projects such as the Habitation Leclerc Hotel in Haiti, where $150 per day room charges contrast starkly with average Haitian per capita income levels of less than $150 per year. OPIC insurance has also covered ITT Sheraton hotels in India, Brazil, and Taiwan, and a gaming lodge in Kenya owned by Chase International.

OPIC is also mandated "to give preferential consideration" in writing insurance and extending financing to "investment projects involving businesses of not more than $2,500,000 net worth or with not more than $7,500,000 in total assets." In 1974, however, more than three-fourths of all OPIC insurance was covering corporations on Fortune Magazine's list of the largest 500 companies and banks on Fortune's list of the 50 largest.

A 1974 Senate Foreign Relations Committee report stated "we cannot conclude that the OPIC investment insurance program is justified on the grounds that it is an aid to development of the poorer countries. Rather, the program is used by American corporations as an insurance program which lowers their risk against adverse political events in less developed countries." Referring to a General Accounting Office statistical study done for the Foreign Relations Committee, the report observed that according to criteria introduced by OPIC itself, "50 percent of the OPIC insured investment projects were rated adverse by GAO with respect to their impact on local LDC capital mobilization (equity participation by local capital); 27 percent of the projects were rated adverse with respect to their effect on local LDC suppliers or down stream industries; and 27 percent of the projects were rated adverse with respect to their effect on local LDC employment and skill creation. Most of the rest of the projects had only slight positive impact on these areas."

Portions of OPIC's very small program of direct lending and loan guarantees may conceivably serve developmental purposes. If they can be clearly shown to do so, they should be transferred to AID and monitored closely in the future. Meanwhile, OPIC's authorization should be allowed to expire in 1977, since its operations are not in keeping with the New Directions approach to development policy of the U.S. and small business people.

AID'S "PARTNERSHIP" WITH AGRIBUSINESS

Early in 1976 AID announced a new "partnership" with U.S. agribusiness, aimed at helping to "solve the food production and distribution problems in developing countries while creating job opportunities for the rural poor." AID's 1977 Congressional Presentation, observing that "Small-scale and large-scale agribusiness firms can bring unique technical and management skills to bear at bottlenecks at all phases of the food production and marketing cycle," notes that "AID is expanding its efforts to involve U.S. agribusiness in development programs and strengthen local private sector agribusiness in developing countries."

AID's main experience at the field level with agribusiness has come through the Latin American Agribusiness Development Corporation (LAAD), which involves some of the largest U.S. agribusiness companies such as Cargill, John Deere, Gerber, Ralston Purina, and the Chase Manhattan Bank in joint ventures with Latin American agribusiness. Whereas the New Directions mandate calls for priority attention for channeling development assistance to meet basic human needs and involving the poor in development, LAAD appears to have had different effects. A 1974 AID-financed evaluation of four years' work by AID's model project found that "the direct effect upon domestic consumption by LAAD appears to be slight because the bulk of the product lines handled are either destined for upper middle, upper class consumption or for export . . . The effect made on small farmers and cooperatives to date has been nearly nil."

In the view of the Taskforce, AID's increased emphasis on a "partnership" relationship with U.S. business and especially with U.S. agribusiness should be continued only to the extent that it is compatible with AID's "New Directions" mandate. In fact, we question whether the concept of "partnership" is appropriate. As an alternative, we would suggest an emphasis on mutual cooperation involving the selective use of American farmers and small business people (including those in agriculture-related fields) as consultants, matching appropriate U.S. skills with specific, known needs of small farmers and entrepreneurs in developing countries.

11. U.S. Private and Voluntary Organizations—

The Taskforce recommends that the Congress incorporate into the Foreign Assistance Act policy language recognizing and facilitating an expanded role for U.S. PVOs in broad partnership with the U.S. government.

The overseas work of U.S. private and voluntary organizations (PVOs)—traditionally in relief and increasingly in development—has been broadly supported by the American people and widely acclaimed by independent observers. PVO programs are generally credited with providing a direct people to people approach aid, with reaching needy people otherwise not touched by the efforts of governments and international agencies, with creative uses of appropriate technology, and with low administrative expenses. PVOs have, by and large, cultivated and maintained the trust of their contributors, who have expanded substantially the level of their contributions in recent years in response to hunger and other crises.

Congress at the same time has given increasing support to the activities of U.S. PVOs, although a broad partnership role with the U.S. government for such organizations has yet to be addressed in the Foreign Assist-

Footnotes at end of article.

ance Act as a matter of development assistance policy. Traditionally, AID has provided PVOs with reimbursement for certain ocean freight expenditures for shipping materiel to programs overseas, made available to PVOs food commodities under the grant programs of Title II of PL 480, and entered into certain other grants and contracts. Recent financial grants have assisted PVO administration and training and overseas program operations. However, difficulties in working relationships and differences in policy matters between AID and PVOs still remain, and the broad supportiveness, flexibility, and "facilitation-without-strings" which characterize the relationships between other governments such as Canada and Sweden and their PVOs is largely absent from the U.S. scene.

The 94 PVOs registered with AID's Advisory Committee on Voluntary Aid recently reported income for a recent twelve-month period of $951 million. Of this, $597 million came from private contributions in cash and kind, $354 million from U.S. government support of the above sorts. These agencies carried out in more than one hundred countries programs of emergency relief to victims of natural and other disasters and of development in fields such as agriculture, health and family planning, education, and housing. Unlike its low rank among the industrialized nations in its expenditures on official development assistance as a percentage of GNP, the U.S. in the annual per capita private contributions of its citizens as a function of GNP stands near the top of the list of donor countries.

In light of the above considerations, the Taskforce urges Congress to facilitate an expanded role for U.S. PVO's in broad partnership with the government. In such a partnership role, PVO's while subject to reasonable accountability for their use of government funds, should in their operations enjoy maximum feasible autonomy from the U.S. government. Moreover, PVO's, though supported in part by government funds, should not be considered by the Congress or the Executive Branch as an overseas arm of U.S. foreign policy.

CONCLUSION

Over two years ago, representatives of 130 nations, meeting at the World Food Conference in Rome, committed themselves to bring about by 1985 a world in which "no child will go to bed hungry, . . . no family will fear for its next day's bread, and . . . no human being's future and capacity will be stunted by malnutrition."

We urge you to establish an international development assistance policy that, sensitive to the claims of justice and compassion, will move us toward that goal of a hunger- and malnutrition-free world.

FOOTNOTES

[1] The value of the P.L. 480 program increased from $972 million in FY 74 to an estimated $1.337 billion in FY 77.

[2] See Appendix.

[3] The developers of each list acknowledged the imprecision of the groupings they have created. The imprecision results from the sketchiness of the data in many developing countries, the inequalities of income which per capita averages do not take into account, differentials of purchasing power and inflation in various nations, and most importantly, the frequently indirect correlation between economic data and quality of life indicators such as literacy, health care, housing, and nutrition.

[4] Had a needs-oriented allocations process been followed by U.S. aid administrators in recent years, Vietnam and Laos would doubtless have qualified for post-war reconstruction and, the nations of the Sahel would have received more substantial amounts, and Mozambique would probably have continued to be a recipient of U.S. bilateral economic assistance.

[5] Two U.S.-based powdered baby milk manufacturing companies recently announced, in response to shareholder resolutions introduced by church groups, that they would cease certain advertising practices and otherwise sharply modify their marketing activities in the developing countries. Other shareholder resolutions and at least one court case brought by church groups relating to infant formula marketing abroad remain pending.

[6] Our attention here is directed toward purchases in developing countries themselves with U.S. aid funds. Under current practices, U.S. development *loans* allow for purchases in developing countries themselves, although procurement procedures give a clear advantage to U.S. suppliers. U.S. development *grants*, on the other hand, are strictly tied to U.S. procurement. We note in passing the announced intention of the U.S. government to negotiate the "reciprocal untying" of aid with other *developed* countries to enable purhases in those countries with U.S. aid funds. This promises to enhance the purchasing power of current U.S. expenditures, but does not address the need for increased purchases in *developing* countries themselves to which we refer above.

[7] The term "multi-national corporation (MNC) has no single agreed-upon meaning. MNCs are sometimes defined as inclusive of those companies with (1) yearly sales of at least $100 million, (2) operations in at least 6 countries, and (3) overseas subsidiaries which together make up at least 20 percent of total annual accounts. The U.N., on the other hand, defines MNCs or "transnational corporations" (TNC as any enterprise active in production or in services outside of its base-country's borders, regardless of scale and even apart from the question of private or state ownership of a given company.

[8] Unfortunately, much less attention has been given (by both advocates and opponents of private investment) to the actual and potential effects of small-scale private investment, both local and foreign, in the developing countries. We see this type of investment as generally offering greater potential benefits for developing countries pursuing an equity-oriented growth strategy, although we would again caution against an unexamined presumption of beneficial results.

THE ROAD IS PAVED WITH GOOD INTENTIONS

Mr. GARN. Mr. President, recently, at Brigham Young University in Provo, Utah, former Congresswoman Edith Green presented an enlightening speech entitled "The Road Is Paved With Good Intentions." In this speech she addresses the effects Government regulations have on our lives and states that while most regulations are well intended the results are oftentimes disastrous.

How many times have we as Members of Congress worked long and hard on a bill and thought the intent was clear only to witness the lack of commonsense involved in administering the law and oftentimes total distortion by regulations of the original purpose and intent of the bill? As author of title IX of the Higher Education Act, Mrs. Green knows only too well how this can happen.

As she points out:

Good intentions are fine but what happens in the local print shop, the local university, the local bus station will determine the degree of confidence people have in their government.

Mr. President, I ask unanimous consent that Mrs. Green's comments be printed in the RECORD.

There being no objection, the comments were ordered to be printed in the RECORD, as follows:

THE ROAD IS PAVED WITH GOOD INTENTIONS

(By Mrs. Edith Green)

It has been almost 20 years since I made my first visit to Salt Lake City. Sputnik had gone into orbit and there was great concern about American education. Were we producing enough scientists, enough engineers, enough technicians so that we could maintain superiority over the Russians? How many of our Ambassadors and foreign service personnel could speak the language of the country to which they were being sent?

Out of this was born the National Defense Education Act of 1958. The word "Defense" was carefully included because otherwise there would not be enough votes to insure approval by the Congress. This was the first major education bill affecting colleges and universities since the Land-Grant College Act signed by Abraham Lincoln.

The American public and Congress were rightfully concerned about the quality of education, about the small percentage of male high school graduates who were going on to college, about the still smaller percentage of female high school graduates who were being admitted to universities, about the concentration of Negroes in the all-black colleges of the South, yes and about the black maid with tired feet who defied orders and tradition and who dared sit in the front of that bus in Selma, Alabama.

Out of these honest concerns came the National Defense Eucation Act, the Higher Education Facilities Act to build college libraries and science buildings, the Civil Rights Act of 1964, the Health Personnel Act to train more doctors and nurses, the Housing Act to provide dormitories, the Higher Education Act of 1972 with its controversial IX and the Occupational and Safety Health Act to protect the safety and health of some 60 million workers.

The intentions were noble—to improve the quality of education and to provide equality of opportunity for every young person who really wanted an education regardless of race, color, creed, or sex. Many of the intended goals were achieved. College enrollments did increase dramatically in the 60's; between 1955 and 1965 the number of high school graduates going to college increased 110 percent; women and blacks were being admitted to study at some of the best universities; quotas were being abolished; professions historically closed to most women and most blacks were searching for qualified applicants.

But what also has happened that would cause university presidents to say to the Office of Education in our Nation's Capital that the "road to hell is paved with good intentions—but this is what is happening on our campus!"

The faculty and students at Brigham Young do not need to be reminded of the courageous action of your Board of Trustees and President Oaks in objecting to certain HEW regulations attached to Title IX. I applaud their action. Little Hillsdale College in Michigan joins Brigham Young when it declares "We will comply with some of the Title IX regulations as put forth by HEW."

President McGill of Columbia University complains that the only voice the university hears is that of junior officials from EEOC on the HEW Civil Rights Office who have the power to bring harassing suits. A month ago, Oregon colleges opened fire on Congress and the Veterans Administration over a new order requiring colleges to keep detailed records of Veterans enrolled in each course of study. HEW backed down.

A syndicated columnist writes about the giant bureaucracy connected with Higher Education: "It seems to be exercising the arrogance of officialdom which Cicero once described in ancient Rome."

A small business man in Pocatello, Idaho defied a Federal Inspector of OSHA (Occupational Health and Safety Act) and took his case to court. A three judge panel upheld the business man's position in a strongly worded decree. The United States Supreme Court carefully side-stepped the DeFunis case, but other cases are on the way up on reverse discrimination.

What has happened to our good intentions? First, explosion of paper work. There is much talk about the scientific explosion, the knowledge explosion, but the paper explosion is horrendous. Each new law, each new regulation increases the volume. Senate subcommittee estimated that it costs Uncle Sam about $16 billion a year to "print, shuffle and store" all of the forms, papers that business (including universities) must fill out. It costs business men another $18 billion to get the forms filled out. Head of the National Archives office estimated the guess was conservative. He reported that in one year paper work sufficient to fill more than 35 box cars.

Then in the ever present Bureaucracy, a Federal Agency consists of an upper echelon of political appointees cabinet-sub-cabinet positions. Traditionally, their life-spans in office are very short. Then there is a vast underlay of permanent civil service personnel known as the "Feds." The top people rarely get a chance to get a real grasp on the Agency before moving on. As a result the lower level bureaucracy runs the show. In practice this means that regulations and guidelines are issued, laws are interpreted, contracts are let by 3rd, 4th, and 7th ranking officials who too often are immune to constituency complaints. In fact Civil Service manages to protect all who come within their purview—from any serious restraints on their freedom, except in rare cases of malfeasance.

Let's examine briefly just two laws Congress passed. The passage of OSHA (Occupational Safety and Health Act) was accompanied with great hopes that through a coordinated effort and firm but fair enforcement of procedures, we could begin a meaningful attack on the 14,000 deaths, the more than 2 million disabling injuries and the hundreds of thousands of occupational illnesses that occur in the work place each year—including university campuses.

The legislation had hardly been enacted when complaints began crackling over Congress like a summer electrical storm and its thunder reached such proportions that both the House and the Senate slashed the operating budget of the new Safety Agency.

The law was put into effect in April 1971. One month later a special edition of the Federal Register was published containing 250 pages of safety and health standards. Seven pages dealt with the use of step-ladders alone; such erudite warnings that one could be injured more severely if he fell off the top than from the bottom step. Senator Curtis asked the Library of Congress to provide a copy of all the standards and codes which the Occupational Safety and Health Act had blanketed into law. Three days later, the Library advised that it was a monumental undertaking which would require the cooperation of the Department of Labor. Senator Curtis found that the documents made a stack 17 feet high. It would cost a business man $4000.00 to buy all of the publications that had been incorporated into the law.

The consensus codes of the construction and industrial groups—developed over the years were incorporated and became Federal law. Although many of these "consensus" codes had been in existence for years, most people were, more often than not, completely unaware of their existence. They had been guides, recommendations adopted at different times by industries, but not mandatory. Suddenly—without review, these codes became law.

Some of the now famous and ludicrous examples stemming from OSHA are attributable to this factor. The "ice water fiasco" is one of the most notorious. An OSHA regulation stated that "ice shall not come into direct contact with water it is cooling." Fines were levied against some who were found to have ice in their ice water! This regulation was an archaic throwback to the days when the ice industry cut ice out of lakes in winter and stored the blocks for summer use. It was in an old consensus standard, picked up and incorporated into OSHA regulations without review. Finally, finally OSHA published standards which provided that ice used in ice water must be free from contamination.

One Navajo Indian found himself in violation because he had to have a phone—one outside and one inside the mine—even though he operated the mine alone and there would have been no one to answer the phone at the other end—had it been installed. He also had to have a stretcher, so, if he is hurt, someone would carry him out—but, again he was the only one there.

Uniform requirements regardless of local conditions, unseasonable regulation can only breed disrespect. Regretfully, while Congress can write our common concerns into legislation, we cannot legislate the uncommon gift of common sense needed to administer laws intelligently. What can be even more disconcerting to a legislator, is to see regulations issued for a program which totally distort the original purpose and intent.

Certainly it was not the intent of the Civil Rights legislation to bring about reverse discrimination. Yet this is precisely what has happened in many cases. The DeFunis case being the best known. Yes, in Portland, a ship conversion plant, for example, employed 15 percent minority workers—a considerably higher percentage than in the state itself. Inspectors from San Francisco, however, said they must have at least 15 percent in each department; 15 percent secretaries—carpenters, welders, etc. They had only two secretaries and one bookkeeper, but before they could hire any more whites, 15 percent of the two secretaries and one bookkeeper must be minority people. Qualified black welders were not available. This did not discourage the Federal Administrators—they said black welders could be imported from Chicago and other areas. Local qualified white welders could not be hired until the 15-percent quota was met. Yet—nowhere in the Civil Rights legislation is such shuffling of population to meet artificial quotas suggested.

In 1972, when we enacted the Higher Education Act—including Title IX—to end discrimination against women, we ought to be exceedingly explicit so that the establishment of quotas would be prohibited. I was surprised and dismayed when complaints from colleges and universities came in stating that the Department of Labor was requiring them to meet quotas. Some institutions complained that, under Labor Department restrictions, they would not be able to hire a white male faculty member until the year 2000. I consider the rhetoric of some in saying, "We don't require quotas—we require goals"—as nothing more than a game of semantics!

For years I participated in the great national struggle against discrimination—both discrimination on the basis of race and discrimination on the basis of sex. One of the ugliest aspects of discrimination was always the "quota system"—quotas limiting women, blacks, HEW's, persons of Irish descent—and on and on.

As I watched it over the years, quotas rep-

resented the crudest form of mindless inequality, because that meant that an important decision was being made not on merit—but on some blatantly unfair, irrelevant criterion.

I find it hard to understand the reasoning that now leads well intentioned people, in simplistic zeal, to institute reverse quotas. Do they believe that one injustice deserves another? Is the basis of judgment to be "merit" or some strict ethnic or sex formula?

Will we need to parcel out all opportunities to so many people aged 20 to 30, so many aged 30 to 40, etc. so many Protestants, so many Mormons, so many Catholics, so many Jews—and so on without end? Is this what democracy has come to mean? Can there be opportunity or hope in such a rigid system? Often people argue that this is the only way to redress evils that have lasted hundreds of years: because my grandmother was considered almost as chattel—because my grandmother did not have the educational opportunities her brothers had—because she could not own or sell property (even property she inherited)—because she was never allowed to vote—am I, her granddaughter, to be given preferential treatment to supposedly redress the grievances of the past? I think not.

During my life, I would only have liked equal treatment, I do not believe it is just, nor fair, nor indeed wise for this generation to try to design a social system based on the mistakes—the injustices practiced by our forefathers. I do not believe this is the best way to launch a more just world of the future.

I have never believed that race, sex, religion, or national origin are valid criteria for either "favorable" or "unfavorable" treatment. This is one reason why I have been opposed to programs which give an advantage in job consideration and promotion to members of those groups who have suffered historic discrimination. As a woman I am a member of one of those groups and keenly aware of the injustices which exist—and I could recite by chapter and verse personal experiences to document the case.

Nevertheless, I reject the thesis that reverse discrimination is therefore justified. When Congress passed the Civil Rights Act in 1964, the purpose was to end discrimination on the basis of race, color, creed, national origin, or sex. It was not designed to replace one injustice with another. One of the most damaging things about prejudice, in my view, is that it gives primary value to a group characteristic rather than recognizing the unique individuality of each human being. It does not matter whether this discrimination works in the person's favor or against him. What he or she still loses is the irreplaceable privilege of being looked upon as an individual rather than an anonymous face in the crowd.

As I see it—only genuinely equal opportunity—containing neither advantage nor disadvantage can provide this.

This is what Title IX was all about—equality of opportunity. It was designed to end discrimination on the basis of sex—in admission standards to undergraduate or graduate schools. It was designed to end discrimination in pay. If a female faculty member had the same professional training—the same experience, the same responsibilities as a male professor then she should be paid the same salary. Title IX was designed to provide equal opportunities for disadvantaged young girls in the Job Corps and other federally financed educational programs. Title IX was not designed to do away with intercollegiate sports. Title IX was not designed to force the integration by sex, of every physical education class in the country. Title IX was not designed to do away with all male choirs, father-son or mother-daughter banquets—or to require the integration by sex of boy scouts, girl scouts, campfire girls, Y.M.C.A.'s, Y.W.C.A.'s—sororities, fraternities.

In each one of these instances—the regulation grew out of the fertile imaginative brain of someone in the administrative branch of the government—and in each instance either the Congress had to pass a specific law prohibiting such action—or the President of the United States had to issue an Executive order to stop the nonsense.

There is nothing timeless nor sacrosanct about local control of education—but there is theoretical sense and good common horse sense in recognizing that all initiative and all wisdom does not somehow automatically flow to and collect on the banks of the Potomac—there to be gathered and redistributed as gifts of the all-seeing, all-knowing Federal government. I suggest the new administration could make a tremendous contribution—perform a valuable service—if in its new reorganization plans, it pass this word down to the thousands of Federal employees who spend their days and their hours drawing up new rules—new regulations.

Good intentions are fine—but what happens in the local paint shop, the local university, the local bus station will determine the degree of confidence people have in their government.

PROPOSED ARMS SALES

Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is immediately available to the full Senate, I ask unanimous consent to have printed in the RECORD the notification I have just received.

There being no objection, the notification was ordered to be printed in the RECORD, as follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., March 30, 1977.

Hon. JOHN J. SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal N. 77-19, concerning the Department of the Navy's proposed Letter of Offer to Norway for anti-submarine patrol aircraft estimated to cost $21.7 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

H. M. FISH,
Lieutenant General, USAF, Director, Defense Security Assistance Agency, and Deputy Assistant Secretary, (ISA), Security Assistant.

TRANSMITTAL NO. 77-19

(Notice of proposed issuance of letter of offer pursuant to section 36(b) of the Arms Export Control Act.)

(i) Prospective Purchaser: Norway.

(ii) Estimated Values: (1) Major defense equip., $17.9; (2) Others, 3.8; Total $21.7.

(iii) Description of Articles or Services Offered: Three (3) P-3B anti-submarine patrol aircraft.

(iv) Military Department: Navy.

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Date Report Delivered to Congress: March 30, 1977.

FOOD ADDITIVE SAFETY AMENDMENTS OF 1977

Mr. BARTLETT. Mr. President, I am pleased to join as a cosponsor of S. 1046, introduced by Senator SCHWEIKER for himself and Senators HELMS, DALE, HATFIELD, and RANDOLPH. This bill, the Food Additive Safety Amendments of 1977, would reform and make more realistic the law regulating the availability of certain food additives such as saccharin.

The Food and Drug Administration's proposed ban on the use of saccharin points out clearly the deficiencies in the existing law. The present law, in the provision popularly known as the Delaney clause, mandates that any food additive be banned which "is found to induce cancer when ingested by man or animal." The law permits no exceptions and provides for no discretion in the Food and Drug Administration.

Certainly I have as much concern as anyone with the dangers of food additives that might cause cancer. But the present law, which wholly ignores the counterbalancing benefits of a particular additive, is a meat-axe approach to the problem which can result in ridiculous results such as the saccharin ban.

The FDA's ban of saccharin was based on a Canadian study which showed that saccharin, taken in massive quantities, may cause cancer in rats. The amount given the rats was the equivalent of the amount a person would get from drinking 800 12-ounce cans of diet soft drink every day for the rest of his life. Even given the differences in metabolic rates and lifespan between humans and rats, that sort of test obviously proves nothing. Taken in those quantities, anything from apples to drinking water might cause cancer.

Dr. Sherwin Gardner, Acting Commissioner of the Food and Drug Administration, recently acknowledged before a congressional committee that—

> We have no evidence that saccharin has ever caused cancer in human beings. . . .

And yet, present law requires that saccharin be banned.

I suppose one solution to this problem would be to write a law requiring, as one Member of the House suggested, that saccharin products be labeled like cigarettes with this language: "Warning: The Canadian Government has determined that saccharin may be hazardous to your rat's health." But I think the approach of S. 1046 is better.

S. 1046 would provide that in determining whether a food additive should be banned, the benefits of it must be considered in addition to weighing its cancer-causing potential. The bill also provides for the continued availability of saccharin until the desirability of saccharin use could be analyzed and weighed under the new procedure.

The approach set out by the bill, unlike the present law, would take into account the needs of the millions of Americans who suffer from diabetes as well as those who might develop other health problems as a result of weight increases.

In sum, I think this bill strikes a reasonable balance between the assurance that Americans are not subjected to a substantial risk of cancer and the assurance that the ban of a product doesn't needlessly increase the risk of other health hazards. The bill is a cautious, reasoned approach to a difficult problem. I urge its adoption.

MODERN WAR TECHNOLOGY NECESSITATES A GENOCIDE TREATY

Mr. PROXMIRE. Mr. President, for the past several years I have urged ratification of the Genocide Convention. The purpose of the treaty is to make the "intent to destroy, in whole or in part, a national, ethnical, racial or religious group" an international crime.

Today the threat of genocide is greater than ever before. The numbers of people and conflicting beliefs continue to grow. The biggest and most frightening development, however, has been in the weapons of war. Modern technology has given us a wide array of techniques which make it easier than ever to selectively eliminate particular groups.

Biological warfare, particularly germ warfare, can be selectively targeted. In the French and Indian War, masses of Indians were purposely killed by giving them blankets infected with smallpox. The tragedy of this genocidal use of biological warfare is increased when we consider the many other tactics available to make genocide an easy feat. Chemical warfare and nuclear warfare are grave tools of war. We cannot forget the instant destruction of Hiroshima and Nagasaki. Add to these methods of warfare conventional weaponry, which Hitler proved unquestionably effective in wiping out millions of innocent people.

It is obvious that the world's rapidly advancing war technology compels us to act. We have no hesitancy about working from the strategic end—the SALT talks. Why then are we so hesitant to condemn the actions which would make use of it? The Genocide Convention is a treaty which gets at the core of the issue; it condemns genocide and genocidal attempts and morally obligates those who sign it to do all they can to prevent these heinous murders. The United States has not done this. What must the rest of the world think of us?

Mr. President, 82 other countries have ratified the Genocide Convention because they know it is a valuable foundation for international harmony, an expression of international morality we all can, and must, share in order to survive.

WHEN SUNSHINE CAUSES SUNBURN

Mr. DOLE. Mr. President, like most other Members of the Senate, I voted last year for the freedom of information amendment to the Government in the Sunshine Act of 1976. I did so, however, with definite reservations—some of which I expressed at the time.

After all, who can oppose open government, openly conducted, in favor of closed government, secretly conducted? Who can favor darkness over daylight or shadow over sunlight as the conditions under which a free society should operate?

"Let the sun shine in," we say, and let there be free access to government information for every citizen. To argue otherwise would be bad enough; to vote otherwise would be akin to opposing motherhood and apple pie.

But as I said, before I cast my affirmative votes for the FOIA amendment and the Sunshine Act itself I cautioned my colleagues of the potential for abuse and injustice inherent within each. It now appears from a gesture of "compliance" which has crowded the headlines over the past 2 weeks that my concerns were well-founded.

I refer specifically to the release by HEW on March 14—in response to a number of Freedom of Information Act requests—of the names of physicians in solo practice, medical groups, and laboratories for whose services medicare allegedly paid $100,000 or more in 1975. It has taken until now to have some idea of the extent of personal damage done to a substantial number of America's doctors by that action, but whatever the final analysis might show, we know enough already to realize that indiscriminate doses of "sunshine" can often lead to "sunburn."

Incidentally, the interim regulation to implement those requests was not published in the Federal Register until 2 days after the date of release—which seems in itself to be jumping the gun a bit—but regardless, Secretary Califano apparently felt there was an immediate pressing need to "let the sun shine." In the process, as we have since witnessed, he watched the hide get fried off HEW's own Bureau of Health Insurance.

"Why?" or "Why not?" and "So what?" I was tempted to ask when the information was published naming 409 physicians; 1,752 groups; and 58 laboratories for whose services medicare paid the $100,000. After all, it was the intent of Congress that medicare cover the cost of physician services for our elderly. Should the press, therefore, conclude, or invite its audience to conclude, that payment of more than $100,000 is excessive, abusive, wasteful of the taxpayer's dollar, or dramatic evidence of a ripoff?

I personally tend to view such payments, unless given evidence to the contrary, as showing that a Government program is functioning as it was designed to function and providing the services it was intended to provide. Unfortunately, however, the release of data of this sort does nothing to reassure the American people of the program's effectiveness, especially when it has not been so interpreted by the press.

"HEW Releases Names of Doctors on Medicare Gravy Train," trumpeted the Fort Lauderdale Sun-Sentinal. And this more or less reflected the attitude initially taken by much of the media.

Few of the stories which reported on the HEW release, that is, bothered to explain that the figures cited were gross, not net, and that by no means did they represent what the doctor put away in his bank account until the IRS could get hold of him at tax time. Moreover, few stories mentioned that the dollar totals quoted included not only payments to the physician but payments made directly to the beneficiary in cases where they themselves were responsible for the doctor's bill.

In those latter instances, whatever the reimbursement should have been showed up in the HEW list as part of the total figure, even though it was a payment the doctor may never have received. But let me get down to specifics by citing some individual examples of error and misrepresentation which have been pointed out to me.

The first involved one of my physician constituents from Salina, Kans., Dr. John H. Schwartz, who was listed as a recipient of $135,066 in 1975. He protested in understandable indignation that the figure was somewhat inaccurate, since he had actually been reimbursed only $7,765 or some $127,300 less than claimed.

I thought at first that this was probably an exception—a simple oversight that had crept into an otherwise flawless computer masterwork—but later I read of a Kansas City physician, reported by HEW to be in solo practice, who was supposed to have received $280,712 from medicare. As it turned out, he was neither an officer nor a full member of a 60-physician group called Medical Associates Chartered—a corporation of the internal medicine department at the University of Kansas Medical School—yet was credited with its total billings and reimbursements.

The Associated Press wondered how and why such a thing could happen, and decided to ask the physician involved, Dr. Daniel Hinthorn, for an explanation. Dr. Hinthorn informed them that he had received no more than $1,000 and probably closer to $700 if the truth were known.

"I hate to have people think I'm getting wealthy off of poor people," Dr. Hinthorn told the AP. "Actually," he said, "I am not getting wealthy at all," adding that professors are paid about half or a third of what private physicians earn.

Dr. Roger E. Murken of Ames, Iowa, was listed as having received $702,453. He left the 44-physician McFarland Clinic in December of 1975 and is now practicing in Pomona, Calif., but the publication of his name and the vast amount of money he allegedly received have caused him, and his relatives in Ames, some serious headaches. It has also subjected them to considerable abuse, for his story was heavily publicized by the Iowa newspapers and the local segment of the Today show.

The doctor's parents and in-laws still living in Ames kept getting asked if the reason Dr. Murken had moved to California had been because "he made all that money on medicare patients." The fact is, Dr. Murken's gross receipts, as-

signed and unassigned were only between $15,000 and $20,000 during 1975.

The HEW regional director in Kansas City, who checked the figure at Dr. Murken's insistence, agreed that the $702,453 figure was completely in error. Dr. Murken felt obliged to point out that any physician in a town of 30,000 who made $702,453 in a single year of treating medicare patients would have to be the most shameless crook at large, and that the press should have at least consulted him before using a patently stupid figure.

"HEW put me to a lot of effort, cost me a small fortune in telephone calls, and forced me to take a lot of abuse," Dr. Murken said, "and I do not feel they should have the right and the power to do that." I agree with Dr. Murken, Mr. President. No agency of Government has the right, or should have the power, to do that.

The cases I have cited, however, are by no means isolated examples of bureaucratic error. Dr. John Chidlow of Shreveport, La., for example, who was said to have received $298,686, says that figure must have been what was paid to him and 18 other physicians with whom he works.

"I will be happy to forget the whole matter if Mr. Califano will send me the rest of the money I am supposed to have collected," Dr. Chidlow said helpfully.

A Michigan doctor, listed as having received $115,000, actually got $15,000. "My wife must think I have an apartment on the side and a mistress as well," he told the AP.

Dr. Ernest Watson of Elmhurst, Ill., was another listed as having received over $100,000 from medicare—specifically, $233,871. But Dr. Watson is a pediatrician—and baby specialists are not frequently sought out by persons 65 years of age or older. Dr. Watson is 76 years old and has been living in Arizona for the past 12 years. He is retired and, needless to say, practiced no medicine at all in 1975.

Mr. President, HEW's list of solo practitioners even included General Hospital in Detroit. I suppose someone at HEW must have thought that some physician named Dr. Hospital held a reserve rank in the armed services as a major general.

I could go on. I could recite cases where physicians have been besieged by crank calls and threats. I could describe instances in which their children are being taunted on the playground for having a cheat or a crook for a father.

There is still a different type of repercussion where this HEW release threatens a cut-back of medical school appropriations by the State legislature. And in at least one other case, philanthropic contributions to a hospital may be curtailed because it is allegedly getting rich on medicare.

These problems were caused by inexcusable and egregious errors in HEW reporting, Mr. President. They are in addition to the damage done to reputations, peace of mind, and domestic harmony.

But it is pointless to give the Senate a laundry list. It would be far too long and would do little to undo the damage already done by what must be one of the sloppiest pieces of bureaucratic shuffling in recent years.

As I said earlier, the HEW release listed 409 physicians, 1,752 groups, and 58 laboratories for whose services medicare paid $100,000 or more in 1975. The American Medical Association, understandably concerned over what it had learned to expect was another attempt to tarnish its profession, quickly came to the defense when it recognized from the lists that multiple inaccuracies existed.

It set out to interview, on a crash basis, those physicians listed as practicing alone, and during the limited time available reached 166 of the 409 doctors—approximately 40 percent—in 30 States and the District of Columbia. It is astonishing to learn, Mr. President, that fully 65.7 percent of the HEW figures checked were found to be incorrect.

The errors were generally of three kinds:

First. The solo practice designation was wrong, and the figure reported referred to a group practice;

Second. The amount listed as received by the physician was incorrect; or

Third. Both the designation and amount were in error.

Let me emphasize the degree of error: HEW was wrong in two out of three of its attempts to report factual statistical data. Of course, SSA has responded that the errors were "probably not of the magnitude stated by the AMA," but given the obvious hazards of guilt for the same malfeasance you are criticizing, I think we have to assume the AMA was pretty careful about its figures.

In all fairness, I suppose we cannot hold Secretary Califano personally responsible for the precipitous release, under his name, of March 14, for he is new to his job and doubtless unaccustomed to the bumbling vagaries of the Bureau of Health Insurance. But I would hope that this might motivate him to shake the Bureau up a bit, if for no other reason than because two out of three wrong is a failing mark even on a true or false test.

I notice from a New York Times story of last Saturday that the Social Security Administration expects to issue a corrected list of the now infamous "$100,000 club" in about 2 weeks—or a full month after the initial fiasco. That will hardly be a consolation or reassurance to us as Senators and taxpayers, however, who have learned through this experience that BHI only knows where our money goes 30 percent of the time.

Mr. President, if this unfortunate action on the part of HEW should somehow result in making the press more responsible in its reporting of Government information about private individuals, then I suppose the whole sad affair will have been worth the hardship it has caused. Happily, I add, not all the press rose to this HEW release like young trout to a fly, but rather checked before they wrote—and have since even come to the defense of those who were aggrieved. For that we should be grateful

If there is no objection, Mr. President, I ask unanimous consent to have printed in the RECORD just a few such editorials which appeared in the Salina Journal; the Wichita Eagle; and the Washington Star, as well as stories by the National Observer, Chicago Tribune, and Associated Press. Together they demonstrate that sometimes, at least, the Sun does shine in.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Salina (Kans.) Journal, Mar. 17, 1977]

PROFITEERING?

The American public seems to have a peculiar love-hate view of its doctors.

We love, respect, admire, obey and trust our own personal physicians.

But we are fed a diet of TV "exposes" featuring malingering doctors. And so, when HEW or some other federal agency releases figures claiming that "X" number of doctors have made more than $100,000 in a year on Medicaid or Medicare charges, the suspicion of profiteering comes to some of us.

That's a shame.

Granted, there are undoubtedly a few bad apples in the barrel but most doctors are honest, hardworking and capable.

There are at least 3 reasons why some doctors do make substantial money in the Medicare field:

1. They're willing to put up with an aged class of clientele and the vast paperwork involved, while many of their peers would rather not bother. In fact, a doctor can make more money with less work by dealing with middle-income and wealthy patients.

2. They, themselves, are superefficient or have efficient staffs which can handle a large Medicare volume.

3. They're specializing in a medical field, such as urology, where many of the patients are elderly and are apt to be on Medicare.

Anyway, what's so bad about a doctor getting wealthy?

In what other profession does a person have to spend the best years of his life, and a lot of money, just preparing himself for it?

What other profession holds our lives in its hands?

What other professions (there are a few, but very few) demand such skill, such dedication, such long and bizarre hours, such emotional expenditures?

Most doctors deserve all the monetary rewards, that come their way.

As for HEW, you can't always believe its reports. Judging by at least one Salina doctor's experience and the number of complaints pouring into Washington from all over the nation, its latest report this week on doctors' incomes was full of fantastically inflated errors.

There apparently are some bad or inefficient apples in HEW, too, or some mighty dumb computers.

[From the Wichita (Kans.) Eagle, Mar. 17, 1977]

WHAT IS PROVED?

What, if anything, is proved by the fact that eight medical groups and two other Wichita physicians collected more than $100,000 each from Medicare in 1975?

Maybe that Wichita is a health care center whose medical specialists and the other doctors involved in this largest city in Kansas work hard.

St. Louis has 16 listings, for whatever that may mean.

It is unfortunate that because the program designed to look after the medical needs of the elderly and the chronically ill is federally run and federally financed in part, those who provide the health care seem automatically open to suspicious scrutiny.

Six-figure earnings by professional athletes are quite routine—d'ya expect those guys to perform for nothing?—but when it becomes known that a doctor may have prospered treating Medicare patients, suspicions sprout.

That and the intricacies of federal regulations make it easy to understand why occasionally doctors and hospitals balk at participation in programs where federal money is involved.

Take, for instance, the situation involving the Sedgwick County Mental Health department and two hospitals to which it has been referring patients. Now the hospitals say they will not renew contracts with the department because a federal regulation limits charges to all county-referred patients whether the hospital bills are paid with public funds or not—thus, if a patient sent to the hospital by a county mental health clinic but able to pay his own hospital bill from private resources or with his own hospitalization insurance were billed the private patient rate, the hospital would have to rebate to the county any charges exceeding government allowed actual costs. That doesn't leave hospitals "growth" money.

Presumably there are opportunities for fraud any massive program in which public funding is involved and federal authorities must, of course, stay vigilant to detect and correct abuses.

But on the whole, the Medicare program is a worthwhile one and must not be ensnarled by controversy and red tape. Perhaps organizational changes ordered by Health-Education-Welfare Secretary Joseph Califano will help.

[From Washington Star, Mar. 27, 1977]

A SLOPPY PIECE OF WORK

That Medicare information put out a couple of weeks ago by the Department of Health, Education and Welfare (at the demand of several news organizations, including The Star) was darn startling.

It indicated that 409 physicians around the country received $100,000 or more dur-1976 from payments for Medicare patients. When that news hit the streets of Topeka, Peoria, Baltimore, Washington and a few hundred other places, the local citizenry was given the impression that the doctors were really cleaning up on Medicare payments.

But were they?

Perhaps some. But in response to complaints from outraged doctors, who in many instances had been badgered and sometimes called crooks by furious citizens, the American Medical Association undertook a study of the list. As of a few days ago, the AMA had checked 129 of the 409 and found a 70 per cent rate of error.

Some figures, according to AMA, were simply wrong. But the biggest error was the listing of physicians who are in group practice as solo practitioners. For example, a Kansas doctor, who is chief of a 20-member group practice, was listed as the recipient of $544,014 but says he was responsible for billings of only $12,522. An Oregon doctor, who is the salaried director of a hospital and has no private practice, was listed as receiving $103,686 which evidently went to the hospital.

The AMA's check included three District of Columbia physicians reported as receiving more than $100,000—Charles A. Hufnagel, John W. McTigue and George E. Schreiner—who were erroneously listed in the HEW release as solo practitioners when in fact they shared the proceeds with associates.

The figures sometimes are misleading in another respect. The HEW list includes payments to doctors as well as to patients, but patients don't always pay the doctor; sometimes they spend their Medicare reimbursements for something besides doctor bills.

The point is that raw statistics often can give someone a raw deal. In this instance, the error was compounded by the news media which in some cases didn't bother to go beyond the statistics in their first stories, and in other cases gave more prominence to the seemingly spectacular payments than to the explanation that the payments frequently didn't all go to one person.

Similar errors and misleading impressions, in approximately the same proportion, have been found by AMA in Medicaid payment lists released the past several years.

HEW produced the Medicare list to satisfy requests from the press under a Freedom of Information amendment to the Government in the Sunshine Act of 1976.

Now there is nothing wrong with government in the sunshine, so long as the sunshine lights up the entire picture. HEW has an obligation not to produce misleading or erroneous information. And news organizations have an obligation to go beyond raw statistics, particularly when we have initiated an inquiry.

Perhaps some doctors have abused the Medicare program, but it seems obvious that many who haven't were tarred with the same brush.

Dr. James H. Sammons, executive vice president of AMA, claims that the Medicare episode "has got to be the sloppiest performance in the history of American bureaucracy." Well, maybe not the sloppiest, but it certainly ranks high.

[From the National Observer, Mar. 26, 1977]

THE "RICH" MEDICARE DOCS: MISLEADING FIGURES

(By Lawrence Mosher)

During 1975 Dr. Charles D. Kelman, a New York City ophthalmologist, earned $412,757 for services paid by Medicare, the Federal health-care program for the elderly.

Chesapeake Physicians of Baltimore received $844,294 in Medicare payments that year. And in Zumbrota, Minn. (population 1,830), the Zumbrota Health Facility took in $22,293,171 from the Government.

All these revelations, and more, can be found in a half-inch thick list published last week by the Department of Health, Education, and Welfare. The disclosure, produced to satisfy requests under the Freedom of Information Act, provided the names and addresses of physicians, clinics and group practices, and laboratories that earned $100,000 or more in Medicare services for 1975.

However well-intentioned, the Federal disclosure contained enough errors and produced enough confusion to make officials at the Social Security Administration wish they had never heard of the law that led to publication of the list.

"GUILT BY INNUENDO"

Social Security spokesman reported that their Baltimore office was ringing with angry doctors calling to complain. One St. Louis doctor, they said, insisted he had been retired for 10 years. The American Medical Association criticized the disclosures as establishing "guilt by innuendo"; the AMA says the impression is created that doctors who receive large Medicare payments must somehow be doing something illegal.

Take the examples used in this story. They are deceptive unless fully explained, which often was not possible from the information given in the list. The Zumbrota Health Facility should have been listed as the Mayo Clinic, Rochester; Zumbrota is a town near Rochester. Chesapeake Physicians Professional Association numbers about 200 doctors, all practicing at Baltimore's City Hospital. Dr. Kelman employs a staff of two other ophthalmologists, four technicians, and four secretaries. He reports that his overhead costs exceed his Medicare payments. Such payments, he says, account for about 75 per cent of his total income.

A major cause of the confusion is the Social Security Administration's computerized billing system for Medicare. Group practices and clinics are often listed under one doctor's name without giving the other names. Although the Medicare list distinguished between "solo practitioners" and "group/clinics," some newspapers and reporting services apparently did not make this clear.

A NEW LIST

What affronted some physicians, however, was the disclosure itself. "They made it sound like the doctors were just pocketing the money," says Kelman. He received an American Academy of Achievement award in 1969 for developing an ultrasonic needle procedure for removing cataracts.

Kelman's surgical process, which he has taught to some 1,500 other ophthalmologists around the country, allows patients to go home the day after the operation. The standard operation requires an additional four days' hospitalization. Kelman figures he personally saves the Government $240,000 a year in unnecessary hospitalization costs.

By week's end the Social Security Administration said it was preparing a new list that it hopes would eliminate the errors. The disclosures, however, appear to be a new aspect of Medicare operation that physicians will have to live with.

[From the Chicago Tribune, Mar. 18, 1977]

HEW PAYMENTS LIST GETS "ZERO" FROM IRATE DOCTORS

(By Peter Rich)

Dr. Ernest Watson of Elmhurst was one of the Chicago area physicians listed by the Department of Health, Education, and Welfare as receiving more than $100,000 in payments from Medicare in 1975.

Specifically, the HEW list noted, Dr. Watson received $233,371.

A spoksman for the Illinois State Medical Society told The Tribune there are two strange things about that:

Dr. Watson is a pediatrician, a baby doctor. Since Medicare generally is for people over 65 years of age. Dr. Watson's patients wouldn't really qualify for it.

Dr. Watson is 76 years old, retired, and has been living in Arizona for the last 12 years. He did not practice medicine in 1975.

The above error is just one of many the ISMS has uncovered in the HEW list.

In fact, the spokesman said, "Every doctor we have contacted so far has ben listed erroneously."

The society put out a statement terming the HEW list "grossly inaccurate and a malicious distortion of the facts."

The spokesman listed some more interesting examples:

Dr. R. P. Foth of Aurora was listed as receiving $460,000 in Medicare payments in 1975. The business manager of the Dryer Clinic in Aurora, where Dr. Foth is located, estimates that Dr. Foth received approximately $35,000 in Medicare payments in 1975.

A Dr. C. A. Bayar of Chicago is listed as receiving $238,239 from Medicare in 1975. But Dr. Bayar died the previous year—1974.

A spokesman for the American Medical Society said his group is "doing a spot check with various medical societies to determine just what the error rate [in the HEW list] is."

"If it is anything like what it seems to be in Chicago and Illinois," he added, "this has got to be one of the sloppiest performances in the history of American bureaucracy.

"If the AMA were to put out data this inaccurate, the press would have us for breakfast, and properly so. I think HEW ought to be held similarly accountable."

Numerous Chicago area physicans on the HEW list have been calling The Tribune to complain that erroneuos amounts of Medicare payments were attributed to them.

Dr. Bipin Bhayani of Kankakee called to complain that whereas he had been listed

as receiving $160,533 in Medicare payments in 1975, he actually received only $45,917—and he sent a copy of his Form 1099-MED, filed with the IRS for 1975, which shows his "total medical and health care payments" to be the lower amount.

Dr. Edward Brunner, chairman of the department of anesthesiology at Northwestern University, McGaw Medical Center, called to complain that while a Dr. H. S. Holley is listed by HEW as receiving $108,221 in 1975, only $2,488 actually was collected in Dr. Holley's name, and the entire 20-physician anesthesia practice group at NU to which he belongs received only $29,590.

"The published data obviously are incorrect," Brunner noted.

Dr. Olaf S. Andersen of Elgin, who was listed as receiving $116,943, said his total billings for 1975 were about $80,000, and that Medicare was only a portion of that, "perhaps half, certainly no more than $60,000."

Moreover, he said, for six months of 1975 he was on the staff of the University of Illinois as a salaried employee.

Dr. George Olander of Highland Park, listed as receiving $101,538, told The Tribune he received no individual payments from Medicare, and that the sum listed went to a corporation of which he is a senior member, Surgeons Group, SC.

He sugegsted that the erroneous HEW listing may have resulted from Medicare officials' insistence on listing individual physicians rather than the groups to which they belong in their billing procedures.

In Washington, the government began checking for mistakes in the HEW list.

Since the list contained the names of 409 physicians, 1,752 groups, and 58 laboratories, such checking is expected to take some time.

A spokesman at the Social Security Administration office told The Tribune it will take me "about a week" before a revised corrected list is issued.

Michael Naver, a spokesman for the Baltimore Social Security office that issued the list, said that "in most cases it was just sloppy bookkeeping by insurance carriers or others." He said the agency sees no evidence that fraud was involved.

HEW acknowledged that it has received complaints from numerous doctors disputing their figures. A HEW spokesman said some of the doctors complain that payments listed to them were in fact total payments of fees to a group clinic for many physicians.

The executive vice president of the American Medical Association, Dr. James H. Sammons, said release of the names "serves only to badger a large segment of the profession and to establish guilt by innuendo."

He noted:

"There is something basically dishonest in the broadcast release of names of Medicare payments. The physicians are identified by HEW as individual recipients of Medicare funds whereas the payments often are for services provided by many others as well.

"Many of the physicians listed are hospital-based radiologists, pathologists, anesthesiologists, or heads of clinics. Such physicians usually have large staffs working under their direction."

The apparent errors were not confined to the Chicago area by any means.

An AMA spokesman said a Dr. Milton Hamolsky of Providence, R.I., was listed as receiving $307,452 in Medicare payments in 1975.

"He checked his records and found he was reimbursed for only $625. Moreover, he has been a salaried physician at the hospital since 1963, and not a solo practitioner, as the HEW statement noted," the spokesman said.

[From the Associated Press]

PHYSICIANS COMPLAIN ABOUT HEW LISTING

Complaints are rolling in by the dozens from doctors saying that they have been victimized by the Washington bureaucracy as the result of a list reporting individual payments of more than $100,000 made under the Medicare health care program for the elderly.

"My wife must think I have an apartment on the side and a mistress as well," said a Michigan doctor who was listed as having received $115,000 for Medicare but claimed he actually got $15,000.

Last week, in response to a request filed under the Freedom of Information Act, the Department of Health, Education and Welfare released a list of 409 doctors, 1,752 health care groups and 58 laboratories which received payments under the Medicare program.

So many complaints were received from physicians saying the list was inaccurate that the department issued a statement 24 hours later conceding there might have been errors in the report and promised a revised list this week.

"The error rate is phenomenal," said Joe Breu, a spokesman for the American Medical Association. "It is unconscionable that they should release the figures without knowing what they are talking about."

Breu said Friday that the association had contacted 80 doctors in 22 states whose names were on the list and found 56 were listed incorrectly.

He said 39 were listed as solo practitioners when the sum listed represented amounts for clinics or groups of dotcors, two had the wrong amounts, and 15 had both the amount and the listing of the physician as a solo practitioner incorrect.

Dr. Richard R. Patton of Seattle was listed as having received $3.2 million for Medicare services in 1975.

"If that's true, tell them to send the money and I'll retire," said Patton. He was one of 112 physicians affiliated with Mason Clinic which actually received the payment.

Another example of incorrect listing of the amount was for Anesthesia Services of Mobile, Ala.

"Our records show we collected right at $134,000 in Medicare payments in 1975," said Alice Gadlihe, business manager for the anesthesia group. "Yet the HEW report has us listed as collecting $628,153. I think they must have figured up anesthesia services for the whole Mobile area to have come up with that figure."

A spokesman for the department said the reports apparently did not differentiate between an individual doctors' receipts and payments made to a group of physicians in the name of one person.

The HEW list included this disclaimer: "Despite efforts made to verify this information, data on some individuals may not be completely accurate due to coding and or clerical errors which could cause some payments attributed to a listed physician to have been for service performed by another physician or in a group practice setting.

Despite the disclaimer, there was no indication on the actual list that the physicians represented groups.

Dr. John Chidlow of Shreveport, La., who was reported to have received $298,686, said the figure must have been for him and 18 other physicians with whom he works.

"I will be happy to forget the whole matter if Mr. Califano will send me the rest of the money I am supposed to have collected," said Chidlow. Joseph A. Califano is secretary of Health, Education and Welfare.

Dr. Oscar Blitz of New Orleans reportedly got $233,173. Blitz said the amount was for all four doctors in his office and was about $100,000 high anyway.

"I wish to God, I made that much. I couldn't make that much if I worked all day and all night. There aren't that many hours in a day," he said.

Dr. E. W. Peters of Cleveland reportedly received $882,458. "I retired nine or 10 years ago," was his response. Peters noted that he founded the Euclid Clinic Foundation which now has 50 doctors on its staff, but he is no longer affiliated with the clinic.

Dr. Vernon Stabler of Stabler Clinic in Greenville, Ala., referred to the listing of $111,764 for him instead of for all five doctors in his clinic as "poppycock."

"I don't mind HEW releasing the list because newspapers just love that sort of thing," Stabler said. "Medicare doesn't account for much of our business anyway. I'm not concerned one bit about HEW's list."

While some physicians treated the matter relatively lightly, others were angered by the report.

"I'm very upset," said Dr. Lawrence E. Smith of Auburn, N.Y., who was listed as receiving $147,000. "In a small town like this, that is very hard to live down."

Smith said he works with four other doctors.

"I haven't made that much in all my life," commented Dr. Olaf Severud of Cooperstown, N.Y., who was listed as receiving $466,013.

Severud, 71 and semiretired, receives a salary of $15,000 a year from a nursing home and said he suspected all of the home's Medicare payments were listed in his name.

Dr. Daniel Hinthorn of the University of Kansas Medical Center in Kansas City was shown as receiving $280,712, but said he received no more than $1,000 in Medicare payments and probably closer to $700.

Hinthorn said he called Califano after the figures appeared. "He listened for one or two minutes and then he said just a moment and transferred me to someone else. They shunted me around to several different people."

Hinthorn said he got no satisfaction.

"I hate to have people think I'm getting wealthy off poor people. Actually I'm not getting wealthy at all," he said, adding that professors are paid about half to a third what private physicians get.

Hinthorn said he has been subjected to "anxiety and remarks from friends and associates" since the report appeared.

Hinthorn said he was a salaried employe of Medical Associates Chartered, a 60-doctor corporation.

THE ROLE OF PRIVATE AND VOLUNTARY AGENCIES IN OVERSEAS DEVELOPMENT

Mr. HUMPHREY. Mr. President, last week my Foreign Assistance Subcommittee received testimony from representatives of private and voluntary agencies which are actively involved in overseas development activities.

The testimony and subsequent discussion on the role of PVO's, the problems they face, and the unique contribution they make to the development process provided for a very stimulating and educational session.

Participating in the panel discussion were Mr. C. Payne Lucas, executive director of Africare, Mr. Tom Fox, executive director of Volunteers in Technical Assistance, VITA, and Mr. Edward Bullard, president of Technoserve, Inc.

All three agreed that the success of the PVO's as they related to the Agency for International Development could be maximized only if a Bureau of Private Developmental Assistance, headed by an Assistant Administrator, were established within AID.

As Mr. Lucas pointed out in his testimony:

Such a Bureau would be a "one stop" place where all PVO assistance could be co-

ordinated. Such a Bureau would not ignore the necessary participation of the Area Bureaus and the invaluable support and input of the Offices of Developmental Resources and Technical Assistance within these Bureaus. Simply put, it would expedite the development of the partnership between PVOs and AID. It would be an enormous efficiency and economy move.

Mr. President, I endorse this recommendation, which we will consider when markup begins in my subcommittee on the bilateral development and humanitarian assistance programs next week. As my colleagues are well aware, in the 1973 reform of our bilateral aid programs, Congress directed AID to strengthen its relationship with private and voluntary organizations, including increased financial support for PVO activities. I believe establishment of a separate Bureau in the Agency would allow AID to carry out this congressional directive more effectively.

Each of the three PVO's represented at the hearings were unique in their contributions to the development process.

For example, VITA, which was established 17 years ago, was founded by a group of scientists and engineers, many of whom were employed by General Electric's Research and Development Laboratory. As Mr. Fox pointed out:

Today, it is widely known overseas as a respected source of technical assistance and information; it is a regular participant and leader in the mounting national dialogue on appropriate technology; and it is an association of some 5,000 highly skilled people, mostly Americans, who seek to apply their skills to important and recurrent problems in developing areas around the world.

In noting the vast need for technical assistance in less developed countries, and the great pool of applicable expertise and experience existing in the industrialized nations, Mr. Fox stated:

What may be of interest, however, are the mechanisms provided by VITA for productively matching these two elements—need and technical talent. Essentially VITA achieves this linkage through three programs: its Technical Information Service, its Publications Program, and specific projects.

Mr. Fox also explained that for the user of VITA's services,

. . . there probably are two distinctive reasons for VITA's appeal. First, VITA's approach is unobtruse and demonstrably non-paternalistic. Its assistance is originated, so to speak, by the consumer—by the requests of extension agents, small businessmen, research centers, development organizations, governments, and others in developing countries. Problems and needs are defined in the field. And VITA's pool of specialists devotes its efforts to grappling with the issues from a local perspective—not through reaching into a mail-order catalog of high and so frequently inapplicable technology.

In addition, a second major appeal of VITA's program is its flexibility—a readiness and capacity to tackle all kinds of problems: in agriculture, small business development, water supply—in Asia, Africa, and Latin America—the gamut of appropriate technology questions throughout the developing world.

I would urge my colleagues to read Mr. Fox's testimony, for I am sure they will experience the same sense of appreciation for the special skills this organization brings to the development effort.

Africare also brings a unique approach to development. Mr. Lucas, who has served as a Peace Corps country director in several African countries and later as the regional director for all Peace Corps programs in Africa, pointed out that his organization has 22 projects in 9 countries.

However, he pointed out some of the difficulties associated with perceptions of the role of PVO's in development:

The Congress and U.S.A.I.D. have acted upon that concern by encouraging private and voluntary organizations (PVOs) to assume a much larger role in world development. This is now national policy, but it is a policy on trial. Moreover, in some quarters PVOs are not taken seriously. They are often perceived as just "do-good" organizations manned by volunteers and nonprofessionals and living on government handouts. The very nature of the concept of "private and voluntary organizations" is often misleading, for most of these organizations are engaged in development and sometimes relief, and are staffed not by volunteers but by professionals who would otherwise be employed by such institutions as the World Bank, United Nations, U.S.A.I.D. and the Peace Corps, to mention a few.

Many PVOs have already made an enormous contribution to development. However, the jury is still out on the eventual role of PVOs in developmental assistance. We are just beginning to perceive the full potential of using PVOs to complement bilateral and multilateral aid programs.

He further noted:

Africare's experience is not unique among private and voluntary organizations working in the foreign assistance field. We and others, frequently with U.S.A.I.D. financial support, are helping to change the face of U.S. foreign assistance in the Third World. It is the face of a pluralistic society reflecting a pluralistic America; it is a society in which voluntarism and service to others are enduring cultural strengths; it is a technological society which nevertheless values hard physical work. Each is a national trait that especially suits Americans working in the Third World.

The obvious question is how best to exercise these strengths abroad. We have been experimenting for the better part of 30 years—A.I.D., its forerunners and the Peace Corps being the outstanding government innovations. The private sector, however, has a remarkable record of accomplishment as well. There are dozens of organizations—diverse in their expertise and purpose—that have proven capacity for productive work in developing lands. These organizations which seldom suffer in suspicious foreign eyes for being American; they do not represent the United States officially, and they are accepted in some places where A.I.D. would be rejected. . . . They are often more flexible and responsive than A.I.D. or other national aid programs can be in providing urgent needs. . . . Because their personnel and program practices are less bound by red tape and security requirements, they can attract American experts into short- and long-term programs overseas when they are needed, not six months or a year later. . . . In short, these private and voluntary organizations are "can-do" enterprises, highly competent in their specific fields. Moreover, they are a direct link between the people of the third world and the individual American who is concerned enough about the state of the planet that he or she will contribute money or time to its improvement.

A.I.D. cannot provide this linkage, but it is helping to strengthen the links: and it can—with the blessings of Congress—do much more. . . .

As my colleagues can see, Mr. Lucas presented a very eloquent statement on the role of PVO's in development.

Mr. Bullard testified that 65 percent of Technoserve's staff of 70 were former Peace Corps volunteers.

As he pointed out in his testimony:

An organization such as Technoserve has no tangible "product." It gives away no food, no tools and no money and it builds no roads or schools. The organization is its people—career professionals who combine a high level of commitment and competence. . .

The aim of the program is to create new jobs, income, and increase rural productivity and food productions, all leading to an improved quality of life. Technoserve believes that helping low-income people to start or expand their own viable self-help enterprises is the best means of accomplishing these important ends. Helping others to start medium scale businesses and cooperatives in developing countries is what we do. It is complex; the businesses sometimes fail. It is a process, however, which we believe does most effectively foster self-reliance, economic stability and human dignity for the poorest majority.

As an example of such projects, Mr. Bullard cited the following:

In Central America, Technoserve is helping 250 low-income rice farmers to set up a large cooperative rice mill, which they now own and which is processing and marketing their rice; 465 jobs have been created by this project alone and income and productivity in this rural area are projected to rise significantly.

One of the most important points made by Mr. Bullard was the following:

A number of the "tools" or processes which many of the PVOs utilize in their overseas development efforts are becoming of increasing interest to the development community. These tools can be empirically tested by PVOs in their field work and determination made on the basis of actual experience as to what mechanisms are most effective in the development process. Some of the more important tools now being utilized by PVOs include:

Intermediate technology which is becoming an integral part of many development projects;

Management assistance and training as it relates to development projects and programs;

Cooperative structures used as a means of involving the poorest majority;

Capital, not as an end in itself, but as a tool to facilitate the development process;

Labor intensive enterprises which seem an effective means of helping people to help themselves.

Mr. President, Mr. Fox, Mr. Lucas, and Mr. Bullard provided my subcommittee with important and exciting information on the contribution of PVO's to the development process. I urge colleagues to read their statements in great detail, because I believe they are valuable contributions to our knowledge of PVO operations.

Mr. President, I ask unanimous consent that the three statements be printed in the RECORD.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

TESTIMONY OF THOMAS H. FOX

Mr. Chairman, I am indeed very honored to appear before this subcommittee and am grateful for this opportunity to describe for you the work of VITA, a private voluntary organization working in the field of foreign assistance. Then, based on my experience with this and other PVOs, I want to make a few recommendations for the future relationship of the United States Government to the many such organizations that now exist.

VITA, Volunteers in Technical Assistance, is a seventeen-year old organization. Founded in Schenectady, New York, by a group of scientists and engineers, many of whom were employed by General Electric's Research and Development Laboratory, it started in 1960 as a very small, volunteer-administered, local program. Today, it is widely known overseas as a respected source of technical assistance and information; it is a regular participant and leader in the mounting national dialogue on appropriate technology; and it is an association of some 5000 highly skilled people, mostly Americans, who seek to apply their skills to important and recurrent problems in developing areas around the world.

It is not necessary to describe for this subcommittee the vast need for technical assistance in developing countries. Nor is it necessary to explain that a great pool of applicable expertise and experience exists within the United States and in other highly industrialized countries. What may be of interest, however, are the mechanisms provided by VITA for productively matching these two elements—need and technical talent. Essentially VITA achieves this linkage through three programs: its Technical Information Service, its Publications Program, and specific projects. I will return to outline these mechanisms in some detail.

First, however, I would like to describe the spirit of our program. For, in truth, it is the character of VITA's program which makes the organization attractive to requestors and Volunteers alike, and leads to successful problem-solving. No authority in developing countries compels people to seek out VITA. But they do. At the same time, of course, there is no compulsion here at home for citizens to become VITA Volunteers. But they do, and in ample numbers. So what is there about the nature of VITA's approach to development which sets the stage for success—for productively matching up people, totally voluntarily, in the solving of development problems?

For the user of VITA's services, VITA's requestors, there probably are two distinctive reasons for VITA's appeal. First, VITA's approach is unobtrusive and demonstrably non-paternalistic. Its assistance is originated, so to speak, by the consumer—by the requests of extension agents, small businessmen, research centers, development organizations, governments, and others in developing countries. Problems and needs are defined in the field. And VITA's pool of specialists devotes its efforts to grappling with the issues from a local perspective—not through reaching into a mail-order catalog of high and so frequently inapplicable technology.

In addition, a second major appeal of VITA's program is its flexibility—a readiness and capacity to tackle all kinds of problems: in agriculture, small business development, water supply—in Asia, Africa, and Latin America—the gamut of appropriate technology questions throughout the developing world.

To its Volunteers, the occasion to design and adapt technology is one of the challenges and attractions of VITA. Many of them enjoy the escape from their day-to-day routine with big and complex technology and the professional challenge of the search for appropriate solutions for more restricted conditions, such as limited materials and capital.

In addition to this challenge, VITA enables Volunteers to make use of their professional or avocational skills without requiring new special training programs. Moreover, there is no fixed tour of duty or limit to the length of Volunteer service. There is no need to pack up, leave home, job, country; they can participate from their home. In short, VITA makes it possible for large numbers to volunteer, people who have the desire to help but not the freedom to participate on-site, as, say, Peace Corps Volunteers do. (VITA volunteering, incidentally, has proven to be a natural extension of service for returned Peace Corps men and women. Through the VITA program, they can and do continue to make satisfying and effective use of the expertise and sensitivies gained during their Peace Corps tours abroad.) To sum up this brief analysis, then, VITA's program is essentially non-threatening and unobtrusive; it is appropriate technology in orientation; and it opens up avenues of participation in development by many who would not otherwise have the opportunity, but who do have invaluable contributions to make.

As noted before, the actual mechanisms of VITA's program are its Technical Information Service, its Publications program, and special projects.

The Technical Information Service has been providing assistance by mail for almost two decades. It has answered over 25,000 requests for help, approximately 100 per month.

Some of the assistance provided by the Information Service is in the form of already-published information which can help requestors better define problems. Therefore, VITA maintains a library of appropriate technology materials which are used to answer such requests. In those cases which call for more than simple access to information, the majority certainly, the assistance is provided directly by VITA Volunteers. A very good example of the way in which this service works is provided by a case from Tanzania:

In September, 1974, a group of expatriate and host country nationals at the Water Ministry in Arusha, Tanzania, requested information and guidance concerning a design for a windmill to pump water. A VITA staffer took the request, and, using our partially computerized file, searched for names of VITA Volunteers who were expert in this field. The staff member contacted these Volunteers to determine which of them would be willing to handle the case. Meanwhile, the VITA library sent preliminary information. Finally, 9 Volunteers were contacted and contributed to the design of the first prototype, in Tanzania. That design was then sent back to VITA by the requestors, to be scrutinized by U.S.-based VITA Volunteers for technical accuracy. Upon completion of the review process, the requestor changed the design to incorporate suggestions made by VITA Volunteers and a second prototype was built and approved by the local Tanzania government.

Some VITA cases would have stopped here, but this one didn't. And, I think it is worthwhile to cite briefly some of the further actions generated by this one request:

The requestor received from Tanzanian sources $12,000 to build windmills for an irrigation project (and more may be forthcoming);

A windmill was built and displayed at a 1976 UNICEF Conference in Kenya;

Three pumps were designed by VITA Volunteers to be used in conjunction with the windmill;

The windmill design has been prepared for publication and will soon be available for worldwide distribution—and replication.

Of course, not all requests involve this kind of time and input—and not all are as successful. But this case is a good indication of just how much VITA's service can accomplish. I am proud to say 96% of VITA's requestors who evaluated VITA's responses provided in 1976 were satisfied with VITA's responses and would make use of the service again, a fine tribute to VITA's Volunteers and program.

Our Publications program uses not only Volunteers who are engineers and scientists, but also writers, editors, and illustrators as well. For example, a manual focusing on the problems of small scale grain storage, which VITA and Peace Corps together produced last year, combined the talents of 20 Volunteers. Now VITA Volunteer translators are working to put this and other publications into French and Spanish. Such interdisciplinary teams of Volunteers collaborate to produce how-to manuals for which there is a clear felt need, handbooks focused on the requirements of development workers in the field. VITA distributed over 10,500 of these publications in 1976, an astonishing 100% increase over the preceding year—and the number continues to grow.

In addition to working through the Information and Publications Service, VITA undertakes a number of more intensive, specific projects. In these, we work with host country organizations not only to provide a technology design, but also to provide ongoing assistance through the testing and implementation stages. In Upper Volta, we're helping to establish an appropriate technology center. In Nigeria, we're working with the prestigious International Institute of Tropical Agriculture to adapt and test a wide variety of agricultural implements for local use. In Honduras, VITA Volunteers have been working with a lime producers' cooperative to design, build, and test a new kiln for the production of lime. Goals of this project have included not only better quality lime, but also the more efficient use of wood—an increasingly scarce national resource in so many parts of the world. VITA's contribution has included designs, several on-site visits by staff and Volunteers, and general trouble-shooting through all phases of the project.

This particular project demonstrates one of VITA's greatest strengths, that Volunteers and staff alike get caught up with a sense of excitement and participation in both the ups and downs of the organization. When a portion of the VITA-designed lime kiln in Honduras threatened to collapse, VITA staffers got on the phone to mobilize Volunteers, who in turn went back to the drawing boards and came up with possible solutions. When the lime kiln was constructed and then test-fired successfully, it was a shared satisfaction. And when the kiln design was adopted by another Honduran organization, there was a shared pride.

I'd like now to turn to VITA's role and relationship with other private voluntary organizations. For we have always taken our role as part of the PVO community very seriously.

VITA is somewhat different from many of the other development-oriented private voluntary organizations—because of its unusually wide use of American citizens in solving recurrent problems and because of its operations are carried out from a U.S. base. And yet, VITA is also very similar to other PVOs. For example, a shared commitment to solving the grass roots problems of poor people in developing countries links VITA firmly with the development-oriented members of the PVO community. In addition, CITA's commitment to long-term solutions and its leadership and promotion of "appropriate technology" place it in the vanguard of those PVOs which share similar goal statements.

In a broader sense, VITA depends on the programs and operations of host country agencies and other private voluntary organizations—for it is often the case that those organizations with offices and representatives located within developing countries provide the impetus and structure through which requestors' needs get expressed to VITA. Operating as it does from a centralized U.S. base, and operating almost entirely by mail in complementary relationships with requestors, VITA's operation is extremely cost effective; but it requires a window to the wider world. Therefore, VITA extends its own reach as it enhances and collaborates with the capabilities of overseas-based organizations, like Technoserve and Africare. Other PVOs

thus play an important role; by translating VITA's written word into direct benefit to poor people, they are frequently VITA's eyes and ears and even agents overseas. In 1976 alone, VITA worked in direct collaboration with other American private voluntary organizations in 130 different cases.

VITA also shares with other PVOs a large number of common concerns. Of continuing concern is the necessity to ensure that PVO perceptions, technologies, and programs respond to local needs and local aspirations. VITA must be particularly cautious and aware of this potential problem because so much of our work is provided at long distances and conveyed by the written word.

I think that bridging the gap between the giver of services and the recipient, sensitively and effectively—that is, ensuring that the collaboration between VITA and the recipient is truly collaboration—is a challenge and a concern shared by all thoughtful PVOs, indeed by all instruments of foreign cooperation and assistance. I might add that it is also at the heart of the dialogue and discussion about "appropriate technology."

A second concern—indeed a major problem—that VITA shares with most other private voluntary organizations, particularly the smaller ones, relates to funding. Small, private voluntary organizations have a very difficult time raising funds to assure their very survival. Additional funds needed to ensure effective programming are even harder to find—regardless of the success of the program and the attractiveness of the appeal to donors or potential donors. Virtually every dollar raised during the course of a year is spoken for ahead of time; planning and evaluation, two factors critical to effective program delivery, are thus very hard to assure. A stable, secure financial base, is, therefore, absolutely essential for private voluntary organizations, at least those which have demonstrated over the years that they deserve to exist and thus to be funded.

Based on my experience as Execuive Director of VITA and from my perspective as one very close to many other private voluntary organizations, I will close with a number of recommendations to this subcommittee as it in turn ponders new ways to effectively communicating American capabilities and attitudes and resources to people overseas who would seek our cooperation and assistance.

First, I think it essential that the Congress continue to stress the importance of the current work and the potential of private voluntary organizations working overseas. More than any other single instrument, private voluntary organizations reflect the generous spirit of the American people. Further, PVOs, through the diversity of their programs and approaches, reflect the plurality of our society. Thus, PVOs are not only a means of assistance and growth; they are, in addition, communication channels linking our society with others. In this capacity alone, private voluntary organizations are and should continue to be a fundamental cornerstone of a total United States presence in developing countries.

But I think it important to state here that PVOs, particularly the smaller ones, often feel cast in the role of stepchildren among the community or larger and more powerful American structures and organization working overseas, despite recent Congressional statements, and despite sensitive and consistent support within many offices in A.I.D. More must be done to enhance and strengthen the role of PVO's work overseas, both in terms of Congressional statements of priority and support, and in terms of specific decisions which recognize the importance of maintaining the character of private voluntary organizations.

Additionally, I recommend that much more be done to facilitate the education of the American people about needs overseas and about the realities of interdependence. To me, it is insulting to both residents of the United States and those of the developing countries to see that the most effective fundraising appeals in this country seem to be those that show a small child with a distended stomach holding out an empty rice bowl. This kind of appeal is frequently the only image that many Americans have of developing countries. Yet this appeal perpetuates an image of development and of developing countries which absolutely defeats any program which attempts to convey interdependence rather than dependence, cooperation rather than aid, dignity rather than degradation. The Congress obviously is in a position to reverse this public impression; I hope you will seek opportunities to do so.

I further recommend that the Congress recognize and continue to support the work being done within the PVO community itself to strengthen and expand capabilities and programs. One noteworthy effort which I wish to bring to the attention of this subcommittee is PACT. PACT, an acronym for Private Agencies Collaborating Together, is a consortium of agencies which encourages the collaboration and sharing of resources and perceptions of the private organization community. Based on the assumption that small organizations with limited means can best improve the impact of their services overseas by sharing resources, and thus increasing their critical mass, PACT is one of the more creative and demonstrably effective instruments within this community of private voluntary organizations. It exists with the warm support of A.I.D., and at the behest of its member organizations. VITA is firmly committed to PACT. And in my other capacity as current Chairman of PACT's Board of Directors, I wish to underline the importance and impact of this fine organization.

I go on to recommend that the Congress enact legislation which will assure and increase the amount of funding support available to private voluntary organizations. Tested and worthy development-oriented private voluntary organizations, following annual and rigorous reviews, should have some guarantee of stable funding, for periods as long as five years. Such financial support should be general and broad-based. Further, unnecessary restrictions on matters such as travel, "buy-American," and the like should be removed where they now exist.

I do not advocate full government support for PVOs like VITA. Quite the contrary, f feel that such organizations should receive significant percentages of their funds from private sources. I do feel strongly, however, that the government would make its greatest contribution to PVOs by funding core activities and administrative costs, those costs for which it is much harder to raise funds from private sources. Funding for the implementation of specific projects is much easier for PVOs to raise from the private sector. But the money for planning and developing those projects is hard to come by.

To summarize, I urge the Congress to:

(1) increase the amount of funding available to the development PVOs (and I would ensure that all PVOs are following a relatively common definition and practice of development);

(2) make grants available for periods as long as five year, with an annual review;

(3) make such grants as unrestricted as possible.

As I am sure this subcommittee is aware, there have been a number of recent and thoughtful studies of possible structures and forms by which governmental money might best support the work of private voluntary organizations. The so-called Crystal City Conference Report is one such study, but there are others: a paper by Warren Wiggins of the TransCentury Corporation; recommendations from the supportive Private Voluntary Cooperation Office with A.I.D.; and, by implication, a study on the future of the Peace Corps by Harlan Cleveland of the Aspen Institute for Humanistic Studies. Each of these reports seems to be advocating the creation of a forceful organizational unit which would be structured specifically to deal with the PVOs, both for financial and for program support. Some of the studies advocate a totally new structure in the form of a public corporation or foundation.

Without endorsing definitively one course or another, I do find myself strongly in favor of at least an interim step which would create, within A.I.D., a separate, strong Bureau whose mandate is to encourage private voluntary cooperation. Such a step would lend visible strength and support to PVOs. Similarly, I very much advocate the creation of new, innovative structures—such as PACT and Appropriate Technology International—through which the Government expresses its support for a specific component of private voluntary cooperation. This kind of flexibility enhances the plurality and diversity that the PVOs themselves express.

In conclusion, Mr. Chairman, I sense that the mood of this Administration, this Congress, and this country encourages a fresh look at the relationships of private citizens to the issues confronting developing—and because the world is interdependent—developed countries as well. I can only suggest that you look first to the private voluntary organizations as appropriate tools for accomplishing this objective—with a spirit and style that is both collaborative and effective.

TESTIMONY OF C. PAYNE LUCAS

Mr. Chairman and Members of the Committee:

I appreciate the opportunity you have afforded me to testify on a matter which I am deeply interested in, The Developmental Assistance Act of 1977 and how it relates to private voluntary assistance.

Before joining Africare five years ago, I served with the Peace Corps for almost ten years—first, as a Country Director in several African countries and then, as the Regional Director for all Peace Corps programs in Africa. Upon leaving the Peace Corps, I joined Africare, which was created in 1972 as a non-profit, tax-exempt organization and dedicated to the improvement of the quality of life in rural Africa through programs of food production, water resource development and the delivery of health services.

At the present time Africare has 22 projects in nine countries. We will submit for the record a complete list of all our past and current projects.

We are governed by a distinguished group of Americans and Africans who make up our Board of Directors. The Africare staff of nineteen, including overseas, is made up of Africans, Black and White Americans with over 75 years of experience on the African Continent.

It is written neither in stone, nor in the annals of Congress, that foreign aid is exclusively the business of government. Lend-Lease made sense in 1940; the Marshall Plan made sense in 1949; PL-480 made sense in the 1950s and '60s. But bilateral government-to-government assistance, by itself, makes less sense in the 1970s. No longer should we be concerned primarily with disbursing "surplus" commodities abroad—food, hardware and dollars. These satisfy important needs. But they seldom affect the underlying cause of the world's developmental imbalance. That is the lack of technological and managerial capacity in the poorest countries. Conventional aid programs tend often to reinforce this weakness. Instead of helping nations to rely more upon their own skills and initiatives, we often provide the skills and initiatives for them. Unintention-

ally, we promote an insidious form of international welfarism that both saps the people's will to improve their own lives and alienates them from those supposedly trying to help them. In other words, we often become the "bad guys".

Private and voluntary assistance (PVOs) provide an important "third approach" to developmental assistance (in addition to bilateral and multilateral aid). This is no secret to the members of this Committee and the officials at the U.S. Agency for International Development. The congressional and U.S.A.I.D. participants in the foreign assistance process are acutely conscious of the limitations and pitfalls of bilateral and often multilateral aid. The congress and U.S.A.I.D. have acted upon that concern by encouraging private and voluntary organizations (PVOs) to assume a much larger role in world development. This is now national policy, but it is a policy on trial. Moreover, in some quarters PVOs are not taken seriously. They are often perceived as just "do-good" organizations manned by volunteers and non-professionals and living on government handouts. The very nature of the concept of "private and voluntary organizations" is often misleading, for most of these organizations are engaged in development and sometimes relief, and are staffed not by volunteers, but by professionals who would otherwise be employed by such institutions as the World Bank, United Nations, U.S.A.I.D. and the Peace Corps, to mention a few.

Many PVOs have already made an enormous contribution to development. However, the jury is still out on the eventual role of PVOs in developmental assistance. We are just beginning to perceive the full potential of using PVOs to complement bilateral and multilateral aid programs.

Let me use Africare to illustrate the thesis: it is American based, although its genesis is both African and American. It is not an us-doing-good-deeds-for-them proposition. It is simply *us*, Americans and Africans engaged together in solving very real human problems. The Africans set developmental priorities in their countries and provide as many of the technical and supervisory personnel as they can on specific projects. In the United States we mobilize private and government resources necessary to sustain the African's programs until they become self-sufficient. Along the way, we have built a membership of several thousand Americans and other grassroots donors, many of them relatively poor themselves, who identify directly with Africa, with what Africare does and the way it does it. Our members and grassroots donors helped us survive for the first few years. They saw that, through Africare, they could contribute directly to concrete improvement in the lives of rural Africans. They could not do that as taxpayers. Bilateral government aid is unavoidably impersonal; it represents a corporate American humanitarianism that inevitably loses something in translation. Africare and other PVOs have become important instruments for overcoming the impersonalization of foreign assistance.

Our philanthropy does not come *only* from the U.S. Treasury; however small, it also comes from individual, community and religious groups and a few foundations and corporations. This makes a world of difference to the beneficiary, the poor majority, who truly appreciates the extra commitment of many Americans to PVO programs.

Something more happened. In 1974, Africare received a Development Program Grant from U.S.A.I.D. It is an instructive example of how Africare, with private and government assistance, is helping African nations to plan and carry out comprehensive rural development programs which, if successful, will reduce their dependence upon many forms of foreign assistance.

An Africare development team (including a Food Production Specialist, Agricultural Economist and Public Health Specialist among others) worked with local officials and technicians in Mali, Upper Volta and Niger to construct model "integrated" rural development strategies which take into account a broad range of social, economic and physical factors affecting a given project.

A series of planning workshops in the three countries allowed members of Development Ministries to fashion model programs which could be adapted to specific locations and later submitted to funding sources for support.

Thus, in Upper Volta, for example, the Ministry of Development, local officials and villagers in Yatenga and Seguenega districts determined their own development priorities in economic improvements, health and education. Several of their proposals were funded subsequently by foundations, individuals, religious institutions and community group contributions to Africare.

In Niger, meanwhile, the Ministry of Rural Economy, with assistance from Africare, has prepared a model hydroagricultural project designed to reclaim valuable land in the Niger River Basin to increase food production.

The project, funded in Phase I by the Lilly Endowment, is expected to serve as a model for similar land reclamation efforts along the Niger River northward into Mali. Projects such as this have the potential to become a major factor in reducing Niger's, and eventually Mali's, dependence on imported food.

Although a few foundations, notably Lilly Endowment and U.S.A.I.D., have provided significant financial support, Africare's success would be less meaningful if thousands of Americans, representing every community group, had not involved themselves in its work.

Africare's experience is not unique among private and voluntary organizations working in the foreign assistance field. We and others, frequently with U.S.A.I.D. financial support, are helping to change the face of U.S. foreign assistance in the Third World. It is the face of a pluralistic society reflecting a pluralistic America; it is a society in which voluntarism and service to others are enduring cultural strengths; it is a technological society which nevertheless values hard physical work. Each is a national trait that especially suits Americans for working in the Third World.

The obvious question is how best to exercise these strengths abroad. We have been experimenting for the better part of 30 years—A.I.D., its forerunners and the Peace Corps being the outstanding government innovations. The private sector, however, has a remarkable record of accomplishment as well. There are dozens of organizations—diverse in their expertise and purpose—that have proven capacity for productive work in developing lands. These are organizations which seldom suffer in suspicious foreign eyes for being American; they do not represent the United States officially, and they are accepted in some places where A.I.D. would be rejected. . . . They are often more flexible and responsive than A.I.D. or other national aid programs can be in providing urgent needs. . . . Because their personnel and program practices are less bound by red tape and security requirements, they can attract American experts in to short and long-term programs overseas when they are needed, not six months or a year later. . . In short, these private and voluntary organizations are "can-do" enterprises, highly competent in their specific fields. Moreover, they are a direct link between the people of the third world and the individual American who is concerned enough about the state of the planet that he or she will contribute money or time to its improvement.

A.I.D. cannot provide this linkage, but it is helping to strengthen the links; and it can—with the blessings of Congress—do much more. My American and African colleagues in Africare are only too aware how difficult it is to establish a private development agency on a sound footing.

I wonder, frankly, whether we could have done it without having turned to A.I.D. for a development program grant two years ago. It bought us time and opportunity to show how we could assist African officials on their home ground to design and direct their own social and economic projects. Ultimately it gave A.I.D. another vehicle for delivering assistance effectively in the drought-ravaged Sahel of West Africa.

It also meant that there is one more organization assembling new sources of private support for foreign development projects. The Development Program Grant, referred to earlier, for instance, helped Africare to convince the Lilly Endowment and several Church groups, including West Kansas Conference of Methodist Bishops, UMCOR and World Vision, to invest in the important hydro-agricultural/land resettlement program in Niger. That program might still be a dream—if A.I.D. had not given us the boost we needed.

Mr. Chairman, my point should be clear: serious overseas development must be a partnership between government and U.S. private agencies, just as it must be a partnership between us and the developing countries themselves. A.I.D. is the obvious locus of federal assistance to PVO's. It is already showing what can be done by this means, albeit on a relatively small scale. Congress certainly is anxious to make its foreign aid dollar more effective; certainly it wishes to encourage even greater private and voluntary involvement in development abroad; and it can do so by increasing A.I.D.'s budget for Developmental and Operational Program Grants to PVOs.

Finally, I believe that we can maximize the success of PVOs as they relate to A.I.D. by creating within A.I.D. a Bureau of Private Developmental Assistance, headed by an Assistant Administrator. Such a Bureau would be a "one stop" place where all PVO assistance could be coordinated. Such a Bureau would not ignore the necessary participation of the Area Bureaus and the invaluable support and input of the Offices of Developmental Resources and Technical Assistance within those Bureaus. Simply put, it would expedite the development of the partnership between PVOs and A.I.D. It would be an enormous efficiency and economy move.

We believe that increased support to PVOs and the creation of a separate Bureau for Private Development within A.I.D. would be strongly supported by the American people. Two separate public opinion polls commissioned by the Overseas Development Council and the Chicago Council on Foreign Relations showed a marked preference for, and confidence in, private organizations over government as implementors of foreign assistance programs.

I will be happy to answer any questions you may have.

STATEMENT BY EDWARD P. BULLARD

Mr. Chairman and members of the Committee, I am Edward P. Bullard, President of Technoserve, Inc. I will address you today as President of Technoserve, a Private and Voluntary Organization, (PVO), and will also speak of the work of PVOs who are vitally interested in United States foreign assistance programs.

The PVO community in the United States is perhaps unique in the world. Our organizations are diverse and our origins different. We

share certain fundamental convictions, however, which we would like to make known to this Committee:

We believe that the problems of the Third World are problems which we should be actively addressing;

We believe that the PVO community can make a significant contribution towards the solution of these problems leading to the well being of our neighbors in low-income countries;

We believe, however, that to bring this about, an appropriately structured partnership between PVOs and our government must be further developed.

During my presentation I will address these points and hopefully together we can further stimulate an important new thrust in United States development assistance programs.

A PRIVATE AND VOLUNTARY ORGANIZATION (PVO)—TECHNOSERVE, INC.

Technoserve is a PVO engaged exclusively in development activities in low-income countries. It is a non-profit non-governmental organization founded in 1968. Its primary purpose is providing technical assistance for the establishment of self-help enterprises by low-income peoples and to thereby increase local productivity and income. Technoserve headquarters are located in Darien, Connecticut, U.S.A., with programs operating in several African and Latin American countries. Technoserve is supported by voluntary contributions from churches, foundations, private organizations, individuals, and public entities such as the U.S. Agency for International Development. Its 1976 income totaled $1,200,000.

An organization such as Technoserve has no tangible "product." It gives away no food, no tools and no money and it builds no roads or schools. The organization is its people—career professionals who combine a high level of commitment and and competence. Technoserve's staff of 70 believe that it is important to help our less fortunate neighbors and virtually all have committed themselves to that process. These staff people represent our best hope for effectively assisting our neighbors overseas. They are typical of the staff of many PVOs.

It is interesting to note in Technoserve's case that 65% of the Americans on Technoserve's professional staff are former Peace Corps volunteers. These individuals have returned from overseas assignments, entered schools of higher education to develop specialized skills and joined Technoserve so as to fulfill their desire to further help in the development process. A significantly increasing number of such talented and committed people are applying for jobs with Technoserve. Technoserve is also pleased that approximately 50% of its professional staff are host country and third country nationals. It is our host country colleagues who can and must play an increasing role with a PVO like Technoserve in local institution building and the development process.

Since Technoserve is "people" and it produces no tangible "product" I should explain our program. The aim of the program is to create new jobs, income, and increase rural productivity and food production, all leading to an improved quality of life. Technoserve believes that helping low-income people to start or expand their own viable self-help enterprises is the best means of accomplishing these important ends. Helping others to start medium scale businesses and cooperatives in developing countries is what we do. It is complex; the businesses sometimes fail. It is a process, however, which we believe does most effectively foster self-reliance, economic stability and human dignity for the poorest majority.

The best way to illustrate Technoserve's program is to cite a few specific examples of project development activities from the more than 25 enterprises Technoserve has assisted.

In Central America, Technoserve is helping 250 low-income rice farmers to set up a large cooperative rice mill which they now own and which is processing and marketing their rice. 465 jobs have been created by this project alone and income and productivity in this rural area are projected to rise significantly.

Technoserve is pleased with its progress as well in West Africa in the development of what could be a whole new industry. With Technoserve help, two companies have been formed by nationals to grow sugar cane and market sugar syrup. Hundreds of small scale farmers will shortly be supplying cane to processing plants which utilize low cost appropriate technology developed by Technoserve and nationals.

Development however, is a difficult and long term process as illustrated by another project we are assisting in Latin America. For more than three years Technoserve has been assisting over 100 small woodworking shops to start their own supply cooperative and build a large $300,000 wood drying kiln complex. The cooperative has lost money and is now in financial difficulty. Technoserve caused some of the problems by being too anxious to see the cooperative expand and by not insuring that the cooperative was well managed. While we now feel the cooperative can be made viable, the experience points out that there is no way to guarantee success in business or in development and that development is a learning process for us all. Given sufficient time, effort and luck these projects do effectively improve the well being of the poorest majority. This is the kind of work that PVOs can do.

THE PVO COMMUNITY

An understanding of the PVO community requires that an initial distinction be made between those agencies, usually older well established, whose programs are primarily related to relief efforts and the newer development related agencies. While fully recognizing the value of agencies that promote relief sevice or combine relief and development, Technoserve will limit its comments to that new generation of PVO whose programs are exclusively in the development field.

Within that broad categorization of development oriented PVOs, there still exists considerable diversity. Various PVOs have programs directed at health care, adult literacy, family planning, agricultural extension and research, cooperative development, technical assistance and self-help enterprise development. This diversity of programming nevertheless centers around a common set of *goals* and objectives shared by the PVO community and by the Congress of the United States. Some of these major goals for development assistance are: self reliance; increased productivity in rural and urban areas; the increase of income among low-income populations; new jobs or improved conditions of employment; increased availability of locally produced food; and human development for the poorest majority target population.

The PVO community has running through it some important operational *characteristics* which are significant from the standpoint of U.S. foreign assistance. It is generally recognized that PVOs are: innovative and willing to take risks; relatively cost effective, utilizing low cost delivery systems; able to generate trust and confidence within the U.S. public sector; able to operate in areas inappropriate for formal multilateral or bilateral assistance; engaged in projects involving the poorest majority as full partners; and assisting projects which are often replicable.

A number of the "tools" or processes which many of the PVOs utilize in their overseas development efforts are becoming of increasing interest to the development community. These tools can be empirically tested by PVOs in their field of work and determinations made on the basis of actual experience as to what mechanisms are most effective in the development process. Some of the more important tools now being utilized by PVOs include: intermediate technology which is becoming an integral part of many development projects; management assistance and training as it relates to development projects and programs; cooperative structures used as a means of involving the poorest majority; capital, not as an end in itself, but as a tool to facilitate the developement process; and labor intensive enterprises which seem an effective means of helping people to help themselves.

The PVO community is developing the capability of combining mutually accepted goals with important operational characteristics and innovative mechanisms in a manner such that the community can have a significant impact on the well being of the poorest majority.

Another interesting feature of the PVO community is the effort within the community to try and organize consortia or collaborative work in developing countries. Many PVOs including Technoserve belong to organizations such as Private Agencies Collaborating Together (PACT) and Coordination in Development (CODEL) which have made it possible for the individual PVOs to share information and become more effective in their development activities.

LESSONS LEARNED

The PVOs have learned a great deal since the 1973 Foreign Assistance Act encouraged greater participation on the part of the PVO community in the development process overseas. Some of the *lessons* which are of particular importance to Technoserve and other agencies working in similar fields include the following: projects should be assisted in response to local initiative; with limited resources, efforts must be made to select activities which maximize the social and economic benefit; an important ingredient in the success of a particular project is the identification and stimulation of local leaders; and the recognition that the appropriateness of technology depends on whether it "fits" with all the other ingredients which make up a project.

The following general observations are more fundamental and are shared by a great many organizations within the PVO community.

First, "grand solutions" and great leaps forward are not pragmatically possible. Development is a people process and must be carried on one step at a time. The fact that it is difficult to effectively reach the target population does not relieve us of the responsibility of continuing to recognize that the poorest majority is the target population.

Second, true development is complex and long-term. If such a complex problem is to be effectively addressed it must be addressed with competent professionals. The PVO community needs to be able to attract and hold the best talents in the United States and elsewhere if a significant impact is to be made on the well being of the poorest majority around the world.

Third, in order to achieve the level of competence and professionalism to attract able people and to develop sophisticated programs covering extended periods of time, PVOs require reasonable funding stability.

PVO'S AND U.S. FOREIGN ASSISTANCE—AN EMERGENCY PARTNERSHIP

United States foreign assistance has been traditionally channeled through bilateral and multilateral mechanisms. While these two mechanisms have their strength and weaknesses they are requisites of an effective foreign assistance program. A new avenue of foreign assistance is coming into prominence, however, and deserves increasing attention.

That avenue is represented by U.S. support for the programs of PVOs. There is the growing consensus of PVOs working in development that the use of PVOs to provide developmental assistance abroad should be strengthened to become the independent vital third avenue of assistance, equal in importance and emphasis to the other bilateral and multilateral avenues. With past help from the private and public sectors, the PVO community has gained stature and know-how and is now in a position to shoulder greater responsibilities in the foreign assistance program of the United States. A strong reason to include the PVO community as a major avenue of foreign development assistance is the support they bring to U.S. overseas development efforts through their broad constituencies.

Joined with this increased capability to play a role in development assistance is the agreement between PVOs and the U.S. Congress on major shared priorities. All seem to concur that the poorest majority should be the target for our foreign development assistance programs. We agree that local capabilities should be strengthened so that this poorest majority can experience better diets, better health and child care, more manageable family size, constructive income producing work and improved purchasing power. The integration of women into the national economies is important as is increasing production, processing, nutritive value and distribution of food. The enhancement of job opportunities through the encouragement of labor intensive, low cost systems of production and services, improved literacy and better forms of education and training all are equally shared priorities.

PVOs can also be mechanisms for more effectively utilizing some multilateral and bilateral programs. The large multilateral lending institutions are constantly faced with the problem of getting their funds to the poorest majority. PVOs with their close historical link with this target population can structure projects so that funds from such large lending institutions would benefit the poor. Appropriate guidelines instructing these lending institutions to more fully utilize PVOs in their development programs should be formulated and contained in legislation concerned with replenishment of these institutions.

In a similiar vein, there should be closer collaboration between the United States bilateral assistance programs and the activities of PVOs in developing countries. Often PVOs are relatively small and their capabilities unknown to host country development institutions and governments. In appropriate circumstances, USAID Missions could encourage host country development organizations to take advantage of competent PVOs and their services.

As relationships between the private and public sectors are joined, concerns are often expressed regarding the fact that PVOs may lose their character and autonomy and become too dependent on the U.S. Government. Some percentage funding formulas have been proposed as a means of protecting the independence of PVOs. Many of my colleagues and I feel this type of oversimplified approach could have serious negative consequences on the potential role which PVOs can play in the development process. More to the point is the manner in which the government procedurally and substantively handles this new relationship. It is our contention that the key concepts are partnership and interdependence. If these concepts characterize the relationship between PVOs and U.S. foreign economic assistance activities, the PVOs' independence is not threatened.

Implicit in the idea of partnership and interdependence is the reality that PVOs must be reasonably assured of ongoing forms of funding from U.S. Government sources. The concept that somehow seed funding from the Government can start a non-profit organization on its way to financial self-sufficiency is false and must be laid to rest. The new generation of development oriented PVOs could be financially self-sufficient but their scale, impact, level of competence and tenure of staff would seriously limit their impact on the well-being of the poorest majority. Thus, the concept of ongoing forms of support from the U.S. Government for PVOs must be accepted in principle as it is in bilateral and multilateral funding appropriations.

In addition, mechanisms need to be established for giving PVOs some indication of what funding levels they might expect three to five years into the future. Only with some such guidelines can proper planning, staffing and program implementation be undertaken. PVOs do recognize that funding from the U.S. Government cannot be guaranteed for long periods of time. However, most PVOs are willing to assume that risk in the interest of benefiting a larger number of the poor.

Many details remain to be worked out relative to the partnership concept. A balance would have to be struck between the government's need for financial accountability and program evaluation while allowing PVOs to run their own programs, set their own targets and make their own mistakes. Future regulations and registration procedures, however, should not be allowed to inordinately impinge upon the autonomy and staff time of the PVOs. While it is recognized that accountability is a legitimate concern of Congress, PVOs are more easily monitored than many of the large multilateral programs.

It should be noted that not all PVOs are effective, nor are they all equally well run, nor do all wish to establish a partnership with the U.S. Government. The allocation of scarce U.S. Government foreign assistance resources must be based on competence and performance in the field and a desire to collaborate with U.S. Government plans. There must be a screening process which directs funds to those agencies which most effectively address the needs of the target population.

RECOMMENDATIONS

1. Technoserve recommends that legislation be enacted which recognizes PVOs as full partners in the U.S. development assistance program and that further guidelines be drawn up giving shape and direction to this evolving partnership. If the PVO community is to become an important third avenue of development assistance, impetus for this new role should come from Congress.

2. Technoserve recommends that a higher level of funding for PVO development activities be acknowledged as essential and that $125,000,000 be directed to PVO activities in FY 1978. This amount could, for the time being, come from a number of different sections of the Development Assistance Act and not necessarily be a single line item. Technoserve believes that approximately $125,000,000 can be effectively used by the PVOs in FY 1978. A statement in the Act indicating that such an amount is to be directed to PVO activities for development assistance purposes would give substance to the idea of an emerging partnership. The $125,000,000 referred to above is in addition to ocean freight, excess property, disaster relief and P.L. 480 food programs.

3. Technoserve recommends that the Agency for International Development continue as the mechanism through which the emerging partnership betwen the U.S. Government and PVOs be further implemented; also that a mechanism be developed for the centralized management of the PVO program within AID. Relations between the PVO community and AID have been generally constructive and the Agency for International Development does appear to be the best instrument through which to implement the new partnership philosophy.

Thank you again, Mr. Chairman, for allowing me to express my opinions on matters which are very important to all of us in Technoserve and the PVO community as well as to our low-income neighbors overseas. It is our hope that a new partnership will continue to evolve between our government and the PVO community and that this partnership will be a further demonstration of the generosity and human concern of the American people for our less fortunate neighbors in other countries.

UNIONIZATION OF THE MILITARY

Mr. THURMOND. Mr. President, in the March 23, 1977, edition of the St. Louis Globe-Democrat there was an article entitled, "Military Union Threat to United States."

This article points out that the Carter administration has refused to face reality and come to grips with the threat of unionization of the Armed Forces. I fully share the concern expressed therein.

Mr. President, I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From St. Louis Globe-Democrat, Mar. 23, 1977]

MILITARY UNION THREAT TO UNITED STATES

Thus far the Carter Administration has refused to face reality and come to grips with the threat of unionization that hangs over the U.S. armed forces.

On the surface it appears that President Carter is adamantly against moves to organize the military. "My opinion, strongly held," he said recently, "is it would not be advisable to have military personnel unionized."

However, fears regarding exactly where the President stands on this vital issue are justified by Mr. Carter's insistence that it is not necessary to pass legislation that would prohibit members of the armed forces from joining a union.

Now the door seems to be wide open for an invasion by union recruiters as top administration officials have taken up the President's chant. Both Defense Secretary Harold Brown and Navy Secretary W. Graham Claytor figuratively wrung their hands as they straddled the issue at a hearing by the Senate Armed Services Committee.

The unfolding drama of indecision annoyed Chairman John C. Stennis, who is author of one of two bills on the matter that are pending in the Senate. The Mississippi Democrat pleaded with the Defense Department officials by urging them to "make up your minds which way you are going."

Strong warnings of intentions to organize the military have been visible for more than a year and a half. Time will run out if the procrastination continues endlessly. The Association of Civilian Technicians already is organizing members of the reserves and the National Guard The 300,000-member American Federation of Government Employees has amended its constitution to extend recruiting to the armed forces. The National Maritime Union also established a committee to study the matter.

Two years ago the Union of Military Physicians sprang up among U.S. officers sanctioned in Germany.

Despite all this activity and a beachhead already established among reserve forces, President Carter continues to downgrade the intentions of the unions. Mr. Carter is not alone in the belief that strong efforts to organize military personnel are non-existent. The President reports that various labor leaders agree with his position, making it the first time organized labor has voluntarily renounced recruiting as a tool for increasing its membership.

Supporters of the ban on union activity point to the upheaval that would result to the chain of command and the damage, perhaps irreparably, to the nation's defenses. The two Defense Department witnesses at the hearings acknowledged the dire results. Brown conceded that military unions could cause havoc with the command system.

Although the Defense Secretary testified that collective bargaining in the armed forces is "fundamentally incompatible" with the necessity for an "unencumbered command and control system," he declined to support either of the two measures being studied by the Senate panel. Both Brown and Claytor cast doubt on the constitutionality of such a law.

The present policy that is aimed at prohibiting solicitation for union membership on military bases is not working. This fact was proven by Sen. Strom Thurmond, R-S.C., who displayed a flyer publicizing a meeting with AFGE officials at the Oakland Army base to discuss "unionization of the military."

The administration cannot give first consideration to paying political obligations to labor leaders. Top priority and concern must be given to the entire country.

Congress' authority over the armed forces is clearly spelled out in Article I of the U.S. Constitution, which says:

"The Congress shall have power . . . to raise and support armies . . . to provide and maintain a navy . . . to make rules for the government and regulation of the land and naval forces."

Such power invested in Congress would appear to answer any challenge alleging that a ban on union membership in the armed forces might violate individual rights.

Article II of the Constitution establishes the President as Commander-in-Chief of the Army and Navy of the United States. President Carter should have no hesitancy in backing legislation to uphold Congress' authority and his own executive power.

The President has but one course to follow. He should spur the Democratic-controlled Congress to enact legislation banning military unions that in war could spell the difference between victory or defeat.

A PROUD WEEK FOR THE STATE OF WISCONSIN

Mr. NELSON. Mr. President, this was a proud week for the State of Wisconsin. On Saturday, the University of Wisconsin won its second national hockey championship by defeating an outstanding Michigan team 6–5 in an exciting overtime finish. And of course Monday night the Marquette University basketball squad battled its way to a national championship of its own by beating a fine North Carolina team 67–58.

Marquette's victory was an appropriate climax to a brilliant career for Coach Al McGuire, who now retires from college basketball. After 10 consecutive years of post-season tournament appearances, he and his players can finally claim the grandest prize of all. Coach McGuire was showman, philosopher, tactician, and teacher. He brought winning basketball to Milwaukee and his own unsinkable style to fans everywhere. Most important, he helped mold the lives of many young men who wore the Marquette uniform. He will be missed by all of us.

PETROLEUM PRICE MONITORING SYSTEM

Mr. LEAHY. Mr. President, coincidental with the decontrol of middle distillate petroleum products, former FEA administrator Frank Zarb developed an elaborate price monitoring system to track sudden price increases which might result from decontrol, and to set in motion steps to bring prices down. The agreement to establish the system and an outline of the procedures involved was set forth in a letter from Mr. Zarb to Senator KENNEDY on page 21538 of the CONGRESSIONAL RECORD of June 30, 1976.

Subsequent meetings with FEA officials engendered considerable confusion about the meaning of the agreements outlined in Mr. Zarb's letter and detailed on page 41155 of the Federal Register of September 21, 1976; about how the operation of the so-called price trigger affects FEA's authority to grant relief; and as to what relief is available for dealing with this situation.

Consequently, I wrote Comptroller General Staats on January 19 of this year requesting clarification of these points. Shortly after I received the reply, the price trigger was tripped in the North Central region, causing FEA to schedule investigatory hearings.

Mr. President, in the interest of furthering this process, I ask unanimous consent that a copy of my letter to Mr. Staats and his legal opinion be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

COMMITTEE ON
AGRICULTURE AND FORESTRY,
Washington, D.C., January 19, 1977.

Mr. ELMER STAATS,
Comptroller General, General Accounting Office, Washington, D.C.

DEAR MR. STAATS: As you may be aware, coincidental with the decontrol of middle distillate petroleum products, Federal Energy Administrator Frank Zarb last year developed an elaborate price-monitoring system to track sudden price increases which might result from decontrol, and to set in motion steps to bring prices down. The agreement to establish the system and an outline of the procedures involved is contained in a letter from Administrator Zarb to Senator Kennedy on page 21538 of the Congressional Record of June 30, 1976.

The Northeast, and especially New England, has experienced rapid and sharp increases in recent months in the price of number two heating oil, a middle distillate product. These increases have been exceptionally high in the residential sector, which comprises 68 percent of the volume tracked by FEA's monitoring system.

Recent meetings with FEA officials have engendered considerable confusion about the meaning of the agreement outlined in Administrator Zarb's letter and detailed on page 41155 of the Federal Register of September 21, 1976; about how the operation of the so-called "price trigger" affects FEA's authority to grant relief; and as to what relief is available for dealing with this situation.

For that reason, I would like clarification of the following questions:

(1) Under the terms of the notice in the September 21 Federal Register, is the FEA legally bound to take any action?

(2) If middle distillate prices "break" the trigger, what, if any, action is required under the law?

(3) What authority is there to grant relief, and what relief is available under the law?

Your timely response is appreciated because of the unusual hardships that these price increases have imposed, and the apparent reluctance of the FEA to take swift and meaningful action. Furthermore, since President Ford intends to submit to Congress a gasoline decontrol plan today with a similar "price trigger" mechanism, it would be extremely helpful to have the answers to my questions before the Senate acts on this latest decontrol plan.

Sincerely,

PATRICK J. LEAHY.

COMPTROLLER GENERAL OF THE
UNITED STATES,
Washington, D.C., March 18, 1977.

Hon. PATRICK J. LEAHY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR LEAHY: This is in response to your letter of January 19, 1977, requesting clarification of several legal issues regarding the operation of the Federal Energy Administration's (FEA) system for monitoring prices and responding to price increases of middle distillate petroleum products. Specifically, you asked the following questions:

(1) Under the terms of the notice in the September 21 Federal Register, is the FEA legally bound to take any action?

(2) If middle distillate prices "break" the trigger, what, if any, action is required under tho law?

(3) What authority is there to grant relief, and what relief is available under the law?

The Federal Energy Administration Act of 1974 (FEAA), Pub. L. No. 93-275, 88 Stat. 96, established the Agency and set forth its authority and functions in broad terms. Section 5 provides, in pertinent part:

"Sec. 5(a) Subject to the provisions and procedures set forth in this Act, the Administrator shall be responsible for such actions as are taken to assure that adequate provision is made to meet the energy needs of the Nation. To that end, he shall make such plans and direct and conduct such programs related to the production, conservation, use, control, distribution, rationing, and allocation of all forms of energy as are appropriate in connection with only these authorities or functions—

"(1) specifically transferred to or vested in him by or pursuant to this Act;

"(2) delegated to him by the President pursuant to specific authority vested in the President by law; and

"(3) otherwise specifically vested in the Administrator by the Congress.

"(b) To the extent authorized by subsection (a) of this section, the Administrator shall—

* * * * *

"(4) develop plans and programs for dealing with energy production shortages;

"(5) promote stability in energy prices to the consumer, promote free and open competition in all aspects of the energy field, prevent unreasonable profits within the various segments of the energy industry, and promote free enterprise;

"(6) assure that energy programs are designed and implemented in a fair and efficient manner so as to minimize hardship and inequity while assuring that the priority needs of the Nation are met;

"(7) develop and oversee the implementation of equitable voluntary and mandatory

energy conservation programs and promote efficiencies in the use of energy resources;

"(8) develop and recommend policies on the import and export of energy resources;

* * * * *

Additionally, the President has delegated to the Administrator of FEA all authority granted to him by the Emergency Petroleum Allocation Act of 1973 (EPAA), Pub. L. No. 93-159, 87 Stat. 27. See Exec. Order 11790, June 27, 1974. Pursuant to section 4(a) of EPAA, as amended by the Energy Policy and Conservation Act of 1975 (EPCA), Pub. L. No. 94-163, 89 Stat. 871, the President promulgated allocation and price control regulations as required See 10 C.F.R. §§ 210-212 (1976).

Regarding those regulations, section 4(b)(1) of the EPAA provides, in pertinent part:

"(b)(1) The regulation under subsection (a) of this section, to the maximum extent practicable, shall provide for—

* * * * *

"(D) preservation of an economically sound and competitive petroleum industry; including the priority needs to restore and foster competition in the producing, refining, distribution, marketing, and petrochemical sectors of such industry, and to preserve the competitive viability of independent refiners, small refiners, nonbranded independent marketers; and branded independent marketers;

* * * * *

"(F) equitable distribution of crude oil, and refined petroleum products at equitable prices among all regions and areas of the United States and sectors of the petroleum industry, including independent refiners, small refiners nonbranded independent marketers, branded independent marketers, and among all users;

* * * * *

Also, subsections (b) and (c) of section 12 of EPAA allow the President to exempt any petroleum products from allocation and price controls, if he determines that such exemption is consistent with the objectives of section 4(b)(1). These controls may be reimposed, however, pursuant to section 12(f), which provides:

* * * * *

"With respect to any oil or refined product category which is exempted pursuant to the provinions of this section, the President shall have authority at any time thereafter to prescribe a regulation or issue an order respecting either the allocation of amounts, or the specification of price or the manner for determining the price, of any such oil refined product category upon a determination by him that such regulation or order is necessary to attain, and is consistent with, the objectives specified in section 4(b)(1). Any such oil or refined product category for which allocation or price requirements are reimposed under authority of this subsection may subsequently be exempted without regard to the provisions of subsection (c) of this section."

In accordance with section 12(c) of EPAA the FEA submitted an energy action to Congress, with appropriate findings, exempting middle distillates from allocation and price controls. Congress did not disapprove the amendment within 15 days, as specified in section 551 of the EPCA, therefore middle distillates were exempted effective July 1, 1976. In response to congressional concern that prices of middle distillates would rise unjustifiably upon decontrol, FEA proposed and adopted the plan for monitoring prices referred to in your letter. See 41 Fed. Reg., Sept. 21, 1976, pp. 41155-62.

The Carter Administration appears to have reaffirmed the previous administration's intention to monitor prices. The Washington Post recently (February 11, 1977, p. A1) reported that the FEA intends to reimpose price controls on kerosene and home heating oil when prices rise above the index price level. According to the Post, FEA Administrator John F. O'Leary stated:

"My predecessor, Frank Zarb, committed this agency to a return of price controls if heating oil went back through the trigger price. Zarb made that commitment as a price for getting decontrol through Congress and I plan to honor that commitment."

Under this plan, regional and national price indices are computed by FEA based on:

" * * * actual average June 1976 prices for No. 2 heating oil and No. 2-D diesel fuel (weighted by their historical relative sales volumes), adjusted to take into account (1), seasonal price variations of both products, (2) actual increases/decreases in the price of imported and domestically produced crude oil, (3) actual increases/decreases in the prices of imported middle distillates (weighted by their historic relative volumes), (4) increases in non-product costs of refiners, as defined and limited under FEA costs pass-through regulations, and estimated increases in operating costs of resellers and retailers, and (5) the two cents/gallon flexibility factor." 41 Fed. Reg. 41156.

If actual prices for middle distillates rise above the index price, then FEA will:

" * * * (a) hold public hearings within ten days to determine the causes of the excessive price levels and to solicit comments on actions necessary to return actual prices to levels at or below the index price level, and (b) to take within ten days of completion of hearings such action as may be required to restore prices to those levels within one month." 41 Fed. Reg. 41156.

The notice of adoption of the plan includes the following options available to FEA to restore prices to levels at or below the index prices:

" * * * (1) reimposition of complete price and allocation controls over the entire industry, (2) imposition of partial price/allocation controls over the entire industry, (3) imposition of full or partial controls over certain segments or distribution levels of the industry, and (4) modification of FEA's entitlements program to reduce the cost of imported middle distillates." 41 Fed. Reg. 41156.

In connection with your third question we have also considered whether allocation and price controls could be reimposed on a regional basis under the plan. While such action is not specifically authorized by the acts discussed above, there is nothing in those acts that would preclude such action. Since FEA's plan provides for monitoring of prices on a regional basis, the reimposition of controls on a regional basis appears to be an available form of relief under the plan.

In regard to whether FEA is required to act, should middle distillate prices "break" the trigger, FEA has the authority under section 12(f) of EPAA to reimpose allocation and price controls on exempted petroleum products. This action is discretionary, however, so long as FEA determines that such action is necessary to attain, and is consistent with the objectives specified in section 4(b)(1) of EPAA. Nothing in FEAA or EPAA requires FEA to take any action in response to rising prices of decontrolled petroleum products.

By adopting the plan discussed above, FEA has essentially limited its discretionary authority in responding to price increases of middle distillates. According to the terms of the plan, if actual prices exceed index prices FEA must hold public hearings, and take some action to return prices to the index price level. The specific action taken, however, is still discretionary, limited only by sections 12(f) and 4(b)(1) of EPAA, and section 5(b) of the FEAA.

In regard to your first question, there is an issue as to whether FDA is legally bound to adhere to the plan at all. Generally, while administrative agencies are bound by their own validly-promulgated rules and regulations issued pursuant to statute, they are not bound by internal agency procedures, even though they are published in the Federal Register. *Service* v. *Dulles*, 354 U.S. 363 (1956); *Accardi* v. *Shaughnessy*, 347 U.S. 260 (1954); *Gardner* v. *F.C.C.*, 530 F. 2d 1086 (D.C. Cir. 1976).

In the present case, the price monitoring plan was published in the Federal Register as a notice, rather than as a statutory regulation. While a court would not be bound by the agency's label, the line between a binding agency regulation and a non-binding internal agency procedure is not well defined. See *St. Francis Mem. Hosp.* v. *Weinberger*, 413 F. Supp. 323 (1976). If FEA decided to ignore the plan and a law suit were instituted to attempt to force adherence to the plan, the outcome would be influenced by such factors as whether the plaintiff detrimentally relied on the plan and whether FEA had compelling reasons to deviate from the plan. Therefore, we are unable, in the present case, to provide a definitive answer to the question of whether FEA is legally bound to follow the plan. We can, however, provide some guidance as to the probable outcome.

Even though the plan was published as a notice, in adopting the plan FEA followed the administrative procedure normally used in the promulgation of regulations—that is, notice by publication of proposed rules, public hearings solicitation of written comments, incorporation of comments into the proposed rules, and finally publication of the adopted rules. See 5 U.S.C. § 553 (1970). Since FEA treated the plan procedurally as a regulation, an argument can be made that it is, in fact, a regulation and that the public may rely on it as such.

Also, while FEA did not indicate that the plan was being promulgated pursuant to any specific statute, the plan meshes closely with FEA's statutory authority and regulations in the area of price control and allocations as discussed above. The plan appears to be in implementation of these statutes and regulations, rather than merely an internal agency procedure. Specifically, the plan provides a standard for FEA to determine when to institute remedial action under section 12(f) of the EPAA. The plan also is consistent with, and facilitates achievement of the objectives stated in section 4(b)(1) of the EPAA.

Additionally, the plan is directly related to the authority of FEA, as set forth in section 5(b) of the FEAA.

For these reasons we feel that a court could find that the plan is legally binding on FEA.

Even if the plan is binding on FEA, however, it could be amended or repealed very quickly. Generally, formal rulemaking, including amendment or repeal of an existing rule or regulation, requires notice of the proposed rulemaking, opportunity for interested parties to submit comments and publication of the adopted rule not less than 30 days before its effective date. 5 U.S.C. § 553 (1970). However, notice of proposed rulemaking and the opportunity to submit comments are not required:

". . . when the agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest." 5 U.S.C. § 553(b)(3)(B) (1970).

Also, the requirement under section 553(d) that the adopted rule must be published 30 days before it is effective can be waived:

"* * * (3) as otherwise provided by the agency for good cause found and published with the rule."

In this case, therefore, it would not be difficult for EPA to make the required findings

under these provisions, based perhaps on an emergency of some sort, and then to repeal the plan in a very short time.

We note that our audit staff is preparing a report to you, to be provided separately, regarding the validity of the sampling techniques used by FEA in monitoring prices under the plan.

We hope that this information has satisfactorily answered your questions.

Sincerely yours,

ELMER B. STAATS,
Comptroller General of the United States.

INTERNATIONAL NARCOTICS CONTROL

Mr. HUMPHREY. Mr. President, two reports have come to my attention in recent days which illustrate the basic dilemma facing our International Narcotics Control program. During the early 1970's the United States began an active effort to stop production of illegal drugs at their source. The effort has resulted in some curtailment of supply of dangerous drugs to the United States, but at the cost of heavy U.S. involvement in drug enforcement operations of other countries. Pressured by the United States, countries such as Mexico and Bolivia passed stringent drug laws that are now backfiring on many U.S. citizens. Now the United States is forced to pressure these same countries in the other direction to protect the basic human rights of our citizens caught by the laws we helped draft. I would not be surpised if these countries are confused by our policies.

The first of the two reports which illustrate this dilemma is the Secretary of State's March 4, 1977 report to the Senate Foreign Relations Committee required by section 408(b)(2) of the International Security Assistance and Arms Export Control Act of 1976. The report states that local Mexican authorities have often mistreated U.S. citizens. It notes 58 cases of substantiated physical abuse of U.S. citizens after their arrest, 17 cases of unscrupulous financial practices by Mexican attorneys, and 269 cases of inadequate notification after arrest. The U.S. Embassy was in many cases forced to send formal protest notes. I should add, however, that the Mexican National Government is cooperating with our Government on these matters and that cooperation will surely continue under the new Mexican President, Lopez Portillo. In this regard, the administration is now drafting implementing legislation for the United States-Mexican Treaty on the Execution of Penal Sentences which will allow the Senate to more effectively consider the treaty.

The second report is a Jack Anderson article which appeared in the March 19, 1977 Washington Post, entitled "Bolivia Mistreats Jailed Americans." The article details some of the hardships suffered by U.S. citizens for what would be minor drug offenses in this country. The State Department has informed my staff that the Bolivian Government is cooperating with our efforts to provide humane treatment and due process for our citizens in Bolivian jails. For example, in January Bolivia passed a new law which reduces sentences from 10 to 2 years for simple possession of drugs; and recently the number of judges trying narcotics cases has increased from 3 to 12. The State Department has not, however, begun negotiations with Bolivia on a prisoner exchange treaty.

The dilemma of our International Narcotics Control program is a difficult one to solve. It is important to stop the flow of dangerous drugs into our country and halt the damaging effect it has on our society. But it is equally important to have a consistent international drug control policy which both avoids excessive U.S. involvement in the domestic affairs of others and yet protects the basic human rights of U.S. citizens abroad. The administration has requested $39 million for its fiscal year 1978 international narcotics program. My Foreign Assistance Subcommittee hopes to hold hearings on these matters later this year.

Mr. President, I ask unanimous consent that the texts of the two documents to which I referred be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF STATE,
Washington, D.C., March 4, 1977.

Hon. JOHN SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate.

DEAR MR. CHAIRMAN: In accordance with Section 408(b)(2) of the International Security Assistance and Arms Export Control Act of 1976 (P.L. 94-329), I am writing to report on the progress which has been made toward achieving full respect for the human and legal rights of United States citizens detained in Mexico.

In the last report, submitted to you by my predecessor on November 10, 1976, it was reported that the problem of obtaining full respect for the human and legal rights, under Mexican law, of all United States citizens detained in that country had not been solved and that the Department was not fully satisfied with the progress that had been made at that time toward its solution.

During hearings before the House International Relations Committee from July 1975 through January 1976, the Department reported on its findings in some 475 cases of United States citizens who were detained in Mexico as of July 1, 1975. The Department indicated during those hearings that prisoners' allegations of physical abuse and denial of human and legal rights were substantiated in a disturbing number of cases. Unfortunately there are still substantiated cases in which U.S. citizens are not receiving the full rights guaranteed to them under Mexican law.

During the period from July 1, 1975 through January 15, 1977, over 1500 Americans were arrested in Mexico. A vast majority of that number were involved in minor offenses and the arrestees were released after only one or two days in jail and/or the payment of a fine. During this period, there were 58 cases of substantiated physical abuse at the time of arrest. In another 47 cases the evidence was not sufficient to reach a clear conclusion. There were also 17 cases wherein Americans were subjected to unscrupulous financial practices by attorneys who extracted large fees from the prisoner and/or his family for services which they then failed to provide and another 61 cases where the evidence of malpractice was not sufficient to reach a conclusion. In cases of substantiated abuse the Embassy at Mexico City and our consular posts throughout Mexico have made and continue to make protests to the Mexican authorities at both the local and federal levels. I should point out, however, that protests have not been made in those cases where the arrested American citizens specifically requested that no protest be made. The protests are normally made both orally and in writing to the appropriate local officials. In many instances, the cases are documented by constituent posts and forwarded to the Embassy at Mexico City so that protests can be lodged with the Mexican Foreign Ministry. In such cases, the Embassy sends a formal note of protest to the Ministry with a copy to the Mexican Attorney General. These notes include a description of the case, a sworn statement by both the prisoner and the consular officer where appropriate, and a request that a full investigation be made into the allegation of abuse. To date, the Embassy has not received satisfactory replies to the vast majority of such notes.

While it is true that the total number of cases of substantiated abuse represents a small percentage of the total number of arrests, we cannot be complacent. As was noted in our previous report, as long as one American citizen is not being accorded his human and legal rights under Mexican law, we will not be satisfied.

Timely notification to our consular officers of the arrest of an American in Mexico and subsequent early access to the arrestee continue to be major problems, which we have discussed repeatedly with officials of the Mexican Government at the highest levels. We have stressed in these discussions the importance the United States Government places on obtaining early notification of an arrest and subsequent prompt access to the detainee in accordance with the Vienna Convention on Consular Relations to which both of our countries are signatories. While we have succeeded in convincing the Mexican Federal Government of our position, practical results on the local level remain spotty and uneven. During the last eighteen months, there were some 269 cases where we did not consider notification of an arrest by police authorities as adequate. In many cases the initial information on the arrest case came from outside sources such as friends or relatives rather than from local authorities. Once notification has been received, however, the gaining of consular access to the arrested American is usually no longer a problem. Conditions of communication and or transportation, however, can be an obstacle, particularly in the many cases where the arrest takes place several hundred miles from the nearest consular office. In these instances initial contact with the arrested citizen is made by telephone and a consular officer visits as soon thereafter as practical.

In our last report, the Department also noted that the Mexican Government was understood to be in the process of revising its law to extend parole to drug offenders on the same basis as other convicts. The parole bill, however, was not reported out of committee prior to the adjournment of the Mexican Congress on December 31. We understand that the parole legislation may be reconsidered when the Mexican Congress reconvenes in September.

On the more positive side, the United States and Mexico have concluded successful negotiations on a treaty which will permit a national of the United States or Mexico convicted of a crime in the other country to serve his sentence in a penal facility located in his own country. The Treaty on the Execution of Penal Sentences was formally signed in Mexico City on November 25, 1976 and ratified by the Mexican Senate on December 31, 1976. The Treaty was transmitted to the United States Senate for its advice and consent to ratification on February 15. Implementing legislation which is currently being drafted by the Department of Justice must also be enacted before the Treaty can go into force. We are hopeful that, when ratified, the Treaty will help to alleviate the long range problem of large numbers of Americans serving extended sentences in Mexico.

During the period covered by this report a new Mexican administration has assumed office and we have discussed the problem with newly installed officials. President Lopez Portillo is, of course, aware of the problem and, as you know, alluded to it in his address to the House of Representatives during his recent State Visit to Washington. We are hopeful that our continuing discussion of the plight of U.S. citizens arrested in Mexico with the new Mexican Government officials will lead to rapid improvement.

Sincerely,

CYRUS VANCE.

[From the Washington Post, Mar. 19, 1977]

BOLIVIA MISTREATS JAILED AMERICANS

(By Jack Anderson and Les Whitten)

Three months ago, we described the plight of 35 Americans who are languishing in grim, rat-infested Bolivian prisons, uncertain when they wil get out. Some have been held for years, without trial, on suspicion of possessing marijuana or cocaine.

They can thank their own government for their misfortune. They were dumped in jail as a direct result of U.S. pressure upon Bolivia to crack down on drug violators. The Justice Department even sent an attorney to help the Bolivians draft a tough drug law.

The U.S. government is also subsidizing the police who arrested the Americans. No less than $4 million of the American taxpayers' money has been pledged to the Bolivian drug enforcement program.

This $4 million bequest hasn't noticeably softened the hearts of the Bolivian police toward their American prisoners. At least five young Americans have written home about police brutality. One complained that the police beat him with a rubber hose. Another wrote that he had been beaten and then threatened with execution before a firing squad at sunrise. A long-haired youth was dragged across the prison courtyard by his ponytail.

Most of the prisoners have complained bitterly about sanitary conditions. The prisons are infested with rats and cockroaches. The food and water have caused dysentery, intestinal infection and hepatitis.

One prisoner almost died, according to his parents, of hepatitis. Another lost 70 pounds in prison as a result of an intestinal infection. Yet the prison authorities refused him treatment for nearly a year. Another man would have received no medical treatment for flu and malaria except for the kindly intervention of a priest.

But it is the uncertainty that has caused the most anguish. Most of the Americans were arrested for possessing no more than a pinch or two of marijuana or cocaine. Some pleaded innocence, claiming they just happened to attend a party where pot was smoked.

Yet they have been stuck in the slammer for months, some as long as three years, without a trial. Their parents have hired Bolivian lawyers who have collected fat fees but accomplished nothing.

The parents have also complained to us that the U.S. embassy in La Paz seemed more concerned about the sensibilities of the Bolivian authorities than the suffering of the imprisoned Americans.

After we wrote about their sad situation, the State Department dispatched a special team to Bolivia to investigate. The investigators visited the Americans in prison, with the full cooperation of the Bolivian government. Their report is still in the drafting stage, but we can disclose the main findings:

The State Department confirmed that most of the American prisoners have been denied due legal process. This is regarded as a "flagrant violation" of their human rights. The Bolivian judges have deliberately held up the trials, however, to spare the Americans harsh sentences under the existing law. The judges are waiting hopefully for the law to be modified.

The investigative team also confirmed that Americans have been mistreated in Bolivian prisons. Not all the complaints about beatings and brutality could be verified, although the report about one youth being dragged by the hair was affirmed. But the investigators concluded that the Americans were treated no worse than Bolivian prisoners in the same circumstances.

There is also no question that sanitary conditions are substandard in the Bolivian prisons. The investigators actually saw the rats and cockroaches with their own eyes. As a result, many prisoners have had health problems. But again, the American prisoners are no worse off than their Bolivian cellmates.

The State Department agrees that most of the Americans were arrested for simple possession. But a few of the prisoners apparently were drug traffickers. One was caught with 50 pounds of cocaine in his suitcase.

Belatedly, the State Department has now moved to protect the basic rights of the jailed Americans. The department has even cautioned the Bolivian authorities delicately that U.S. aid could be withdrawn if the human rights of the prisoners are violated. The U.S. embassy has also been authorized to retain a Bolivian attorney to give legal advice on the prisoner problem.

SENATE SMALL BUSINESS COMMITTEE

Mr. NELSON. Mr. President, I wish to announce the following subcommittees for the Senate Small Business Committee:

Subcommittee on Monopoly and Anticompetitive Activities: Senator Nelson, Chairman; Senator Haskell and Senator Weicker.

Subcommittee on Government Regulation and Small Business Advocacy: Senator McIntyre, Chairman; Senator Nunn and Senator Bartlett.

Subcommittee on Economic Development, Marketing, and the Family Farmer: Senator Nunn, Chairman; Senator Hathaway and Senator Packwood.

Subcommittee on Government Procurement: Senator Hathaway, Chairman; Senator Culver and Senator Packwood.

Subcommittee on Financing, Investment and Taxation: Senator Haskell, Chairman; Senator Nelson and Senator Bartlett.

Subcommittee on The Future of Small Business: Senator Culver, Chairman; Senator McIntyre and Senator Weicker.

The chairman and the ranking minority member of the full committee are members ex officio of all subcommittees.

SPEECH BY MR. GEORGE MEANY IN ACCEPTANCE OF THE 1977 EUGENE V. DEBS AWARD

Mr. ROBERT C. BYRD. Mr. President, it was my pleasure, in company with scores of the leaders of American labor and several of my colleagues from Congress, to be present last night for the George Meany Testimonial Dinner held at the Shoreham Americana Hotel here in Washington. On this occasion, Mr. Meany was presented with the 1977 Eugene V. Debs Award in recognition of his lifelong efforts in behalf of the American labor movement and the enormous contributions that he has made to the social and economic progress of the American worker.

George Meany is one of the American labor giants of all time. He began his labor career in 1910 when he became an apprentice plumber in New York City. Since that time, 67 years ago George Meany has risen through the ranks of his own occupation to become one of the leading spokesmen for labor around the world.

Mr. Meany has never lost touch with his origins as a skilled worker or with the men and women who have turned to him again and again for leadership. As a result, he has given voice to the aspirations and ideals of millions of people in this Nation whose talents, energy, craftsmanship, and discipline have helped to make this country the leading economic and industrial power of the world.

The commitments of George Meany have gone beyond just economic concerns, however. He has been a dedicated American patriot who has wisely balanced the just goals of American labor with the well-being of the whole country. He believe deeply in America and has supported the concept of a strong national defense program. He has also given himself to the cause of social and economic justice for all Americans, not just the members of his own union. When historians record the names of those men and women who have helped shape the destiny of this Nation in this generation, George Meany's name will be high on their list.

In response to receiving the Eugene V. Debs Award, Mr. Meany gave a clear and succinct statement of his vision of the role of the labor movement in modern America. His speech is a resounding affirmation of the values of American democracy and our way of life.

Mr. President, I ask unanimous consent that the inscription on the Eugene V. Debs Award, together with Mr. Meany's speech, be printed in the RECORD.

There being no objection, the inscription and the speech were ordered to be printed in the RECORD, as follows:

INSCRIPTION

GEORGE MEANY

For nearly a quarter of a century, one man has towered over the united American labor movement, guiding its development into the strongest organization of free workers in the world.

The authentic and outspoken voice of American workers, George Meany has never subordinated their fundamental interests to other claims, rightly insisting that the economic and social progress of workers is the bedrock of the national welfare.

No man in our time has stood so firmly and effectively for the universality of the democratic idea and its inalienable connection with free trade unionism; and no man has in consequence so richly earned the enmity of all totalitarians, "left" and "right" alike.

For George Meany, economic prosperity, social justice, and expanding human rights are the inseparable and mutually reinforcing elements of the good society for which countless millions struggle the world over.

Because this is our vision as well, and because he has done so much to help fulfill Debs' hope for the American worker.

Social Democrats, U.S.A. proudly presents its 1977 Eugene Victor Debs Award to George Meany, March 31, 1977.

ADDRESS BY MR. MEANY

I am delighted to be here and to accept your 1977 Eugene V. Debs Award.

I see here many old friends and familiar faces—veterans of many battles, some lost, some won, most unfinished. I see a lot of people who wear different hats on different days of the week.

Take Bayard Rustin, for example. On one day, I run into him as president of the Randolph Institute. On another day, he is organizing the Black Americans in support of Israel Committee. On still another day, he is chairman of the executive committee of the leadership Conference on Civil Rights. And now, of course, I see him as chairman of Social Democrats, U.S.A.

I think this is a tribute not only to Bayard's many talents but also to the broad-ranging interests of this organization, whose members are active in so many of the struggles for economic and social justice in which the trade union movement also has a profound interest.

A lot has changed since Gene Debs passed from the American scene. A lot has changed in American life and industry. A lot has changed in the American labor movement. Many of the programs that Debs' old Socialist movement advocated have since become part of American life. And, of course, many of that movement's old dogmas have been rightly discarded by Debs' modern descendants.

For my money, all of these changes have been for the better. Of course, there are some people who don't seem to think so. They don't see progress in the American trade union movement in the last half century or so—only deterioration. They miss the rhetoric of class struggle, the clarion calls for the general strike, the bloody clashes with the police or national guard—usually observed from a safe distance. The militance of such people is sort of disembodied—it bears no relation to the actual conditions and concerns of workers at any given time. It is a fashion for all seasons.

When we think of Debs the trade unionist, we think of the Pullman strike of 1894—the so-called Debs rebellion. It was a great strike. The issues could not have been clearer. The company could not have been more morally wrong; the workers could not have been more militantly right. It was a tremendous, dramatic, classic labor struggle. It had only one drawback: The strike was smashed. The workers lost.

They did not lose for lack of charismatic leadership. Debs had charisma enough. He was also a prudent man, who really worked to avoid the strike.

No, the workers lost because of the overwhelming power of the forces arrayed against them—a rich and brutal company, a hostile president, a trigger-happy national guard, a private army of goons plus public indifference. Against these forces, the workers were too weak and poorly organized to prevail.

Now, I suppose there are areas in this country where this kind of power imbalance still exists, where the alignment of forces is so favorable to management and so hostile to organized workers that union victories are few and far between. And, of course, it is still true that the labor movement as a whole has hardly achieved equality of power with the big corporations.

Nonetheless, there has been—overall, a fundamental and, I believe, lasting shift in the alignment of forces as between labor and capital. It is a shift that would have pleased, though not, of course, satisfied Debs. In any case it is a shift that has had a profound impact on American society.

The American worker today gets more respect on the shop floor than any worker in the world. He is not locked into the kind of class system that exists in much of the old world and demands a deferential attitude on the part of the worker toward his so-called "betters."

Nor need an American worker feel that the government is completely stacked against him—as once seemed the case. Big business still exercises more than its fair share of influence over government policy, but we have a say, too—and we have more and more to say. And because we have more to say, the American people are better off.

So, the trade union movement has come a long way since Debs. Sometimes, we forget how far. Take, for example, the question of civil rights.

As late as 1893, Debs' own union, the American Railway Union, had a constitutional provision restricting membership to "whites only." Debs himself tended to the view that black workers had no special or distinct problems that needed to be specifically addressed. All the problems of black Americans, he thought, would be solved as part of the class struggle of the working class as a whole against the bosses.

We've come a long way from this view. Of course, the "whites only" clauses have been eliminated from just about all union constitutions. But more than that, we have recognized that black Americans do have special problems, the result of their unique history in America, and that their problems must be addressed directly. And we have learned that it's not enough to tear down the racial barriers—in unions or anywhere else. We need to provide training and education and other forms of assistance to insure that equality of opportunity is not a hollow phrase.

That's why we have a civil rights department in the AFL-CIO. That's why we have outreach programs. That's why we work with the Randolph Institute, the recruitment and training program, the Urban League. That's why we backed the NAACP when it was in trouble. That's why we have marshalled all of our forces on capitol hill on behalf of civil rights and other social legislation designed to improve the lot of minorities and the poor.

That's why we will not accept the miserable proposal of the administration for a shamefully inadequate minimum wage.

Nor will we accept its proposal to permanently lock the Nation's minimum wage workers below the poverty level.

Eugene Debs is famous for having said "while there's a lower class, I am of it . . ." Debs was a deeply compassionate man and I understand what he meant. But I don't believe anybody should be part of the lower classes. I think the so-called lower classes should be abolished. There is no virtue in poverty or social inferiority.

So when some of our critics say that we have made workers middle class, I say: Thanks for the compliment. We haven't made enough workers middle class—but we're working on it. And when we succeed in that goal, then in the tradition of Gompers who said "more", we'll aim to make workers upper class.

I guess this is the point where the tradition of Gompers and the tradition of Debs come together—for if workers become upper class, there can't be much of a class society. And that is a goal we share—A society in which people are not divided by false distinctions of wealth and privilege.

Take another example of the progress we have made as a trade union movement. Certainly, one of Debs' valid criticisms of the old AFL was that it was not sufficiently involved in politics. Of course, Debs had in mind a specific political program that would have tied the labor movement to the Socialist Party or to some kind of labor party. Neither has proven viable in the United States, although some diehards refuse to recognize that reality.

Nonetheless, the American trade union movement today is more deeply involved in politics than its most politically-oriented critics could have believed possible a few decades ago. Our committee on political education is the single most effective political machine in the country. Certainly, in terms of involving people in electoral activity, it is far more effective than either the Democratic or Republican Party apparatus.

In the final analysis, this is not a machine based on money. We can't compete with the big corporations in that field. Our machine is based on people—on our ability to turn out tens of thousands of people to work for pro-labor candidates. It is a people's machine.

And our legislative operation is truly a people's lobby. It doesn't work only for trade unions objectives, in a narrow sense. It works for consumers, for the unemployed, for the elderly, for the handicapped. Our trade union movement is involved in every issue that affects the daily lives of working people—housing, education, health care, energy, the environment—you name it.

I don't know whether this is "pure and simple unionism" or "business unionism" or "social unionism" or "political unionism." None of these labels tell the true story of what the trade union movement is today. One thing is for sure: It is a more sophisticated, effective, broad-based, democratic, and involved movement today than it was ten, twenty, or thirty years ago, let alone in the days of Gene Debs. And it faces more difficult and complex challenges.

One of these challenges did not really exist in the days of Debs. I refer to the spread of totalitarianism on the world stage. Totalitarianism, as we know it today did not exist in Debs' time. There were tyrants and despots, to be sure, but not these modern, all-powerful States machines that exercise total control over social life and demand the unquestioning allegiance of the individual. Such systems did not emerge until the rise of fascism and communism.

Totalitarianism is, of course, a threat to all elements of a democratic society. But we know from experience that the first institution to be crushed in a totalitarian takeover is the trade union movement.

For this reason, we have a tremendous stake in the extension of the democratic system and the securing of human rights wherever possible. Notice, I said the Extension of the democratic system—not merely its preservation. I do not say this because I propose a military rollback of totalitarian power but because it is a fact that free workers cannot safely coexist with slave labor.

We couldn't do it in the United States a hundred years ago in a relatively democratic political framework. It is unlikely we can do it in a world constantly shrinking, thanks to technology. Any realistic, long-term prospects for peace in the world must look to the dismantling, by non-nuclear means, of the worldwide totalitarian system.

There is no easy way to achieve this goal while avoiding nuclear annihilation. Certainly, we need time—time in which to mobilize world opinion on human rights, as President Carter has begun to do—and we strongly support that effort. We need time to revive and revitalize the economies of the Western World. We need time to design realistic and effective programs to help third world countries to develop democratic institutions and climb out of centuries of backwardness.

To buy that time, we need to maintain a military capacity that will not only deter a direct attack on the United States but also discourage dangerously aggressive political and diplomatic behavior by what we now call our potential adversaries in other parts of the world.

There is no doubt but that democracy is now on the defensive in the world. American workers have a vital stake in reversing this trend. This is one of the great challenges we face in the remainder of this century.

Yes, we have come a long, long way since Debs' day. Many of his ideas did not stand the test of time and have fallen by the wayside. Many of his visions for the labor movement have been fulfilled, even if not in ways he expected. Much more remains to be done on the road to achieving a more democratic, a more just, and a more egalitarian society.

I know that this is the goal to which Social Democrats, U.S.A., has dedicated itself. It is also the goal of the American labor movement. It is in the spirit of this common dedication that I am honored to receive this award.

CONCEPT OF THE CITIZEN LEGISLATOR

Mr. WALLOP. Mr. President, the distinguished minority leader, Senator Baker, has eloquently expressed the need for America to contemplate the benefits of returning to the concept of the citizen legislator. The greatest artists step back from their canvas from time to time to view it in totality. By keeping our noses too close to the national canvas, we lose perspective.

Historically, our canvas has been colored by citizen painters; natural colors if you will. Now for 20 years we have been filling it in with the colors of full-time professional legislators and staff, not citizen legislators and constituents.

The colors are dull and contrived. The harmony and vibrancy of renewed perspectives lost. Mr. President, the picture is blurred now. The fine lines of history smudged by too much paint.

The Congress has usurped much local prerogative, taken too much of the Nation's legislative load unto itself. In so doing, we have increased the legislative load and decreased the efficiency of Congress.

The result is that instead of those who have been elected to hold the brush, unelected painters are at work on our national canvas. Those who have been elected have lost touch with those who view the work and provide the variety of color. We can no longer freshen our canvas by renewing our perspectives. It is not part of the present concept. The blurring will accelerate, and our painting become more abstract, less relevant. The longer we fail to step back and assess our work, the more difficult the restoration of perspective becomes.

We can renew contact by design, as Senator BAKER suggests, if we adopt a limited session. We can renew it by collective recognition of the value of increased stimulation provided by constituent contact. As a body we know too little of the effects of our activity on individual lives and the productive sector of society.

Only by having this our purpose can we resist the pressures to become over-involved. More of the specific judgments of the Congress will be made by elected Members than by the unelected forces which support an over-involved Congress.

Mr. President, the Senate, the people must contemplate the essence of the distinguished miniorty leader's expressed philosophy. It is in the national interest that we step back, look at our work, to see if the natural color cannot be restored.

It is to date the world's greatest canvas. Dare we spoil it by claims that the search for color has become too demanding to look for it at home.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A VOTE FOR THE BAKER PLAN

Senator Howard Baker of Tennessee has a plan for solving a lot of public image problems for the Senate all at once.

He suggests that the august body be restricted to meeting only six to seven months a year. That way Senators could justly be permitted to earn outside income, since they would need to support themselves. Their pay could be cut accordingly which would please those legions who were up in arms over the congressional pay increases. The Senators would spend more time with their constituencies, finding out more about the concerns of the folk back home.

In other words, a citizen legislature, closer to the people and the land and not so much exposed to the temptations of Washington, would be restored. And we might add another point in favor of the Senator's idea: It might cut down on the number of laws passed each year.

BALANCED AUTO EMISSIONS STANDARDS: THE RIEGLE-GRIFFIN AMENDMENT

Mr. RIEGLE. Mr. President, I am placing in the RECORD today a detailed rationale supporting the schedule of clean air automobile emission control standards contained in S. 919, the Riegle-Griffin Mobile Source Emission Control Amendments of 1977.

Our bill—sponsored in the House by Representatives JOHN DINGELL and JAMES BROYHILL and over 80 cosponsors—presents what we believe are reasonable, balanced and achievable motor vehicle pollution control levels for the Clean Air Act. Our maximum concern in our advocacy of these control levels is the issue of timing: Providing standards that will provide cleaner air while at the same time permitting cars to reach the stringent fuel economy levels mandated by the Energy Policy and Conservation Act of 1975. Important to this timing factor is that emission control technology be in place and available to manufacturers, technology that will not drive the cost of purchase and maintenance for consumers beyond affordable prices.

We believe that the following schedule and timetable of emission standards, and rationale for these standards, will insure the best balance possible to achieve environmental, economic, energy conservation, and public health goals. Supporting us in this effort are the United Auto Workers; the AFL–CIO; automobile manufacturers, dealers, suppliers, and distributors; parts manufacturers, retailers, and suppliers; repair garages; and numerous transportation and automobile associations, investment houses, and air, water, and ground carriers.

I ask unanimous consent to have printed in the RECORD the rationale for our legislation.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

RATIONALE FOR AUTOMOBILE EMISSION CONTROL STANDARDS IN THE DINGELL-BROYHILL (H.R. 4444) AND RIEGLE-GRIFFIN (S. 919) MOBILE SOURCE EMISSION CONTROL AMENDMENTS OF 1977 TO THE CLEAN AIR ACT OF 1970

	gpm
Hydrocarbons HC	
1978–79	1.5
1980–81	0.41
1982 and thereafter	0.41
Carbon monoxide CO	
1978–79	15.0
1980–81	9.0
1982 and thereafter	9.0
Oxides of Nitrogen NO_x	
1978–79	2.0
1980–81	2.0
1982 and thereafter	1.0–2.0

1978–79 STANDARDS

Each of the auto emission schedules approved in legislation during the 94th Congress by the Senate, the House, and the Conference Committee provided for standards of 1.5/15/2.0 for 1978 models. Congress recognized in the 1976 Conference Amendments to the Clean Air Act that the statutory standards required by the current law for 1978 models were unnecessarily stringent and infeasible. Both government agencies and the motor vehicle manufacturers reasonably assumed that the emission standards for 1978, as agreed to by the Conference Committee, would become the applicable emissions standards when the Clean Air Act Amendments were passed by the 95th Congress.

With respect to 1979 standards, the year-long certification process for the 1979 models will begin in mid-summer of 1977—just three months away. All the lead-time problems which faced the industry for upcoming 1978 models are almost upon the industry for 1979 models. Therefore, the public interest, business and labor will best be served by an extension of the 1977 standards through the 1979 model year. Also, keeping standards of 1.5/15/2.0 for 1979 would allow the nation to continue to maximize fuel economy gains. It is essential that the standards be set for at least two year intervals to ensure certainty in the manufacturing cycle.

1980–81 STANDARDS

Autos already have made major contributions towards obtaining clean air goals. As older cars are replaced with new, cleaner burning cars, the pollution clean up by autos rapidly progresses.

Beyond 1979, as the domestic and foreign manufacturers have recently testified at Congressional hearings, the disadvantages in meeting excessively stringent standards include fuel economy penalties, higher costs to the consumer (increased equipment and maintenance costs), and at least initially, poorer driveability of and performance and reduced model availability. The impact of these disadvantages, which would result if auto emission standards were too stringent or tighter than the Dingell-Broyhill Riegle-Griffin standards, must be weighed against the fact that analytical data available shows there also would be statistically insignificant improvements in the nation's ambient air quality Congress has previously agreed that the statutory standards must be changed. New standards must truly be cost-beneficial and implemented at the proper time when advanced automotive emission control technology is available.

For 1980 and subsequent models, hydro-

carbons (HC) will be controlled at the .41 gpm level called for by current law. The Federal Motor Vehicle Goals Study, or "300 Day Study," shows that it would make very little difference in air quality gains to wait the year or two it would take to integrate technology which would alleviate the fuel economy penalty in moving to more stringent hydrocarbon control. However, of the three pollutants, automotive hydrocarbon emissions are strongly implicated in smog formation; and if any clean-up should be accelerated, it is agreed that hydrocarbon control should be given the priority, as it is in the Dingel-Broyhill/Riegle-Griffin bills.

The carbon monoxide (CO) standard for 1980 and subsequent models should be 9.0 grams/mile. The recent "300 Day Study" of the Department of Transportation shows that air quality goals can be met and exceeded with this standard, and that minimal improvement would result from the statutory 3.4 gpm standard. For example, as compared with 1971-73, projected 1990 air concentration levels of CO would be 80 percent lower with a 9.0 grams/mile standard, or 83 percent lower with a 3.4 grams/mile standard. On the other hand, imposing the lower standard would put a particular burden on cars with small engines, and those are the ones that will be needed to achieve desired fuel economy goals. It should also be noted that use of a more stringent standard is not an effective way to solve the problem of cars which are not properly maintained in use, and thus emit high CO levels.

The 9 grams per mile carbon monoxide standard reflects recent evidence that today's California carbon monoxide standard of 9 gpm, which has been adopted by the California Air Resources Board for the long term, is more than adequate to protect public health. This is significant, because this CO level permits the operation of three-way catalyst technology to achieve low NO_x levels while still providing more fuel-efficient operation.

1982 AND THEREAFTER STANDARDS

With regard to NO_x, the ultimate level which represents the best tradeoff between fuel economy and air quality will fall within the 1 to 2 gram per mile range. Not enough is known at this point to specify the precise standard. Therefore, the Administrator of EPA would be given the authority to adjust the standard within this range. There is substantial argument over what level of NO_x control is needed for public health reasons. When vehicles are controlled to levels as stringent as 2 grams per mile NO_x, as they are today, stationary sources become the major NO_x emitters. The Motor Vehicle Goals or "300 Day Study" identified five strategies to control NO_x in the atmosphere, each of which would be more cost-effective than reducing auto emissions below 2 grams per mile.

There are many unsettled questions regarding the control of oxides of nitrogen (NO_x). Recent technological developments (such as those used by Volvo) indicate that the recommended level of 1.0 grams/mile can be achieved, but considerable additional work is needed if that technology is ever to be made sufficiently applicable to a wide range of cars. In fact, there is some question whether that standard will actually be needed to protect public health. Therefore, the EPA Administrator should be given authority to revise the NO_x standard, up to 2.0 grams/mile, unless he determines that would endanger public health.

NO_x control also presents special problems for many engines, such as diesels, which can help conserve energy. Thus, the identical Dingell-Broyhill/Riegle-Griffin bills propose that the EPA Administrator could permit a NO_x level up to 2.0 grams/mile for specific categories of cars if that is necessary for them to achieve substantial energy savings. Here again, the higher NO_x level would not be permitted if the Administrator determines that would endanger public health.

EUGENE V. DEBS AWARD

Mr. ROBERT C. BYRD. Mr. President, our esteemed colleague, Senator MOYNIHAN, delivered a speech last evening at the George Meany testimonial dinner, upon which occasion Mr. Meany received the 1977 Eugene V. Debs Award. Senator MOYNIHAN's speech was exceptionally well received, and his delivery was, as usual, superb. In order that our colleagues may have the benefit of the contents of Senator MOYNIHAN's address, I ask unanimous consent that the transcript of Senator MOYNIHAN's speech be printed in the RECORD.

There being no objection, the transcript was ordered to be printed in the RECORD as follows:

ADDRESS BY SENATOR DANIEL PATRICK MOYNIHAN

The distinguished members of this audience will permit a displaced professor some remarks on the momentous reunion of two great intellectual and political traditions that occurs here tonight, two traditions which despite many common values have but rarely shared a common ground in American politics. One does not exaggerate in stating that among the most promising trends of the past decade in our sometimes unhappy public life has been the revival of a sense of shared concern, common origins, and mutual respect between these two important schools of our politics and thought.

In Bayard Rustin, Carl Gershman, and Sidney Hook we have the heirs to Morris Hillquit, Victor Berger, Eugene Debs, Norman Thomas, John Dewey—American social democrats who never wavered from the conviction that socialism was above all else a philosophy which sought a broader application of the American ideals of democracy.

In George Meany, I. W. Abel, and Lloyd McBride—Lloyd McBride whose recent election so brillantly confirmed the good sense of American working people and the authenticity of America's labor leadership--we have the heirs to the tradition of Samuel Gompers, William Green, Philip Murray, and a host of other leaders in the day-to-day struggle to improve the lives of working men and women.

(We all welcome Lloyd McBride on this occasion, and I particularly welcome him. I am trying to get used to having a President of the United States who received his commission in the Navy a year *after* I did. At least we have a President of the Steelworkers who joined that union seven years before me, even if he was twenty and I was sixteen on the respective occasions. It's the first trade union I ever did join—out at the National Can Company in Long Island City. It had great leadership then and it has great leadership still.)

These two traditions, at the turn of this century—so long ago, it seems—confronted one another in an intense but remarkably honest and creative debate. The Socialists argued that American labor should found its own political party and dedicate itself to a long-term effort to build a new society. But Gompers, his colleague, Peter McGuire, and the early American Federation of Labor chose otherwise.

In a speech some of you may have heard me give during last year's primary campaign in New York, I described the choice, and its gradual acceptance by the rest of American society as a "social contract." A social contract which has been the basis of social stability and progress for much of the modern era of American democracy. Its terms were simple and direct:

First, labor would not "seek to transform the American economic system by posing an alternative system."

Second, labor would not "seek to transform the American political system by founding its own political party."

But, third, in return, the labor movement would not only be permitted but would be encouraged to seek to gain within the American system so constituted a broad range of material and social benefits for the people it represented.

One would search long and hard through the political history of this century to find a broad social agreement that has been so honorably and scrupulously upheld as American labor's adherence to that social contract

Labor's choice was right. The political and economic stability which that agreement fostered, and the gains won by labor under it, in turn brought unequaled well-being, dignity, and position to American workers. Perhaps the greatest testimonial to the soundness of Sam Gompers' choice today comes from the children of his brilliant adversaries—from you the Social Democrats, U.S.A. You have at the end put aside your call for a separate party of labor and socialism. You have broken out of the confining dogmatism that economic democracy can only be achieved through the drastic imposition of an alternative system of economic organization. And, yet you have come to these decisions without any corruption or abandonment of your deepest ideals—a point to which I shall return.

But first—how have the other sectors of American society met their responsibilities under labor's social contract? Have they understood it? Have they cherished it and abided by it?

In most places, at most times, the record has not been so bad. But there is something in the air today that should cause us concern.

It could be detected on Capitol Hill last week when the House voted down the Common Situs Picketing Bill. It was noticeable in the atmosphere surrounding the Administration's decision as to the proper increase to propose in the minimum wage. It is not just a phenomenon of Washington. It could be sensed, for example, in New York when discussions about union rights under the new financial plan for the City were going on. It was even present in our Democratic Party at its 1974 mid-term convention

The ground on which we have stood is shaking. We can, all of us, sense the tremors of bad faith, of withdrawn consent, of weakened commitment and of yet more weakened understanding which threaten the very social contract between capital and labor which has persisted into this last quarter of this century, and which has been the near constitutional source of so much of what we have achieved.

Whence this subterranean convulsion which we begin to sense? I believe its nature is clear enough. The plain success of the American labor movement has brought about a massive defection of the much enlarged ranks of those ever present ideologues and opportunists who support the labor movement from the outside on condition that they may lead it from the outside, or as they would see it, from above They know what is best for labor and judge the quality of a labor leader by his or her willingness to be led. By them, of course

This is normal. What is not normal is that the disaffection of this cadre is threatening our understanding of the great social contract on which so much depends

Thus, a week ago when the Common Situs Picketing Bill failed an editorial in a leading American newspaper commented " or-

ganized labor is seen as motivated by self-interest, rather than broader public interest". (The journal was describing the attitude, not necessarily endorsing it, and the description was not inaccurate.) Elsewhere an important union official argued that labor should put legislation that is "in the best interest of the whole country" ahead of such narrow *union* interests. He did not see—fewer and fewer are able to see—that by the terms of our social contract labor is expected to concentrate its efforts on the particular and the specific well-being of union members. This is practically the condition of our system of a free economy and a limited state.

I for one hope that labor will continue to press forward on behalf of the specific interests of its members. I believe that a labor movement doing just that is engaged in one of the most constructive and democratic undertakings the world has seen. I do not know whether it would be more reactionary or more revolutionary to deny labor this role, but I do know our public life would never again be the same if such an effort should succeed.

Those who sneer at labor's efforts to satisfy its own institutional self-interests not only fail to realize how valid and important those interests usually are in themselves, but they also overlook the degree to which the prosperity and stability of our nation depends on labor's willingness to concentrate energy on such objectives.

Do those who look askance at legislation such as the Common Situs Picketing Bill *really* want labor to forsake such limited, bread-and-butter goals? There are some—who think of themselves as the Left—who surely do. They want labor to abandon the social contract of Gompers and McGuire, and to launch into the sort of ideological and political warfare that prevails in so much of the world.

There are also those on the right who believe that labor should give up the old demand for "more", and proclaim that it now has "enough". In this view, labor has achieved its goals, and now should restore all powers of social and economic decision-making to their rightful proprietors—to the corporations, the foundations, the editorialists, and certain right-thinking government officials. Either way the grand social contract is dissolved.

Both the Left—the false Left—and the right would dissolve the contract. Neither is comfortable when labor holds a respected place at the table, speaks with its own voice, conducts its own negotiations, and makes its own demands. Both want labor to renounce its "selfish", "narrow" interests, and to dedicate itself to the broader public good—*as those outside the labor movement will define it.*

In truth it has been a long time indeed since American labor asked for very much for itself. Go over the COPE score card—it is a list of votes which do concern unions and union members, but you find little there that can be said only to represent the direct institutional interests of labor unions themselves. What you *will* find is tax reform, health security, civil rights, urban redevelopment, international trade, voter registration. There is *very little* which benefits unions directly, and unions only. Yet still the critics on the Left and on the Right are not satisfied.

One has the feeling that we may be on the threshold of a certain crisis in relations between American Labor and the wider society, a crisis which, however, we have every prospect of surmounting. I have a sense that the social contract is coming up for renegotiation, and as I would hope reaffirmation. And I think it is the time that this society offered a new package to American Labor—one that will reaffirm and renew our social contract. After all, it has been the best labor contract any society has ever had.

Such a package should have as its proclaimed purpose doing away with the variety of legal and procedural obstacles which now impede the growth and effectiveness of the American labor movement. I will not attempt to outline in full what I think such a package should include—but high on the list should be the program for Labor Law Reform set forward by the AFL–CIO Executive Council at its meeting last February.

The National Labor Relations Board should be strengthened, and its procedures streamlined so that workers seeking union representation are not subject to procedural harassment and discouraging delays.

Employers who violate the labor law should face penalties equal to those which are awarded to unions in such cases.

Agricultural workers should receive all the collective bargaining rights provided to other workers under the National Labor Relations Act.

And surely the time has come to enact a federal prohibition against state laws which deny workers the opportunity to seek union security clauses in their contracts. The so called "right-to-work" is a patent deception. A fundamental premise of industrial democracy is that all who benefit from a collective bargaining agreement should share in the cost of achieving and maintaining it. It is time to begin a massive campaign for the repeal of Section 14–b of the Taft-Hartley Act.

What the Voting Rights Act was to the minority of blacks in the South, the repeal of 14-b would be to the majority of workers—black and white alike. Very simply, they would get back economic rights which have just as surely been denied them as were voting rights.

This last point brings me back to the great contribution of the Social Democrats, U.S.A. Unlike so many who profess to be pro-labor, the Social Democrats have had the wisdom and intellectual integrity to learn from the real experience of the trade union movement. And now it is time for them to teach what they have learned.

Your insight has been that the particular practical, bread-and-butter successes of the American labor movement have not been won at the expense of "the best interests of the whole country", that indeed they have contributed in a major way to the interests of the public-at-large. Your understanding of this truth makes you crucial allies for example, in labor's campaign against right-to-work.

You can explain why the growth of stable unionism in the South will provide major benefits to American blacks. You can argue that industries which evade their responsibilities to their employees will in the end bring trouble to the South, just as they have left trouble behind them in the North. You can point out how free enterprise and competition—which modern social democrats no longer categorically oppose—are subverted when unfair labor laws turn businesses from trying to produce better products more efficiently to trying to find groups of workers who are more vulnerable to exploitation.

The Social Democrats, U.S.A., now accept that the social contract its predecessors disputed a half century ago was no sweetheart contract. The American labor movement has worked under that contract, as the old radical phrase put it, "to build a new society in the womb of the old". It is no exaggeration to say that some major steps toward social democracy have already been achieved in this country. It is time that truth were told to a skeptical world. It is time our own people understood how the misunderstood particularism of American Labor has brought not only benefits that are universal in our society, but has demonstrated truths which are surely international in their implication.

(This concludes additional statements submitted by Senators today.)

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. The time for morning business has expired.

OFFICIAL CONDUCT AMENDMENTS OF 1977

The PRESIDING OFFICER. Under the previous order, the hour of 9:45 a.m. having arrived, the Senate will now resume consideration of the pending business, Senate Resolution 110, which the clerk will state by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 110) to establish a Code of Official Conduct for the Members, officers, and employees of the U.S. Senate; and for other purposes.

The PRESIDING OFFICER. Under the previous order, the Senator from Tennessee (Mr. BAKER) is recognized to call up his amendment on which there shall be 1 hour of debate, with the time to be equally divded and controlled between the majority and minority leaders or their designees. Any amendment to the Baker amendment can only be offered after the first half-hour of the hour on the Baker amendment, with the vote on any such amendment or tabling motion to occur at the end of that hour.

AMENDMENT NO. 164 (AS MODIFIED)

Mr. BAKER. Mr. President, I call up my amendment No. 164, as modified.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER) proposes an amendment numbered 164, as modified:

On page 55, line 23, insert the following:

SEC. 311. (a) The Senate Code of Official Conduct shall cease to be effective on March 1, 1981.

(b) On or before March 1, 1980, the Select Committee on Ethics shall report to the Senate its recommendations with respect to whether the Senate Code of Official Conduct, or any part thereof, shall be continued, or modified and continued as modified.

Mr. BAKER. Mr. President, I yield myself such time as I may utilize.

Mr. President, for 2 weeks now, the attention of the Senate has been devoted to the consideration of Senate Resolution 110, the Senate Code of Official Conduct, more commonly called the ethics code. While I am fully cognizant of, and sensitive to, the necessity for consideration of this resolution, I am compelled to remark, Mr. President, that I have approached this subject with a deep and abiding sense of regret.

Obviously, I regret the need or necessity for even considering a resolution prescribing the ethics of elected officials, connoting as it does that we can legislatively regulate the ethics or morals of anyone. Obviously, we cannot. What we can do is inhibit, through the continual threat of disclosure, the actions of those few for whom the holding of a public trust is not, in and of itself, sufficient inhibition.

For that reason, I have supported this resolution, Mr. President; and I shall vote in favor of it on final passage later

this morning. However, before we reach that vote, Mr. President, I would ask that my colleagues turn their attention to yet one more amendment, which adds a sunset provision to the Senate Code of Official Conduct.

The amendment is quite simple. It terminates the provisions of Senate Resolution 110 on the 1st of March 1981; and it requires the Ethics Committee to submit to the Senate no later than the 1st of March 1980, its recommendations concerning those provisions of the code that should be continued, or modified and continued as modified.

This amendment will allow us to address at a later time and in a deliberate manner my concern that the Congress is headed in the wrong direction—toward an institutionalized bureaucracy. That, Mr. President, is the problem; and what we have been addressing for the past 2 weeks is merely a symptom of the problem. I believe that the time has come for us to focus on the problem itself and make a conscious decision on what we believe the nature of the Congress should be, and reverse, if we must, the evolutionary trend of recent years. I sincerely believe that my amendment will provide a forum for this much-needed reappraisal.

As we so frequently do in attempting to define the constitutional framework of the Government, Mr. President, allow me to read what one of the framers had to say in "The Federalist No. 49" about the proposed legislative branch:

> The members of the legislative department, on the other hand, . . . are distributed and dwell among the people at large. Their connections of blood, of friendship, and of acquaintance embrace a great proportion of the most influential part of the society. The nature of their public trust implies a personal influence among the people and that they are more immediately the confidential guardians of the rights and liberties of the people.

Can anyone say here today that this 95th Congress, sometimes called the first billion dollar Congress, was encompassed in form or function within the scope of the vision of our Founding Fathers?

I believe the Founding Fathers contemplated an entirely different concept—a concept of the citizen legislator who lived and worked among the people and who could draw from the knowledge and wisdom gained from daily exposure to the needs of the people in establishing the broad policies devised to guide the daily operation of Government.

As recently as 1950, when my father was elected, Congress met for a total of 103 days and accumulated the grand total of 85 votes. As do we, Mr. President, my father came to Washington in January for the convening of Congress; but there the similarity ends, because in the spring, he returned to Tennessee to practice law; he returned to Tennessee to participate fully in the mainstream of the economic, social, and political life in his community, his district, and his State. He knew firsthand, Mr. President, what policies of Government would benefit the people of Tennessee because he lived there. He was in every sense of the word a citizen of Tennessee, and I believe he was also a better legislator because of it.

On the other hand, Mr. President, we are in session virtually the entire year; and last year we had 700 rollcall votes. We pass bills of incredible length, detailing with minutia the functions of Government and, in turn, imposing on the lives and livelihoods of an unwelcoming public detailed guidance and regulation. And we do this, Mr. President, in self-imposed isolation, without any true exposure to the needs of the public for whom we serve and by whom we are elected.

It is this situation, Mr. President, that I regret; and it is this situation which has necessitated our consideration of this ethics resolution; and it is this situation that mandates the passage of my amendment.

All this amendment does is invite the Senate to make a knowing and conscious decision on the fundamental nature of Congress.

In addition, Mr. President, the sunset date that I have proposed allows reasonable and ample time to test and consider the full ramifications of the resolution we are about to adopt and to consider the recommendations of the Select Committee on Ethics with regard to those provisions of this code that should be modified and/or continued.

I add that to emphasize that by passage of this amendment, we will not be "sunsetting" ethics, which we could not do legislatively any more than we can legislatively create them. At the very least, what we are doing is committing ourselves to a continued reexamination of our code of conduct and to issues collateral thereto, such as the manner of our compensation and the nature of our undertaking.

Mr. President, I ask that my colleagues consider the amendment with that purpose in mind; and I urge that they vote in favor of its passage.

Mr. President, this is not a cause I have come to support and embrace easily, or without concern for the political implications involved or the difficulty of the task. I am aware of the possibility of misinterpretation, notwithstanding that I have stood shoulder to shoulder with the majority leader and others in insisting that, after we pass on the adjustment of our salary benefits and compensation, we address immediately the question of a revised and up-to-date code of conduct. Moreover, I understand that it is possible for some to say that any opposition to this code by amendment, by voting against it, by "sunsetting" it, is an effort to torpedo it. I understand that risk. I understood it before I undertook this endeavor, and I was not wrong.

I note with interest a letter from Common Cause dated and received on March 24, 1977, presumably addressed to each Member of the Senate. It was signed by Mr. David Cohen, the president of Common Cause, and it reads:

> COMMON CAUSE,
> *March 24, 1977.*
>
> DEAR SENATOR: We strongly oppose the amendment to be offered by Senator Baker which would terminate the Code of Conduct after only two years.
>
> Senator Baker's mischievous amendment is a blatant attempt to destroy the Code of Conduct and kill the limit on earned outside income before it has even had a chance to work. The limit on earned outside income does not go into effect until January 1978. Under Senator Baker's amendment the entire Code—including the income limitation—would expire in January 1980, only two years after the limitation had gone into effect—

I might say, parenthetically, that I doubt that the modification of the dates in the amendment was known to Mr. Cohen at the time he wrote the letter—

> We strongly urge you to vote against the Baker amendment which would make a mockery of the Senate's commitment to a limit on earned outside income and the other provisions of the Code of Conduct.
>
> Sincerely,
>
> DAVID COHEN,
> *President.*

So, Mr. President, my anticipation that any effort to cause us to reexamine the function and role of Congress would be interpreted as an effort to torpedo this code of conduct was correct—notwithstanding my announcement on the day this measure was laid before the Senate that I intended to support it. In addition, although I said at the time that the temper of these times, the nature of the circumstances involved, the fact that the House of Representatives has adopted a similar measure, and the misunderstandings in the public domain require us to do it, I believe it is a step in the wrong direction. I believe that when we approve this new code of ethics, we should make certain that we set in place the catalyst that will cause us to consider it again in a more tranquil time.

Notwithstanding all that, I fully understood then, and I understand now the possibility of my motives being misinterpreted.

That is why I said, Mr. President, that I did not come to this cause without considerable thought. For there is nothing more fundamental to my political beliefs and my dedication to the future of this Nation than my belief in the fundamental integrity, viability, and usefulness of the constitutional arrangements of Government in the United States.

I believe that our Founding Fathers were so inspired, I believe that their foresight was so great and thorough; I believe that their insight was so accurate and adequate, that it is truly astonishing—it is little short of a political miracle—that now, 201 years later, the form and structure is so relevant to our times. But it is.

I believe in the structure of government. I believe in the political system. I believe in that grand institution we talk about as the two-party system, which in many ways is the fourth department of Government, serving the function of sensing out and determining what the people think and translating it into useful governmental policy.

However, Mr. President, I believe that we have strayed from the fold. We have gone in the wrong direction. We have lost a clear understanding of our role as Congressmen. We must do something about it; because if this structure of Government is to continue to serve us in the future, we must make certain that we do not fritter away the genius that was designed into it.

So, Mr. President, let me share with

my colleagues, if I may, some of my thoughts about the direction Congress might take in the future—some of the things we might consider in the ensuing 3 years before we have to focus once again on the reinstitution of code of conduct.

To begin with, I think Congress should stop thinking of itself as an aggregation of Presidents. We are not charged with carrying out the laws of the land. In Congress, we are charged, really, with two duties—to serve as a policy-setting group, and to oversee the activities of the Government. Those are our responsibilities.

But I look on these desks, these historic desks in the Senate Chamber, and almost every day I see another bill that is 10 pages, 100 pages, sometimes more than 1,000 pages long; and I realize that what we are doing in the Senate and in the House of Representatives, is trying defensively to write rules, regulations and guidelines in an attempt to implement the law.

We are trying to be bureaucrats. We are trying to provide against some secretary of some agency or department, an assistant secretary under him, or some anonymous bureaucrat from writing a rule, regulation or guideline of which we do not approve or with which we disagree.

We will always lose that game. There is no way we can match them bureaucrat for bureaucrat. There is no way we can stay ahead of the bureaucracy with defensive legislation. That is not our turf. Our turf is to write laws. Our turf should be setting the broad, general policies of the United States, and, in turn, having a fair respect for the integrity of the executive department to implement and of the judiciary to monitor for performance of both.

Some say, "Well, look why on earth would you suggest that in the wake of the trauma of Watergate?" Maybe I am the only person here, one of a handful left in the country, who believes that Watergate was not a structural defect in the system. In fact, I think the system worked very well. I believe Watergate was a defect of personalities, not of structure; and I do not believe that the tragedy of Watergate should be used as a device or an excuse for fundamentally altering the relationship among the three departments of Government.

I do not fear an imperial presidency. I would fear an imperial President. I would fear that I might or might not succeed, or my party might or might not succeed, or the country might or might not succeed in moderating the tendencies of an imperial personality. But the structure itself is sound; and I see no violence done to it by asking that Congress return to its fundamental role, which was that of formulating policy to be carried out by the President and the several departments and agencies under his charge and care.

I do not expect the bureaucracy to compete on our turf either, regardless of how many bureaucrats they have, how many employees they have, or how thoroughly isolated they are by civil service. They are not going to write the policy of the Government if we do our job. We are not going to write the rules and regulations and guidelines if we trust them to do their job.

So, Mr. President, I hope we would focus more attention on the business of the policy of the Government and have a greater care for its faithful execution by the executive department.

Maybe that is one of the few good things—speaking only as a politician now and not as a citizen—maybe that is one of the few good things that come to a Republican for losing the Presidential election. I can suggest to my colleagues on the other side of the aisle that they ought to be willing to do that.

Mr. President, what else do I see? I see the possibility that the problem of 12-month sessions or 10-month sessions compounded by the prospect of Federal financing of our election campaigns will do violence to the most intimate of all political relationships. Not only will we have prescribed the standard of living, the code of conduct, the permissible activities of the participants in the legislative department of Government; we will also have provided and assured their campaigns for reelection from the Federal Treasury. If we think we are isolated now, wait until we see what happens then.

I think it is entirely too sensitive a business, this question of choosing the government, to say that the government will be selected by a process financed and regulated by the government.

My own view, Mr. President, is that 3 years from now we should not only be meeting less, dealing more with policy, and resisting the temptation to author rules and act like bureaucrats, we should positively encourage our Members to reimmerse themselves in the mainstream of America's political, social, and economic life. It is just not the same when you make a flying trip, a weekend hit-and-miss visit, to your constituency, but I can feel the difference when I am home for a week, or two weeks, during those rare breaks we have had lately.

I can tell the difference in my perception, my appreciation of the concerns, of the combined desires, the aspirations, the dissent, the demand of the people of my State when I am there for awhile—when I can identify again. We ought to provide for this interaction because it is useful.

It is not only reinvigorating politically and personally, it is essential, in my view, to the balancing effect it has on our attitudes and our outlook.

I would like to see us disclose our income tax returns. You have to pay some price for public service, I think, and that is one. I would like to see us disclose our assets and liabilities. I would like to see strong statutes that prohibit a conflict of interest while you are a member of the Government. But I would not like to see us positively insulate a Member of Congress from a proper understanding of the fabric of society in this country.

I have no illusions about this, Mr. President. I do not think I can change any mind today. I look around this Chamber and there are five of us on the floor. I do not think I can change anybody's mind on such fundamental principles in 5 weeks, let alone 2 weeks during 50 hours of debate.

But I believe we can change our minds, Mr. President, in the course of 3 years. I think if we resolve together to reexamine the role of Congress; if we talk about citizen legislators; if we reexamine the propriety of trying to keep people from understanding what it is like to be a citizen of Tennessee instead of a citizen of the District of Columbia in the Federal compound; if we talk about that for the next 3 years, I have a hunch that the great force which has made remarkably right decisions on behalf of America for two centuries called public opinion, will focus on this issue and will give us the guidance we need.

We have been right in America on the great decisions before us not because we have always had great leaders—we have had our share, for which we thank God—but we have been remarkably right on the big decisions America has made because the people were right in the expression of their collective genius for self-government.

If we talk about this concept; if we set in place the action-forcing mechanisms that require us to debate it; if we do not simply agree that now we are going to be Congressmen on the public payroll for our standard of living, for our reelection campaign, forever amen; if we put action-forcing mechanisms in this code, I think you will have that debate in the country in the next year or two or three. To the extent that this feeble voice can be heard, I shall encourage that discussion against whatever odds, whatever risks of misunderstanding.

So, Mr. President, let me reiterate my view very briefly: I think we ought to pass this ethics code; I think it will be politically unconscionable not to do so. I think that, having worked within the framework of the statute law that provides for the adjustment of salaries—salaries having reached the levels that they have, it is essential that we put in place a firm code of conduct. I think the two go together. I supported one and I am going to support the other.

But that requirement does not diminish my concern for the direction in which we are going, and this amendment is simply an action-forcing concept to make us reexamine the fundamental tenets.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER (Mr. TALMADGE). Who yields time?

Mr. CLARK. Mr. President, will the Senator yield 3 minutes?

Mr. NELSON. I wonder, Mr. President, there is an important omission in the RECORD on an amendment.

Mr. ROBERT C. BYRD. Mr. President, I yield to the Senator from Wisconsin for the purpose of making whatever correction he deems necessary.

Mr. NELSON. I will only take a minute or 2, but I ask unanimous consent that it not be charged against either side.

Mr. ROBERT C. BYRD. Mr. President, we only have an hour in any event, so

it would have to be charged against my side.

The PRESIDING OFFICER. Who yields time?

Mr. ROBERT C. BYRD. Mr. President, did the Senator from Iowa wish time?

Mr. CLARK. Only 3 minutes.

Mr. ROBERT C. BYRD. I yield 3 minutes to the Senator from Iowa.

The PRESIDING OFFICER. The Senator from Iowa is recognized for 3 minutes.

Mr. CLARK. Mr. President, there is clearly much to be said for the citizen-legislator concept that the distinguished minority leader has outlined this morning; if that is still a feasible concept, it is well worth considering. But as I read the very brief amendment, it seems to me that it does not have much relationship with that concept. The two do not necessarily go together.

Mr. President, this amendment has been referred to as the "sunset" amendment, and if the distinguished minority leader would forgive me, it seems to me that a better title would be the "wait till the heat dies down" amendment. I cast no aspersions on the intent of the amendment. I think it has been well explained. But if the Senate does in fact agree to the pending amendment, it seems to me that we will be saying to the country: "Yes, we are concerned about ethics, and we are passing a very tough code of ethics. But in a few years, in March of 1981, when the heat dies down, this code is going to quietly self-destruct."

There is no guarantee that the Senate will take any action or will ever have a vote on this important question.

We will be saying to the people of this country:

Yes, we gave ourselves a $13,000 pay raise, but we are also passing a tough code of ethics—except that in a few years the code will die a quiet death, and the paychecks will keep rolling in.

That is what agreeing to this amendment, it seems to me, will say to the Nation; it will be interpreted in that way.

We are all for ethics today, but wait until tomorrow when the heat dies down. I think it clearly is going to be interpreted in the country in that way.

Of course, the proponents of this amendment are calling it a sunset amendment, and appropriately so. Sunset is a very appealing concept. Senator MUSKIE's excellent sunset bill has more than 50 cosponsors. But as I understand it, the Muskie bill would apply only to spending programs, to authorizations. There would be no sunset for criminal law; there would be no sunset for any statutes which are in any way comparable to the Code of Official Conduct. Sunset, in fact, is designed to force a periodic review of Federal programs to help us eliminate unnecessary Government spending. Sunset, as the proposed Muskie bill is written, has nothing at all to do with the kind of sunset proposed in the pending amendment.

Even if there were some realistic relationship, let us not forget that the sunset bill has not been enacted, not by the House of Representatives, not by the Senate.

The PRESIDING OFFICER (Mr. DECONCINI). The Senator's 3 minutes have expired.

Mr. CLARK. Mr. President, will the majority leader yield me I additional minute?

Mr. ROBERT C. BYRD. I yield 1 additional minute.

The PRESIDING OFFICER. The Senator from Iowa is recognized for 1 additional minute.

Mr. CLARK. But will it not look strange in view of the fact that this legislation has not been passed—indeed, somewhat incredible—if the very first sunset proposal that we pass in this body is to sunset our own Senate Code of Official Conduct?

Mr. President, this code of conduct obviously is not perfect. It will not last for all time. It is going to need changes and, of course, we must constantly review it. But if we say now, after all the work that we have done that has gone into writing this code of conduct, that in a few short years the code will simply cease to exist, then we will certainly seem to be making a mockery of this process.

Mr. President, we will be seeming to make a mockery of any professed commitment to put our house in order and keep it in order.

I hope that the amendment will be defeated.

Mr. ROBERT C. BYRD. Mr. President, I understood the distinguished Senator from South Carolina (Mr. THURMOND) wanted to be yielded time.

UP AMENDMENT NO. 128

Mr. President, while I am waiting on the Senator, I send an amendment to the desk and ask that it be stated by the clerk.

The PRESIDING OFFICER. The time of 10:15 a.m. having arrived, the amendment is in order.

The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from West Virginia (Mr. ROBERT C. BYRD) proposes unprinted amendment No. 128 to amendment No. 164, as modified.

On line 1 strike all after the word "The" and insert in lieu thereof the following:

"Code of Official Conduct of the Senate shall be periodically studied by the Select Committee on Ethics and between January 1 and June 1, 1984, the Select Committee on Ethics shall report to the Senate its recommendations with respect to whether or not the Senate's Code of Official Conduct, or any part thereof, should be continued in effect, and whether or not it should be amended."

AMENDMENT NO. 164

Mr. ROBERT C. BYRD. Mr. President, I yield 7 minutes to the distinguished Senator from South Carolina (Mr. THURMOND).

Mr. THURMOND. Mr. President, I have the highest regard for our minority leader. He is an able man of courage and capacity, and it is a pleasure for me to work with him. But I cannot agree with him on this amendment.

I think this might be the test that will go to the public as to whether the Senate really means what it says when it adopts a code of ethics. This may be the word that will go out as to whether the Senate is permanently adopting a code of ethics or temporarily taking a position to offset the bad reaction to the increase in pay.

In my judgment, it will be a mistake to agree to this amendment. There is no sunset amendment on the pay increase; there should be no sunset amendment on this code of ethics.

Generally speaking, we have sunset amendments on authorization bills or spending bills, but on legislation of this kind, it is different. We want the word to go out to the people of the United States that the Senate has adopted a permanent code of ethics, not only for us, but also for our successors.

So it is my position that later, if this code of ethics is not exactly what it should be, then we can modify it, we can correct it; but to say it is going to end will give the wrong impression. In the future we can amend the code of ethics but let us do not end it. Amend it; not end it.

Mr. President, I think an amendment of this kind is a meat-ax approach because if the amendment is adopted we are simply going to cut it off entirely and kill the whole code of ethics. We do not have to do that to make any corrections. I believe the time has come when the people of this country want a permanent code of ethics so that they can feel that the Members of Congress not only appear right but they are going to be right. There has been confidence-shaking in the Members of Congress, whether it is justified or not. I have respect for every Member of this body. But that is the fact, nevertheless. The polls show it, and if that is a fact, we should be willing to take steps to correct it.

We cannot take steps to correct it if we are going to pass a temporary code of ethics, and that is what this would amount to if we agree to this amendment.

Mr. President, in my judgment this amendment will convey the wrong impression to the public. In my judgment if we adopt this amendment the people may get the impression that Congress really does not mean what it says in a permanent way, and that the Senate is going to return to its old ways when the sunset amendment takes effect.

Mr. President, I am very pleased that the Senate has gone forward on this code of ethics. It has been a pleasure for me to serve on the committee and help to write this code of ethics.

I believe most Senators favor this code of ethics, and we are going to adopt it today. I believe it is going to become a permanent part of the rules of the Senate, and will result in statutes being passed that will set high standards for Members of Congress, the leaders of this country, and the people. The Members of Congress are among our top leaders. If we do not set the standards for the people of the country to follow, who is going to set the standards? To whom can the man on the street look for proper standards of behavior and conduct? To whom can people on the street look to emulate in their life and conduct, especially in public office?

Now is the time to pass a permanent code of ethics. Later, if flaws show up, they can be corrected. But we do not wish to give the impression that we would

wish to pass any type of code of ethics except in a permanent way. I say again, later we can amend it, but let us not end it.

Mr. President, I yield back whatever time remains.

Mr. ROBERT C. BYRD. Mr. President, I yield 3 minutes to my distinguished friend from Alabama (Mr. ALLEN).

Mr. ALLEN. I thank the distinguished majority leader.

Mr. President, I wish to commend the Senator from Wisconsin (Mr. NELSON), the Senator from South Carolina (Mr. THURMOND), the Senator from Connecticut (Mr. RIBICOFF), the Senator from Iowa (Mr. CLARK), and the other members of the ad hoc committee for the excellent job they have done in drafting and steering this resolution to its imminent passage in just a few minutes.

I commend Senator NELSON for his dedication and leadership, and for the great knowledge and expertise that he has in this field. He has been on this floor every minute that this matter has been under discussion. He has shown familiarity with all of the provisions of the resolution. He has been able to give excellent responses to all the various amendments that have sought to weaken or to strengthen the resolution. No Senator could have done a more effective job.

I pay tribute to the distinguished Senator from South Carolina, (Mr. THURMOND) who is the ranking Republican member on the ad hoc committee and who has been a stalwart supporter of the resolution. Many times, on amendments, on the content of the legislation, and on the amendment now before the Senate, he has not had the full backing of Senators who are members of his party, but this great Senator (Mr. THURMOND), a man of character and unimpeachable integrity, has fought with great courage for the good name of the Senate and for the image that the Senate presents to the American people. I certainly commend him for the way that he has helped in the drafting of this resolution and in the strong support he has given the resolution on the Senate floor. I feel that he has made a great contribution in fashioning and shaping the resolution so that we will have an excellent code of conduct for Members of the Senate.

I think that there is sufficient credit available for all members of the ad hoc committee, for the outstanding job they have done. Truly I feel they have rendered a great public service. And the Senate itself has risen to the occasion by setting strict rules governing the official and unofficial conduct of its Members.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. ALLEN. I thank the Senator for yielding.

Mr. THURMOND. Mr. President, let me convey my sincere appreciation for the remarks of the Senator from Alabama.

Mr. ROBERT C. BYRD. Mr. President, I yield 7 minutes to the distinguished Senator from Wisconsin.

Mr. NELSON. Mr. President, of that 7 minutes I first yield myself 4.

I regret that the other Members of the Senate were not here to hear the thoughtful philosophical comments of the Senator from Tennessee. I suppose they were not here because the word was around that I was going to be here.

Many of the things the Senator said I would agree with. However, I am not with him on the sunset amendment.

We all know the Senator from Tennessee is a thoughtful, charming, good citizen, a litterateur, and connoisseur and student of history and biography. But as I read his amendment, it dawned on me for the first time that the Senator from Tennessee was a genuine Renaissance man in the best sense of the word—not only a litterateur, but a scientist as well—a scientist of great intellectual dimension.

I have studied this remarkable invention of the Senator from Tennessee called the sunset amendment. Through this amendment of his, the Senator would arrange for a remarkable event: a sunset.

The only other person I have ever heard of in the history of mankind who attempted to change the natural order of our galaxy, or dreamed about doing so, was Archimedes. We all remember Archimedes. It was he who said:

> Give me a place to stand, give me a fulcrum and a pole long enough, and I will move the Earth.

Archimedes never found a place to stand, but the Senator from Tennessee has found a place to stand, right here on the Senate floor.

What would this marvelous invention do? It would arrange for the sunset to occur before the Sun rises, which is a remarkable accomplishment. My ancestors, through eons and eons, all the way back to the baboon or the monkey, whichever group my family came from, sat on the trees and sat on the cliffs and watched the Sun rise, and many hours later watched the sun set, and marveled at the whole process. I say to the Senator, if he arranges that event in our galaxy, he will have outraged the whole human species and the whole animal kingdom.

One man that I know of was prosecuted because of the perception of the public that he was trying to rearrange the order of our galaxy. That was Galileo. We all remember Galileo. He got his telescope out and stared at the stars and everything he could see in our galaxy, the Moon and the Sun, for 2 or 3 years, and pretty soon he announced that the Earth was not the center of our universe.

The PRESIDING OFFICER. The Senator's 4 minutes have expired.

Mr. NELSON. I yield myself 3 additional minutes.

As Senators will recall, Galileo was punished. They forced him to spend the rest of his life under house arrest in Florence—not because of what he was trying to do, but because they believed his idea was wrong.

I say to the Senator that the rest of us need to save him from the sad fate that awaits him, because if he succeeds in making the Sun set before it rises, there will be another modern inquisition, and I know what will happen to the Senator. They will try him, they will convict him, they will sentence him, and that sentence will be so bad that death will seem like a pleasant diversion.

That sentence will be that the Senator must spend 8 hours a day every day for the rest of his life sitting here in the Chamber listening to the rest of us speak. I believe we ought to all join together, those who love the Senator from Tennessee, and save him from that fate by voting to destroy this ingenious machine that the Senator from Tennessee has invented.

Mr. CURTIS. Will the distinguished Senator yield for a short question?

Mr. NELSON. On the time of the other side.

The PRESIDING OFFICER. The Senator from Tennessee has 5 minutes remaining.

Mr. BAKER. Mr. President, I yield 1 minute to the Senator from Nebraska.

Mr. CURTIS. I am fascinated by the remarks of the Senator from Wisconsin, but my question is this: What causes the Senator to have such pride in the work of the resolution he is presenting that it would be wrong to take another look at it at the time suggested by the distinguished Senator from Tennessee?

Mr. NELSON. What I object to is just having an amendment which concludes that we have to have a sunset before this little piece of legislation gets off the ground.

Mr. CURTIS. The Senator did not understand my question. I asked what causes the Senator to take such pride in the resolution he has written which causes him to oppose the idea of taking another look at it at the time suggested?

Mr. NELSON. Every single year at any time, at the beginning of every session, there is an appropriate time, if we wish, without any sunset resolution, to reexamine all of the rules of the Senate and propose changes to them.

Mr. RIBICOFF. Will the Senator yield at that point?

I do not believe, and I hope the chairman will agree with me, that it is a question of pride. Those of us who were given the job were given an unwelcome task. I do not know a single member of the Nelson committee who sought to be on the Nelson committee. As a matter of fact, all Members were like myself. They were pursuaded to do this. We felt we had an obligation. The leadership asked us to try to work it out and we did.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. ROBERT C. BYRD. Mr. President, I yield 1 additional minute.

Mr. RIBICOFF. There is no question of pride in this legislation. There is much in it that I do not like. There is much in it that the membership does not like. I do believe we will be faced with the reality that within 6 months or a year we will be trying to work out statutorily, and not just by rule, laws to cover all three branches of the Government.

Right now, the executive branch has its set of rules, the judicial branch has its set of rules, the House has a set of rules and the Senate will have a set of rules.

My feeling is if we are going to have any code of ethics or code of conduct, every member of the Federal Government should be treated equally. I would expect that within the next year, long before the end of a 3-year period, somebody in the Senate will have the obligation and responsibility to bring forth statutory language, a statutory enactment, which contains uniform rules which will apply to every member of the Federal Government.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. ROBERT C. BYRD. Mr. President, how much time remains to me?

The PRESIDING OFFICER. The Senator from West Virginia has 7 minutes remaining. One minute has been yielded.

Mr. ROBERT C. BYRD. I yield to the Senator from Wisconsin.

Mr. NELSON. I would just like to say as a supplementary comment to what the Senator from Connecticut said that I would be more pleasantly inclined toward the sunset amendment of the Senator if we could include rule XXII. If the Senator would include rule XXII I might be able to go along with that.

There are a lot of rules that ought to have a sunset on them.

Mr. RIBICOFF. May I have 1 more minute?

Mr. ROBERT C. BYRD. I yield 1 minute to the Senator.

Mr. RIBICOFF. I take this opportunity to commend the Senator from Wisconsin for his outstanding leadership in putting this resolution together. With all his duties, with all the responsibilities he has had, he has devoted extra time and weekends to this task. Similarly, Senator THURMOND, the ranking minority member on the committee, has worked exceedingly hard on this resolution and has exhibited outstanding leadership and wisdom throughout the consideration of this resolution. Senator CLARK has made extensive contributions to this resolution and contributed his intelligence and sensitivity to this task. Senator JAVITS, as always, has applied his energy and keen mind to developing this code.

We have gathered together our personal staffs on both the Republican and Democratic side, all able men and women.

Ira Shapiro of Senator NELSON's staff, who served as chief counsel and staff director of the committee; John Napier of Senator THURMOND's staff, who served as chief counsel to the minority; Andy Loew of Senator CLARK's staff, Eric Hultman of Senator THURMOND's staff, Chuck Warren and Brian Conboy of Senator JAVITS' staff; Mildred Lehman of the Congressional Research Service, and David Schaefer of my staff. The staff worked exceedingly hard and devoted full time to this task, every day late into the evening and on weekends for the last 8 weeks.

We have worked hard to bring this code to the Senate floor. Senator NELSON has been patient, he has been thoughtful, and he has been very, very wise in trying to work out in a short period of time this code of official conduct by which we try to govern ourselves in the future. I do not want to let the time go by without commending the Senator from Wisconsin.

Mr. ROBERT C. BYRD. Mr. President, how much time remains to each side?

The PRESIDING OFFICER. Five minutes remain to the Senator from West Virginia and 4 minutes to the Senator from Tennessee.

Mr. ROBERT C. BYRD. I thank the Chair.

Mr. President, the Commission on Executive, Judicial, and Legislative Salaries recommended that the salaries of senior Federal Government officials be increased, but only if a strict code of public conduct were enacted. President Ford, in recommending an increase in salaries of the Federal judiciary, senior officials in the executive branch, and Members of Congress, said:

> Like the commission, I would not recommend a salary increase if there is not a firm commitment to a new code of conduct.

Mr. Ford went on to say:

> I have personally discussed this matter with President-Elect Carter and he authorized me to say that he fully supports my recommendations concerning salary levels and the need for stronger codes of conduct for all three branches as recommended by the Commission. Thus, the Executive Branch has made the commitment to the improved code of conduct. I have also spoken to the Chief Justice of the United States and he too supports the recommendations of the Commission and is committed to the code of conduct principles in the report.
>
> If the Congress commits itself to adoption of the proposed code of conduct reforms, then I believe the Congress should permit their salary increases to take effect. This will not only restore public confidence in national leaders, but it will permit the country to be able to attract the most qualified citizens to these important posts.

Mr. President, when the Congress accepted the March 1, 29-percent salary increase to which it was entitled—and with respect to which I am going to have a good bit more to say later and also with reference to the so-called billion dollar Congress—Congress accepted, by implication, an obligation to adopt a strong code of conduct as recommended by the Peterson Commission and by President Ford, and supported by President Carter.

The House of Representatives has already adopted a strong code of conduct. The Senate is about to complete action incorporating its own code of conduct into the standing rules.

I take this occasion to compliment highly Senator NELSON, the chairman of the committee, and Senator STROM THURMOND, the ranking member of that committee; also, Mr. RIBICOFF and the other members of the committee on both sides. These three Members, Senator NELSON, Senator THURMOND, and Senator RIBICOFF, have, more than any of the rest of us, stood on this floor day after day to manage the resolution and deal with amendments thereto. They did not ask for this assignment. They were asked by the joint leadership to take the assignment. I am proud of them, proud that they accepted such an onerous burden. I congratulate them on their dedication to duty, and I congratulate and thank them on their product. I also thank Senators EAGLETON, INOUYE, NUNN, CLARK, MELCHER, and GLENN on this side of the aisle; and Senators JAVITS, GRIFFIN, STAFFORD, PACKWOOD, LAXALT, and CHAFEE, all of whom worked hard in the committee.

When Members of Congress accepted the pay raise, to which Members of Congress were rightly entitled, we did so without any "sunset" provision or self-destruct amendment in relation thereto. The adoption of the amendment now before us, which would terminate the effect of Senate Resolution 110 on March 1, 1981, would mean that we had accepted the benefit of the pay raise but have placed our obligation to enact a code of official conduct, as envisioned by the Peterson Commission, by Mr. Ford and Mr. Carter, in a most uncertain status.

Quite frankly, Mr. President, it is somewhat demeaning to the Senate, in a sense, to enact a code of conduct governing its own membership. Who, among men anywhere would impugn the integrity of an ED MUSKIE or a GEORGE MCGOVERN or a STROM THURMOND for accepting honoraria for written articles or for speeches delivered to academic or other audiences? Who would impute to an ABE RIBICOFF or a JOHN STENNIS or a MILTON YOUNG or a DICK STONE or a HOWARD BAKER or a GAYLORD NELSON an ulterior motive in accepting a gift, the value of which amounted to $101 from a source other than a relative?

Who would charge a CLIFF CASE or a FLOYD HASKELL or a GARY HART or a CHARLES "MAC" MATHIAS with a conflict of interest in voting?

Who would harbor the thought that a BILL HATHAWAY or a JIM EASTLAND or a HERMAN TALMADGE or a JIM ABOUREZK or a JOHN CULVER would be influenced in his vote on any matter by having accepted two boxes of La Corona Corona cigars at Christmas—the cumulative value of which would be more than $35—from an employee of a corporation, labor organization, or other organization having a separate, segregated fund for political purposes?

To ask such absurd questions is to answer them. Nevertheless, out of the necessity of the times, the climate of public opinion, and in the context of errant activities in the past on the part of a minority of public officials, it is apparent that a code of official conduct must be enacted. The committee knew this; I know this; and most other Senators will agree.

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. ROBERT C. BYRD Has all my time gone?

Will the Senator from Tennessee allow me some time?

Mr. BAKER. Mr. President, how much time do I have?

The PRESIDING OFFICER. The Senator has 5 minutes.

Mr. BAKER. I yield 2 minutes to the Senator from West Virginia.

Mr. ROBERT C. BYRD. I thank my very courteous and gracious friend.

It is all a part of the overall aftermath of Vietnam and Watergate—two dark episodes in our Nation's history, which have inflicted deep wounds of distrust among the people toward elected officials. Such distrust and lack of confidence will not be assuaged by the adoption of an amendment which would say, in effect, that the Senate is not really serious about the enactment of a code of conduct.

I do not impute to the distinguished minority leader any mischievous conduct in offering this amendment. I do not call it a blatant attempt to destroy the code—to use the words in the Common Cause letter. I respect the Senator for his point of view. I disagree with him, but I do not cast any reflection on his sincerity, on his convictions, or on his good conscience in offering the amendment. I regret that Common Cause has chosen to use such words in the letter.

Now, I believe there is much merit to the concept of sunset legislation—but I believe that it is most applicable to the appropriations process, to federally administered programs, to regulations promulgated by regulatory agencies, and where specific programs and activities require continued funding. The amendment before us, however, proposes something entirely different from the self-destruction of a funded program. It constitutes a ground-zero reexamination of principles and standards of conduct by which we are to be guided in our official capacities as U.S. Senators.

Today marks the 12th day of action on this resolution—action that has produced intense feeling, much eloquent oratory, and often true debate between Members on the floor. Through these nearly 50 hours of debate, we have had 24 rollcall votes on this legislation. Rarely has a resolution been so carefully scrutinized, attacked, defended, and with resulting compromises reached, than has Senate Resolution 110. Where compromises have been drawn—and it is true that some of the lines have been arbitrary—they have been drawn only after careful consideration and where it was found that lines had to be drawn somewhere. I said at the beginning of the debate that the code of conduct recommended by the committee was not perfect, and this was shared by every member of the committee that worked so hard and so diligently to report the resolution. We all said that some improvements could be made through floor debate, and they have been made.

We have made many critical and difficult decisions in the course of these 12 days that directly relate to our institutional integrity and how it is perceived—by ourselves and by the American people. I think it would be a serious error in judgment if, after the struggle to hammer out this resolution, the Senate were to adopt an amendment calculated to inflict automatic self-destruction upon the code of conduct we will have enacted. It would be better to kill it now and simply admit that we do not intend to be governed by a code of conduct written into the Senate rules.

No Senator here today will insist that what we adopt will contain the answer to every conceivable problem. If I may refer to a statement by the distinguished Senator from Mississippi, Mr. STENNIS, former chairman of the Committee on Standards and Conduct, which he made at the time of the adoption of the Senate code of ethics in 1968:

> It is not a finished product . . . but a substantial beginning.

In the House, its Ethics Committee report referred to its code as "a meaningful beginning—subject to revision and refinement."

Both events and statements occurred in 1968, 9 years ago. No mandatory review period or reauthorization period was included in the measures adopted by both Houses, because it was accepted that if and when a change was to be made, it would take place at the proper time, as facts might warrant. This is building, from experience, the standard adopted 9 years ago and one which should continue to be applicable in the future.

Codes of ethics are standards of accepted behavior that are intended to endure until they are bettered. They are not, in the same class as a restricted railroad ticket, good for this day and time only.

Codes of conduct are not transients adopted to fit a temporary need. When the time comes to amend what we are doing today, we will know it. We certainly are not adopting these changes as an experiment, to be brought to an absolute and final end, and within a designated time frame, on which date the code of conduct would be scrapped, with no substitute required to take its place at that moment, which would likely mean that the Senate would have to go through this whole, long and tortuous process again.

In closing, I call attention to the fact that Senate Resolution 110 authorizes certain Senate standing committees to conduct studies and report recommendations in numerous areas within 120 days and other time frames after Senate Resolution 110 is agreed to. To arbitrarily require now that the code should self-destruct in 4 years and presumably include in its own suicidal end any actions taken by such Senate standing committees in respect thereto, would not seem to be feasible. Hardly would whatever operations that would be so adopted have been put into effect, than the entire procedure would have to be done all over again. In reality, there would be a duplication of effort along with its additional expenditure of time and labor.

Surely the rules of the Senate are more than a restricted railroad ticket. Time will prove what amendments might eventually have to be made to the measure we are working on now, but time in this sense accords with traditional Senate practices, not an arbitrary time frame of 4 years. At the appropriate time, I shall move to table the amendment.

Mr. BAKER. Mr. President, do I have 2 minutes left?

The PRESIDING OFFICER. The Senator does.

Mr. BAKER. Let me first say, Mr. President, that I am personally very grateful to those I appointed to the ad hoc committee to try to draw up this code. Senator THURMOND, Senator GRIFFIN, and others have worked long and hard to produce a code of ethics. I told them at the time that I thought they had to do this job. I think they have done it very well.

I also want to say, Mr. President, that I believe I have proved my point: You sure do stir them up when you start talking about nature. Regardless of our comedy and all that sort of thing, I suspect even the manager of the bill might shudder a little bit if somebody condemned him to listen here 8 hours a day. But the majority leader and I do that more than anybody else. I contend that would be a cruel punishment.

So it would be to ask a body of Senators to come here and cut their own salaries by being paid on a per diem basis, which I think we should do to put us back in the mainstream of life in America. I rather like going home, myself, but I am certain it will cause some ripples on the water.

All of these ideas verge on being radical, because we have come so far from the original concept of Congress. As I said at the outset, I do not expect these ideas to be incorporated into this bill, but that did not deter me from offering it.

I promise that I will discuss this idea as often as I can. As long as my colleagues and others will listen, I shall condemn them to that purgatory, to hear what I have to say on this subject.

Mr. President, I must also say that I think a half loaf is better than none. I ask unanimous consent that I might accept the amendment of the distinguished Senator from West Virginia.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, I would have to object.

The PRESIDING OFFICER. Objection is heard.

Mr. BAKER. Mr. President, I ask unanimous consent that I may amend my amendment to conform to the provisions of the amendment of the Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I regret to have to object, but I shall object.

The PRESIDING OFFICER. Objection is heard.

The question is on agreeing to the amendment of the Senator from West Virginia.

Mr. CURTIS. I ask for the yeas and nays on the Byrd amendment.

Mr. ROBERT C. BYRD. Mr. President, I am glad to give the Senator the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ROBERT C. BYRD. Mr. President, I am going to move to table. The purpose of my amendment was two-fold—to shut out any other amendment, No. 1; and, No. 2, to do only what the Ethics Committee can do now. I move to lay the amendment on the table.

The PRESIDING OFFICER. Which amendment?

Mr. ROBERT C. BYRD. Mr. BAKER'S amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Tennessee.

Mr. BAKER. Parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BAKER. There is an amendment pending. That is the amendment of the distinguished Senator from West Virginia. What disposition does the Chair make of that amendment?

My parliamentary inquiry is, does that amendment not have to be disposed of before the tabling amendment will lie against the amendment of the Senator from Tennessee?

The PRESIDING OFFICER. No, it does not.

Mr. ROBERT C. BYRD. My motion which tables the Senator's amendment would take my own amendment with it if the tabling motion is adopted.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay it on the table.

Mr. BAKER. Parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BAKER. The inquiry is the amendment was not disposed of in any way that I ascertained. The amendment of the Senator from West Virginia, if it were added to the amendment of the Senator from Tennessee, would go down with the tabling motion. But it has not been adopted as part of the amendment of the Senator from Tennessee.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Tennessee.

Mr. BAKER. Parliamentary inquiry once again.

The PRESIDING OFFICER. The Senator will state it.

Mr. BAKER. There has been no disposition of the Byrd amendment.

The PRESIDING OFFICER. That is correct.

Mr. BAKER. It has not been adopted. If the Baker amendment is tabled, what is the status of the Byrd amendment?

The PRESIDING OFFICER. It falls.

Mr. ROBERT C. BYRD. Parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. ROBERT C. BYRD. The Byrd amendment to the Baker amendment is an amendment in the second degree.

The PRESIDING OFFICER. That is correct.

Mr. ROBERT C. BYRD. The tabling of the Baker amendment, which is an amendment in the first degree, automatically carries with the tabling of the Byrd amendment, which is in the second degree.

The PRESIDING OFFICER. It would carry that amendment with it.

Mr. ROBERT C. BYRD. If the motion to table fails, then the question will recur on the adoption of the Byrd amendment.

The PRESIDING OFFICER. That is correct.

Mr. ROBERT C. BYRD. I thank the Chair.

Mr. BAKER. Parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BAKER. I do not even attempt to presume to lecture either the Parliamentarian or the distinguished majority leader but, if this were other and different circumstances, I would pursue that a little bit.

At this time, however, do I understand correctly that the yeas and nays are ordered on the Byrd amendment, but the pending motion is to lay on the table the Baker amendment?

The PRESIDING OFFICER. Yes.

Mr. BAKER. Have the yeas and nays been ordered on that motion?

The PRESIDING OFFICER. They have been ordered.

The PRESIDING OFFICER. The question is on the motion to lay on the table the Baker amendment. The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Colorado (Mr. HASKELL), the Senator from Washington (Mr. MAGNUSON), and the Senator from Hawaii (Mr. MATSUNAGA) are necessarily absent.

I further announce that the Senator from Hawaii (Mr. INOUYE) is absent on official business.

I further announce that, if present and voting, the Senator from Washington (Mr. MAGNUSON) would vote "yea."

Mr. STEVENS. I announce that the Senator from Kansas (Mr. PEARSON) and the Senator from Texas (Mr. TOWER) are necessarily absent.

I further announce that, if present and voting, the Senator from Texas (Mr. TOWER) would vote "nay."

The result was announced—yeas 63, nays 31, as follows:

[Rollcall Vote No. 93 Leg.]

YEAS—63

Abourezk	Byrd, Robert C.	Dole
Allen	Cannon	Durkin
Anderson	Case	Eagleton
Bayh	Chiles	Eastland
Bentsen	Church	Ford
Biden	Clark	Glenn
Brooke	Cranston	Gravel
Bumpers	Culver	Hart
Burdick	DeConcini	Hathaway
Helms	Melcher	Riegle
Hollings	Metcalf	Sarbanes
Huddleston	Metzenbaum	Sasser
Humphrey	Morgan	Sparkman
Jackson	Moynihan	Stafford
Johnston	Muskie	Stennis
Kennedy	Nelson	Stevenson
Leahy	Nunn	Stone
Mathias	Pell	Talmadge
McClellan	Proxmire	Thurmond
McGovern	Randolph	Williams
McIntyre	Ribicoff	Zorinsky

NAYS—31

Baker	Griffin	Packwood
Bartlett	Hansen	Percy
Bellmon	Hatch	Roth
Byrd, Harry F., Jr.	Hatfield	Schmitt
Chafee	Hayakawa	Schweiker
Curtis	Heinz	Scott
Danforth	Javits	Stevens
Domenici	Laxalt	Wallop
Garn	Long	Weicker
Goldwater	Lugar	Young
	McClure	

NOT VOTING—6

Haskell	Magnuson	Pearson
Inouye	Matsunaga	Tower

So the motion to lay on the table the amendment of the Senator from Tennessee (Mr. BAKER) was agreed to.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ADDITIONAL STATEMENTS OF SENATORS SUBMITTED ON SENATE RESOLUTION 110

Mr. CRANSTON. Mr. President, in politics, appearance is often as important as reality. It is not enough for a politician to be honest, essential though that surely is. He must also avoid any taint or suspicion of dishonesty.

He should not only do so in his own interest—for his political survival, more importantly, he must do so in the national interest—for the survival of effective, democratic government.

Public confidence in Government has been badly shaken in recent years. And with just cause. We in Government have a responsibility to take whatever steps are necessary to reestablish public confidence in the men and women who hold high public office.

I believe the code of official conduct, which the Senate has just approved overwhelmingly, is just such an essential step. While steering a middle course between extremes, it provides for a number of sweeping tough, comprehensive reforms.

Financial disclosure—the heart of honesty in politics—is made mandatory to an unprecedented degree, including full public disclosure of all income, assets, liabilities, and gifts. Actions that could lead to real—or seeming—conflicts of interest are restricted. Foreign travel for lame duck office holders is banned. Staff political activity is limited. So is the receipt of gifts. Office slush funds are prohibited—and a much-needed new look at the adequacy of office allowances is called for. For the first time there is an equal employment practice code for Senate hiring, banning discrimination because of race, color, age, religion, sex, national origin, or physical handicap.

And, for the first time, effective enforcement procedures are to be instituted.

I voted for tougher restrictions on incumbents' use of the newsletter prior to primary and general elections. And I also supported a proposed ban against surplus campaign funds being used to defray office expenses. Both those tougher provisions failed.

Nonetheless, I believe this new code is a measure that the Senate can be proud of—and that the American people can have full confidence in.

Mr. CLARK. Mr. President, this code of conduct represents a big step forward. The proposal that we drafted in committee has remained largely intact. Most of the attempts to water it down on the floor were beaten back. It will go a long way toward ending the abuses that have so tarnished Congress image in recent years through its prohibitions against conflicts of interest, its ban on gifts and elimination of secret slush funds, its limitations on outside income, and its stringent public financial disclosure requirements.

A major aspect of the code—which sets it apart from the code of conduct passed earlier by the House—is the strict enforcement provisions it contains. These provisions will insure that the Senate will be held accountable for allegations of wrongdoing against its Members, so that such allegations can no longer be buried in back rooms.

This code alone will not restore public confidence in the Senate. But the very specific standards it sets forth for judging the conduct of the Senate's Members provide a sound mechanism for achieving that goal. The challenge now will be for Senators and the public alike to apply those standards rigorously so that the credibility of the Senate as an institution can be restored.

Mr. President, I would just like to add a word of praise for the Senator from Wisconsin. This has truly been a thankless task. Yet, just as he did in committee, he has handled this resolution on the floor with consummate wit, skill, and grace, and the Senate is deeply in his debt.

Mr. President, I would also give thanks to the senior Senator from South Carolina, who has stood by all the major provisions of this resolution and, as ranking minority member, has performed with great ability.

The senior Senator from Connecticut has also made an invaluable contribution to the creation and passage of this resolution.

And finally, Mr. President, I want to commend the distinguished majority leader. It is Senator ROBERT C. BYRD who deserves enormous credit for the adoption of this Code of Official Conduct. His leadership truly has been exemplary.

All these men have done an exemplary job. We are indebted to them, and to the staff, which has worked many long hours to help us complete this task.

Mr. ROTH. Mr. President, it is with considerable regret that I am voting against the proposed code of conduct.

I believe that ethics legislation is sorely needed, and I am pleased that the proposed code does contain some provisions which I initiated and have fought for over the past 2 years. I will vote against the code, however, because I believe it fails to address the real ethics problem facing the Congress while at the same time creating many cumbersome and arbitrary rules that can result in less rather than more public confidence in the Congress. It has all the characteristics of so much of our legislation—overregulation and underenforcement.

What is the problem of ethics in Congress? It is not that there has been a lack of sound rules. Senators and Congressmen, like all other Federal officials, are prohibited by law from accepting bribes or abusing their personal positions for private gain. In the late 1960's, both the House and the Senate passed rules incorporating high standards of conduct. The problem has been that there has been a low standard of enforcement.

This past year's crisis of confidence in the ethics of Congress did not begin with the Hays affair. It was the result of a series of serious allegations that went uninvestigated. Congress, which is so quick to intervene when allegations involve the executive branch or private sector, dragged its heels on serious allegations involving its own Members. Neither House was serious about finding out what the truth was and disciplining any who violated the law.

How should the Senate address the ethics problem? First of all, the rules should be clear and straightforward.

Second, there should be disclosure of outside business interests and other transactions that could involve, but do not necessarily involve, a conflict of interest so that the voters themselves can decide whether a Member has compromised himself.

Third, confidential financial information should be filed and should be made immediately available in response to a court order when there are serious charges of wrong-doing. Finally, and most importantly, there should be effective enforcement with outside participation.

On the whole, I am satisfied with the disclosure requirements of the proposed code. Important information will be disclosed, and information of a very personal nature, such as tax returns, will be filed confidentially. The code contains the auditing provisions which I first authored in the Watergate Reform Act and which I regard as absolutely essential to instill confidence that disclosure will be full and accurate. This is a very substantial improvement over the recently adopted House code.

I am also gratified that the confidential financial information will be available in response to a court order. This is a provision I proposed more than 2 years ago and which gives real meaning to the confidential disclosure procedure.

What are the problems with the code? First, the rules are absurdly complex and arbitrary. The Code is honeycombed with special exceptions and arbitrary distinctions, many of which just do not make sense when judged by any ethical standard. Can anyone explain why it is ethical under the code for a Senator to practice teaching or hair-dressing on the outside, but unethical for a Senator to practice medicine or architecture if he has been trained in those fields? Or why a gift of personal hospitality from a lobbyist is not restricted and does not have to be disclosed, while other kinds of gifts from lobbyists are limited and disclosed? Or why if a Senator is a painter and sells an artistic work that should be excepted from the 15-percent limitation on outside earned income, while most other kinds of earnings are included?

As the code has been debated and amended on the floor, it has generally grown more rather than less complex. I am not sure that there is a Senator in this body who entirely understands what the code provides and what it proscribes.

A number of most difficult issues have simply been referred—or deferred—to committee with instructions to report back later on.

Clearly, we have fallen into the trap of overregulation of which Elliot Richardson wrote in a recent article entitled "The Sexless Orgies of Morality." Ambassador Richardson warns that one important liability of trying to legislate morality is that it will discourage good people from going into politics and public service:

> The danger of dredging up petty complaints or adopting overly rigid rules can be serious—a fundamental dampening of processes essential to our political system. For we must not only enact good laws, and exact high standards. We must also attract good people, and such excesses can make that more difficult.
>
> The outcome of Watergate, we keep hearing, proved that the system works, that our government is still one of laws, and not of men. That's so. But it was never intended to mean good laws without good men, who will always be needed.

In many respects, the very complexity of the bill may very well cause more rather than less confusion in the Congress, press, and public about just what high ethical standards are and are not. And that, in turn, is likely to create less rather than more confidence that high ethical standards are being maintained.

Moreover, it will make the Code more difficult to enforce, and I regard enforcement as the key to creating public confidence in the Congress. What good are any rules if violations are ignored?

There is no question but that the Senate has made a better effort than the House in trying to strengthen enforcement. In my judgment, however, this effort still falls short of what is needed. I have said many times that I think it is very difficult for a small group like the Senate or the House to investigate its own Members.

We deal with each other on a day-to-day basis, and many friendships and common interests develop that inevitably inhibit investigating when allegations do arise. Moreover, I do not believe the pub-

lic will have real confidence in an in-house procedure.

During the debate on the proposed code, I offered an amendment to establish an outside body to receive complaints and conduct investigations. I believe this procedure would have built effective enforcement into the code and created public confidence in Congress willingness to maintain the highest standards of ethical conduct.

I regret the Senate tabled this amendment. Without it, I fear the Senate is heading toward a new crisis of ethics. There may be little problem in the very near future, but to maintain high standards in the long term, there must be an effective enforcement mechanism.

Finally, Mr. President, I appreciate the hard work and energy expended by the members of the special committee which drafted this resolution. They were working under very stringent time constraints. Frankly, I believe we were wrong in establishing such deadlines. This is an issue that should have been given very sober and careful consideration. It should have been looked at long before the proposed pay raise finally goaded the Senate into taking action. And a good deal more time should have been given to evaluating the problem and considering the different alternatives for addressing it.

In the absence of such time, I believe we have taken the wrong route. We have tried to legislate morality rather than tried to emphasize effective enforcement.

Mr. HUMPHREY. Mr. President, when the Senate accepted the findings of the Quadrennial Commission for an increase in the pay rates of top Federal officials, it did so with the specific understanding that it would promptly develop, consider, and adopt a code of conduct that would reassure our constituents that Members of Congress are prepared to respond to their legitimate concerns for explicit and binding financial ethical standards.

We assumed this moral obligation, and established a Special Committee on Official Conduct to draw up such a code in an expeditious manner. Acting within its stringent deadline, the committee has heard testimony and collected data in order to present to the Senate its recommendations.

The basic purpose of this code is to avoid any conflict of interest, or any appearance of conflict of interest, among Members of the Senate. This should be the guiding criteria in our debate. We are not called upon by our constituents to profess poverty as a condition of our service. The U.S. Senate demands an enormous investment of time, and physical and mental endurance. Our commitment is to fulfill that office capably, with energy and integrity. Clearly, it would be a betrayal of that commitment to allow our judgment to be swayed by personal financial considerations.

The code before us reflects new and demanding standards of official conduct. However, many of us already have made a practice of financial disclosure, and supported legislation, such as the Integrity Act of 1977, that would require public financial disclosure of high-level officials in all three branches of the Federal Government.

There is little doubt that this code entails a painful loss of privacy for many individuals. But this is a price we pay for the privilege of serving in high office. The public has a right to demand good, responsible and ethical performance. Unfortunately, some serious examples of failure to meet those standards have undermined the confidence of our constituents.

In order to be an effective representative body, we need the confidence of our constituents and their trust in a responsive, distinterested legislative process. We cannot afford the cynicism that would greet any failure on our part to devise and adopt a strict code of financial ethics.

Some of the debate on this issue suggests that a high degree of ethical conduct and responsibility is a brand new requisite of public service, a recent discovery rather than a common sense condition of office. I never have considered public officials above the law. Indeed, it is expected that public office entails especially scrupulous standards of honesty and integrity.

The code of conduct resolution before the Senate today has been drafted with care. It will clarify areas where Senators otherwise may reasonably err with regard to expenditures related to official duties. In that sense, it is a protection against honest error and against bad faith or frivolous allegations.

Inevitably, this code will involve inequities in the treatment of unearned and earned income. It is often very difficult to judge when a Senator's speaking engagements represent time away from his duties and when they are a vital extension of his duties that helps clarify and encourage public debate of major national issues.

I regret that Government has fallen so far in the estimation of the public. This body has been damaged by well-publicized instances of wrongdoing. Such incidents can be addressed by existing sanctions of this body and of the courts. Unfortunately, as a result, the Senate finds its reputation tarnished, its motives suspect, and its strength as an institution imperiled by suspicions and intimations which besmirch in a general and indiscriminate manner every Member of this body, regardless of his personal standards and public record.

Having reached a situation where the Senate's credibility is seriously undermined, it is important that we act promptly to confront this issue, to resolve it, and then to return to the important and primary business of lawmaking.

While I accept this stringent code as a requisite of public service, and I know all of us can learn to live with the extra work and restrictions it entails, I would specifically question the requirement for imposing audit requirements in addition to those embodied in current law. Most Senators are in a tax bracket that is subject to auditing by the Internal Revenue Service, and to require an additional audit by the Comptroller General every 6 years seems to me unnecessary duplication.

With that slight reservation, let me say that all of these requirements are not necessarily comfortable; they do not necessarily affect all of us with equal fairness. But, when the pay raise was discussed in the Senate, I noted that we had authorized a commission to make an objective, cutside evaluation of pay scales. We accepted its recommendations.

Now, we have asked a committee of our colleagues to make an objective evaluation of the requirements for financial accountability. The provisions of this code represent a conscientious attempt to avoid conflicts of interest, while respecting so far as possible the understandable desire for personal privacy. However, the dominant principle is the public demand for guarantees against conflict of interest. That principle is embodied in the safeguards established against the use of official position for direct or indirect financial benefit.

In voting for this code of conduct, I am essentially reaffirming the personal obligation I always have accepted to act with respect for my office and responsibility to my constituents.

Mr. THURMOND. Mr. President, I support a strict code of conduct for the Senate and shall vote in favor of Senate Resolution 110.

When we began this debate, I said I would support any amendments to make the code more practical and workable, but would oppose any amendments to weaken its effectiveness. I believe the code has survived the debate intact, and I urge my colleagues to support it.

When the Senate passed the initial resolution to charter a special committee to write a code of conduct, it mandated the committee to make recommendations in the following areas:

First, annaul public disclosure of income, assets, debts, gifts, and other financial items;

Second, restrictions on, or the elimination of, outside income from honoraria, legal fees, gifts, and other sources of financial or in-kind remuneration;

Third, conflicts of interest arising out of investments in securities, commodities, real estate, or other sources;

Fourth, office accounts, and excess campaign contributions;

Fifth, Senate travel;

Sixth, engaging in business or professional activities or employment, or other remunerative activities, so as to avoid any conflict with the conscientious performance of official duties.

By way of comparison, Mr. President, let me list the following recommendations of the Committee on Official Conduct which have been incorporated in the code:

First, complete, full public financial disclosure by Senators or officers and employees of the Senate earning in excess of $25,000 per year.

Second, a prohibition on knowingly accepting a gift or gifts having an aggregate value of over $100 during a year from any individual or organization having a "direct interest in legislation."

Third, a prohibition imposed on Senators, officers, and employees of the Senate earning more than $35,000 from earning income in an amount exceeding 15 percent of their salaries.

Fourth, a restriction on Members, officers, and employees earning over $25,000 from practicing their profession or rendering professional services.

Fifth, a prohibition on the use of so-called unofficial office accounts.

Sixth, a prohibition on the practices of so-called "lame-duck travel" in connection with foreign travel.

Seventh, a restriction on the use of the frank to materials printed or paper purchased with Government funds.

Eighth, a prohibition against discriminating in employment practices in the Senate.

Ninth, a set of procedural rules to guarantee a strong Ethics Committee accountable to the Senate and to the public.

Tenth, a number of studies to be conducted by Senate committees to provide for greater accountability and efficiency in Senate procedures.

Mr. President, the committee has now fulfilled its duties, the Senate has debated this matter for almost 3 weeks, and I believe we have now worked out a code of which the Senate can be proud.

It has not been an easy task to draft a code of conduct for the Senate. The code which we will pass is not a perfect one, but it is a necessary part of the continuing process of keeping the affairs of house in order. It is also a beginning in the long and arduous task to restore public confidence in Congress as an institution.

As vice chairman of the special committee, it has been a pleasure to work on this code. I am particularly grateful, Mr. President, to the Republican members of the committee who served with distinction—Senators JAVITS, GRIFFIN, PACKWOOD, STAFFORD, LAXALT, and CHAFEE. Senator NELSON, the chairman of the committee, deserves the gratitude of the Senate for his exemplary leadership. I commend him for his fairness and leadership on this matter.

Mr. President, I strongly support the code.

Mr. DOLE. Mr. President, I have a few questions which I would like to put to the manager of the bill to confirm some of the impressions which I have about this bill and to get some answers in areas where I am uncertain.

Basically, there are two related sections of this bill which could deal with gifts of transportation or lodging paid for by someone other than a Senator or the Government. The gifts section of the bill restricts certain kinds of gifts of transportation and lodging, and the financial disclosure calls for the reporting of certain gifts of lodging and transportation.

Here are my questions:

Let us say I take a trip to Kansas to give a speech to a group there. I understand that the group can pick up my expenses without that amount being considered a gift for either reporting purposes or for purpose of restrictions in the gifts section. Is that correct?

Mr. NELSON. Yes, that is correct.

Mr. DOLE. If that group has a political action committee, does that change things?

Mr. NELSON. No, that makes no difference.

Mr. DOLE. Suppose I go to Kansas to speak to a group and someone, not a corporation or labor union with a PAC, and not a lobbyist, wants to pay for my transportation to Kansas. Is that allowed?

Mr. NELSON. Yes, but it must be disclosed if the amount is over $250 and not paid for by the group you are speaking to.

Mr. DOLE. Would it make any difference if it were being paid for by a private person as opposed to a business of some kind?

Mr. NELSON. No. As long as it is not an officer or director of a registered lobbyist or corporation with a political action committee, it would not make a difference.

Mr. DOLE. Would it make any difference what sort of group I was addressing—or whether I was there on personal business—or doing several things at once?

Mr. NELSON. No. But it would be considered a gift and would have to be disclosed.

Mr. DOLE. Once I am in Kansas, can I accept a ride in a plane owned by a corporation or by an individual for my travels around the State if the owner of the plane is not an officer or director of a registered lobbyist or a corporation with a PAC?

Mr. NELSON. Yes, but you must disclose this if the value of the ride exceeds $250 or if other gifts received from the same source during that calendar year exceed $250.

Mr. DOLE. Would it make any difference whether I was 1 year or 5 years away from the expiration of my term?

Mr. NELSON. No.

Mr. DOLE. If the corporate or private plane is not owned by a registered lobbyist or an officer or director of a corporation with a political action committee, can I accept the gift regardless of what kind of event I am going to?

Mr. NELSON. Yes.

Mr. DOLE. Can I use it to attend political meetings, civic and community meetings, go on Senate business, or go on personal business?

Mr. NELSON. There is nothing prohibiting this in the code. But as explained before, this may have to be disclosed. However, the propriety of this may be governed by other rules or laws, such as the Federal election law.

Mr. DOLE. Does it make any difference if there is commercial transportation available in any of the instances which I have mentioned in which I accepted private travel?

Mr. NELSON. No.

Mr. DOLE. Would any of the instances which I have outlined above be any different if I were traveling around in a State other than my home State?

Mr. NELSON. No.

Mr. DOLE. Suppose I make a bonafide appearance before a political action committee of a corporation in Wichita, Kans., and they buy me a round trip ticket as a "necessary expense" of having me there. Can I go ahead on the same trip and take time off to go home to Russell, Kans., at my own expense, and still have the plane fare from Washington to Wichita and back paid for by the group, and not have it considered as a gift?

Mr. NELSON. Yes. If the appearance for which you received the round trip ticket is bona fide, the round trip ticket is a necessary expense. The situation is not changed by the fact that you went home to visit.

Mr. DOLE. With the same hypothetical situation, would it make any difference if I went ahead and went to some political events or went to other meetings to address other business or civic groups. Could the corporation with the political action committee still pay for my plane fare to and from Wichita for that weekend?

Mr. NELSON. As the question is posed, there would be no violation of the code. In a variety of cases posing different circumstances, advisory opinions will be available from the Ethics Committe.

Mr. GOLDWATER. Mr. President, this ethics code which we have been debating may in the end look all right, read all right, and even prove satisfactory to the moralizers in Common Cause and the media. But I submit that it is an exercise in sheer hypocrisy. It is a sham, an unworkable sham that will have very little effect on improving the official conduct of the Members of the Senate. And I suggest that the American people will not be fooled by an in-house procedure which leaves it up to the Members of Congress to police themselves.

I am afraid Mr. President, that public cynicism will be overwhelming when the first test of this code is handled under the procedures proscribed. After all the American people have watched before as the Senate and House wrestled mightily with an ethical problem involving some of its Members and came forth with nothing stronger than a wrist tapping.

Mr. President, unless there are strong regulations for policing this conduct, backed by the force of law, we will fall back into the old ethical practice which produced little surveillance, few penalties, and a series of shabby scandals.

A recent editorial in U.S. News & World Report had some observations on the general subject of conniving and cowardice in the Congress of the United States. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

SAME OLD GANG?

(By Marvin Stone)

The shameless conniving and cowardice that Congress displayed in arranging to raise its pay, without having to vote, was greeted with dismay, shock and disgust. There still exists, outside Washington, the notion that public servants ought not to wear masks when they dip into the public till.

But the deed is done and Congress has survived one more self-inflicted blow. Still, is it out of line to ask our elected representatives to start earning their $57,500 a year? It may be fruitless to seek a return to the credo, now discarded, that public service carries its own rewards. Yet there are opportunities for Congress to examine and mend its ways. A half-dozen imperatives come to mind:

One. Congress should provide real enforcement for the Code of Ethics that is the other half of the pay-raise bargain. The commission that recommended the raise made stiffened morality in Congress a condition, so merely enacting the Code in the form of House and Senate rules is not enough. Unless regulations for policing are effective, with the force of law, the new Code will fall back into the state of the old, which produced little surveillance, few penalties and a series of shattering scandals. The machinery is still to be set up, and an alert public should demand, as a minimum:

Means to guarantee that members finances will be fully disclosed.

Tight enforcement of a limit on outside earnings.

A watch on investments to discourage members from voting when there are possible conflicts of interest.

Strict and specific accountability for expense allowances.

A reliable and open system of auditing for all matters under the Code.

Two. Congress should see to it that future cost-of-living raises for itself, like the one due next October, are submitted to a vote. People are entitled to that much accountability.

Three. Congress should stop growing, spending and wasting at its present headlong pace and begin setting an example for the rest of Government in cutting out frills. In these times, simple decorum calls for a new look at mushrooming allowances, free gyms and pools and steam rooms and potted plants, fancy limousines for leaders, subsidized meals and insurance, frequent travel in the U.S. and often frivolous junkets abroad.

Four. Congress should stop trying to ram political hacks and cronies down the throat of the executive branch. It is a hiring practice that belongs to the past.

Five. Congress should co-operate in putting judiciary nominations under a merit system. The President has taken the first step by moving to set up regional committees that will recommend persons for the U.S. circuit bench. But the other traditional plums—district judges and U.S. attorneys—remain substantially under the thumbs of Senators. Therefore, for these positions, Attorney General Griffin Bell has asked the legislators to set up their own merit committees in the States, to choose names that will eventually reach the President. Some Senators have acted already; the rest should not delay.

Six. Congress should tackle again the job of pruning the congressional-committee structure, a thicket of power struggles, jealousies and overlapping authority. Last month the Senate almost succeeded in reducing its committees from 31 to 15, but that effort broke in the face of hard lobbying and then finally crumbled under the ambitions of entrenched chairmen. In the end it was almost a sham. The need for Senate reform is unsatisfied. And the House has not even tried this year.

If lawmakers will address these issues with vigor and openness, people may stop asking whether this new 95th Congerss is not just the same old gang, doing the same shameless things.

Mr. DOLE. Mr. President, it is no secret that the Senator from Kansas has serious reservations about this ethics resolution. Despite those reservations, however, this Senator supports the resolution and hopes that it will clear up some of the problems which Congress has been having with how it is perceived by the American people. But beyond that, the Senator from Kansas hopes that this resolution will help us keep our House in order in future years.

One reservation concerns the unfair, discriminatory treatment of earned versus unearned income. The proponents on our side of the issue effectively refuted the arguments which were made on behalf of the committee's position. Despite our arguments, however, the unfair treatment of these two kinds of income remains in the resolution.

Another consideration is that those of us who do receive honoraria pay a lot of that money back to the Government in taxes. For instance, for the years 1971 through 1975 my average tax liability, after paying withholding on my salary, was an amount totaling about 25 percent of my total Senate pay after taxes.

THE CONSTITUTIONAL QUESTION

In addition to other reservations about this provision, the Senator from Kansas fears that this may well be unconstitutional and introduced an amendment, which was accepted by the manager of the resolution, that mandates a study by the Judiciary Committee as to the constitutionality of this provision of the ethics resolution.

This Senator trusts that the committee will do a full, exhaustive study of the question. Basically, the question arises from the discrimination between classes of Senators. The chilling effect which this could have on participation in the political process, and the lack of a reasonable connection between the legitimate Government end which this bill pursues and the method which it uses in pursuit of that end.

After research and study into the various legal questions involved, we should have a meaningful study which will give us some insight into the constitutional validity of the code of conduct.

The Senator from Kansas will be looking forward to seeing the report of the committee. It could shed some light on this very serious question.

Mr. GARN. I understand that if an organization invites a Senator to make a speech, whether or not it involves an honorarium, the organization can pay the expenses for travel out and the accommodations for the night of the speech or the night after, if those are necessary expenses.

Mr. NELSON. That is correct.

Mr. GARN. My question for the floor manager is this: If an organization invites a Senator to make a speech and offers to bring his wife out as well, is the cost of her travel and accommodations for the day of the speech also "necessary expenses," or are those costs regarded as a gift to the wife?

Mr. NELSON. The committee's intent was that the expenses you described—the cost of travel and accommodations for the wife—would be regarded as part of the "necessary expenses." These costs would not be a gift to the wife.

Of course, if the Senator and his wife stayed at the city where the speech was made for a few days after the speech, if expenses were paid for them, these expenses would be a gift. But, of course, that would be true whether or not the Senator's wife was involved.

Mr. GARN. That is my understanding and I thank the Senator.

Mr. BAKER. Mr. President, I ask unanimous consent to have printed in the RECORD a statement on Senate Resolution 110 by the Senator from Texas (Mr. TOWER).

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR TOWER

I am opposed to passage of S. Res. 110, and I would like to comment briefly on my reasons for disagreeing with this approach to the question of congressional ethics.

I suppose that there are those who would consider it foolhardy for an elected official to oppose a so-called "ethics bill", and I have thought long and hard about my decision. I think we can all appreciate the need to restore a high level of public confidence in our government and in our elected officials, and it was with this goal in mind that we set about the task of constructing a clear and rational set of standards to govern our conduct as public officials.

Unfortunately, after months of drafting, and endless hours of floor debate, the end product of this effort is nothing more than a blatant public relations maneuver designed to justify the recent pay raise which Congress received. I did not vote for this pay raise; but even if I had, I find it demeaning to this Senate, and an insult to the intelligence of the American people, that we should endorse such a quid pro quo. This bill is a hoax, and it's full of discriminating exceptions for those who are wealthy enough to use them.

I have said on several occasions that I support the concept of public financial disclosure, and I would support those sections of this bill which require such public disclosure of income, as well as the sources of that income. But this bill goes far beyond that. This bill differentiates between outside "earned" income, and outside "unearned income", placing an arbitrary limitation on the former, and no limits whatsoever on the latter. In other words, if you happen to be a relatively wealthy individual with healthy investments, you are free to collect as much income as these endeavors will yield. But if you don't happen to be wealthy, then you are strictly limited in the amount of money you can earn beyond your Senate salary. If this sort of arrangement were set up in private industry, you would have every civil rights group crying "discrimination" in no time.

Proponents of the bill claim that these provisions are intended to prevent conflicts of interest. Following this premise then, we are supposed to believe that if a Senator has substantial investments in cotton, or tobacco, or if he owns stock in some sort of manufac-

turing concern, that he is less likely to be "influenced" by these interests than the Senator who accepts an honorarium for making a speech to the cotton farmers, or the tobacco industry, or to the national association of manufacturers. I simply don't buy that twisted line of reasoning. Nor do I believe that every Senator is up here casting votes with his own gain in mind.

In my opinion, the best way to prevent conflicts of interest is to let the public know what we earn, and where it comes from. Armed with this information, I think the public is quite capable of determining for themselves whether or not a public official is acting responsibly and responsively. I don't want to see this Senate turned into another faceless bureaucracy, where the overriding concern is not with the legislative business at hand, but rather with how many forms we have to fill out, and how many costly investigations we have to undertake, and that is just what we are doing here.

I think it is most appropriate that the Senate has chosen April Fool's Day to take final action on this bill, because it's a joke to think that there will be any real benefits accruing from this bill. I would hope, Mr. President, that the Senate will put aside public relations posturing, and get back to the business of enacting a sensible and responsible code of ethics.

Mr. LAXALT. Mr. President, from the outset of the discussion concerning the adoption of an "ethics code" of the U.S. Senate, I have entertained serious reservations about the whole matter.

After serving on the Select Conduct Committee and after observing the many hours of debate on the issue, both on the floor and in discussion with my colleagues, I have come to the conclusion that I cannot in good conscience vote for this piece of legislation.

Not because one is opposed to ethical conduct in the Senate. That is patently absurd. But rather because nothing in the past several weeks has convinced me that there is such a justification for the enactment of the restrictive provisions in this code which may well prove to be counterproductive and demeaning to the American people. Essentially what we are doing is telling the voters they do not have the wisdom to pass on the conduct and performance of their elected officials at the ballot box as should be done in a democracy. It is also demeaning to the Members of this body and to the institution itself.

The redeeming feature of the code is the inclusion of full public disclosure which is entirely necessary for the voter to make his decision at the ballot box. However, that positive step forward was negated by the imposition of countless do's and don'ts, all needless restrictions on individual freedoms.

It has been repeatedly said that the public demands that we do something in this field. Other than some general surveys, of rather doubtful value as far as I am concerned, I find no evidence of such strong public feeling.

In my own case, and I rather imagine the same is true of my colleagues, other than a few letters from members of Common Cause, we have heard nothing. Contrast that with the thousands of letters received by the Senators the past few weeks on common situs.

Perhaps the public has a far greater perception of what is important than the Senate.

It has been said that the passage of this code will help to raise public esteem of the Senate. That, to me, is sheer "poppycock." The real reason the public does not think well of us as an institution is not because we do not have a code of ethics, but because we just have not done a good job in addressing the serious problems of this country.

The fact that only 18 percent of the public give us a favorable rating is of no moment to me. The public just does not like institutions. It never has. It never will. They do not like doctors as a group. They certainly do not like lawyers as a group. On a "one-to-one" basis, this situation is wholly different.

I rather imagine that if Gallup surveyed the country a hundred years ago and asked if they approved of Congress the rating would not be materially different than it is now.

It has been said that as a "profession" we should have a code of the type utilized by the other professions such as the doctors, lawyers, and accountants. But the fact is that the situations are not analogous at all.

As a former member of a Board of Governors regulating the conduct of attorneys in Nevada, I never questioned the need for a code. We had no other method to employ sanctions for those few who would "stray from the corral of ethical conduct."

But we have a readily available sanction for errant Senators. It is forceful. It is final. I speak of course of the sanction of the ballot box.

It has been said that Senators should be "full time," whatever that means. In looking about the Senate I find that some of the most effective Senators are those who speak frequently around the country and those who necessarily spend time on their citizens investments. I have yet to see a case where these men have misplaced their priorities by emphasizing extra-Senate activities in preference to doing a job as a Senator.

I see great value in Senators spending as much time as possible, consistent with their responsibilities here, in the real world.

We must always remember that the heart of this system is in citizen politicians.

To me, the result of this code may well be a Senate in a few years composed of full time, noncitizen, technocrats. Then one would not be able to tell the difference between Capitol Hill and the agencies downtown. We will all be one happy, muted, bureaucratic family.

Then this independent and proud institution will be turned into a "Department of Legislation," complete with a bureaucratic manual on "How to Be an Honest U.S. Senator."

Then inevitably many good people, before running for the Senate, will pick up this manual and say, "The hell with it. I don't need that nonsense. What kind of an institution is this that needs moral suasion?"

It is a prospect that chills because if we ever reach the point that strong willed, independent, persons with strong views about innate ethical conduct, choose "not to run," the Senate, and in turn the country, will be irreparably damaged.

I guess what I am trying to say is that I am proud to be in the U.S. Senate. Today, when I face the prospect of this piece of legislation passing, almost entirely for reasons of raw political expediency sprinkled with far too much hypocrisy, I feel a little less proud.

That is bad for me, and probably bad for the Senate, for I fear that far too many of my colleagues share the same feeling.

(This concludes additional statements of Senators submitted on S. Res. 110.)

Mr. HUMPHREY. Mr. President, I should like to have the attention of the manager of the bill, the distinguished Senator from Wisconsin.

The PRESIDING OFFICER. May we have order in the Senate?

Mr. HUMPHREY. Mr. President, this code of official conduct that we will soon vote upon—and I trust will ratify by our vote—is a very important and a very sweeping measure in terms of rules of conduct of the Members of the U.S. Senate.

My concern is and my request is this: Once this body of rules is adopted, a copy of said body of rules, in layman's language, in a very well-prepared little booklet, should be made available to every Member of the Senate, to every staff member of the Senate, to all persons to whom this code of conduct applies.

Ignorance of the law, they say, is no defense. However, we are writing here a very elaborate system of code of conduct. I realize that it will be printed in our rules, but this does not apply merely to Members of the Senate. It applies also to the staff; it applies to spouse; it applies to members of families.

I suggest that, just as we receive a little booklet that gives us the names and addresses and telephone numbers of every Member of the Senate, we have a similar little publication that will give to every Member of the Senate and to all persons to whom this code applies, in layman's language that is easy to understand, what we have adopted here as a set of rules.

I would appreciate any comment that the manager of the bill would care to make.

Mr. NELSON. Mr. President, I agree with the distinguished Senator from Minnesota. We have had some discussion, but I cannot recall now whether it was in committee or on the floor. However, since the committee that conducted the hearings and prepared this code expires with the adoption of the code, that responsibility would fall upon the Ethics Committee, chaired by the distinguished Senator from Illinois (Mr. STEVENSON).

I believe it would be the hope and intent of the Senate that the appropriate committee—and I think it is the Ethics Committee—would prepare a summary

touching the main points, and there would also be available, of course, copies of the code itself. I intend to ask unanimous consent that the whole code be printed in full in the RECORD.

As the Senator from Minnesota well knows this code of conduct does not involve only 100 Members of the Senate. It involves some 2,000, I believe, staff people.

Mr. HUMPHREY. Exactly.

Mr. NELSON. Everybody is entitled to have in hand a copy of the code itself as well as a copy of a pamphlet that explains in direct, simple English what the code means. They should be informed, of course, that they can seek advisory opinions on any matter involving the code upon a request to the Ethics Committee.

Mr. HUMPHREY. May I add this: Is it my understanding that this code become effective in a couple of months from now?

Mr. NELSON. There are a number of effective dates that are different. Some of it becomes immediately effective.

As you know, the outside earned income limitation reporting date is January 1979; the first financial disclosure statement will be filed on May 15.

Mr. HUMPHREY. Of this year?

Mr. NELSON. Of 1978, covering the period starting October 1, 1977. So there are several dates within that code on which certain provisions become effective.

Mr. HUMPHREY. The only thing I want to be sure of is that whoever has the responsibility, that the interpretation of the code, the exact language of the code, and the preparation of the necessary documents that will give this information, will not fall between the boards of an ad hoc committee that goes out of business and an Ethics Committee that maintains itself as a continuing institution, because if there are parts of this code that go into effect immediately or within a few days, it is imperative that those persons who are to be affected by the code be fully informed.

I know we can say, "Well, it is in the CONGRESSIONAL RECORD." Well, you have got to have a love for reading if you want to read the CONGRESSIONAL RECORD. That is about as interesting a display of material in terms of the layout as McNamara's dead goat. (Laughter.)

You know, there is nothing there that anybody would be enticed into reading unless it was compulsory.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield so I may propound a unanimous-consent request and see if it meets the objection? I think the Senator from Minnesota has made an excellent suggestion.

I ask unanimous consent that in today's RECORD there appear an up-to-date synopsis of Senate Resolution 110, Official Code of Conduct, with amendments, to date.

There being no objection, the Synopsis was ordered to be printed in the RECORD, as follows:

To Senator R. C. Byrd.
From J. H. Duffy.
Re Synopsis of S. Res. 110, Official Code of Conduct, with amendments, to date.

Rule 42:

1. Each Senator, officer, or employee compensated at an annual rate in excess of $25,000, or who is authorized under Rule 49 to handle campaign funds, or who is a candidate for nomination or election to the Senate, shall file reports with the Secretary of the Senate not later than the 30th day after the individual first fulfills the filing requirements or May 15th of that calendar year, whichever is later.

2. Reports required to be filed shall include, per calendar year:

(1) amount and identity of source of each item of earned income (except for honoraria) in excess of $100;

(2) amount, source, date of each honorarium received and which, if any, were donated to charity;

(3) identity of each source of income (other than earned income) received in excess of $100 and the category in which it falls.

(a) up to $1,000;
(b) $1,000 to $2,500;
(c) $2,500 to $5,000;
(d) $5,000 to $15,000;
(e) $15,000 to $50,000;
(f) $50,000 to $100,000; and
(g) over $100,000.

(4)(a) any gifts described in paragraphs b and c of section 4 shall not be considered as income;

(b) identity of source, value, and description of gifts of transportation, lodging, food, or entertainment of $250 or more (except from a relative) must be reported, but personal hospitality for food, lodging, or entertainment need not be reported;

(c) gifts aggregating $100 or more from any one source other than a relative must be reported unless a waiver is granted by the Ethics Committee;

(d) gifts with a fair market value less than $35 need not be aggregated;

(e)(1) real property in excess of $1,000 must be disclosed; and

(2) personal property in a trade or business or for investment in excess of $1,000 in value must be disclosed;

(f) each personal liability owed in excess of $2,500 must be disclosed;

(g) each transaction in securities or commodities in excess of $1,000, except a gift to charity or transactions among immediate family, must be disclosed;

(h) transactions in real property in excess of $1,000 must be disclosed—acreage, location, etc., except for personal residence;

(i) identity of any patents or interests in patents must be disclosed;

(j) positions held in any corporation, firm, partnership, etc., must be disclosed; and

(k) contracts, agreements, etc., for private employment after the reporting individual leaves his Senate position or providing for a continuation of benefits from a prior employer other than the Federal Government must be disclosed.

If compensation is paid the reporting individual in excess of $5,000 in any of the two calendar years prior to the year in which an individual is required to report, then the identity of the person paying the compensation must be disclosed as well as the nature and term of the services.

3. (a) For purposes of subparagraphs (e) through (h), supra, actual dollar values need not be supplied, but there must be an indication of the category of values of each item:

(1) up to $5,000;
(2) $5,000 to $15,000;
(3) $15,000 to $50,000;
(4) $50,000 to $100,000;
(5) $100,000 to $250,000;
(6) $250,000 to $500,000;
(7) $500,000 to $1,000,000;
(8) $1,000,000 to $2,000,000;
(9) $2,000,000 to $5,000,000; and
(10) over $5,000,000.

(b) Value of real property need not be obtained by appraisal. The purchase price and the date of purchase will suffice. For personal property, however, the book value or net worth or equity value or other recognized indication of value and a description of the method used shall be reported.

(2) Earned income over $1,000 received by the spouse or dependents of a reporting individual must be disclosed but only the source and not the amount. Gifts to spouses or to adult dependents are to be reported only if they exceed $500 from any one source.

(3) No report relative to a spouse living separate and apart need be filed.

(d) Income and holdings of a trust must be disclosed unless not created by reporting individual, spouse, or dependents; the reporting individual, spouse, and dependents have no knowledge of contents; and the trustee refuses to disclose any information about trust holdings and income.

Where trust holdings and income must be reported, it should be done by category as in the case of unearned income (see subparagraph (a)(3) of paragraph 2, p. 4, of S. Res. 110).

Blind trusts need not be dissolved before May 15, 1978, and Governmental Affairs Committee has 6 months in which to study whether blind trust should be permitted.

(e) Report only what is actually known about trust corpus and income.

4. (a) Reports to be filed with Secretary of Senate by May 15 of the next year.

(b) Reports covering only a portion of a year shall be filed with the Secretary on the last day an office or position is occupied.

(c) Candidates seeking nomination or election shall file 30 days after qualifying or May 15th of that year, whichever is later.

(d) A copy of each report shall be provided to the Select Committee on Ethics.

(e) Senators and candidates shall file a financial disclosure statement with the Secretary of State in the State he represents or where he is a candidate.

(f) Extensions of time for filing may be granted by the Ethics Committee but total extensions shall not exceed 90 days.

(g) Comptroller General to provide assistance to any Member, officer, or employee.

5. (a) Secretary shall make reports available to the public within 15 days after receipt and provide copies on request.

(b) persons requesting report copies may be required to furnish names and addresses and organizations represented, and to pay reasonable fees.

(c) Secretary shall preserve each report for 7 years and then destroy.

(d) Ethics Committee to review all statements for timeliness and form.

(e) (1) and (2) Comptroller General to conduct random audits on about 5 percent of reports filed but shall audit at least one report filed by a Member during a 6-year term but not in an election year.

(3)(A) Comptroller General is authorized to request a subpoena from Ethics Committee for audit purposes.

(B) Comptroller may utilize outside consultants to assist him.

(4) Findings of each audit shall be given to Ethics Committee and person audited.

6. (a) Income tax return copies shall be furnished to Comptroller in sealed envelopes by May 15 in each year.

(b) Papers filed with Comptroller to be kept for not less than 7 years, sealed, but if Ethics Committee by majority vote requests individual reports, they shall be transmitted by Comptroller. Individual affected shall be notified in reasonable time of the vote and the nature and scope of the examination. Only members of Ethics Committee may open and examine contents of sealed envelopes.

Ethics Committee may decide to proceed further and allow Members and staff to examine papers and use papers for evidence after due notice and hearing opportunity.

Comptroller shall report by June 1st each year the names of Senators, officers, and employees who have filed. Papers on file with Comptroller for more than 7 years shall be returned to the files or to the spouse or representative.

(c) Comptroller may examine materials filed for purpose of conducting an audit.

(d) When a discovery order is issued by a competent court in a criminal proceeding involving a Member, officer, or employee and served on the Comptroller, the Comptroller shall:

(1) give reasonable notice to individual affected;

(2) make an authenticated copy of any report in a sealed envelope, reseal the report and attach copy to envelope with note that it was opened pursuant to discovery order; and

(3) appear in court and produce the authenticated copy.

A competent court is a Court of the United States, a State, or the District of Columbia, having general jurisdiction over criminal offenses against the U.S., a State, or D.C. Discovery includes a subpoena.

The Ethics Committee must establish procedures for the confidentiality of tax return information.

7. Definitions:

(a) "Commodity future"—Commodity Exchange Act, sections 2 and 5 (7 U.S.C. 2 and 5).

(b) "Comptroller General"—U.S. Comptroller General.

(c) "Dependent"—Internal Revenue Code of 1954, section 152.

(d) "Earned income"—outside earned income plus Senate salary.

(e) "employee of Senate"—salary paid by Secretary of Senate.

(f) "gift"—anything of value, money, food, transportation, entertainment, etc., unless equal consideration is received. Gift does not include political contributions, commercial loans, bequests or inheritances, or anything of value given to a spouse or a dependent by an employer in recognition of service.

(g) "income"—gross income (IRS sec. 61).

(h) "political contribution"—FECA (2 USC 431).

(i) "political expenditure"—FECA (2 USC 431).

(j) "relative"—immediate family, grandparents, uncles and aunts, nephews and nieces, in-laws, stepparents and stepchildren, first cousins.

(k) "Security"—SEC 1933 (15 USC 77b).

(l) "transactions in securities and commodities futures"—any acquisition, transfer, or disposition of securities or commodities.

Rule 43:

1. Was stricken by the Senate.

2. (a) prohibits Members, officers, and employees, spouses or dependents from accepting any gifts aggregating in excess of $100 from any person, organization, or corporation having direct interest in legislation unless Ethics Committee grants a waiver.

(b) the following having an interest in legislation:

(1) persons, organizations, or corporations registered under the Lobbying Act of 1946 or employed or retained by registered lobbyists, or

(2) a corporation, labor organization, or other organization having a separate, segregated fund for political purposes, or an officer, director or employee of such organizations.

(c) the prohibitions on gifts do not apply to:

(1) relatives;

(2) gifts of less than $35 in value;

(3) personal hospitality of an individual;

(4) meals and entertainment from a lobbyist; and

(5) gifts from a foreign national not acting for a foreign organization or government.

3. (a) For purposes of Rule 43, a gift is a payment, subscription, advance, money, food, services, entertainment, transportation or anything of value but shall not include:

(1) political contribution;

(2) a commercial loan;

(3) bequest or inheritance;

(4) bona fide public award;

(5) reception honoring a Member, officer, or employee within the limitations on gifts other than a suitable memento; and

(6) anything of value to a spouse or dependent in recognition of service.

(b) term "relative"—same as rule 42, 7(j)

4. If a gift is accepted unknowingly except a prohibited gift as set forth in paragraph 2, supra, it shall be returned or the donor reimbursed.

Foreign travel paid for by a foreign foundation may be accepted by Members, Officers, and Employees if approved by the Select Committee on Ethics.

Rule 44:

1. No Senator, officer, or employee who is compensated at an annual rate in excess of $35,000 and employed for more than 90 days in a calendar year, shall receive any outside earned income exceeding 15 percent of salary.

2. (a) Honoraria for a Senator shall not exceed $1,000 per appearance, speech, or article.

(b) Honoraria for an officer or employee shall not exceed $300 per appearance, speech, or article nor $1,500 in any calendar year.

(c) Honoraria in excess of limits of (a) and (b) supra and up to $25,000 per calendar year may be accepted if such honoraria are immediately to a tax exempt organization and if no tax benefit accrues for such donation.

3. (a) "Outside earned income" means any income received as the result of personal services rendered if such services are material income factors.

(b) "Outside earned income" includes honoraria, stipends, advances on books, or creative or artistic works.

(c) "Outside earned income" does not include:

(1) royalties from books;

(2) income from family enterprises where services are not material income producing factors;

(3) gains from property, dealings, or investments;

(4) interests;

(5) rents;

(6) dividends;

(7) alimony or separate maintenance;

(8) annuities;

(9) income from discharge of debts;

(10) partnership income where there is no material income producing factors;

(11) income from estate or trust;

(12) sale of creative or artistic works; and

(13) fair market "buy-out" arrangements of business or partnership.

Rule 45:

1. No Member, officer, or employee shall receive any compensation resulting from improper influence.

2. Outside business, professional activity, or employment for compensation in conflict with official duties is barred.

3. Officers and employees may not engage in any outside business or professional activity unless he reports when such activity begins and annually thereafter by May 15th and is given approval by his supervisor.

4. Members, officers, and employees shall not introduce or support legislation designed to benefit him or his family.

5. A Member may decline to vote on any matter which he believes would be a conflict of interest.

6. Members, officers, and employees who are compensated at an annual rate in excess of $25,000 shall not provide professional services for compensation during regular office hours of the Senate office in which employed. "Professional services" includes those which involve a fiduciary relationship.

7. Members, officers, and employees are prohibited from serving on publicly-held or regulated corporation, financial institution, or business board. The prohibition shall not apply when service is without any compensation on a board of a tax exempt organization; on organizations principally available to Senators, officers, or employees, or when service on a board has existed for 2 years prior to coming to the Senate, the amount of time spent is minimal, and there is no conflict of interest. Applies only to those compensated in excess of $25,000.

8. Senate committee staff compensated at a rate in excess of $25,000 per year shall divest himself of any holdings which may constitute a conflict of interest with his employing committee unless approved by his supervisor and the Ethics Committee.

9. Members who leave office may not lobby Members, officers, or employees for one year.

10. Staff members who leave may not lobby his employing Member or that Member's staff for one year. Committee staff members who leave may not lobby the Members of the employing committee or its staff for one year.

11. (a) "Senate employee"—see Rule 49

(b) Subcommittee staff are treated as committee staff

(c) "lobbying"—is any oral or written communication to influence content or disposition of pending measures, but does not include:

(A) communications such as testimony before a committee or submitted for the period; and

(B) personal communications to express an opinion privately.

12. For this Rule, supervisors are:

(a) a Senator or Vice President for his staff;

(b) a chairman for committee staff but minority staff shall be supervised by the ranking minority Member;

(c) subcommittee chairman and the ranking minority Member for the Majority and Minority staffs respectively;

(d) President pro tem for the Secretary of the Senate, Sergeant-at-Arms and Doorkeeper, the Chaplain, Legislative Counsel and employees of the Legislative Counsel;

(e) Secretary of the Senate for his employees;

(f) Sergeant at Arms and doorkeeper for his employees;

(g) Majority and Minority Leaders and Majority and Minority Whips for their employees;

(h) Majority Leader for the Secretary for the Majority and the Secretary for the Majority for his employees; and

(i) Minority Leader for the Secretary for the Minority and the Secretary for the Minority for his employees.

Rule 46:

1. Unofficial office accounts are barred. No Member may receive funds for the purpose of defraying unreimbursed expenses relative to the operation of a Member's office.

Excluded are:

(a) personal funds;

(b) appropriated funds;

(c) political committee funds; and

(d) reasonable reimbursements.

2. No political contribution shall be converted to the personal use of any Member or former Member. Personal use does not include any reimbursement of expenses incurred in connection with official duties.

Rule 47:

1. Prohibits foreign travel by any Member after:

(a) defeat in a general election; and

(b) sine die adjournment of the date of the general election, in the case of a Member who is not a candidate.

2. No Member, officer, or employee may accept funds for any expense for which he has been reimbursed from any other source, nor receive double reimbursement from the U.S. Government, nor use funds furnished except for purposes funds were furnished.

3. Per diem allowances shall be used for appropriate expenses and unexpended balances shall be returned.

Rule 48:

1. Prohibits Senators and candidates from using mass mailings 60 days before the date of any election in which the individual is involved.

2. Only official funds shall be used to purchase, print, or prepare any mass mailing under the frank.

3. (a) mass mailings shall be registered annually with the Secretary of the Senate. Copies of mailings shall be furnished, except as to the number of pieces. A description of the group(s) to whom mass mailings were sent shall be provided.

(b) Secretary of the Senate shall make reports available to the public.

4. This rule shall not apply to inquiries from or responses to persons to whom mail is sent, Members of Congress, Government officials, or news releases.

5. Senate computer facilities shall not be used to store campaign contributors, workers, party members, or other partisan political purposes.

6. (a) Senate and House radio and television studios may not be used by Senators or candidates less than 60 days prior to any election.

(b) Exception if facilities are used at the expense and request of licensed broadcast organizations exempt from taxation [IRS code, sections 501(c)(3)]

Rule 49:

1. Prohibits any officer or employee of the Senate from handling any campaign funds except that 2 staff aides in the District of Columbia or 2 staff aides in the Member's home State may be designated by the Senator to perform any function *except* solicitation. Such aides must be compensated at a rate in excess of $10,000 per year and authorized in writing by the Senator to the Secretary of the Senate.

Any such authorized aid(s) must file financial statements with the Secretary of the Senate.

2. (a) an "employee" is any employee paid by the Secretary of the Senate

(b) any reemployed Government consultant's compensation shall be totaled for purposes of the rule.

3. Any officer or employee of the Federal Government, utilized by any Senate committee, shall agree in writing to comply with the Senate Code of Official Conduct.

4. Full-time services of an individual for more than 90 days shall be prohibited unless the individual:

(a) is an officer or employee of the Senate;

(b) is an officer or employee of the Government (other than the Senate); and

(c) agrees in writing to comply with the Code of Official Conduct (and any such person shall be treated as an employee of the Senate).

Rule 50:

No Member, officer, or employee shall:

(a) refuse to hire an individual;

(b) discharge an individual;

(c) discriminate against an individual on the basis of race, color, religion, national origin, *age*, or state of physical handicap.

Title II—Ethics Committee:

Sec. 201. Sec. 2(a) of S Res. 338, 88th Congress, July 24, 1964, is amended by inserting "violations of the Senate Code of Official Conduct" after the words "violations of Law" in paragraph (1).

Sec. 202(a). Sec. 2 of S. Res. 338 added new subsections:

(b)(1) Each complaint shall be in writing, in proper form, and under oath.

(2) Sworn complaint: —personal knowledge, alleging a violation of law, Senate Code of Official Conduct, or other rule or regulation of the Senate.

(3) knowing or willing perjury may be referred to the Attorney General.

(4) Ethics Committee may propose an appropriate remedy for any violation it deems to be neither of a de minimus nature nor sufficiently serious to justify censure or expulsion.

A summary of the Ethics Committee's conclusions shall be filed with the Secretary of the Senate as a public record.

(5) Ethics Committee to determine in the event of credible evidence whether:

(A) the violation is serious enough to warrant Senate action per section (a)(2) of S. Res. 338.

(B) less serious violations shall be reported by the Ethics Committee to the Senate.

(6) Investigations relative to the conduct of an officer shall be reported to the Senate as soon as practicable.

(d)(1) Ethics Committee to conduct a prompt review of complaints to determine substantial credible evidence as to a violation of the Code.

(2) If no credible evidence, the Ethics Committee shall report such to the complainant and the party charged.

(3) Inadvertent, technical, or de minimus violations are to be handled by informal methods.

(4) Ethics Committee may devise remedies for violations which are neither of a de minimus nor of a serious nature. Summaries of the Ethics Committee findings will be filed with the Secretary of the Senate.

(5) The Ethics Committee shall determine if there is substantial credible evidence to warrant serious penalties or something less.

(6) Ethics Committee to report to the Senate its findings.

(e) Complaints against an employee shall be handled according to appropriate procedures. If a complaint has no merit, the complainant and the accused shall be so notified.

(f) Ethics Committee may employ hearing examiners to hear testimony and make findings or recommendations.

(g) This section precludes any alleged violations occurring prior to the effective date of the Code of Official Conduct. However, the Ethics Committee may review or investigate any prior alleged violation not resolved on the merits by its predecessor, Select Committee on Standards and Conduct.

(h) The Ethics Committee shall adopt rules and procedures.

Sec. 203. S. Res. 338 is amended:

(e)(1) a member of the Ethics Committee shall not participate in any review or investigation of his own conduct (or a member of his staff).

(2) a member of the Ethics Committee may disqualify himself from participating in any investigation pending before the Committee.

(3) whenever any member of the Ethics Committee disqualifies himself or is ineligible to participate in an investigation, another Member of the Senate shall be appointed, if qualified, to serve as a temporary Member.

Sec. 204. Section 3 of S. Res. 338 is amended:

(1) by inserting after "fix the compensation of" in subsec. (a)(7) the following: "a staff director, a counsel, an assistant counsel, one or more investigators, one or more hearing examiners, and," and

(2) the Select Committee is authorized to employ outside counsel when necessary or appropriate.

Sec. 205. Section 2(a) of S. Res. 338 is amended by adding after "disciplinary action" the following: "including, but not limited to, in the case of a Member: censure, expulsion, or recommendation to the appropriate party conference regarding the Member's seniority or positions of responsibility; and in the case of an officer or employee: suspension or dismissal."

Sec. 206. Amends Section 3 of S. Res. 338:

(e)(1) Select Committee shall prescribe and publish necessary regulations to implement the Code of Conduct.

(2) Select Committee is authorized to issue interpretative rulings of law, the Code, or any rule within its jurisdiction.

(3) Select Committee shall issue advisory opinions in response to requests from Members or officers or candidates concerning the application of any law, the Code of Conduct, or any rule or regulation of the Senate relative to a factual situation.

(4) The Select Committee may, in its discretion, issue an advisory opinion to an employee.

(5) Reliance upon an advisory opinion and good faith action on such opinion will protect individuals who receive such opinions from any sanction of the Senate.

(6) Individuals may rely upon an advisory opinion issued if the request for an opinion included a complete and accurate statement of the specific fact situation. Any person who is involved in a specific fact situation which is indistinguishable from that for which the opinion was issued may also rely on the opinion.

(7) Any advisory opinion issued shall be printed in the *Congressional Record* with suitable deletions to assure privacy of persons involved. Interested parties should be given opportunity to submit written comments to the Select Committee prior to the issuance of an opinion.

Title III—Miscellaneous; Effective Dates

Sec. 301. Within 120 days after S. Res. 110 is agreed to, the Committee on Appropriations shall report to the Senate legislation to adjust amounts and uses of Senatorial allowances. (The Rules and Administration Committee was deleted from this section.)

Sec. 302. The Appropriations Committee and the Finance Committee shall review the Internal Revenue Code relative to tax status of funds raised and expended to defray ordinary and necessary expenses of a Member. (Rules and Administration Committee was deleted from this section.)

The Committee shall have 120 days after adoption of S. Res. 110 to report their findings to the Senate.

Sec. 303(a). The Committee on Rules and Administration shall review the desirability of promulgating rules and regulations for:

(1) periodic audits by GAO of all offices and committees of the Senate;

(2) central system of recordkeeping and reporting accounts, allowances, expenditures and travel;

(3) procedures for handling accounts of committees and Members' offices; and

(4) public disclosure of accounts of committees and offices of the Senate.

(b) The Committee shall report the results of its review to the Senate within 120 days after adoption of S. Res. 110.

Sec. 304(a). The Rules Committee shall review desirability of requiring only official Senate funds for payment of Senate radio-television studio expenses.

(b) Rules Committee to report its findings in 120 days after S. Res. 110 is adopted.

Sec. 305(a). Foreign Relations Committee is to review the problem to travel, lodging, and related expenses provided to Members, officers, and employees paid for by foreign governments where it is not possible to procure transportation, lodging, etc., or to reimburse the foreign government.

(b) The Committee shall report results of its review and recommendations within 90 days after S. Res. 110 is adopted.

Sec. 306(a). Governmental Affairs shall review desirability of permitting:

(1) use of franked mail to simplified addresses in Senator's State.

(2) franked mail but simplified address which is:

(A) to be prepared by Postal Services, and

(B) to be delivered to:

(i) each boxholder or family on a rural or star route;

(ii) each post office boxholder; and

(iii) each stop or box on a city carrier route.

(b) the committee shall report its findings and recommendations within 120 days after adoption of S. Res. 110.

Sec. 307. The Rules Committee shall study laws relating to contributions solicited from or made by officers or employees of the Senate and report results and recommendations within 180 days after adoption of S. Res. 110.

Sec. 308. Rules Committee to report within 180 days after adoption of S. Res. 110 proposals to prohibit misuse of official staff by holders of public office in campaigns for nomination or election to Federal office.

Sec. 309(a). Governmental Affairs Committee shall study handling of employment discrimination complaints.

(b) the committee shall report results and recommendations within 180 days after adoption of S. Res. 110.

(c) Governmental Affairs recommendations shall be referred to the appropriate committee for not to exceed 60 days.

Sec. 310(a). Amendments to the Standing Rules of the Senate made by Title I and Title II shall take effect on the day after the day on which S. Res. 110 is adopted.

(b)(1) Rule 42 of the Standing Rules of the Senate as amended by Title I of S. Res. 110 relating to public financial disclosure shall take effect on October 1, 1977. Statements required to be filed thereunder, on or before May 15, 1978, shall cover the period October 1, 1977, through December 31, 1977, except any individual may opt to cover all of calendar year 1977.

(2) Rule 44, as it existed prior to the Title I amendments of S. Res. 110, shall remain in effect through September 30, 1978, and the statement to be filed on or before May 15, 1979, shall cover the period January 1, 1978, through September 30, 1978, or all of calendar year 1978 at the option of the individual.

(c) Rule 44, as amended by Title I of S. Res. 110 relating to outside earned income shall take effect January 1, 1979.

(d) Paragraphs 6, 7, 8, 9, and 10 of Rule 45 as amended by Title I of S. Res. 110 on conflict of interest shall take effect on April 1, 1978.

(e) Rule 46, as amended by Title I of S. Res. 110, prohibiting unofficial office accounts shall take effect as follows:

(1) the day after S. Res. 110 is agreed to, no contributions may be received.

(2) expenditures from an unofficial office account shall cease December 31, 1977.

(f) Rule 48 relating to the franking privilege and radio and television studios shall take effect on January 1, 1978.

(g)(1) Paragraph 1 of Rule 49 shall take effect 30 days after S. Res. 110 is agreed to.

(2) Rule 43 shall remain in effect for 30 days after S. Res. 110 is adopted.

(h) Rule 50 (employment practices) shall take effect January 3, 1979.

(i) Amendments to S. Res. 338 contained in sections 202 and 203 of Title II of S. Res. 110 shall take effect 30 days after the resolution is agreed to.

Mr. ROBERT C. BYRD. Now, Mr. President, I ask unanimous consent—I have not discussed this with the chairman of the Committee on Ethics—that the Committee on Ethics, assisted by the staff of the Nelson Special Committee on Official Conduct—prepare such a compendium as the distinguished Senator from Minnesota has recommended; that there be a time limit—that the Committee on Ethics, with the assistance of the staff of the Nelson committee, prepare such a summary in layman's language and quoting the pertinent areas of the code within a period of 30 days, and that such compendium be printed as a Senate document. We can change the time from 30 to 60 days.

Mr. HUMPHREY. That meets my concerns. I was going to make that motion, but I am pleased the majority leader has done so.

I think this will be very helpful, may I say. Might I add that every person this code affects must receive a copy of said compendium, said analysis and summary. We should not take any chances here, because this is a field day for an investigative reporter, and I just want to be sure we all know exactly what we are doing. I am going to vote for the code. I commend the Senator from Wisconsin for his diligence and for his incredible patience and, above all, for his sense of fair play.

Mr. McCLURE. Mr. President, will the Senator yield for a question?

Mr. HUMPHREY. Yes.

Let me first yield to the Senator from Illinois.

Mr. STEVENSON. Mr. President, will the Senator yield to me so I might also respond to the Senator?

The PRESIDING OFFICER (Mr. METZENBAUM). Under the previous order, the hour of 11:15 a.m. having arrived, the Senate will now proceed to vote on the adoption of Senate Resolution 110.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the vote on the code be delayed for 3 minutes.

Mr. GOLDWATER. I object.

Mr. ROBERT C. BYRD. Two minutes?

Mr. GOLDWATER. No.

Mr. ROBERT C. BYRD. One minute?

Mr. GOLDWATER. We have been sitting around here for 2 weeks and we are ready to vote.

Mr. ROBERT C. BYRD. Vote.

The PRESIDING OFFICER. The question is on agreeing to the resolution, as amended.

Mr. BROOKE. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

The PRESIDING OFFICER. Will the Members of the Senate retire to their seats so the rollcall may be heard by each of the Members?

The clerk may proceed.

The assistant legislative clerk resumed the call of the roll.

Mr. MUSKIE (when his name was called). On this vote I have a pair with the distinguished Senator from Washington (Mr. MAGNUSON). If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." I withhold my vote.

The assistant legislative clerk resumed and concluded the call of the roll.

Mr. CRANSTON. I announce that the Senator from Washington (Mr. MAGNUSON) is necessarily absent.

I futher announce that the Senator from Hawaii (Mr. INOUYE) is absent on official business.

Mr. STEVENS. I announce that the Senator from Kansas (Mr. PEARSON) and the Senator from Texas (Mr. TOWER) are necessarily absent.

I further announce that, if present and voting, the Senator from Texas (Mr. TOWER) would vote "nay."

The result was announced—yeas 86, nays 9, as follows:

[Rollcall Vote No. 94 Leg.]

YEAS—86

Abourezk	Eastland	Melcher

PRESENT AND GIVING A LIVE PAIR—1

Muskie, against.

NOT VOTING—4

Inouye	Pearson	Tower
Magnuson		

So the resolution (S. Res. 110), as amended, was agreed to.

Mr. NELSON. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. THURMOND. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CODE OF ETHICS—SENATE RESOLUTION 110

Mr. ROBERT C. BYRD. Mr. President, I renew a request made earlier, though slightly modified. I ask unanimous consent that an analysis be prepared of the provisions of the code of ethics, using the distinguished former Vice President's language, "in lay language," so that such a code will be readily understandable by the Members, officers, and employees of the Senate. I ask unanimous consent that the Committee on Ethics be directed to provide for the Senate within 60 days such a compilation of these provisions, its analysis thereof, and that such a code of conduct be printed as a Senate document.

Mr. BAKER. Reserving the right to object, Mr. President, would the majority leader consider a request to have a final version of Senate Resolution 110, with all of the amendments embodied in it, printed as a Senate document and an appropriate number of copies provided, in addition to the summary and synopsis?

Mr. ROBERT C. BYRD. Yes. I include that in my request, Mr. President. Possibly by Monday the distinguished minority leader and I can join in offering a resolution which would provide for the printing of sufficient copies to supply the Members and employees of the Senate.

Mr. BAKER. I thank the majority leader. I am told by our staff on the Rules Committee that it may take as many as 5,000 copies if we are to have good circulation.

Mr. ROBERT C. BYRD. That would require a resolution.

Mr. McCLURE. Mr. President, reserving the right to object, and I shall not object, if there had been the opportunity before the vote on this resolution, I would have suggested that it might have been wise for us to delay the effective date of the enactment until this compilation is available to Members, their staffs, and the public. I suspect that in spite of the lengthy debate we have gone through on this resolution there are a good many Members of this body who do not know what is in the resolution. The sponsors and the floor manager confess that on numerous occasions they were unable to give precise explanations of the effect of the resolution under certain facts and situations. I think it might have been well for us to have had the explanation at least before the resolution goes into effect, if not before it was voted upon. That was not possible, because of the objection of the Senator from Arizona that forced us to go to an immediate vote.

I think it is unfortunate that we legislate when we must immediately confess during the process of the vote that we do not know what it means. Yet that is just what we have done.

I withdraw my objection.

Mr. STEVENSON. Mr. President, reserving the right to object, on the question of the Ethics Committee putting together within 60 days an explanation in layman's language of what this code does on its face, I would hope that the request propounded by the distinguished majority leader did not go beyond that. The code establishes procedures for advisory opinions and interpretative rulings. Those procedures will fill in the cracks and interpret the provisions of the code over a period of months and perhaps years.

If the Ethics Committee is expected to interpret all of the provisions and to fill all of the cracks within 60 days, then the request is an impossible one with which to comply. I would hope it can be clarified to make clear that the Ethics Committee is only expected, within this period of time, to interpret, in layman's language, this code and what it does on the face of it and, to the extent it is possible, to go beyond that. It will not be possible to interpret everything.

Mr. ROBERT C. BYRD. Mr. President, I am going to withdraw my request at this time. I feel we should consult with Mr. NELSON, Mr. THURMOND, Mr. STEVENSON, and Mr. SCHMITT as to just what kind of a request we want to present.

Mr. STEVENSON. Will the majority leader yield further?

Mr. ROBERT C. BYRD. I yield.

Mr. STEVENSON. The Ethics Committee will undertake, to the extent possible, without a unanimous-consent agreement, to interpret this code.

It will also undertake, as has been suggested, to advise all the Members in advance of the effective date of every provision in this code, starting today. In response to the Senator from Idaho and others who have expressed concern, I will attempt, with the vice chairman of the Ethics Committee, to place in the RECORD today a statement apprising every Member of every provision of this code which goes into effect immediately and in the near future.

That is a practice that the Ethics Committee will maintain as the provisions come into effect and that we shall begin today.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. President, I withhold that request until I have had further opportunity to consult with the minority leader and the other Senators mentioned. At that time, I think we shall introduce a resolution to provide for the printing of the appropriate number of copies.

Mr. BAKER. Will the majority leader yield for just a moment?

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. I hope he will still ask that a final print of Senate Resolution 110 be compiled so we may have that to work with.

Mr. ROBERT C. BYRD. Yes.

Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make technical and clerical corrections in the engrossment of the amendments to Senate Resolution 110 and that Senate Resolution 110, as amended, be printed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I further ask unanimous consent that Senate Resolution 110, as amended, be printed in the CONGRESSIONAL RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. RES. 110

Resolved, That this resolution may be cited as the "Official Conduct Amendments of 1977".

TITLE I—CODE OF OFFICIAL CONDUCT

SEC. 101. The Standing Rules of the Senate are amended—

(1) by striking out rules XLI, XLII, XLIII, and XLIV; and

(2) by renumbering rule XLV as rule XLI, and by adding after such rule the following new rules which shall be known as the "Senate Code of Official Conduct":

"RULE XLII

"PUBLIC FINANCIAL DISCLOSURE

"1. (a)(1) Each individual who for a period in excess of ninety days during a calendar year is a Senator, or an officer or employee of the Senate who is compensated at a rate in excess of $25,000 a year, shall file a report containing a full and complete financial statement for that calendar year.

"(2) Each employee designated under rule XLIX to handle campaign funds during any calendar year shall file a full and complete financial disclosure statement for that calendar year.

"(b) Each individual described in subparagraph (a) who during any calendar year ceases to occupy an office or position described in such subparagraph shall file a report containing a full and complete financial statement for that portion of such year beginning on January 1 and ending on the date on which he ceases to occupy such office or position.

"(c) Any individual who seeks nomination for election, or election, to the office of United States Senator shall file in any year in which such individual has—

"(1) taken the action necessary under the law of a State to qualify for nomination for election, or election, or

"(2) received political contributions or made expenditures, or has given consent for any other person to receive political contributions or make expenditures, with a view to bringing about such individual's nomination for election, or election, to such office,

a report containing a full and complete financial statement for the preceding calendar year.

"(d) The Secretary of the Senate shall submit annually to the Select Committee on Ethics (hereinafter referred to as the 'Select Committee') a complete list of Members, officers, and employees of the Senate who are required to file a report under this paragraph and shall submit at the close of each calendar quarter a list of individuals required to file such report who have begun or terminated employment with the Senate or been designated pursuant to rule XLIX.

"2. Each individual shall include in each report for each calendar year for which he is required to file a report under paragraph 1 a full and complete statement, in such manner and form as the Select Committee shall prescribe, which contains the following:

"(a)(1) The amount and the identity of each source of earned income (exclusive of honoraria) received during such calendar year which exceeds $100 in amount or value;

"(2) the identity of the source, the amount, and the date, of each honorarium received during such calendar year and an indication of which honoraria, if any, were donated to a charitable organization pursuant to paragraph 2(c) of rule XLIV; and

"(3) the identity of each source of income (other than earned income) received during such calendar year which exceeds $100 in amount or value, and an indication of which the following categories the amount of value of such item of income is within:

"(A) not more than $1,000,

"(B) greater than $1,000 but not more than $2,500,

"(C) greater than $2,500 but not more than $5,000,

"(D) greater than $5,000 but not more than $15,000,

"(E) greater than $15,000 but not more than $50,000,

"(F) greater than $50,000 but not more than $100,000, or

"(G) greater than $100,000.

"(4) For purposes of clauses (1) and (3) any gift described in subparagraphs (b) and (c) of this paragraph shall not be considered as income.

"(b) The identity of the source, a brief description of, and the value of any gifts of transportation, lodging, food, or entertainment aggregating $250 or more provided by any one source other than a relative during the calendar year except that any food, lodging, or entertainment received as part of the personal hospitality of any individual need not be reported.

"(c) The identity of the source, a brief description of, and the value of all other gifts aggregating $100 or more from any one source other than a relative during the calendar year unless, in an unusual case, a waiver is granted by the Select Committee.

"(d)(1) Gifts with a fair market value of less than $35 need not be aggregated for the purposes of subparagraphs (b) and (c) of this paragraph.

"(2) In aggregating gifts for purposes of subparagraphs (b) and (c) of this paragraph, the reporting individual may deduct from the total value of gifts received from any source during the calendar year the total value of gifts given by the reporting individual to that source during the calendar year, except that, if gifts with a fair market value of less than $35 received from that source are not aggregated, gifts with a fair market value of less than $35 given to that source may not be deducted.

"(e)(1) The identity and category of value of each item of real property held, directly or indirectly, during such calendar year which has a fair market value in excess of $1,000 as of the close of such calendar year; and

"(2) the identity and category of value of each item of personal property held, directly or indirectly, during such calendar year in a trade or business or for investment or the production of income which has a fair market value in excess of $1,000 as of the close of such calendar year.

"(f) The identity and category of value of each personal liability owed, directly or indirectly, which exceeds $2,500 at any time during such calendar year.

"(g) The identity, date, and category of value of any transaction, directly or indirectly, in securities or commodities futures during such calendar year exceeding $1,000, except that (1) any gift to any tax-exempt organization described in section 501(c)(3) of the Internal Revenue Code of 1954 involving such a transaction need not be reported, and (2) any transaction solely by and between the reporting individual, his spouse, and dependents need not be reported.

"(h)(1) The identity, date, and category of value of any purchase, sale, or exchange, directly or indirectly, of any interest in real property during such calendar year if the value of the property involved in such purchase, sale, or exchange exceeds $1,000 as of the date of such purchase, sale, or exchange, except that (1) any gift to any tax-exempt organization described in section 501(c)(3) of the Internal Revenue Code of 1954 involving such a transaction need not be reported, and (2) any transaction solely by and between the reporting individual, his spouse, or dependents not be reported.

"(2) For the purposes of subparagraph (e) (1) of this paragraph and clause (1) of this subparagraph the identity of an item of real property shall include the number of acres of property (if there is more than one acre), the exact street address (except with respect to a personal residence of a reporting individual), the town, county, and State in which the property is located, and if there are substantial improvements on the land, a brief description of the improvements (such as 'office building').

"(i) Any patent right or any interest in any patent right, and the nature of such patent right, held during such calendar year.

"(j) The identity of all positions held as an officer, director, trustee, partner, adviser, proprietor, agent, employee, or consultant of any corporation, company, firm partnership, or other business enterprise, any nonprofit organization, and any educational or other institution.

"(k) A description of, the parties to, and the terms of any contract, promise, or other agreement between such individual and any person with respect to his employment after such individual ceases to occupy an office or position described in paragraph 1, including any agreement under which such individual is taking a leave of absence from an office or position outside of the United States Government in order to occupy an office or position described in paragraph 1, and a description of and the parties to any agreement providing for continuation of payments or benefits from a prior employer other than the United States Government.

An officer or employee of the Senate required to file a report under paragraph 1 shall include in such report the identity of any person, other than the United States Government, who paid such individual compensation in excess of $5,000 in any of the two calendar years prior to such calendar year and the nature and term of the services such individual performed for such person. The preceding sentence shall not require any individual to include in such report any information which is considered confidential as a result of a privileged relationship, established by law, between such individual and any person nor shall it require an individual to report any information with respect to any person for whom services were provided by any firm or association of which such individual was a member, partner, or employee unless such individual was directly involved in the provision of such services.

"3. (a) For purposes of subparagraphs (e) through (h) of paragraph 2, an individual need not specify the actual amount or value of each item required to be reported under such subparagraphs, but such individual shall indicate which of the following categories such amount or value is within:

"(1) not more than $5,000,

"(2) greater than $5,000 but not more than $15,000,

"(3) greater than $15,000 but not more than $50,000,

"(4) greater than $50,000 but not more than $100,000,

"(5) greater than $100,000 but not more than $250,000,

"(6) greater than $250,000 but not more than $500,000,

"(7) greater than $500,000 but not more than $1,000,000,

"(8) greater than $1,000,000 but not more than $2,000,000,

"(9) greater than $2,000,000 but not more than $5,000,000, or

"(10) greater than $5,000,000.

"(b) For the purposes of subparagraph (e) of paragraph 2, if the current value of an interest in real property (or an interest in a real estate partnership) is not ascertainable without an appraisal, an individual may list the date of purchase and the purchase price of the interest in the real property instead of specifying a category of value pursuant to subparagraph (a) of this paragraph. If the current value of any other item required to be reported under subparagraph (e) of paragraph 2 is not ascertainable without an appraisal, such individual may list the book value of a corporation whose stock is not publicly traded, the net worth of a business partnership, the equity value of an individually owned business, or with respect to other holdings, any recognized indication of value but such individual shall include in his report a full and complete description of the method used in determining such value.

"(c)(1) For the purposes of subparagraphs (a) through (c) of paragraph 2, the individual need only report the source, not the amount, of any earned income over $1,000 or gifts over $100 ($250 in the case of transportation, lodging, food, or entertainment) received by a spouse or minor dependent, and of gifts of over $500 received by an adult dependent, but with respect to earned income, if his spouse or minor dependents are self-employed in his or her own business or profession, only the nature of such business or profession need be reported.

"(2) For the purposes of subparagraph (a)(3) and subparagraph (d) through (j) of paragraph 2 a reporting individual shall also report the interests of the spouse or dependents of that individual if such interests are within the constructive control of the reporting individual. For the purposes of this subparagraph, an interest is in the constructive control of a reporting individual if the enhancement of the interest would substantially benefit the reporting individual.

"(3) No report shall be required with respect to the interests of a spouse living separate and apart from the reporting individual.

"(d)(1) Except as provided herein and at clause (2) of this subparagraph, the holdings of and income from a trust or other financial arrangement from which the reporting Senator, officer, or employee or the spouse or dependents of such reporting individual receives income or has an equity interest in must be publicly reported according to the provisions of paragraph 2, except that the identity of the holdings and the sources of a trust's income need not be disclosed if—

"(A) the trust was not created directly or indirectly by the reporting individual, his spouse, or dependents,

"(B) the reporting individual, his spouse, and dependents have no knowledge of the contents or sources of income of the trust, and

"(C) the reporting individual has requested the trustee to provide information with respect to the holdings and sources of income of the trust and the trustee refuses to disclose the information.

However, where the identity of the holdings and the sources of income of a trust need not be disclosed, the reporting individual must list the category of the net cash value of his interest in the told trust holdings under subparagraph (e) of paragraph 2, and must list the category of the amount of the income from the trust under subparagraph (a)(3) of paragraph 2.

"(2) Since it is the policy of the United States Senate that Senators, and officers and employees of the Senate make full and complete public financial disclosure of financial holdings, it is the sense of the Senate that trusts established for the purpose of being 'blind trusts', whether revocable or irrevocable, shall be dissolved or amended by May 15, 1978, by the creating party to permit the disclosures required by this rule unless, prior to that date, the minimum requirements for a 'blind trust' are defined by a rule of the Senate or by statute and the trust involved meets the requirements of that rule or statute.

"(e) An individual only is required to report information within his knowledge.

"4. (a) Each individual required to file a report under paragraph 1(a) for any calendar year shall file such report with the Secretary of the Senate not later than May 15 of the next year.

"(b) Each individual required to file a report under paragraph 1(b) for a portion of a year shall file such report with the Secretary of the Senate on the last day he occupies an office or position described in paragraph 1 during such year.

"(c) Each individual required to file a report under paragraph 1(c) shall file such report with the Secretary of the Senate not later than the thirtieth day following the day on which such individual first fulfills the filing requirements of such paragraph during such year or May 15 of that year, whichever is later.

"(d) A copy of each report filed under subparagraphs (a), (b), and (c) shall be provided to the Select Committee by the Secretary of the Senate.

"(e) Each Senator and each individual required to report under paragraph 1(c) shall cause his financial disclosure statement to be filed as a public document with the Secretary of State (or, if there is no Office of Secretary of State, the equivalent State offices) in the State which the Senator represents or in which he is a candidate for the position of Senator.

"(f) The Select Committee may grant one or more reasonable extensions of time for filing any report but the total of such extensions shall not exceed ninety days.

"(g) The Comptroller General shall provide assistance in completing any reports required under this rule when requested by a Member, officer, or employee of the Senate.

"5. (a) Except as provided in this paragraph, the Secretary of the Senate shall make each report filed with him under this rule available to the public within fifteen days after the receipt of such report, and shall provide a copy of any such report to any person upon a written request.

"(b) The Secretary of the Senate shall require any person receiving a copy of any report under subparagraph (a) to supply his name and address and the name of the person or organization, if any, on whose behalf he is requesting such copy and to pay a reasonable fee in any amount which the Secretary of the Senate finds necessary to recover the cost of reproduction or mailing of such report excluding any salary of any employee involved in such reproduction or mailing. The Secretary of the Senate may furnish a copy of any such report without charge or at a reduced charge if he determines that waiver or reduction of the fee is in the public interest because furnishing the information can be considered as primarily benefiting the public.

"(c) Any report received by the Secretary of the Senate shall be held in his custody and made available to the public for a period of seven years after receipt by the Secretary of the Senate of such report. After such seven-year period, the Secretary of the Senate shall destroy any such report.

"(d) The Select Committee shall review all financial statements filed pursuant to paragraph 1 to determine whether such statements are filed in a timely manner and are complete and in proper form.

"(e)(1) The Comptroller General shall, under such regulations as he may prescribe, and which are approved by the Select Committee, conduct, on a random basis, audits of approximately 5 per centum of the reports filed with the Secretary of the Senate (other than those filed by a Member of the Senate).

"(2) The Comptroller General shall, during each six-year period beginning after December 31, 1977, audit at least one report filed by each Member of the Senate except that no such audit shall take place during the calendar year such Member is up for reelection.

"(3)(A) In conducting an audit under clause (1) or (2), the Comptroller General is authorized to request that the Select Committee issue a subpena to require the production of books, papers, and other documents.

"(B) The Comptroller General may use outside consultants to assist him in his responsibilities under this subparagraph.

"(4) The Comptroller General shall transmit the findings of each audit to the Select Committee and the individual being audited.

"6. (a) Each individual who is required to file a financial statement under paragraph 1 for any calendar year shall file with the Comptroller General, in a sealed envelope, a report containing a copy of the returns of taxes, declarations, statements, other documents, and amendments thereto, which he, or he and his spouse jointly, or any fiduciary (regarding income received on behalf of such individual), made for such year in compliance with the income tax provisions of the Internal Revenue Code of 1954. Such report shall be filed not later than the date on which such individual is required to file a financial statement under paragraph 1.

"(b) Except as otherwise provided by this paragraph, all papers filed with the Comptroller General under this paragraph shall be kept by the Comptroller General for not less than seven years, and while so kept shall remain sealed. Upon receipt of a resolution of the Select Committee, adopted by a recorded majority vote of the members of the Select Committee, requesting the transmission to the Select Committee of any of the reports filed by an individual under this rule, the Comptroller General shall transmit to the Select Committee the envelopes containing such reports. After such recorded vote has been taken, but prior to the transmittal to the Select Committee of the envelopes containing such reports, the individual concerned shall be informed of the vote to examine and audit, and shall be advised of the nature and scope of such examination. When any sealed envelope containing any such report is received by the Select Committee such envelope may be opened and the contents thereof may be examined only by members of the Select Committee in executive session. If, upon such examination, the Select Committee determines that further consideration by the Select Committee is warranted and is within the jurisdiction of the Select Committee, it may make the contents of any such envelope available for any use by any member of the Select Committee, or any member of the staff of the Select Committee, which is required for the discharge of his official duties. The Select Committee may receive the papers as evidence, after giving to the individual concerned due notice and opportunity for hearing in a closed session. The Comptroller General shall report to the Select Committee not later than the 1st day of June in each year the names of Senators, officers, and employees who have filed a report. Any paper which has been filed with the Comptroller General for longer than seven years, in accordance with the provisions of this paragraph, shall be returned to the individual concerned or his legal representative. In the event of the death or termination of service of a Member of the Senate or an officer or employee of the Senate, such papers shall be returned unopened to such individual, or to the surviving spouse or legal representative of such individual within one year of such death or termination of service unless the Select Committee directs that such papers be returned at a later date.

"(c) Notwithstanding the provisions of subparagraph (b), the Comptroller General, after giving notice to the individual being audited, may examine the material filed pursuant to this paragraph for the purpose of conducting an audit as required under paragraph 5(e).

"(d) Whenever in any criminal case pending in any competent court in which a Member, officer, or employee of the Senate is a defendant, or in any proceeding before a grand jury of any competent court in which alleged criminal conduct of the Member, officer, or employee of the Senate is under investigation, a discovery order of such court is served upon the Comptroller General directing him to appear and produce any reports filed pursuant to this rule, the Comptroller General shall—

"(1) within a reasonable time prior to appearing in response to such discovery order of such court, notify the individual whose report is requested of the receipt of the discovery order of such court,

"(2) if such report is in a sealed envelope, unseal the envelope containing such report and have an authenticated copy made of such report, replace such report in such envelope and reseal it, and note on such envelope that it was opened pursuant to this clause in response to a discovery order of such court, a copy of which shall be attached to such envelope, and

"(3) appear in response to such discovery order of such court and produce the authenticated copy so made.

For purposes of this subparagraph, the term 'competent court' means a court of the United States, a State, or the District of Columbia which has general jurisdiction to hear cases involving criminal offenses against the United States, such State, or the District of Columbia, as the case may be; and the term 'discovery order' includes a subpena approved by a competent court.

"(e) The Select Committee on Ethics shall promulgate regulations and procedures to insure the confidentiality of tax returns and tax information examined by the staff of that committee pursuant to subparagraph (b) above. Such regulations shall include the sanction of dismissal for any employee who knowingly and willfully communicates to any unauthorized person information derived from any confidentially filed tax return or tax return information examined pursuant to subparagraph (b) above.

"7. As used in this rule—

"(a) the term 'commodity future' means commodity future as defined in sections 2 and 5 of the Commodity Exchange Act, as amended (7 U.S.C. 2 and 5);

"(b) the term 'Comptroller General' means the Comptroller General of the United States;

"(c) the term 'dependent' has the meaning set forth in section 152 of the Internal Revenue Code of 1954;

"(d) the term 'earned income' means outside earned income (as defined in rule XLIV) and any salary disbursed to an individual by the Secretary of the Senate;

"(e) the term 'employee of the Senate' includes any employee or individual described in paragraphs 2, 3, and 4(c) of rule XLIX.

"(f) the term 'gift' means a payment, subscription, advance, forebearance, rendering, or deposit of money, services, or anything of value, including food, lodging, transportation, or entertainment, and reimbursement for other than necessary expenses, unless consideration of equal or greater value is received, but does not include (1) a political contribution otherwise reported as required by law, (2) a loan made in a commercially reasonable manner (including requirements that the loan be repaid and that a reasonable rate of interest be paid), (3) a bequest inheritance, or other transfer at death, or (4) anything of value given to a spouse or dependent of a reporting individual by the employer of such spouse or dependent in

recognition of the service provided by such spouse or dependent;

"(g) the term 'income' means gross income as defined in section 61 of the Internal Revenue Code of 1954;

"(h) the term 'political contribution' means a contribution as defined in section 301 of the Federal Election Campaign Act of 1971 (2 U.S.C. 431);

"(i) the term 'political expenditure' means an expenditure as defined in section 301 of the Federal Election Campaign Act of 1971 (2 U.S.C. 431);

"(j) the term 'relative' means, with respect to a person required to file a report under this rule, an individual who is related to the person as father, mother, son, daughter, brother, sister, uncle, aunt, great uncle, great aunt, first cousin, nephew, niece, husband, wife, grandfather, grandmother, grandson, granddaughter, father-in-law, mother-in-law, son-in-law, daughter-in-law, brother-in-law, sister-in-law, stepfather, stepmother, stepson, stepdaughter, stepbrother, stepsister, half brother, half sister, fiance, or who is the grandfather or grandmother of the spouse of the person reporting;

"(k) the term 'security' has the meaning set forth in section 2 of the Securities Act of 1933, as amended (15 U.S.C. 77b); and

"(l) the term 'transactions in securities and commodities futures' means any acquisition, transfer, or other disposition involving any security or commodity.

"RULE XLIII

"GIFTS

"1. (a) No Member, officer, or employee of the Senate, or the spouse of dependent thereof, shall knowingly accept, directly or indirectly, any gift or gifts having an aggregate value exceeding $100 during a calendar year directly or indirectly from any person, organization, or corporation having a direct interest in legislation before the Congress or from any foreign national unless, in an unusual case, a waiver is granted by the Select Committee. In determining whether an individual has accepted any gift or gifts having an aggregate value exceeding $100 during a calendar year from any person, organization, or corporation, there may be deducted the aggregate value of gifts (other than gifts described in subparagraph (c)) given by such individual to such person, organization, or corporation during that calendar year.

"(b) For purposes of subparagraph (a), only the following shall be deemed to have a direct interest in legislation before the Congress:

"(1) a person, organization, or corporation registered under the Federal Regulation of Lobbying Act of 1946, or any successor statute, a person who is an officer or director of such a registered lobbyist, or a person who has been employed or retained by such a registered lobbyist for the purpose of influencing legislation before the Congress; or

"(2) a corporation, labor organization, or other organization which maintains a separate segregated fund for political purposes (within the meaning of section 321 of the Federal Election Campaign Act of 1971 (2 U.S.C. 441b)), a person who is an officer or director of such corporation, labor organization, or other organization, or a person who has been employed or retained by such corporation, labor organization, or other organization for the purpose of influencing legislation before the Congress.

"(c) The prohibitions of subparagraph (a) do not apply to gifts—

"(1) from relatives;

"(2) with a value of less than $35;

"(3) of personal hospitality of an individual;

"(4) from an individual who is a foreign national if that individual is not acting, directly or indirectly, on behalf of a foreign corporation, partnership or business enterprise, a foreign trade, cultural, educational or other association, a foreign political party or a foreign government.

"2. For purposes of this rule—

"(a) the term 'gift' means a payment, subscription, advance, forebearance, rendering, or deposit of money, services, or anything of value, including food, lodging, transportation, or entertainment, and reimbursement for other than necessary expenses, unless consideration of equal or greater value is received, but does not include (1) a political contribution otherwise reported as required by law, (2) a loan made in a commercially reasonable manner (including requirements that the loan be repaid and that a reasonable rate of interest be paid), (3) a bequest, inheritance, or other transfer at death, (4) a bona fide award presented in recognition of public service and available to the general public, (5) a reception at which the Member, officer, or employee is to be honored, provided such individual receives no other gifts that exceed the restrictions in this rule, other than a suitable memento, (6) meals, beverages, or entertainment, consumed or enjoyed, provided the meals, beverages, or entertainment not enjoyed or consumed in connection with a gift of overnight lodging, or (7) anything of value given to a spouse or dependent of a reporting individual by the employer of such spouse or dependent in recognition of the service provided by such spouse or dependent; and

"(b) The term 'relative' has the same meaning given to such term in paragraph 7(j) of rule XLII.

"3. If a Member, officer, or employee, after exercising reasonable diligence to obtain the information necessary to comply with this rule, unknowingly accepts a gift described in paragraph 1, such Member, officer, or employee shall, upon learning of the nature of the gift and its source, return the gift or, if it is not possible to return the gift, reimburse the donor for the value of the gift.

"4. (a) Notwithstanding the provisions of this rule, a Member, officer, or employee of the Senate may participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization if such participation is not in violation of any law and if the Select Committee on Ethics has determined that participation in such program by Members, officers, or employees of the Senate is in the interests of the Senate and the United States.

"(b) Any Member who accepts an invitation to participate in any such program shall notify the Select Committee in writing of his acceptance. A Member shall also notify the Select Committee in writing whenever he has permitted any officer or employee whom he supervises (within the meaning of paragraph 12 of rule XLV) to participate in any such program. Prior to the beginning of any such program, the chairman of the Select Committee shall place in the Congressional Record a list of all individuals participating, where applicable the supervisors of such individuals, and the nature and itinerary of such program.

"(c) No Member, officer, or employee may accept funds in connection with participation in a program permitted under subparagraph (a) if such funds are not used for necessary food, lodging, transportation and related expenses of the Member, officer, or employee.

"RULE XLIV

"OUTSIDE EARNED INCOME

"1. During the period of service in a calendar year of a Senator, or of an officer or employee of the Senate compensated at a rate exceeding $35,000 a year and employed for more than ninety days in a calendar year, the aggregate amount of the outside earned income of such individual for such period shall not exceed 15 per centum of—

"(1) the aggregate amount of the salary of such an officer or employee disbursed by the Secetrary of the Senate during such period; and

"(2) in the case of a Senator, the aggregate amount of base salary paid to Senators and disbursed by the Secretary of the Senate for that period.

"2. (a) A Senator shall not receive honoraria in excess of $1,000 for each appearance, speech, or article.

"(b) An officer or employee of the Senate covered by paragraph 1 shall not receive honoraria in excess of—

"(1) $300 for each appearance, speech, or article, and

"(2) $1,500 in the aggregate in any one calendar year.

"(c) Notwithstanding the limitations under paragraph 1 or 2(b)(2), any Senator, or employee may accept honoraria in excess of the amount allowed in paragraph 1 or 2(b)(2) but not in excess of $25,000, if he donates such honoraria to an organization exempt from taxation under section 501(c)(3) of the Internal Revenue Code of 1954 and if no tax benefits accrue to such Senator, officer, or employee for such donation.

"3. (a) For purposes of this rule, the term 'outside earned income' shall, subject to the provisions of subparagraph (b), mean any income earned by an individual (other than the salary received as a Senator or officer or employee of the Senate) which is compensation received as a result of personal services actually rendered.

"(b) For purposes of subparagraph (a), the term 'outside earned income' does not include:

"(1) advances on books from an established trade publisher under usual contract terms;

"(2) royalties from books;

"(3) proceeds from the sale of creative or artistic work;

"(4) any 'buyout' arrangement from professional partnerships or businesses which is reasonably related to the fair market value of the partnership or business interest in the enterprise at the time of the sale of such interest, payable within a reasonable period of time, and not related to future services or profitability of the enterprise;

"(5) income from family enterprises, if the services provided by the Senator or officer or employees are managerial or supervisory in nature, necessary to protect the interests in the family enterprise and do not consume significant amounts of time while the Senate is in session; and

"(6) distributive shares of partnership income if the distributive share received represents not more than a pro rata return on the capital invested in the partnership and the services provided by the Senator or officer or employee are managerial or supervisory in nature, necessary to protect the interests in the partnership and do not consume significant amounts of time while the Senate is in session.

"RULE XLV

"CONFLICT OF INTEREST

"1. A Member, officer, or employee of the Senate shall not receive any compensation, nor shall he permit any compensation to accrue to his beneficial interest from any source, the recipt or accrual of which would occur by virtue of influence improperly exerted from his position as a Member, officer, or employee.

"2. No Member, officer, or employee shall engage in any outside business or professional activity or employment for compensation which is inconsistent or in conflict with

the conscientious performance of official duties.

"3. No officer or employee shall engage in any outside business or professional activity or employment for compensation unless he has reported in writing, when such activity or employment commences and on May 15 of each year thereafter so long as such activity or employment continues, the nature of such activity or employment to his supervisor. The supervisor shall then, in the discharge of his duties, take such action as he considers necessary for the avoidance of conflict of interest or interference with duties to the Senate.

"4. No Member, officer, or employee shall knowingly use his official position to introduce or aid the progress or passage of legislation, a principal purpose of which is to further only his pecuniary interest, only the pecuniary interest of his immediate family, or only the pecuniary interest of a limited class of persons or enterprises, when he, or his immediate family, or enterprises controlled by them, are members of the affected class.

"5. A Member, notwithstanding the provisions of Rule XII of the Standing Rules of the Senate, may decline to vote, in committee or on the floor, on any matter when he believes that his voting on such a matter would be a conflict of interest.

"6. No Member, officer, or employee of the Senate compensated at a rate in excess of $25,000 per annum and employed for more than ninety days in a calendar year shall affiliate with a firm, partnership, association, or corporation for the purpose of providing professional services for compensation or permit that individual's name to be used by such a firm, partnership, association or corporation or practice a profession for compensation to any extent during regular office hours of the Senate office in which employed. For the purposes of this paragraph, 'professional services' shall include but not be limited to those which involve a fiduciary relationship.

"7. No Member, officer, or employee of the Senate compensated at a rate in excess of $25,000 per annum and employed for more than ninety days in a calendar year shall serve as an officer or member of the board of any publicly held or publicly regulated corporation, financial institution, or business entity. The preceding sentence shall not apply to service of a Member, officer, or employee as—

"(a) an officer or member of the board of an organization which is exempt from taxation under section 501(c) of the Internal Revenue Code of 1954, if such service is performed without compensation;

"(b) an officer or member of the board of an institution or organization which is principally available to Members, officers, or employees of the Senate, or their families, if such service is performed without compensation; or

"(c) a member of the board of a corporation, institution, or other business entity, if (1) the Member, officer, or employee had served continucusly as a member of the board thereof for at least two years prior to his election or appointment as a Member, officer, or employee of the Senate, and (2) the amount of time required to perform such service is minimal, and the Member, officer, or employee is not a member of or a member of the staff of any Senate committee which has legislative jurisdiction over any agency of the Government charged with regulating the activities of the corporation, institution, or other business entity.

"8. An employee on the staff of a committee who is compensated at a rate in excess of $25,000 per annum and employed for more than ninety days in a calendar year shall divest himself of any substantial holdings which may be directly affected by the actions of the committee for which he works, unless the Select Committee, after consultation with the employee's supervisor, grants permission in writing to retain such holdings or the employee makes other arrangements acceptable to the Select Committee and the employee's supervisor to avoid participation in committee actions where there is a conflict of interest, or the appearance thereof.

"9. If a Member, upon leaving office, becomes a registered lobbyist under the Federal Regulation of Lobbying Act of 1946 or any successor statute, or is employed or retained by such a registered lobbyist for the purpose of influencing legislation, he shall not lobby Members, officers, or employees of the Senate for a period of one year after leaving office.

"10. If an employee on the staff of a Member, upon leaving that position, becomes a registered lobbyist under the Federal Regulation of Lobbying Act of 1946 or any successor statute, or is employed or retained by such a registered lobbyist for the purpose of influencing legislation, such employee may not lobby the Member for whom he worked or that Member's staff for a period of one year after leaving that position. If an employee on the staff of a committee, upon leaving his position, becomes such a registered lobbyist or is employed or retained by such a registered lobbyist for the purpose of influencing legislation, such employee may not lobby the members of the committee for which he worked, or the staff of that committee, for a period of one year after leaving his position.

"11. For purposes of this rule—

"(a) 'employee of the Senate' includes an employee or individual described in paragraphs 2, 3, and 4(c) of rule XLIX;

"(b) an individual who is an employee on the staff of a subcommittee of a committee shall be treated as an employee on the staff of such committee; and

"(c) the term 'lobbying' means any oral or written communication to influence the content or disposition of any issue before Congress, including any pending or future bill, resolution, treaty, nomination, hearing, report, or investigation; but does not include—

"(1) a communication (i) made in the form of testimony given before a Committee or office of the Congress, or (ii) submitted for inclusion in the public record, public docket, or public file of a hearing; or

"(2) a communication by an individual, acting solely on his own behalf, for redress of personal grievances, or to express his personal opinion.

"12. For purposes of this rule—

"(a) a Senator or the Vice President is the supervisor of his administrative, clerical, or other assistants;

"(b) a Senator who is the chairman of a committee is the supervisor of the professional, clerical, or other assistants to the committee except that minority staff members shall be under the supervision of the ranking minority Senator on the committee;

"(c) a Senator who is a chairman of a subcommittee which has its own staff and financial authorization is the supervisor of the professional, clerical, or other assistants to the subcommittee except that minority staff members shall be under the supervision of the ranking minority Senator on the subcommittee;

"(d) The President pro tempore is the supervisor of the Secretary of the Senate, Sergeant at Arms and Doorkeeper, the Chaplain, the Legislative Counsel, and the employees of the Office of the Legislative Counsel;

"(e) the Secretary of the Senate is the supervisor of the employees of his office;

"(f) the Sergeant at Arms and Doorkeeper is the supervisor of the employees of his office;

"(g) the Majority and Minority Leaders and the Majority and Minority Whips are the supervisors of the research, clerical, or other assistants assigned to their respective offices;

"(h) the Majority Leader is the supervisor of the Secretary for the Majority and the Secretary for the Majority is the supervisor of the employees of his office; and

"(i) the Minority Leader is the supervisor of the Secretary for the Minority and the Secretary for the Minority is the supervisor of the employees of his office.

"RULE XLVI

"PROHIBITION OF UNOFFICIAL OFFICE ACCOUNTS

"1. No Member may maintain or have maintained for his use an unofficial office account. The term 'unofficial office account' means an account or repository into which funds are received for the purpose, at least in part, of defraying otherwise unreimbursed expenses allowable in connection with the operation of a Member's office. An unofficial office account does not include, and expenses incurred by a Member in connection with his official duties shall be defrayed only from—

"(a) personal funds of the Member;

"(b) official funds specifically appropriated for that purpose;

"(c) funds derived from a political committee (as defined in section 301(d) of the Federal Election Campaign Act of 1971 (2 U.S.C. 431)); and

"(d) funds received as reasonable reimbursements for expenses incurred by a Member in connection with personal services provided by the Member to the organization making the reimbursement.

"2. No contribution (as defined in section 301(e) of the Federal Election Campaign Act of 1971 (2 U.S.C. 431)) shall be converted to the personal use of any Member, or any former Member. For the purposes of this rule 'personal use' does not include reimbursement of expenses incurred by a Member in connection with his official duties.

"RULE XLVII

"FOREIGN TRAVEL

"1. Unless authorized by the Senate (or by the President of the United States after an adjournment sine die), no funds from the United States Government (including foreign currencies made available under section 502(b) of the Mutual Security Act of 1954 (22 U.S.C. 1754(b)) shall be received for the purpose of travel outside the United States by any Member of the Senate whose term will expire at the end of a Congress after—

"(a) the date of the general election in which his successor is elected; or

"(b) in the case of a Member who is not a candidate in such general election, the earlier of the date of such general election or the adjournment sine die of the second regular session of that Congress.

"2. No Member, officer, or employee engaged in foreign travel may claim payment or accept funds from the United States Government (including foreign currencies made available under section 502(b) of the Mutual Security Act of 1954 (22 U.S.C. 1754(b)) for any expense for which the individual has received reimbursement from any other source; nor may such Member, officer, or employee receive reimbursement for the United States Government. No Member, officer, or employee shall use any funds furnished to him to defray ordinary and necessary expenses of foreign travel for any purpose other than the purpose or purposes for which such funds were furnished.

"3. A per diem allowance provided a Member, officer, or employee in connection with foreign travel shall be used solely for lodging, food, and related expenses and it is the responsibility of the Member, officer, or employee receiving such an allowance to return to the United States Government that por-

tion of the allowance received which is not actually used for necessary lodging, food, and related expenses.

"RULE XLVII

"FRANKING PRIVILEGE AND RADIO AND TELEVISION STUDIOS

"1. A Senator or an individual who is a candidate for nomination for election, or election to the Senate, may not use the frank for any mass mailing (as defined in section 3210(a)(5)(D) of title 39, United States Code) if such mass mailing is mailed at or delivered to any postal facility less than sixty days immediately before the date of any primary or general election (whether regular, special, or runoff) in which the Senator is a candidate for public office or the individual is a candidate for Senator.

"2. A Senator shall use only official funds of the Senate, including his official Senate allowances, to purchase paper, to print, or to prepare any mass mailing material which is to be sent out under the frank.

"3. (a) When a Senator disseminates information under the frank by a mass mailing (as defined in section 3210(a)(5)(D) of title 39, United States Code), the Senator shall register annually with the Secretary of the Senate such mass mailings. Such registration shall be made by filing with the Secretary a copy of the matter mailed and providing, on a form supplied by the Secretary, a description of the group or groups of persons to whom the mass mailing was mailed.

"(b) The Secretary of the Senate shall promptly make available for public inspection and copying the copy of the mail matter registered, the description of the group or groups of persons to whom the mass mailing was mailed.

"4. Nothing in this rule shall apply to any mailing under the frank which is in direct response to inquiries or requests from persons to whom the matter is mailed, is addressed to colleagues in Congress or to government officials (whether Federal, State, or local), or consists entirely of news releases to the communications media.

"5. The Senate computer facilities shall not be used (a) to store, maintain, or otherwise process any lists or categories of lists of names and addresses identifying the individuals included in such lists as campaign workers or contributors, as members of a political party, or by any other partisan political designation, (b) to produce computer printouts except as authorized by user guides approved by the Committee on Rules and Administration, or (c) to produce mailing labels for mass mailings, or computer tapes and discs, for use other than in service facilities maintained and operated by the Senate or under contract to the Senate. The Committee on Rules and Administration shall prescribe such regulations not inconsistent with the purposes of this paragraph as it determines necessary to carry out such purposes.

"6. (a) The radio and television studios provided by the Senate or by the House of Representatives may not be used by a Senator or an individual who is a candidate for nomination for election, or election, to the Senate less than sixty days immediately before the date of any primary or general election (whether regular, special, or runoff) in which that Senator is a candidate for public office or that individual is a candidate for Senator.

"(b) This paragraph shall not apply if the facilities are to be used at the request of, and at the expense of, a licensed broadcast organization or an organization exempt from taxation under section 501(c)(3) of the Internal Revenue Code of 1954.

"RULE XLIX

"POLITICAL FUND ACTIVITY; DEFINITIONS

"1. No officer or employee of the Senate may receive, solicit, be the custodian of, or distribute any funds in connection with any campaign for the nomination for election, or the election of any individual to be a Member of the Senate or to any other Federal office. This prohibition does not apply to two assistants to a Senator, at least one of which is in Washington, District of Columbia, who have been designated by that Senator to perform any of the functions described in the first sentence of this paragraph (except solicitation) and who are compensated at an annual rate in excess of $10 000, if such designation has been made in writing and filed with the Secretary of the Senate and if such assistant files a financial statement in the form provided under rule XLII for each year during which he is designated under this rule. The Secretary of the Senate shall make the designation available for public inspection.

"2. For purposes of the Senate Code of Official Conduct—

"(a) an employee of the Senate includes any employee whose salary is disbursed by the Secretary of the Senate; and

"(b) the compensation of an officer or employee of the Senate who is a reemployed annuitant shall include amounts received by such officer or employee as an annuity, and such amounts shall be treated as disbursed by the Secretary of the Senate.

"3. Before approving the utilization by any committee of the Senate of the services of an officer or employee of the Government in accordance with section 202(f) of the Legislative Reorganization Act of 1946 or with an authorization provided by Senate resolution, the Committee on Rules and Administration shall require such officer or employee to agree in writing to comply with the Senate Code of Official Conduct in the same manner and to the same extent as an employee of the Senate. Any such officer or employee shall, for purposes of such Code, be treated as an employee of the Senate receiving compensation disbursed by the Secretary of the Senate in an amount equal to the amount of compensation he is receiving as an officer or employee of the Government.

"4. No Member, officer, or employee of the Senate shall utilize the full-time services of an individual for more than ninety days in a calendar year in the conduct of official duties of any committee or office of the Senate (including a Member's office) unless such individual—

"(a) is an officer or employee of the Senate,

"(b) is an officer or employee of the Government (other than the Senate), or

"(c) agrees in writing to comply with the Senate Code of Official Conduct in the same manner and to the same extent as an employee of the Senate.

Any individual to whom subparagraph (c) applies shall, for purposes of such Code, be treated as an employee of the Senate receiving compensation disbursed by the Secretary of the Senate in an amount equal to the amount of compensation which such individual is receiving from any source for performing such services

"5. In exceptional circumstances for good cause shown, the Select Committee on Ethics may waive the applicability of any provision of the Senate Code of Official Conduct to an employee hired on a per diem basis.

"6. (a) The supervisor of an individual who performs services for any Member, committee, or office of the Senate for a period in excess of four weeks receives compensation therefor from any source, other than the United States Government shall report to the Select Committee on Ethics with respect to the utilization of the services of such individual.

"(b) A report under subparagraph (a) shall be made with respect to an individual—

"(1) when such individual begins performing services described in such subparagraph;

"(2) at the close of each calendar quarter while such individual is performing such services; and

"(3) when such individual ceases to perform such services.

Each such report shall include the identity of the source of the compensation received by such individual and the amount of rate of compensation paid by such source.

"(c) No report shall be required under paragraph 1 with respect to an individual who normally performs services for a Member, committee, or office for less than eight hours a week.

"(d) For purposes of this rule, the supervisor of an individual shall be determined under paragraph 12 of rule XLV.

"RULE L

"EMPLOYMENT PRACTICES

"No Member, officer, or employee of the Senate shall, with respect to employment by the Senate or any office thereof—

"(a) fail or refuse to hire an individual;

"(b) discharge an individual; or

"(c) otherwise discriminate against an individual with respect to promotion, compensation, or terms, conditions, or privileges of employment,

on the basis of such individual's race, color, religion, sex, national origin, age, or state of physical handicap.".

TITLE II—PROVISIONS RELATING TO THE SELECT COMMITTEE ON ETHICS

SEC. 201. Section 2(a) of Senate Resolution 338, Eighty-eighth Congress, agreed to July 24, 1964, is amended by inserting after "violations of law," in paragraph (1) "violations of the Senate Code of Official Conduct,".

SEC. 202. Section 2 of Senate Resolution 338, Eighty-eighth Congress, agreed to July 24, 1964, is amended by redesignating subsection (b) as (i), and by inserting after subsection (a) the following new subsections:

"(b)(1) Each sworn complaint filed with the Select Committee shall be in writing, shall be in such form as the Select Committee may prescribe by regulation, and shall be under oath.

"(2) For purposes of this section, 'sworn complaint' means a statement of facts within the personal knowledge of the complainant, alleging a violation of law, the Senate Code of Official Conduct, or any other rule or regulation of the Senate relating to the conduct of individuals in the performance of their duties as Members, officers, or employees of the Senate.

"(3) Any person who knowingly and willfully swears falsely to a sworn complaint does so under penalty of perjury, and the Select Committee may refer any such case to the Attorney General for prosecution.

"(4) For the purposes of this section, 'investigation' is a proceeding undertaken by the Select Committee after a finding, on the basis of an initial review, that there is substantial credible evidence which provides substantial cause for the Select Committee to conclude that a violation within the jurisdiction of the Select Committee has occurred.

"(c)(1) No investigation of conduct of a Member, or officer, and no report, resolution, or recommendation relating thereto may be made unless approved by the affirmative recorded vote of not less than four members of the Select Committee.

"(2) No other resolution, report, recommendation, interpretative ruling, or advisory opinion may be made without an affirmative vote of a majority of the members of the Select Committee voting.

"(d)(1) When the Select Committee receives a sworn complaint against a Member or officer of the Senate, it shall promptly conduct an initial review of that complaint. The initial review shall be of duration and scope necessary to determine whether there is substantial credible evidence which provides substantial cause for the Select Committee to

conclude that a violation within the jurisdiction of the Select Committee has occurred.

"(2) If as a result of an initial review under paragraph (1), the Select Committee determines by a recorded vote that there is not such substantial credible evidence, the Select Committee shall report such determination to the complainant and to the party charged, together with an explanation of the basis of such determination.

"(3) If as a result of an initial review under paragraph (1), the Select Committee determines that a violation is inadvertent, technical, or otherwise of a de minimus nature, the Select Committee may attempt to correct or prevent such a violation by informal methods.

"(4) If as the result of an initial review under paragraph (1), the Select Committee determines that there is such substantial credible evidence but that the violation, if proven, is neither of a de minimus nature nor sufficiently serious to justify any of the penalties expressly referred to in subsection (a)(2), the Select Committee may propose a remedy it deems appropriate. If the matter is thereby resolved, a summary of the Select Committee's conclusions and the remedy proposed shall be filed as a public record with the Secretary of the Senate and a notice of such filing shall be printed in the Congressional Record.

"(5) If as the result of an initial review under paragraph (1), the Select Committee determines that there is such substantial credible evidence, the Select Committee shall promptly conduct an investigation if (A) the violation, if proven, would be sufficiently serious, in the judgment of the Select Committee, to warrant imposition of one or more of the penalties expressly referred to in subsection (a)(2), or (B) the violation, if proven, is less serious, but was not resolved pursuant to paragraph (4) above. Upon the conclusion of such investigation, the Select Committee shall report to the Senate, as soon as practicable, the results of such investigation together with its recommendations (if any) pursuant to subsection (a)(2).

"(6) Upon the conclusion of any other investigation respecting the conduct of a Member or officer undertaken by the Select Committee, the Select Committee shall report to the Senate, as soon as practicable, the results of such investigation together with its recommendations (if any) pursuant to subsection (a)(2).

"(e) When the Select Committee receives a sworn complaint against an employee of the Senate, it shall consider the complaint according to procedures it deems appropriate. If the Select Committee determines that the complaint is without substantial merit, it shall notify the complainant and the accused of its determination, together with an explanation of the basis of such determination.

"(f) The Select Committee may, in its discretion, employ hearing examiners to hear testimony and make findings of fact and/or recommendations to the Select Committee concerning the disposition of complaints.

"(g) Notwithstanding any other provision of this section, no initial review or investigation shall be made of any alleged violation of any law, the Senate Code of Official Conduct, rule, or regulation which was not in effect at the time the alleged violation occurred. No provision of the Senate Code of Official Conduct shall apply to or require disclosure of any act, relationship, or transaction which occurred prior to the effective date of the applicable provision of the Code. The Select Committee may conduct an initial review or investigation of any alleged violation of a rule or law which was in effect prior to the enactment of the Senate Code of Official Conduct if the alleged violation occurred while such rule or law was in effect and the violation was not a matter resolved on the merits by the predecessor Select Committee.

"(h) The Select Committee shall adopt written rules setting forth procedures to be used in conducting investigations of complaints.".

SEC. 203. The first section of Senate Resolution 338, Eighty-eighth Congress, agreed to July 24, 1964, is amended by adding after subsection (d) (as added by section 102 of Senate Resolution 4, Ninety-fifth Congress) the following new subsection:

"(e)(1) A member of the Select Committee shall be ineligible to participate in any initial review or investigation relating to his own conduct, the conduct of any officer or employee he supervises, or the conduct of any employee of any officer he supervises, or relating to any complaint filed by him, and the determinations and recommendations of the Select Committee with respect thereto. For purposes of this subparagraph, a Member of such Select Committee shall be deemed to supervise any officer or employee consistent with the provision of paragraph 12 of rule XLV of the Standing Rules of the Senate.

"(2) A member of the Select Committee may, at his discretion, disqualify himself from participating in any investigation pending before the Select Committee and the determinations and recommendations of the Select Committee with respect thereto. Notice of such disqualification shall be given in writing to the President of the Senate.

"(3) Whenever any member of the Select Committee is ineligible under paragraph (1) to participate in any investigation or disqualifies himself under paragraph (2) from participating in any investigation, another Member of the Senate shall, subject to the provisions of subsection (d), be appointed to serve as a member of the Select Committee solely for purposes of such investigation and the determinations and recommendations of the Select Committee with respect thereto. Any Member of the Senate appointed for such purposes shall be of the same party as the Member who is ineligible or disqualifies himself.".

SEC. 204. Section 3 of Senate Resolution 338, Eighty-eighth Congress, agreed to July 24, 1964, is amended—

(1) by inserting after "fix the compensation of" in subsection (a)(7) the following: "a staff director, a counsel, an assistant counsel, one or more investigators, one or more hearing examiners, and";

(2) by amending subsection (b) to read as follows:

"(b)(1) The Select Committee is authorized to retain and compensate counsel not employed by the Senate (or by any department or agency of the executive branch of the Government) whenever the Select Committee determines that the retention of outside counsel is necessary or appropriate for any action regarding any complaint or allegation, which, in the determination of the Select Committee is more appropriately conducted by counsel not employed by the Government of the United States as a regular employee.

"(2) Any investigation conducted under section 2 shall be conducted by outside counsel as authorized in paragraph (1), unless the Select Committee determines not to use outside counsel."; and

(3) by amending subsection (c)(1) to read as follows:

"(c) With the prior consent of the department or agency concerned, the Select Committee may (1) utilize the services, information, and facilities of any such department or agency of the Government, and".

SEC. 205. Section 2(a) of Senate Resolution 338, Eighty-eighth Congress, agreed to July 24, 1964, is amended by inserting after "disciplinary action" in paragraph (2) the following: "(including, but not limited to, in the case of a Member: censure, expulsion, or recommendation to the appropriate party conference regarding such Member's seniority or positions of responsibility; and, in the case of an officer or employee: suspension or dismissal)".

SEC. 206. Section 3 of Senate Resolution 338, Eighty-eighth Congress, agreed to July 24, 1964, is amended by adding at the end thereof the following new subsection:

"(e)(1) The Select Committee shall prescribe and publish such regulations as it feels are necessary to implement the Senate Code of Official Conduct.

"(2) The Select Committee is authorized to issue interpretative rulings explaining and clarifying the application of any law, the Code of Official Conduct, or any rule or regulation of the Senate within its jurisdiction.

"(3) The Select Committee shall render an advisory opinion, in writing within a reasonable time, in response to a written request by a Member or officer of the Senate or a candidate for nomination for election, or election to the Senate, concerning the application of any law, the Senate Code of Official Conduct, or any rule or regulation of the Senate within its jurisdiction to a specific factual situation pertinent to the conduct or proposed conduct of the person seeking the advisory opinion.

"(4) The Select Committee may in its discretion render an advisory opinion in writing within a reasonable time in response to a written request by any employee of the Senate concerning the application of any law, the Senate Code of Official Conduct, or any rule or regulation of the Senate within its jurisdiction to a specific factual situation pertinent to the conduct or proposed conduct of the person seeking the advisory opinion.

"(5) Notwithstanding any provision of the Senate Code of Official Conduct or any rule or regulation of the Senate, any person who relies upon any provision or finding of an advisory opinion in accordance with the provisions of paragraphs (3) and (4) and who acts in good faith in accordance with the provisions and findings of such advisory opinion shall not, as a result of any such act, be subject to any sanction by the Senate.

"(6) Any advisory opinion rendered by the Select Committee under paragraphs (3) and (4) may be relied upon by (A) any person involved in the specific transaction or activity with respect to which such advisory opinion is rendered: *Provided, however,* That the request for such advisory opinion included a complete and accurate statement of the specific factual situation; and (B) any person involved in any specific transaction or activity which is indistinguishable in all its material aspects from the transaction or activity with respect to which such advisory opinion is rendered.

"(7) Any advisory opinion issued in response to a request under paragraph (3) or (4) shall be printed in the Congressional Record with appropriate deletions to assure the privacy of the individual concerned. The Select Committee shall to the extent practicable, before rendering an advisory opinion, provide any interested party with an opportunity to transmit written comments to the Select Committee with respect to the request for such advisory opinion. The advisory opinions issued by the Select Committee shall be compiled, indexed, reproduced, and made available on a periodic basis.

"(8) A brief description of a waiver granted under paragraph 2(c) of rule XLII or paragraph (1) of rule XLIII of the Standing Rules of the Senate, shall be made available upon request in the Select Committee office with appropriate deletions to assure the privacy of the individual concerned.".

TITLE III—MISCELLANEOUS; EFFECTIVE DATES

SEC. 301. The Committee on Appropriations shall, within one hundred and twenty days after the day on which this resolution is agreed to, report to the Senate legislation to adjust the amounts and permissible uses of senatorial allowances so that such allowances will be adequate to defray the necessary and appropriate expenses incurred in connection with the operation of a Member's office. In considering such legislation the Committee shall consider the need to increase clerk-hire allowances and/or to combine or merge official senatorial allowances to provide for additional expenses that might be necessary to comply with the requirements of this resolution.

SEC. 302. (a) The Committee on Appropriations, in consultation with the Committee on Finance, shall review the provisions of the Internal Revenue Code of 1954 relating to the tax status of funds expended by a political committee to defray ordinary and necessary expenses of a Member, the regulations prescribed thereunder, and rulings made with respect thereto.

(b) The Committee on Finance in consultation with the Committee on Appropriations shall review the amounts deductible for senatorial expenses incurred while living away from home pursuant to section 31c of title 2, United States Code, so that the same will more adequately relate to actual living expenses incurred by a Member in connection with the performance of his official duties.

(c) The committees shall report the results of their review under subsections (a) and (b), together with their recommendations, to the Senate within one hundred and twenty days after the day on which this resolution is agreed to.

SEC. 303. (a) The Committee on Rules and Administration shall review the desirability of promulgating rules and regulations providing for—

(1) periodic audits by the General Accounting Office of the accounts of all committees and offices of the Senate;

(2) a centralized system of recordkeeping and comprehensive reporting relating to the accounts, allowances, expenditures, and travel expenses of all committees and offices of the Senate;

(3) suggested accounting procedures for the handling of the acounts of all committees and offices of Members; and

(4) public disclosure and availability of information on the accounts of all committees and offices of the Senate, which shall be available in a form which segregates the allowances and expenses of each committee and office.

(b) The committee shall report the results of its review under subsection (a), together with its recommendations, to the Senate within one hundred and twenty days after the day on which this resolution is agreed to.

SEC. 304. (a) The Committee on Rules and Administration shall review the desirability of requiring that only official Senate funds may be used to pay for any expenses incurred by a Senator in the use of the radio and television studios provided by the Senate.

(b) The committee shall report the results of its review under subsection (a), together with its recommendations, to the Senate within one hundred and twenty days after the day on which this resolution is agreed to.

SEC. 305. (a) The Committee on Foreign Relations shall review the problem of travel, lodging, and other related expenses provided to Members, officers, or employees of the Senate paid for by foreign governments in the situation where it is not possible to procure transportation, lodging, or other related services or to reimburse the foreign government for those purposes.

(b) The committee shall report the results of its review under subsection (a), together with its recommendations, to the Senate within ninety days after the day on which this resolution is agreed to.

SEC. 306. (a) The Committee on Governmental Affairs shall review whether it is desirable to permit—

(1) a Senator to mail franked mail with a simplified form of address for delivery within the State for which he was elected; and

(2) a Senator to mail franked mail with a simplified form of address as provided under paragraph (1) which is—

(A) to be prepared as directed by the Postal Service, and

(B) to be delivered to—

(i) each box holder or family on a rural or star route,

(ii) each post office box holder, and

(iii) each stop or box on a city carrier route.

(b) The committee shall report the results of its review under subsection (a) together with its recommendations, to the Senate within one hundred and twenty days after the day on which this resolution is agreed to.

SEC. 307. The Committee on Rules and Administration shall study laws relating to contributions solicited from or made by officers or employees of the Senate and report the results of their review, together with their recommendations, to the Senate within one hundred and eighty days after the day on which this resolution is agreed to.

SEC. 308. The Committee on Rules and Administration shall, within one hundred and eighty days after the day on which this resolution is agreed to, report proposals to prohibit the misuse of official staff by holders of public office in campaigns for nomination for election, or election, to Federal office.

SEC. 309. The Committee on the Judiciary shall, within one hundred and eighty days after the day on which this resolution is agreed to, report to the Senate on the constitutionality of the effect of the provisions of the Code of Official Conduct which have the effect of discrimination between various classes of Senators on the basis of outside income (whether earned or unearned).

SEC. 310. (a) The Committee on Governmental Affairs shall conduct a study of the subject of handling employment discrimination complaints.

(b) The Committee shall report the results of their study under subsection (a), together with their recommendations, to the Senate within one hundred and eighty days after the day on which this resolution is agreed to.

(c) The recommendation of the Committee on Governmental Affairs shall be referred to the appropriate committee for a period not to exceed sixty days.

SEC. 311. (a) The Committee on Governmental Affairs shall review the desirability of establishing rules and regulations for the establishment and maintenance of "blind trusts", or other similar financial arrangements, by high-level Government officials (including Members, officers, and employees of the Senate) during their period of governmental service.

(b) The committees shall report the results of their review under subsection (a), together with their recommendations to the Senate within one hundred and eighty days after the day on which this resolution is agreed to.

(c) The recommendations of the Committee on Governmental Affairs shall be referred to the appropriate committee for a period not to exceed sixty days.

SEC. 312. The Committee on Rules and Administration and the Select Committee on Ethics shall study the desirability of applying provisions of the Code of Official Conduct to individuals, corporations or other entities employed by the Senate on a per diem, consultant or contract basis.

SEC. 313. (a) Except as provided in this section, the amendments to the Standing Rules of the Senate made by title I and the provisions of title II shall take effect on the day after the day on which this resolution is agreed to.

(b)(1) Rule XLII of the Standing Rules of the Senate (as amended by title I), relating to Public Financial Disclosure, shall take effect on October 1, 1977, and the statement required to be filed thereunder on or before May 15, 1978, shall cover the period October 1, 1977, through December 31, 1977, except that, at the option of any individual required to file such statement, it may cover the calendar year 1977.

(2) Rule XLIV of the Standing Rules of the Senate (as such rules existed prior to the amendments made by title I) shall remain in effect for the period through September 30, 1977, and the statement required to be filed thereunder on or before May 15, 1978, shall cover the period January 1, 1977, through September 30, 1977, except that, at the option of any individual required to file such statement, it may cover the calendar year 1977.

(c) Rule XLIV of the Standing Rules of the Senate (as amended by title I), relating to Outside Earned Income, shall take effect on January 1, 1979.

(d) Paragraphs 6, 7, 8, 9, and 10 or rule XLV of the Standing Rules of the Senate (as amended by title I), relating to Conflict of Interest, shall take effect on April 1, 1978.

(e) Rule XLVI of the Standing Rules of the Senate (as amended by title I), relating to Prohibition of Unofficial Office Accounts, shall take effect as follows:

(1) On the day after the day on which this resolution is agreed to, no contributions to an unofficial office account may be received.

(2) Expenditures from unofficial office accounts shall terminate on December 31, 1977.

(f) Rule XLVIII of the Standing Rules of the Senate (as amended to title I), relating to Franking Privilege and Radio and Television Studios, shall take effect on January 1, 1978.

(g)(1) Paragraph 1 of rule XLIX of the Standing Rules of the Senate (as amended by title I) shall take effect thirty days after the day on which this resolution is agreed to.

(2) Rule XLIII of the Standing Rules of the Senate (as such rules existed prior to the amendments made by title I) shall remain in effect for the period through the thirtieth day after the day on which this resolution is agreed to.

(h) Rule L of the Standing Rules of the Senate (as amended by title I) relating to Employment Practices, shall take effect on January 3, 1979.

(i) The amendments to Senate Resolution 338 contained in sections 202 and 203 of title II of this resolution shall take effect thirty days after the day on which this resolution is agreed to.

NOTICE OF IMMEDIATELY EFFECTIVE REQUIREMENTS OF THE SENATE CODE OF OFFICIAL CONDUCT

Mr. STEVENSON. Mr. President, effective at midnight tonight, 12:01 a.m., April 2, 1977, a number of new ethics rules will be in effect.

These standing rules of the Senate impose requirements on Senators, officers, and employees of the Senate, as well as on former Members of the Senate. Further, the new rules also expand the defi-

nition of who is an employee of the Senate for the purpose of compliance with these new rules and present rules.

On behalf of the Senate Select Committee on Ethics, I and Senator SCHMITT give notice these rules are in effect and impose immediate obligations and prohibitions on Senators, former Senators, officers, and employees of the Senate. Inasmuch as enrolled copies of Senate Resolution 110, incorporating all amendments thereto, will not be available until next week, this notice summarizes the new rules, obligations, and prohibitions. But Senators, officers, and employees are advised to consult the statement of Senate Resolution 110, as adopted, which appears elsewhere in this issue of the RECORD.

Some rules and some portions of rules which are a part of the new Senate Code of Official Conduct take effect at a later date. The select committee will give timely notice with respect to those rules or portion of rules.

In addition, present Senate "ethics" rules—rules 41, 42, 43, and 44—or portions of them, continue in effect during the period of transition to full coverage under the provisions of Senate Resolution 110. This notice will refer to those requirements as well.

Further, Senators, former Senators, officers, employees, and candidates are on notice that present rules 41, 42, 43, and 44 can be, for years hence, the basis for a complaint and Ethics Committee investigation regarding a violation which occurred when those rules were in effect.

IMMEDIATELY EFFECTIVE PORTIONS OF THE SENATE CODE OF OFFICIAL CONDUCT

A. RULE 43—GIFTS

New rule 43 takes effect at midnight tonight. It states prohibitions against a Member, officer, or employee, or a spouse or dependent, accepting gifts with aggregate value exceeding $100 during the calendar year from a person, organization, or corporation having direct interest in legislation before the Congress; or from a foreign national, with certain exceptions relating to gifts which are private and personal and gifts of educational travel to a foreign country.

B. RULE 45—CONFLICT OF INTEREST

Paragraphs 1 through 5 of rule 45 take effect at midnight tonight.

Paragraph 1 prohibits the taking of a bribe.

Paragraph 2 prohibits outside employment which is inconsistent or in conflict with the conscientious performance of official duties.

Paragraph 3 continues the requirement, previously stated in old Senate rule 41, that officers and employees must report to supervisors in writing any outside employment for compensation immediately upon taking such employment and on May 15 of each year. This paragraph further imposes on the supervising Senator the full responsibility to see that such activities by his employee do not represent a conflict of interest or interference with the employee's duties to the Senate.

Paragraph 4 prohibits Members, officers, or employees from knowingly using their official position to advance legislation which furthers their pecuniary interests.

Paragraph 5 permits a Senator to decline to vote, in committee or on the floor, when he believes his voting would be a conflict of interest.

C. RULE 46—PROHIBITION OF UNOFFICIAL OFFICE ACCOUNTS

Under provisions of Rule 46 which are effective at midnight tonight, no contribution henceforth may be received into an "unofficial office account," but otherwise approved expenditures from present funds in existing unofficial office accounts may continue until December 31, 1977.

Further, this rule provides that expenses incurrd by a Member in connection with his official duties shall be defrayed only from personal funds of the Member; official funds specifically appropriated for that purpose; funds derived from a political committee—as defined in section 301(d) of the Federal Election Campaign Act of 1971 (2 U.S.C. 431)); and funds received as reasonable reimbursements for expenses incurred by a Member in connection with personal services provided by the Member to the organization making the reimbursement.

Further, the rule states that, effective midnight tonight, no contribution shall be converted to the personal use of any Member or any former Member.

"Old" rule 42, paragraph 1, may still remain in effect with respect to the source of contributions which legally may be expended from an unofficial office account during the remainder of this year. This "old" rule 42 may also qualify the Federal Election Commission's regulations or IRS regulations regarding purposes for which such funds may be spent during the remainder of this year.

D. RULE 47—FOREIGN TRAVEL

Under rule 47, effective immediately, no Member of the Senate whose term will expire at the end of the Congress may use Government funds for foreign travel after the date of the general election in which his successor is elected, or in the case of a Senator who is not a candidate in the general election, the earlier of the date of such general election or the adjournment sine die of the second regular session of the Congress.

Second, rule 47 prohibits, effective immediately, the practice commonly known as "double dipping." That is, those accepting Govenrment funds for foreign travel may not receive reimbursement for any expense both from the Government and from another source.

Similarly, it prohibits such persons engaged in foreign travel from receiving reimbursement for the same expense more than once from the Government. And, further, it requires that Government funds to defray expenses for foreign travel can be used for no other purpose.

Also, rule 47 requires that a per diem allowance for foreign travel must be used for lodging, food, and related expenses and the portion not actually used must be returned.

E. RULE 49—POLITICAL FUND ACTIVITY: DEFINITIONS

Paragraph 1 of new rule 49, which limits staff political fund activity, takes effect in 30 days, but similar provisions of "old" rule 43 remain in effect: Only an employee in the personal office of a Senator, receiving an annual salary of $10,000 or more who is designated by the employing Senator in writing for the purpose, and who files a public financial disclosure statement regarding contributions, may "receive, solicit, be the custodian of, or distribute" campaign funds. When paragraph 1 of rule 49 takes effect on May 1, a restricted number of employees may be so qualified and "solicitation" will not be permitted even by the qualified staff persons.

Paragraphs 2, 3, and 4 take effect at midnight tonight. They change the definition of a Senate employee covered for the purposes of compliance with some parts of the Senate Code of Official Conduct. Under these new definitions, employees detailed for Senate service from Government agencies on a reimbursable basis, educational fellows, and other temporary assistants paid from non-Government funds, and reemployed annuitants may be required to publicly disclose contributions and honoraria received or handled, submit confidential statements of their financial interests, and report to supervisors in writing their outside business and professional activities.

F. DISCLOSURE OF FINANCIAL INTERESTS UNDER PRESENT RULE 44

The Senate's approval of Senate Resolution 110 does not relieve Senators, officers, employees, and candidates of their obligations under present rule 44 to submit to the GAO before May 15, a sealed disclosure of financial interests. Nor does Senate Resolution 110 change existing requirements for the public reporting, by May 15, of contributions received, contributions expended, and honoraria received. Forms and instructions for these reports are available in the office of the Ethics Committee.

Mr. President, we urge all Senators and supervisors of Senate employees to bring the new ethics rules which take effect at midnight tonight to the attention of all persons under their supervision.

ADMINISTRATION OF OATH OF OFFICE AS SECRETARY TO HONORABLE JOSEPH STANLEY KIMMITT

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now proceed to the swearing-in ceremony for the new Secretary of the Senate.

If the retiring Secretary of the Senate, Mr. Francis R. Valeo, will escort Mr. J. Stanley Kimmitt to the rostrum, the Chair will administer his oath of office.

Mr. J. Stanley Kimmitt, accompanied by Mr. Francis R. Valeo, advanced to the desk, where Mr. Kimmitt was administered his oath of office, as follows:

The ACTING PRESIDENT pro tempore. Do you, Joseph Stanley Kimmitt, solemnly swear that you will support the Constitution of the United States, and do you, Joseph Stanley Kimmitt, Secretary of the Senate of the United States of America, solemnly swear that you will truly and faithfully discharge the duties of your said office, to the best of your knowledge and abilities?

Mr. KIMMITT. I do.

[Applause, Senators rising.]

NOTIFICATION TO HOUSE OF REPRESENTATIVES OF ELECTION OF JOSEPH STANLEY KIMMITT AS SECRETARY OF THE SENATE

Mr. ROBERT C. BYRD. Mr. President, I submit a resolution and ask for its immediate consideration.

The resolution (S. Res. 131) was considered and agreed to, as follows:

Resolved, That the House of Representatives be notified of the election of Joseph Stanley Kimmitt, of Montana, as Secretary of the Senate, effective April 1, 1977.

NOTIFICATION TO PRESIDENT OF THE UNITED STATES OF THE ELECTION OF JOSEPH STANLEY KIMMITT AS SECRETARY OF THE SENATE

Mr. ROBERT C. BYRD. Mr. President, I submit a resolution and ask for its immediate consideration.

The resolution (S. Res. 132) was considered and agreed to, as follows:

Resolved, That the President of the United States be notified of the election of Joseph Stanley Kimmitt, of Montana, as Secretary of the Senate, effective April 1, 1977.

Mr. ROBERT C. BYRD. Mr. President, may we have order?

The ACTING PRESIDENT pro tempore. The Senate will be in order. Will Senators please take their seats?

RECOGNITION OF MR. JOSEPH STANLEY KIMMITT AS HE ASSUMES THE DUTIES OF SECRETARY OF THE SENATE

Mr. ROBERT C. BYRD. Mr. President, I congratulate Mr. Stanley Kimmitt as he assumes the duties of Secretary of the Senate. I look forward to working with Mr. Kimmitt in the months that lie ahead of us in the 95th Congress.

Mr. Kimmitt comes to his post well prepared to fulfill the responsibilities that will be his. After a long and distinguished career in the military, from which he retired as a colonel, Mr. Kimmitt entered Senator Mansfield's staff for a brief period before being elected Secretary of the Majority in 1966.

As Secretary of the Majority, Stan Kimmitt forged a record of integrity, devotion to duty, thoroughness, punctuality, and effectiveness. These are qualities that will serve him well in his new office.

Mr. President, it is my opinion that the work of the Senate is of ultimate importance to the functioning of this Nation.

Mr. President, may we have order in the Senate?

The PRESIDING OFFICER (Mr. HARRY F. BYRD, Jr.). The Senate will be in order. Attachés who are standing will take seats or leave the Chamber.

The Senator may proceed.

Mr. ROBERT C. BYRD. Mr. President, in the Senate, there are few jobs that can equal that of the Secretary of the Senate in importance or demands laid upon it. The position of the Secretary requires a degree of proficiency and commitment that would try any man's mettle; this is a task that calls for maturity, wisdom, balance, and a meticulous sense of accuracy.

But Stan Kimmitt has spent his whole career in the service of his country, often under the trying circumstances of combat. In becoming the Secretary of the Senate, he is but beginning a new phase in a life of patriotic duty and challenge.

I did not know until I became majority leader of the extreme efficiency, dedication, and effectiveness of this man, but I know it now. In all the years that I have worked in the Senate, I was not aware of the amount of work that he has had to do, and the efficiency with which he does it and the punctuality with which he has responded to the needs of the institution.

All of us who have benefited by Mr. Kimmitt's conscientious assistance in the past appreciate the quality of his work, and we wish him well as he enters into this new relationship with the Senate.

Mr. METCALF. Mr. President, a few minutes ago it was my privilege and honor to administer the oath of office to our new Secretary of the Senate, Mr. Stan Kimmitt. Of course, every Senator knows Stan. As Secretary for the Majority under Senator Mansfield, he performed faithfully, diligently, and skillfully. He is acquainted with the operations of the Senate and has the respect of the Senate employees. It is a special privilege and honor to welcome Stan as the new Secretary, because he is a constituent of mine from Great Falls, Mont. I look forward to working with him and I know that every Senator will be pleased that he is our new Secretary.

RESOLUTION COMMENDING HONORABLE FRANCIS R. VALEO UPON HIS RETIREMENT AS SECRETARY OF THE SENATE

Mr. ROBERT C. BYRD. Mr. President, I send to the desk a third resolution, joined in by my friend the minority leader, and ask for its immediate consideration.

The resolution (S. Res. 133) was considered and agreed to.

The preamble was agreed to.

The resolution, with its preamble, is as follows:

Whereas, upon the retirement of its Secretary, Francis R. Valeo, the Senate wishes to express its appreciation for his 19 years of service as an employee of the Senate and his over 10 years as Secretary of the Senate;

Whereas the said Francis R. Valeo at all times has discharged the difficult duties and responsibilities of his office with high efficiency and abiding devotion; and

Whereas his unsurpassed service and his unfailing dedication to duty have earned for him our affection and our esteeem: Now, therefore, be it

Resolved,, That Francis R. Valeo be hereby commended for his long, faithful and exemplary service.

SEC. 2. The Secretary of the Senate is directed to transmit a copy of this resolution to Francis R. Valeo.

COMMENDATION TO MR. FRANCIS R. VALEO FOR HIS CONTRIBUTIONS AS SECRETARY OF THE SENATE

Mr. ROBERT C. BYRD. Mr. President, as Mr. Frank Valeo leaves the position of Secretary of the Senate, he will be completing approximately 31 years of continuous service, directly or indirectly, to the Congress of the United States. In the many capacities in which he has served, he has distinguished himself repeatedly.

The duties of the Secretary of the Senate are important and varied. For nearly 11 years, Frank Valeo has carried out these duties with dispatch, efficiency, and courtesy. All those who have been Members of the Senate for the past decade owe Mr. Valeo a genuine debt of gratitude for the tireless assistance he has rendered us.

Before coming to work for the Senate, Frank Valeo had already established his credentials as an expert on foreign affairs, with a special emphasis on the Far East. Those who accompanied the former majority leader, Mr. Mansfield, and Mr. Valeo on their trips to China were relieved to discover that Mr. Valeo had even mastered the intricacies of the Chinese language. This is but a further example of the intelligence, scholarship, experience, and background that he has applied to his vocation over the years.

Both as secretary to the majority and Secretary of the Senate, Frank Valeo brought honor to himself and to the institution that he served. He has a deep appreciation for the traditions and heritage of this body, and he has labored selflessly for it. I can assure Mr. Valeo that his contributions will long be remembered, and that he will have a special place in the hearts of the many friends among the membership of the U.S. Senate.

TRIBUTES TO MR. KIMMITT AND MR. VALEO

Mr. BAKER. Mr. President, I join the majority leader in congratulating Mr. Kimmitt on his election as Secretary of the Senate, and our good wishes to Mr. Valeo as he retires from that important position.

It is the function of the officers of the Senate, the Secretary of the Senate in particular, to serve this entire body, and that is a tradition that has been kept faithfully over the years. I am sure that Stan Kimmitt will do it with great fidelity as well. We of the minority congratulate him. We wish him well in this new undertaking, and we wish all happiness and good health to Frank Valeo.

Mr. ROBERT C. BYRD. I yield to the Senator from Missouri.

Mr. EAGLETON. I thank my distinguished colleague for yielding.

Briefly, Mr. President, I want to add my words of support and esteem for the two individuals just mentioned. Mr. Valeo and Mr. Kimmitt are two of the finest persons I have known from any walk of life. The word gentleman applies both to Mr. Kimmitt and Mr. Valeo. The Senate indeed has been fortunate to have two such outstanding individuals as part of the Senate family. I wish them the best of health and happiness in the years ahead.

Mr. CRANSTON. Will the Senator yield?

Mr. ROBERT C. BYRD. I yield.

Mr. CRANSTON. I just want to join in the statements, Mr. President, in which

I totally concur, regarding Frank Valeo and Stan Kimmitt. Both have rendered wonderful service to each of us individually, to the Senate as a body, and to this country. It is a great pleasure to know each of them. I look forward to working with Stan Kimmitt in his new responsibilities, and I look forward to working with Frank Valeo in whatever important responsibilities he, too, will assume. I trust, expect, and hope he will have some great opportunities for further public service of the great character he has already rendered.

Mr. BURDICK. Mr. President, I am pleased to have the opportunity to pay tribute to my friend, Mr. Francis R. Valeo, who is retiring as Secretary of the Senate after a career in government which has spanned more than 30 years.

As a person, Frank has exemplified the the same qualities as his close and dear friend, the former Senate majority leader, Mike Mansfield of Montana. He has been intelligent, kind, open, fair, and honorable in his relationship with all the distinguished Members of this Chamber. I am deeply grateful for his contributions to the U.S. Senate and to the American people.

All Members of this body truly appreciate Frank's long dedication to high quality public service. There is no question that he understood the mechanics and the spirit of the U.S. Senate better than anyone else. I join my colleagues in extending my best wishes to a great American and a dedicated public servant, Francis R. Valeo. It is my hope that the future will hold all good things for him and his family.

The PRESIDING OFFICER. The Senate will be in order. What is the will of the Senate?

VISIT TO THE SENATE BY GOVERNOR TEASDALE OF MISSOURI

Mr. EAGLETON. Will the Senator yield for 5 seconds?

Mr. McCLURE. I yield.

Mr. EAGLETON. I would like to bring to the attention of my colleagues the fact that the new Governor of the State of Missouri, the Honorable Joseph P. Teasdale, is standing near the doorway of the Senate.

[Applause.]

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. I ask unanimous consent that the Senate now go into executive session for the purpose of allowing Mr. JACKSON to call up two nominations that are at the desk.

There being no objection, the Senate proceeded to the consideration of executive business.

Mr. JACKSON. Mr. President, I call up the two nominations to be Assistant Secretaries of Interior, Mr. Martin and Mr. Herbst, reported earlier today.

The PRESIDING OFFICER. The clerk will state the nominations.

DEPARTMENT OF THE INTERIOR

The legislative clerk read the nomination of Robert L. Herbst, of Minnesota, to be Assistant Secretary for Fish and Wildlife, Department of the Interior.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The legislative clerk read the nomination of Guy R. Martin, of Alaska, to be Assistant Secretary of the Interior.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. JACKSON. Mr. President, I ask unanimous consent that the President be notified.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUPPLEMENTAL APPROPRIATIONS, 1977

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to the consideration of H.R. 4877, which the clerk will state.

The assistant legislative clerk read as follows:

A bill (H.R. 4877) making supplemental appropriations for the fiscal year ending September 30, 1977, and for other purposes.

The Senate proceeded to consider the bill, which had been reported from the Committee on Appropriations with amendments.

The PRESIDING OFFICER. The time on this bill is limited to 4 hours, to be equally divided and controlled by the senior Senator from Arkansas (Mr. McCLELLAN) and the senior Senator from North Dakota (Mr. YOUNG), with 1 hour on any amendment in the first degree and 30 minutes on any amendment in the second degree, debatable motion, appeal, or point of order.

The Chair recognizes the Senator from Arkansas (Mr. McCLELLAN).

Mr. McCLELLAN. I yield to the Senator from Kentucky.

Mr. FORD. Mr. President, I ask unanimous consent that James Fleming and Jane Mathias of my staff, and Mr. Ron Tammen of Senator PROXMIRE's staff be given the privilege of the floor during discussion and vote on this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSTON. Mr. President, will the Senator yield?

Mr. McCLELLAN. Yes; I yield.

Mr. JOHNSTON. I ask unanimous consent that Alan Yuspeh and John McCutcheon of my staff have the privilege of the floor during consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ABOUREZK. Mr. President, I ask unanimous consent that Wendy Grieder of my staff be entitled to floor privileges during discussion on this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLELLAN. Mr. President, I ask unanimous consent that the committee amendments be considered and agreed to en bloc, and that the bill as thus amended be regarded for purposes of amendment as an original text, provided that no point of order shall be considered to have been waived by reason of an agreement on this order.

The PRESIDING OFFICER. Is there objection?

Mr. FORD. Reserving the right to object, Mr. President, will the Chair explain the statement by the Senator from Arkansas about the ability to object?

The PRESIDING OFFICER. The request made by the Senator from Arkansas means that if a committee amendment is subject to a point of order, that point of order would not be waived. They could still be made and no Senator would lose his right to make a point of order.

Mr. ROBERT C. BYRD. In other words, the Senator would not be giving up any of his rights if the request of the Senator from Arkansas is agreed to.

Mr. FORD. I ask the Senator also, is this the proper time to object to an amendment or a portion of the bill that the Senator now has proposed in the committee amendment?

The PRESIDING OFFICER. Does the Senator from Kentucky mean is this the time that a point of order should be made?

Mr. FORD. No, I want to object to the amendments on pages 5 and 6 that have been offered en bloc with the other committee amendments. I want to object to those amendments.

The PRESIDING OFFICER. The Senator from Kentucky, in that situation, would need to object to the unanimous-consent request of the Senator from Arkansas.

Mr. FORD. The Senator objects.

Mr. ROBERT C. BYRD. Mr. President, the Senator is only objecting to those specific amendments.

Mr. FORD. That is correct. Not to all of the amendments and not to all of the bill.

Mr. McCLELLAN. Mr. President, I amend my request to apply that to all except the two provisions identified by the Senator from Kentucky.

Mr. FORD. The amendments on pages 5 and 6, primarily the uniform services medical school appropriations.

Mr. McCLELLAN. My request is for all of it to be approved except as to those two items.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Arkansas as modified?

Mr. FORD. I have no objection.

The PRESIDING OFFICER. The Chair hears none. It is so ordered.

The committee amendments agreed to are as follows:

On page 3, line 8, strike "$1,020,000" and insert "$1,320,000";

ADMINISTRATIVE PROVISIONS

SEC. 101. Effective April 1, 1977, the Majority Leader of the Senate and the Minority Leader of the Senate are each authorized to appoint and fix the compensation of not more than two individual consultants, on a temporary or intermittent basis, at a daily rate of compensation not in excess of the per diem equivalent of the highest gross rate of annual compensation which may be paid to employees of a standing committee of the Senate. The provisions of section 8344 of title 5, United States Code, shall not apply to any individual serving in a position under this authority. Expenditures under this authority shall be paid from the contingent fund of the Senate upon vouchers approved by the Majority Leader and the Minority Leader, respectively.

SEC. 102. (a) Effective April 1, 1977, the second sentence of section 105 of the Legislative Branch Appropriations Act, 1976 (89 Stat. 275) is amended by striking out "July 1, 1975" and inserting in lieu thereof "April 1, 1977".

(b) The Majority Leader of the Senate is authorized to fix the compensation of the Secretary for the Majority so long as the position is held by the incumbent holding such position on April 1, 1977.

SEC. 103. Effective on the date of the enactment of this Act, the proviso in the paragraph under the headings "CONTINGENT EXPENSES OF THE SENATE", "MISCELLANEOUS ITEMS" in the Second Supplemental Appropriations Act, 1975 (Public Law 94-32) is amended to read as follows: *"Provided,* That notwithstanding any other provision of law, the Sergeant at Arms, subject to the approval of the Committee on Rules and Administration, is hereafter authorized to enter into multi-year contracts for data processing equipment, software, and services."

SEC. 104. The second paragraph under the heading "ADMINISTRATIVE PROVISIONS" in the Legislative Branch Appropriation Act, 1959 (72 Stat. 442; 2 U.S.C. 65b), is amended by striking out "during any fisca' year".

SEC. 105. Effective April 1, 1977, section 3 (f) under the heading "ADMINISTRATIVE PROVISIONS" in the appropriation for the Senate in the Legislative Branch Appropriation Act, 1972 (2 U.S.C. 59(e)), is amended by striking out "quarterly" in paragraph (5) and inserting in lieu thereof "monthly".

SEC. 106. (a) In accordance with subsection (g) of section 705 of Senate Resolution 4, 95th Congress, agreed to February 4 (legislative day, February 1), 1977, each Senator shall, except as otherwise provided in this section, receive each fiscal year an amount equal to three times the amount referred to in section 105(e)(1) of the Legislative Branch Appropriation Act, 1968, as amended and modified. Such amount may be used by a Senator only to employ individuals for the purpose of assisting him in connection with his membership on committees of the Senate. Each Senator shall designate the committee with respect to which any individual is so employed to assist him.

(b)(1) In the case of a Senator who is the chairman or ranking minority member of any committee, or of any subcommittee that receives funding to employ staff assistance separately from the funding authority for staff of the full committee, the amount referred to in subsection (a) shall be reduced by the amount referred to in section 105(e)(1) of the Legislative Branch Appropriation Act, 1968, as amended and modified, for each such committee or subcommittee.

(2) In the case of a Senator who is authorized by a committee, a subcommittee thereof, or the chairman of a committee or subcommittee, as appropriate, to recommend or approve the appointment to the staff of such committee or subcommittee of one or more individuals for the purpose of assisting such Senator in his duties as a member of such committee or subcommittee, the amount referred to in subsection (a) shall be reduced, for each such committee or subcommittee, by an amount equal to (A) the aggregate annual gross rates of compensation of all staff employees of that committee or subcommittee (i) whose appointment is made, approved, or recommended and (ii) whose continued employment is not disapproved by such Senator, if such employees are employed for the purpose of assisting such Senator in his duties as a member of such committee or subcommittee thereof as the case may be, or (B) the amount referred to in section 105(e)(1) of the Legislative Branch Appropriation Act, 1968, as amended and modified, whichever is less.

(3) In the case of a Senator who is serving on more than three committees, one of the committees on which he is serving, as selected by him, shall not be taken into account for purposes of paragraphs (1) and (2). Any such Senator shall notify the Secretary of the Senate of the committee selected by him under this paragraph.

(c)(1) An employee appointed under this section shall be designated as such and certified by the Senator who appoints him to the chairman and ranking minority member of the committee designated by such Senator and shall be accorded all privileges of a professional staff member (whether permanent or investigatory) of such committee including access to all committee sessions and files, except that any such committee may restrict access to its sessions to one staff member per Senator at a time and require, if classified material is being handled or discussed, that any staff member possess the appropriate security clearance before being allowed access to such material or to discussion of it.

(2) If (A) a Senator's service on a committee terminates (other than by reason of his ceasing to be a Member of the Senate) or a Senator's status on a committee as the chairman or ranking minority member of such committee or a subcommittee thereof changes, and (B) the appointment of an employee appointed under this section and designated to such committee by such Senator would (but for this paragraph) thereby terminate, such employee shall, subject to the provisions of subsection (e), be continued as an employee appointed by such Senator under this section until whichever of the following first occurs: (1) the close of the tenth day following the day on which such Senator's service on such committee terminates or his status on such committee changes or (2) the effective date on which such Senator notifies the Secretary of the Senate, in writing, that such employee is no longer to be continued as an employee appointed under this section. An employee whose appointment is continued under this paragraph shall perform such duties as the Senator who appointed him may assign.

(d) An employee appointed under this section shall not receive compensation in excess of that provided for an employee under section 105(e)(1) of the Legislative Branch Appropriation Act, 1968, as amended and modified.

(e) The aggregate of payments of gross compensation made to employees under this section during each fiscal year shall not exceed at any time during such fiscal year one-twelfth of the total amount to which the Senator is entitled under this section (after application of the reductions required under subsection (b)) multiplied by the number of months (counting a fraction of a month as a month) elapsing from the first month in that fiscal year in which the Senator holds the office of Senator through the end of the current month for which the payment of gross compensation is to be made. In any fiscal year in which a Senator does not hold the office of Senator at least part of each month of that year, the aggregate amount available for gross compensation of employees under this section shall be the total amount to which the Senator is entitled under this section (after application of the reductions required under subsection (b)) divided by twelve, and multiplied by the number of months the Senator holds such office during that fiscal year, counting any fraction of a month as a full month.

(f) Section 108 of the Legislative Branch Appropriation Act, 1976 (2 U.S.C. 72a-1c), is repealed.

(g)(1) This section shall take effect on March 1, 1977.

(2) Any designation, or change of designation, made by a Senator before the date of the enactment of this Act under section 705 of Senate Resolution 4, 95th Congress, agreed to February 4 (legislative day, February 1), 1977, shall be treated as a designation or change made under this section.

(3) The amount of any accrued surplus available to any Senator under section 108 of the Legislative Branch Appropriation Act, 1976, at the close of February 28, 1977, shall be available to that Senator during the period beginning on March 1, 1977, and ending on September 30, 1977, for the purpose of this section.

(4) The aggregate amount available to a Senator for gross compensation of employees appointed under this section during the period beginning on March 1, 1977, and ending on September 30, 1977 (other than any amount available under paragraph (3)), shall be seven-twelfths of the total amount to which the Senator is entitled under this section (after application of the reductions required by subsection (b)) for the fiscal year ending on September 30, 1977.

SEC. 107. (a) Section 106 of the Legislative Branch Appropriation Act, 1977, is amended to read as follows:

"SEC. 106. (a) There is hereby established in the Treasury of the United States a revolving fund within the contingent fund of the Senate to be known as the Senate Barber Shops Revolving Fund (hereafter in this section referred to as the 'revolving fund').

"(b) All moneys received by the Senate barber shops from fees for services or from any other source shall be deposited to the credit of the revolving fund. Moneys in the revolving fund shall be available without fiscal year limitation for disbursement by the Secretary of the Senate for necessary supplies and expenses of the Senate barber shops.

"(c) On or before December 31 of each year, the Secretary of the Senate shall withdraw from the revolving fund and deposit in the Treasury of the United States as miscellaneous receipts all moneys in excess of $10,000 in the revolving fund at the close of the preceding fiscal year.

"(d) Disbursements from the revolving fund shall be made upon vouchers signed by the Sergeant at Arms and Doorkeeper of the Senate.

"(e) The Sergeant at Arms and Doorkeeper of the Senate is authorized to prescribe such regulations as may be necessary to carry out the provisions of this section.".

(b) The amendment made by subsection (a) shall take effect on April 1, 1977.

SEC. 108. Hereafter, the Secretary of the Senate is authorized to make transfers between appropriations or funds available for disbursement by him for a fiscal year as may be approved by a resolution of the Senate (reported by the Committee on Appropriations of the Senate), and, to the extent necessary, to reimburse, out of funds thereafter made available for disbursement by him for such fiscal year, any appropriation or fund for any amount so transferred from it.

SEC. 109. Any funds appropriated under the heading "Senate" in any appropriation Act for the fiscal year ending September 30, 1977, shall remain available for obligation through September 30, 1978, for the same purposes for which appropriated.

SEC. 110. (a) Notwithstanding any other provision of law, but subject to the provisions of subsection (b), the Committee on Governmental Affairs is authorized, effective April 1, 1977, and during the remainder of the fiscal year ending September 30, 1977, to pay one additional staff member at a per annum rate not to exceed the rate provided for the two staff members referred to in section 105 (e) (3) (A) of the Legislative Branch Appropriations Act, 1968, as amended and modified.

(b) The provisions of subsection (a) shall cease to be effective when and if the individual who was transferred from the staff of the Committee on the District of Columbia to the staff of the Committee on Governmental Affairs under section 703 of Senate Resolution 4, 95th Congress, and who was paid by the Committee on the District of Columbia at the per annum rate referred to in subsection (a), ceases to be a member of the staff of the Committee on Government Affairs, or of a subcommittee thereof, and paid at such rate.

On page 54, beginning with line 10, insert:

JOINT ECONOMIC COMMITTEE

For an additional amount for "Joint Economic Committee", $11,500.

On page 54, beginning with line 13, insert:

JOINT COMMITTEE ON ATOMIC ENERGY

For an additional amount for "Joint Committee on Atomic Energy", $14,100.

On page 54, beginning with line 16, insert:

JOINT COMMITTEE ON PRINTING

For an additional amount for "Joint Committee on Printing", $6,000.

On page 55, line 3, following the comma, insert "including rental of space in the District of Columbia,";

On page 55, line 5, strike "$569,050" and insert "$729,000";

On page 55, beginning with line 7, insert:

ARCHITECT OF THE CAPITOL

OFFICE OF THE ARCHITECT OF THE CAPITOL

CONTINGENT EXPENSES

For an additional amount for "contingent expenses", $90,000.

GENERAL PROVISIONS

SEC. 111. Notwithstanding any other provision of law, the Secretary of the Senate is authorized to receive moneys from the Department of the Treasury as reimbursements for salaries paid by the United States Senate in connection with certain officers and members of the United States Capitol Police serving as instructors at the Federal Law Enforcement Training Center. Moneys so received shall be deposited in the Treasury of the United States as miscellaneous receipts.

SEC. 112. The provisions of section 1824 of the Revised Statutes of the United States, as amended (40 U.S.C. 210), are amended by deleting "at a cost not to exceed twenty dollars per man,".

SEC. 113. The Chairman of the Capitol Police Board is authorized, subject to such conditions as he may impose, to authorize the asignment of a police motor vehicle for use by instructor personnel of the Capitol Police Force while assigned to the Federal Law Enforcement Training Center.

On page 103, line 17, strike "$32,000;" and insert "$32,000.".

Mr. McCLELLAN. Mr. President, the bill now before us includes supplemental funds for almost every department and agency of Government.

The total amount recommended by the committee for the fiscal year 1977 supplemental appropriations bill is $32,142,985,710.

This amount is $4,250,388,439 over the House, but is still under the President's budget estimates by $873,813,605.

A summary table on pages 4 through 7 of the report shows a chapter-by-chapter breakdown of the bill on a comparative basis.

Title I of the bill includes the general program supplemental items for the various departments and agencies.

Title II of the bill includes the costs associated primarily with the October 1, 1976 general Government pay raise. In title II the committee is recommending a reduction of $215 million below the budget request for pay costs.

Title III of the bill includes the general provisions which are unchanged from those included in the House bill.

I shall discuss each of the chapters very briefly in my remarks and I presume they might be discussed in more detail when the individual chapters are under consideration.

For chapter I, on agriculture, the bill provides $1,521,835,000, which is $720,741,000 over the budget request and $52,841,000 over the House bill.

The principal item of increase over the House bill relates to a late budget request in the amount of $50,000,000 for subscription to capital stock of the Federal Crop Insurance Corporation which was transmitted too late for consideration by the House. Both House and Senate bills include an unbudgeted amount of $710,000,000 for reimbursement of net realized losses of the Commodity Credit Corporation. This amount was deferred in the regular appropriation bill for fiscal year 1977 and is included in the budget estimate for fiscal year 1978.

For chapter II on national defense the bill includes $101,854,000 which is $846,000 below the budget request and $13,555,000 over the House bill.

The principal item of increase over the House is the $12.5 million required to fund operating costs of the Uniformed Services University of the Health Sciences. Both House and Senate have reduced the amount budgeted for per diem rate changes and certain other travel entitlements. These savings more than offset the amount included in the bill for the Uniformed Services University and thus the chapter overall is below the budget request.

For chapter III, on the District of Columbia, the bill includes $18,352,600, which is $4,000,000 below the budget request and $2,000,000 under the House bill.

The reduction in the budget request is expected to be offset by additional local revenues which could be raised from several sources including collection of delinquent parking ticket fines from 1976 and other sources.

For chapter IV, on foreign operations, the bill provides $500,655,000, which is $142,000,000 below the budget request and $19,100,000 over the House bill.

The committee has made a number of adjustments in the House bill based on detailed testimony.

For chapter V, on HUD-independent agencies, the bill provides $19,498,956,000, which is $2,467,412,000 below the budget request and $4,031,545,000 over the House bill.

The principal change from the House bill is the adidtion of $4 billion for a total of $4.5 billion for wastewater treatment plant construction grants. The committee recommendation would provide the full budget request for these facilities.

For chapter VI, on Interior and related agencies, the bill includes $1,029,363,000, which is $181,819,000 over the budget request and $95,746,000 over the House bill.

The principal increase over the House bill relates to $75 million for Indian health facilities. The recommended funding would provide the Indian Health Service with $46 million to install overdue sanitation facilities in existing Indian homes and $29 million for the same facilities in new homes to be constructed in fiscal year 1977.

For chapter VII, the Labor-HEW chapter, the bill includes $5,931,601,000, which is $953,390,000 over the budget request and $106,670,000 over the House bill.

The changes from the House allowance relate to a great variety of health and education programs, including mental health, medical research, medical education, other forms of student assistance and educational support.

For chapter VIII, the legislative branch, the bill includes $4,447,250, which is $1,272,105 below the budget request and $2,484,350 over the House bill.

The increase over the House is composed primarily of Senate budget requests which, by custom, the House does not consider.

For chapter IX, on Public Works, the bill includes $43,800,000 which is the same as the budget request and $13,800,000 over the House bill.

The increase over the House is required to fund a budget request for the Southwestern Power Administration which reached the Congress too late for consideration by the House. These funds are required for the purchase of additional thermal generated electric power to make up the shortfall in the amount of power generated at the Corps of Engineers' hydroelectric power facilities in a six-State area of Kansas, Oklahoma, Texas, Missouri, Arkansas, and Louisiana.

For chapter X, on State, Justice, Commerce, and Judiciary the bill provides $359,722,249, which is $2,161,500 below the budget request and $28,827,540 over the House bill.

The principal changes from the House relate to increased funding for the National Oceanic and Atmospheric Administration and an additional $4 million for a total of $10 million as the U.S. Government contribution for expenses associated with the Eighth Pan American Games to be held in San Juan, Puerto Rico in 1979. Also included are several late budget requests which were received too late for consideration by the House.

For chapter XI, on transportation, the bill provides $63,500,000, which is 1,000,000 over the budget request and $23,000,000 over the House bill.

The changes from the House are required to provide the full budget request

for the traffic and highway safety program of the National Highway Traffic Safety Administration and grants to the National Railroad Passenger Corporation of the Federal Railroad Administration.

For chapter XII, on Treasury, Postal Service, and General Government the bill includes $964,000,000, which is $102,884,000 over the budget request and $9,7233,000 below the House bill.

The principal change from the budget request relates to an amount of $125 million included in both House and Senate versions of the bill. The funds would allow the General Services Administration to deal with the growing backlog of repairs to Federal buildings. Approximately 30,000 jobs could be accommodated with the recommended funding.

Finally, Mr. President, chapter XIII provides about $40.8 million for the satisfaction of claims and judgments. This is about $1 million more than the House bill. All of this is reflected in a budget estimate received in the Senate following House action on the bill.

Mr. President, that gives a brief summary of the bill. As is our normal procedure in supplemental bill, I shall ask the respective subcommittee chairmen to respond to any questions on their particular chapters. Before doing so, however, I would like to yield to my colleague, the distinguished Senator from North Dakota and the ranking minority member of the committee, Mr. YOUNG.

Mr. YOUNG. Mr. President, the committee recommendation for this supplemental appropriations bill is $32,142,985,710. This is $4,250,388,439 more than the amount provided by the House and $873,813,605 below the Carter budget estimate.

The distinguished chairman of the Committee on Appropriations, Mr. MCCLELLAN, has provided detailed information of this bill. Following this, we will have another big appropriations bill, the economic stimulus appropriations bill, which the committee has already reported out. This bill would total $19.8 billion. These two bills, plus the public works employment bill that was passed at the end of the last Congress containing appropriations of $3.7 billion, places the Congress in the position of providing approximately $55.7 billion without offsetting increases in revenues.

Mr. President, our national debt is increasing very sharply and the total national debt for this fiscal year is expected to reach $802 billion. Just the interest on this huge debt will be $46.8 billion. This sharp increase in spending will result in higher inflation rates and, I fear, another period of uncontrolled inflation.

The Ford budget estimated that the fiscal year 1978 debt would be $785 billion and the interest on that debt would be $45 billion. Also, the Ford budget estimated that the deficit for fiscal year 1978 would be $56.1 billion. A recent Washington Post article stated that the House Budget Committee was recommending a budget ceiling that would result in a deficit of $62.4 billion.

Mr. President, I am deeply concerned about the increased spending in this bill and the other bills that are to follow. I am also deeply concerned about unemployment and the economic growth of this country. I find it very difficult to understand how greater expenditures of funds and more deficits are going to improve our national economy. These huge additional expenditures may give some temporary assistance to the economy but the after effects could be devastating. What assurance, if any, do we have that this increased spending will not kick off another inflationary spiral? Somehow I cannot understand how we as a Nation, can spend ourselves into prosperity.

I know that many of my colleagues support the provisions of this supplemental appropriations bill, and there are some necessary programs contained in this bill that should be funded, as well as programs that must be continued in accordance with existing law. However, I am sure that there are many programs that could continue as presently funded and this bill could have been reduced by as much or more than the House reduced it.

For these and other reasons, Mr. President, I shall vote against this bill on final passage.

Mr. ABOUREZK addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. MCCLELLAN. Mr. President, what is the parliamentary situation with respect to the exceptions made in the unanimous consent request on the adoption of amendments?

The PRESIDING OFFICER (Mr. ZORINSKY). The pending question is the one committee amendment on page 6 which has not been agreed to.

Mr. MCCLELLAN. Are there two amendments to which there were exceptions?

The PRESIDING OFFICER. There is only one on page 6.

Mr. JOHNSTON. Will the Senator yield?

The PRESIDING OFFICER. The clerk will state the committee amendment.

The legislative clerk read as follows:

On page 6, line 12, strike "$1,200,000" and insert "$10,700,000, of which $9,500,000 shall be available only for the uniformed Services of the Health Sciences, this $9,500,000 to remain available for obligation until September 30, 1978";

Mr. MCCLELLAN. May I inquire, what the clerk read covers all of the bill to which he raised exceptions?

Mr. FORD. The exceptions were made to the amendments on pages 5 and 6. It primarily deals with the additional funds, operation and maintenance, of the Uniformed Services University of the Health Sciences.

Mr. MCCLELLAN. Does the Senator have objection to considering both at the same time and having one vote on the two amendments?

Mr. FORD. I have no problem.

Mr. MCCLELLAN. I ask unanimous consent that the total exceptions be considered as one issue now pending before the Senate and that there be only one vote.

The PRESIDING OFFICER. Does that include pages 5 and 6, or just page 6?

Mr. JOHNSTON. Mr. President, reserving the right to object, if the Senator will yield, the two amendments, of course, go together.

Mr. MCCLELLAN. They go together.

Mr. JOHNSTON. There is no objection to that.

I think the Senator from Kentucky and I are willing to have a time limitation of a total of 30 minutes, 15 minutes on each side. The first vote would be on the question of germaneness, which I hope would be——

Mr. MCCLELLAN. That is a parliamentary issue.

We are trying to settle what is before us and we can just have one vote on the two-amendment issues.

Mr. JOHNSTON. My only problem is the Senator said one vote and I did not want——

The PRESIDING OFFICER. Obviously, the material, the amendment, starts on page 5.

Mr. FORD. Page 5, lines 11 through 23, and page 6, 11 through 15.

Mr. MCCLELLAN. My request, Mr. President, only applied to the issues raised by the exception to the amendment, not upon a parliamentary question of germaneness. That would be a completely separate issue.

Mr. FORD. I have an understanding with the Senator from Arkansas, if the Chair is willing, that I was to be allowed to make my points and we would debate the issue here, and I can make my point, raise my points of order, as to the amendment, is that correct, and get into germaneness at that time, if the Senator wants?

Mr. MCCLELLAN. Why not raise the point of order now?

Mr. FORD. It is all right with me. But the Senator from Louisiana and I have agreed we can do it in 30 minutes, 15 on each side.

The PRESIDING OFFICER. Is there objection to the half-hour limitation on the amendment?

Without objection, it is so ordered.

The Senator from Kentucky has 15 minutes.

Mr. FORD. Mr. President, I am beginning to feel the pressure of seniority on a new Member in this body. I assure my colleagues that I do not mind the lobbying that is going on as it relates to this, because I feel I am right, and when one feels he is right and his people are supporting him, I believe he should continue to wage that battle.

Mr. President, twice I have stood before this body in opposition to the Uniformed Services University of the Health Sciences, and I do so again today.

Mr. President, I object to the inclusion of advanced funding in this bill—$12,465,000 to be exact—for the university. The administration recently declared its intention of closing down the university, the House appropriated no funds in its version of the supplemental, and here we are giving the program life instead of cutting it off.

Health manpower needs can be met without a university at a savings of $112 million between now and fiscal year 1982 by simply increasing the active duty obligation of scholarship participants,

which will automatically give the Department the same number of staff years of physician services as would be obtained from both programs when operating concurrently.

The cost of Federal aid to health education is absurd when comparing the two programs. This cost existed before the university and will continue after the university—or continue regardless of what happens to the university.

The shortage of physicians is in specialties, in geography, rather than simple numbers.

The claim that military medical needs are not being met is not true, and only 6 percent of the total numbers of physicians assigned fiscal year 1977 are foreign trained.

I do not want to be misunderstood. I am not against having doctors for our Armed Forces. On the contrary, I think we owe it to those who serve and protect our country to give them the very best health care available. But we can do this and at the same time serve a larger constituency—the American taxpayer—by terminating the university, transferring its 32 students—only 32, Mr. President—to the armed services health professions scholarship program, and putting the buildings to another use.

As a means of obtaining adequate medical care for our military personnel, the Department of Defense has chosen the least expensive of the three options suggested last year by the General Accounting Office analysis of the scholarship and university programs: By simply increasing the initial active duty obligation of scholarship program participants, the Department will receive the same number of staff years of physician service as would be obtained from both programs operating concurrently—and at an even lower cost per staff-year than both programs get now. Let me emphasize this point: No expansion of the scholarship program is required and no expansion of civilian medical schools will be necessary.

The Defense Department estimates that closing the school would result in a $112.6 million savings in operation and maintenance costs between now and fiscal year 1982, and approximately $30 million annually after that. Since the Defense budget already includes funding for the scholarship program, these amounts are direct budget savings.

A few words regarding the cost of staff-years of expected service are in order. At $21,441 per staff-year, the scholarship program is the most cost-effective method of providing military physicians as compared to $26,236 for the university. Supporters of the military medical school are continually adding to the scholarship program the cost of Federal assistance to civilian medical schools so that the university will look like the bargain it is not.

Mr. President, Federal subsidies to medical education are independent of the existence of both the university and the scholarship program and will continue regardless of their fates. Both the GAO and the DMC have stated this very fact, and I cannot understand why the university's proponents persist in supporting it with false figures.

To those of my colleagues who will argue that, since tuition costs are rising, the cost of the scholarship program will increase too, I point out that the current distribution of DOD scholarship students indicates that these large increases will not impact greatly on the Defense Department; 38 percent of the scholarship students have a tuition cost of under $2,000; 32 percent, of $2,000 to $4,000; 22 percent, of $4,000 to $6,000; and only 8 percent, of $6,000 to $8,000. None are in schools having a tuition cost of over $8,000. Furthermore, as costs and salaries go up for civilian schools, so will they increase at the university.

The university is neither cost-effective nor an efficient use of resources. The GAO, the Defense Manpower Commission—DMC—and the House Appropriations Survey and Investigations staff report have all shown the university to be an inefficient method of providing military physicians. Perhaps the DMC study says it best:

> It is clear . . . that it would be efficient to terminate the USUHS today and rely upon the scholarship program. . . . The analysis presented in this paper indicates that the operating costs of the USUHS alone would exceed the costs of the scholarship program: Therefore, the USUHS would be an inefficient alternative even if the facilities were constructed and had no net value in alternative uses.

But the facilities do have alternative uses. The second and largest phase is only 15 percent finished. When the shell is completed, the interior can be redesigned and constructed according to the requirements of a new mission. Final disposition of the buildings has not yet been decided upon and will be up to both the Defense Department and the Congress. However, NIH and Bethesda Naval Hospital could easily use more space, to name two possibilities. Future savings in construction costs will be significant, ranging, I would guess, near $100 million.

It is argued that one of the best reasons for having a military medical school is that it will help increase the Nation's supply of doctors. I think we all agree that it is the responsibility of the Department of Defense to provide adequate health care for its dependents at the greatest savings to the taxpayer and that it is the primary function of the university to fill this role. Mr. President, not only is our often decried national physician shortage taking care of itself, I further submit this shortage is the business of neither the Defense Department nor the university.

Besides, how proponents of the university program can argue that it will help solve the problem is a little much. By the time the first full class of 175 students graduates, it will be 1983. By the time these doctors are ready to return to the civilian sector, whether because they have paid back their time or have had a 20-year career, the physician shortage may well be a physician surplus.

Fears of a physician shortage are exaggerated: It is ending. A revised preliminary report from the Manpower Analysis Branch of the Department of Health, Education, and Welfare projects the national supply of physicians to increase from 375,000 in 1975 to 517,000 in 1985, a 38-percent increase. The report also shows the percentage of non-U.S. trained physicians will decrease from 21 percent to 18 percent of the total supply. The AMA Journal for December 27, 1976, indicates that medical graduates from the 114 medical schools will increase 11 percent from 1977 to 1981. Between 1966 and 1976, graduates from medical and basic science schools increased 79 percent.

The Department of Defense is convinced that physician requirements can be met and be met more economically in the 1980's through a combination of the Armed Forces scholarship program and direct recruiting than by the Uniformed Services University of the Health Sciences.

First, retention rates in the military services are increasing. The variable incentive pay program was initiated in 1974 to enable military salaries to better compete with civilian salaries and has helped with recruitment of physicians. As a matter of fact, as of December 31, DOD had filled 11,080 of 11,648 authorized physician slots for fiscal year 1977.

Second, the scholarship student is a volunteer who has chosen to serve in the Armed Forces in return for a scholarship or perhaps because he is attracted to service in the Armed Forces. He will be obligated to serve a minimum of 5 years—1 year internship, 4 years payback—and up to 10½ years—1 year internship, 4 years residency, and 5½ years payback. The same argument so frequently applied to the university pertains here also: The longer a person stays in the military and accrues benefits and tenure, the longer he or she may be expected to serve. The increased duty obligation of the scholarship program added to the important element of the variable incentive pay plan results in a convincing argument that physician retention rates will increase significantly over the next several years. I would like to take the time right now to refute the argument that 99 percent of all scholarship program graduates serve only their 4-year commitment: Department of Defense statistics show that at least 50 percent serve more than the minimum time required.

One final argument, Mr. President. The other side often dwells on the need for specially trained physicians who are tailored for specific military needs. Aside from the fact that the military doctor spends most of his time engaged in the field of primary health care—the common cold and broken bones, if he needs special training, he can do it right here in the civilian world. Over an 8-year period, our 600 surgeons in Southeast Asia saw fewer traumatic vascular injuries—wounds to a major artery—than did the surgeons at Houston's Ben Taub Hospital from January 1969 to September 1973.

I heard in the committee the objection to foreign trained physicians.

The buildings that have been constructed can be used efficiently by other

Federal agencies, NIH, and the Bethesda Naval Hospital. The facts are clear.

Military manpower needs can be met another way. The buildings under construction can be utilized effectively by other Federal agencies.

The university was approved without careful cost-benefit analysis, a fact pointed out by the GAO study.

We are going to hear on this floor today that those figures are wrong and they want to bring in the health manpower help from HEW to our medical schools. That cannot be added in, because it is there now, and it is going to be there regardless of the decision on the university.

If we are concerned about the tax burden and the need to give the taxpayers the best use of their money, this appropriation should be deleted and the university terminated.

Mr. President, I reserve the remainder of my time.

Mr. JOHNSTON. Mr. President, I do not know what this Congress has to do in order to convince the President that we are serious about the uniformed services medical school.

This legislation first passed Congress in 1972—full hearings, full debate, full votes in both Houses of Congress. We came back and funded it in 1973. We funded it in 1974. We funded it in 1975. We funded it in 1976.

Now, Mr. President, $85.8 million has been appropriated for the school, with all the construction under contract. There is a cost underrun of $13.2 million, all the design is complete, with the first building virtually finished and the second building well along, and now the administration tells us that we should reexamine this thing and kill the medical school.

Mr. President, when we received that message, we had another hearing in the Appropriations Committee, and by a vote of 18 to 4 ruled that we should continue with the medical school.

Let me point out what is involved in this amendment and why it is so essential that we act today.

First of all, we have the first class that has been accepted in the medical school. The first class is underway.

Second, we have 35 full-time faculty members employed, with their lives and their professions invested in this school. We have 175 physicians from the private sector who are working with the medical school.

We had 2,500 applications that had been received for the 68 places in the class to start in September, and we have the whole school in motion ready to go.

What this amendment does is simply to fund the school through fiscal year 1978. Why fund it through fiscal year 1978? Because if we do not, all this staff, all these students, all this tremendous effort and funds that have been put into this school, based upon the Executive Order to discontinue, will be lost for this country.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. JOHNSTON. I yield.

Mr. HUMPHREY. I just want to take a moment of the Senator's time to tell him that I am thoroughly in agreement with him. I believe it would be a serious mistake to retard in any way or to do away with this medical school. The Armed Forces medical school serves a vital purpose. In the long run, it is a money saver rather than a money user, and it gives some stability to the medical services for the Armed Forces. I am familiar with it. I know the head of the medical school. I think it is necessary. I thank the Senator for his efforts.

Mr. JOHNSTON. I thank the Senator from Minnesota for his good words. I know that he has been interested in this matter. Indeed, many Senators in this body, with the number of years this matter has been pending, have become familiar with it.

The Senator is correct in saying that this school actually will save money. According to the GAO, the cost per physician year—that is, the cost of putting a physician in the field—for the university is only $26,236; whereas, for the scholarship fund it is $32.068, when all the Federal costs are figured in.

Mr. President, I think the only reason why we ever have had this move to cut out the medical school was the concern as to what we might call a false accounting practice, whereby only the Department of Defense costs were figured on the scholarship funds, and they deleted a large amount of Federal funds from the actual cost of the scholarship program.

If we figure the full Federal cost, there is a saving of about $6,000 per staff year by going to the Uniformed Services University of Health Services.

Not only that, Mr. President; 40 percent of the cost of the scholarship program which is put up by the State is not at all figured into this. If we add that cost—which, after all, is a cost to taxpayers whom we represent—then it is a great saving to have the Uniformed Services University of Health Sciences, particularly when it is fully funded, fully appropriated, and almost complete.

Mr. President, 35 percent of the doctors now coming into the military, who are being recruited now, are foreign doctors. Of those, about 60 percent are not even American citizens. I believe we badly need a cadre of permanent officers who are willing to make a military career and military medicine their profession. Military medicine treats about 8 million to 10 million people; 9 million to 10 million Americans are dependent on military physicians. I think it is only appropriate that we continue an effort which we started more than 5 years ago.

The issue is very clear. This question of fiscal year 1978 funding is absolutely essential to settle this question once and for all.

Mr. SARBANES. Mr. President, will the Senator yield?

Mr. JOHNSTON. I yield.

Mr. SARBANES. Mr. President, I commend the distinguished Senator from Louisiana and the members of the Committee on Appropriations for the action they have taken.

If ever there was a clear example of being pennywise and pound foolish, it is the proposal which the Secretary of Defense has put forth, to proceed to terminate the Uniformed Services University of the Health Sciences.

As has been so ably pointed out by the distinguished Senator from Louisiana, the construction of this project has proceeded so far that no savings of consequence are to be realized by termination especially when one realizes additional costs are incurred by termination. In this regard I note that this is a project which, very laudably, has come in below estimates.

Mr. JOHNSTON. The Senator is correct.

Mr. SARBANES. That does not happen often.

Second, as the Senator has pointed out, the savings in terms of the cost of education are like the old shell game. The Secretary looks only at the cost to the Defense Department. However, if you go to the existing medical schools to get your personnel—and it is not there, in any event—you will incur not only the costs reflected in the Defense Department budget but also the costs incurred by other Federal agencies, plus costs incurred by State governments or private entities responsible for providing that medical education.

So, in terms of total cost to the entire society, this is going to educate doctors at a lesser cost than the use of the scholarship program in terms of the total cost; is that not correct?

Mr. JOHNSTON. The Senator is very correct, and I appreciate his comments.

Mr. President, how much time is remaining?

The PRESIDING OFFICER. The Senator from Louisiana has 6 minutes remaining.

Mr. SARBANES. I again commend the Senator and strongly support his position. If we really want to make effective use of our resources, if we want to give the armed services a guaranteed source of trained medical personnel, and if we want to meet the broad medical needs of our society, then the way to do it is to press forward with this university and not to terminate it.

Mr. JOHNSTON. I thank the distinguished Senator from Maryland.

I yield 2 minutes to my distinguished friend from Hawaii.

Mr. MATSUNAGA. This is just for a brief question and statement.

I supported the measure when it was first proposed in the House of Representatives, and I do intend to support the Senator and his committee. I commend the Senator and his committee for taking the action that it has taken.

One question which has arisen, and I ask this so that the Senator from Louisiana may make a statement for the RECORD where readers of the RECORD may be better informed, the objection I have heard runs along these lines: "Well, that school is just going to be set up for special selectees who will be appointed by politics and favoritism and it is not going to be a school to which those who merit attendance or who will merit enrollment will be admitted."

Would the Senator care to comment on that?

Mr. JOHNSTON. I certainly would.

This school now has 2,500 applications, and they have been meticulously selected on the basis of merit, on the basis of grades, and on the basis of their potential for the school and for the military.

The Senator is very correct in feeling and in urging that the selection be continued as at present, and that is totally on the basis of merit. The Senator can be assured that will continue.

Mr. MATSUNAGA. How does one apply to go to that school?

Mr. JOHNSTON. Anyone can file an application. I think you have to meet the minimum requirements, be a college graduate, et cetera.

As I say, there are presently 2,500 applications pending. Just apply to the Uniformed Services Medical School.

Mr. MATSUNAGA. I thank the Senator and I again congratulate him.

Mr. JOHNSTON. I thank the Senator from Hawaii.

Mr. President, I reserve the remainder of my time.

Mr. FORD. Mr. President, how much time do I have left?

The PRESIDING OFFICER. The Senator from Kentucky has 11 minutes.

Mr. FORD. You know, we are hearing the same song, the same words, the same music we have been hearing for years. This is not just a new thing for the House and the Senate. It is something which has been going on for years before. If you want to check political history, check those who ascended to certain positions, who were very much in favor of this medical school, and see how quickly the Department of Defense agreed to it.

The Senator from Louisiana keeps using figures that he wants to use. He is trying to make this a foreign doctor amendment. I do not know where he gets his figures, but the Department of Defense states that only 6 percent of foreign doctors were accepted.

Now I have got him on his feet, and that is fine. He has his figures and I have mine, and he is not going to use my time, so I want to quote from a statement that was made to the Senator for a question and a statement made by Senator JOHNSTON to Dr. Smith.

Chairman JOHNSTON. How would these cost effectiveness analyses be affected when the "sunk" costs of University construction are considered? That is, even assuming their validity at program outset, would they now be favorable where already-obligated construction costs are removed?

Dr. SMITH. If the GAO analyses were to be updated to consider incremental costs from this point in time, the "sunk" costs of University construction would be larger and the amount of unincurred investment costs to be amortized would be smaller. This would definitely decrease the cost per staff year for University graduates; however, even if all construction costs were excluded from the calculation, the decrease would only amount to $1,208 per staff year (see page 22, GAO Report, May 5, 1976). The University cost per staff year would then be $25,028 ($26,236–$1,208), still higher than the Scholarship cost per staff year of $21,444.

Now, we hear the argument about esprit de corps, having their own medical school. I listened to the former Senator, now Congressman, PEPPER as he testified before this committee, and he was bragging about the esprit de corps, the dedication, the fine service, the fine health, and all the medical care he could receive at Bethesda and at Walter Reed. I wonder where these people came from? They did not come from the Uniformed Services Medical School; they came from private schools, from our civilian area. So I do not see that there is any more esprit de corps.

We hear a lot from those who say, "We need to train them in military wounds." Well, let me just give you a little something here that might be of interest.

The other side often dwells on the need for specially trained physicians who are tailored for specific military needs. Aside from the fact that the military doctor spends most of his time engaged in the field of primary health care, the common cold, broken bones, pregnancy, if he needs special training he can do it right in the civilian world.

Over an 8-year period—now, think of this—our 600 surgeons in Southeast Asia saw fewer traumatic, vascular injuries, wounds to a major artery, than did the surgeons in Houston Ben Taub Hospital from January 1969 to September 1973, a 4-year period.

The university is already built, we hear. Major construction is only 15-percent complete. When finished, the new building can be used by other governmental agencies, with a significant future savings in construction alone.

We can save there, and we can save by using the scholarship program, we can save the taxpayers twice. We need more military physicians, and the university is the only way we can get them, we hear.

DOD indicates that all military physician needs can be met by a combination of the scholarship program and continuing existing incentives. This can be done without any strain on the facilities which are expanding rapidly.

Mr. President, if we want to help on both sides, if we want to save the taxpayers $112.6 million and $14 million this year, I think we ought to give that consideration.

How much time do I have left, Mr. President?

The PRESIDING OFFICER. The Senator has slightly over 8 minutes remaining.

Mr. FORD. The Senator from Louisiana does have about 3? If the Senator will use his and I will use mine——

The PRESIDING OFFICER. The Senator from Louisiana

Mr. JOHNSON. Mr. President, on the question of foreign physicians, I want to make clear I did not say we had 35 percent foreign physicians in the military. What I said was that 35 percent of the new recruits are foreign. In other words, the situation is bad, that is, 6 percent of the doctors now total are foreign, but 35 percent of the recruits are. I do not know what it would be next year without this medical school. Perhaps it would exceed 35 percent.

Mr. President, the distinguished Senator from Kentucky will make a point of order to this matter, and I shall bring to the floor the question of germaneness. It is a very simple question. And that is the question of whether or not this amendment, which forwards funds through fiscal year 1978, is germane to the question of funding for 1977 in effect. I think it is very clear that it is. There is no language written into this bill that makes it legislative in character. We are not trying to engraft a statute. All we are doing is trying to insure that fiscal year 1978 is funded in order that we will have a life of this medical school in fiscal year 1978. If we do not do that, if we do not agree to this amednment at this time, then all of the efforts that we have and $100 million which we have invested is likely to go down the drain and in the process we will be breaking faith with a lot of fine physicians who have signed on for a career of teaching there and for many students who are already in the school and already doing a job.

So, Mr. President, I will reserve the remainder of my time.

Mr. McCLELLAN. Mr. President, will the Senator yield?

Mr. JOHNSTON. I yied to the distinguished Senator from Arkansas.

Mr. McCLELLAN. Has not this project been authorized?

Mr. JOHNSTON. Yes. The project was authorized in 1972.

Mr. McCLELLAN. What amount of funds has been authorized for its construction to date?

Mr. JOHNSTON. To date we have appropriated $85.8 million, but I might say that the whole matter is under contract, and it came through with a contract of $72.6 million or an underrun fo $13.2 million.

Mr. McCLELLAN. That is another issue and that is very good news that we do have one contract in process where the construction is being achieved for much less than the estimated cost.

I do not understand how we have been appropriating money for this project year after year unless appropriations were authorized in the beginning when the project was authorized.

Mr. JOHNSTON. The appropriations were authorized and have been authorized each year, not only the construction contracts but the maintenance and operation.

Mr. McCLELLAN. Separate authorizations each year?

Mr. JOHNSTON. Excuse me. O. & M. does not require brand new authorizations in this matter.

Mr. McCLELLAN. I do not understand. The what?

Mr. JOHNSTON. Operation and maintenance funds and personnel are not required for the operation of this medical school, I am advised.

Mr. McCLELLAN. I am not talking about the operation of it, the teaching and so forth. I am talking about the construction.

Mr. JOHNSTON. Yes.

Mr. McCLELLAN. This projcet was authorized.

Mr. JOHNSTON. That is right.

Mr. McCLELLAN. No question about that.

Mr. JOHNSTON. No question about that.

Mr. McCLELLAN. At the time of the authorization of the project establishing the authority to construct the project, was there not at that time an authorization of funds sufficient to carry out the construction?

Mr. JOHNSTON. Yes, there was.

Mr. McCLELLAN. It seems to me like it is authorized.

Mr. JOHNSTON. It absolutely is authorized.

Mr. McCLELLAN. We have not had a separate authorization for each appropriation we made for it, have we?

Mr. JOHNSTON. No, we have not, except for the——

The PRESIDING OFFICER. The time of the Senator from Louisiana has expired.

Mr. McCLELLAN. Mr. President, I yield myself such time as I may use on the bill.

Mr. JOHNSTON. The Senator's question was: Was there more than one authorization for construction?

Mr. McCLELLAN. Have we each year been making an additional authorization or specific authorization for expenditures on the construction of this project?

Mr. JOHNSTON. The answer is yes.

Mr. McCLELLAN. We have been. But we are now at a point where there is no appropriation or where an additional appropriation is needed in order to continue construction.

Mr. JOHNSTON. That is right.

Mr. FORD. Mr. President, will the Senator yield?

Mr. JOHNSTON. There is no additional money needed for construction. What we are talking about here is the cost of operating the school for fiscal year 1978.

Mr. McCLELLAN. They do not need any construction money?

Mr. JOHNSTON. We do not need any construction money.

Mr. McCLELLAN. This is operating the school?

Mr. JOHNSTON. That is correct.

Mr. McCLELLAN. But there is no specific authorization for that; is that right?

Mr. JOHNSTON. Such authorization is not needed.

Mr. FORD. Mr. President, will the Senator yield?

Mr. McCLELLAN. All right. Just one moment. The distinguished Senator from Louisiana contends that no such authorization is needed.

I will be glad to yield.

Mr. FORD. I ask the chairman if he will yield to me a minute.

Mr. McCLELLAN. I yield.

Mr. FORD. I think he should be concerned. We are not authorizing construction money in this legislation.

Mr. McCLELLAN. All right.

Mr. FORD. We are authorizing operations money.

Mr. McCLELLAN. There is construction money still needed to carry on this project.

Mr. FORD. I know. But we are talking about the operation, materials and personnel, and it is only authorized a year at a time, and this is fiscal year 1977 appropriation. And we are authorizing 1978 appropriations money. We are extending the original authorization over into fiscal year 1978. I think the chairman of this distinguished committee probably realizes it may be that he should not be authorizing something that is going to happen in the next fiscal year, because we only appropriate 1 year at a time. We only authorize 1 year at a time.

Mr. McCLELLAN. We can authorize for longer than 1 year at a time. That is frequently done.

Mr. FORD. Operation and maintenance and military personnel, I find, is only authorized for 1 year In that specific case, I think that I am correct.

I am ready to submit my point of order, if the chairman is ready. Is the Senator from Arkansas prepared?

Mr. McCLELLAN. I yield the floor, Mr. President.

ADDITIONAL STATEMENTS SUBMITTED

Mr. BAKER. Mr. President, I wish to speak briefly in favor of this amendment, which would provide the funding required to continue in operation of the Uniformed Services University of the Health Sciences.

I believe it would be most ill-advised to terminate this program so auspiciously well underway. I fully agree with the Committee on Appropriations, which concluded that the arguments in favor of the University far outweigh those opposed.

It is time, Mr. President, to conclude this issue and establish, once and for all, the continued existence of this valuable source of physicians, not only for the military, but for the Nation at large.

I, therefore, urge my colleagues to vote against this amendment.

Mr. President, I commend the Appropriations Committee for including the $12 million in the pending supplemental in order to continue the operation of the Uniformed Services Health University for fiscal year 1978.

As the Senate knows, the January budget contained these funds but in a subsequent amendment by the new administration recommended that no funds be appropriated for fiscal year 1978 and that the school be closed.

Mr. President, at the outset let me say that with health care now one of the dominant issues in America today, it is unthinkable to close any medical school, regardless of whether its purpose is to furnish physicians for the Armed Forces or for our civilian population. And I hope the Congress will not close the one at issue today.

MILITARY DEPENDENCE FOR OVER TWO DECADES ON THE DOCTOR DRAFT

Mr. President, the decision of whether the medical school will continue to exist is a crucial issue for the future of military medicine.

I would remind the Senate that for over 20 years our Armed Forces were dependent on the so-called doctor draft provisions for acquiring physicians needed for the Armed Forces. The issue first arose in the late 1940's when legislation was enacted to provide an additional $100 per monh in compensation in the hope that this sum would stem the resignations and provide some inducement to volunteers for the Armed Forces When the Korean war began in 1950, there was no alternative but to provide a special draft for physicians which was continued as a part o fthe draft laws until their expiration in 1972. As the saying goes—

We can fight a war without lawyers but not without doctors.

This authority was unique since a person was compelled to serve on active duty on the basis of his profession.

Today there still remain on active duty repaying their obligated service a small number of physicians who entered active service under the draft provisions.

DEPENDENT NOW ON PHYSICIAN VOLUNTEERS

It was realized with the end of the draft in 1972 that the only means for providing volunteer physicians in adequate numbers for the Armed Forces was some means of medical school scholarships under which the graduates would serve certain minimum obligated periods in return for Federal financial assistance.

The legislation enacted in 1972 provided for two programs to obtain physicians. These programs were complimentary, not competitive. First the scholarship program for civilian medical schools was authorized under which the graduates would serve on active duty 4 years. The second source was the Uniformed Services Health University created in the act whose graduates would be obligated to serve for 7 years on active duty following graduation. Under both programs, additional periods of obligated service would be required for intern and residency training.

The purpose of the medical school was twofold, first to provide a nucleus for career physicians in the Armed Forces. It is anticipated that about 75 percent would continue in active service for an entire military career. It is planned that eventually the medical university will provide about 20 percent of the physicians on active duty in the Armed Forces. The civilian scholarship program will always be the dominant source for medical officers.

The Senate might recall that one of the problems during the years of the doctor draft was a low level of medical experience in the Armed Forces due to the constant 2-year turnover of physicians. At one time, over two-thirds of all the physicians in the Armed Forces had less than 2 years' medical experience.

The second purpose was to provide a unique school with a curriculum, which in addition to the traditional courses, would include those essential for military medical training, such as the problems involved in mass casualties, trauma, combat surgery, medical logistics, and the like.

One added benefit would be the retention of outstanding military physicians who might wish to participate in academic medicine during their career but who would leave active duty because of the absence of such an opportunity.

The school which by law was located in Bethesda, Md., would have available to it the unique clinical facilities already in

existence at the Naval Hospital at Bethesda, Walter Reed, Malcolm Grow at Andrews Field, and those at the National Institutes of Health. Because of these facilities, new construction could be limited to two buildings.

WHAT HAS HAPPENED

In the over 4 years since its statutory authorization, a distinguished Board of Regents under Mr. David Packard, has proceeded to the point where the school is now operating. One building is 87 percent complete; the other is 20 percent complete. It should be noted that these buildings received an appropriation of $79.9 million, but the latest cost estimate is only $66.5 million, with a saving to the Government of $13.2 million. A faculty including 50 full-time civilian members have been appointed. The first student class of 32 out of over 1,700 applicants was entered last fall. The second year class of 62 out of over 2,500 applicants have been selected for entrance in the fall of 1977. Academic accreditation has been granted. The school will eventually have 700 medical students and graduate 175 per year.

The important fact, Mr. President, is that the school is now operating.

POSITION OF CIVILIAN MEDICINE

Mr. President, in the early 1970's the creation of the school was opposed by some segments of American civilian medicine. This opposition was mainly on the premise that it represented Federal intervention in medical training which traditionally was reserved to the States and private institutions.

Insofar as I know, these reservations have disappeared. On the contrary, there is support from American medicine. Last week, one of those who testified in strong support of the school and in opposition to its closing was Dr. John E. Chapman, currently dean of the school of medicine at Vanderbilt University.

ARGUMENT ON COST

One argument put forth by the administration is that it is possible to train all the physicians for the Armed Forces in civilian medical schools. Further money will be saved if we close the institution now.

Mr. President, I am convinced that this cost argument has no merit. Studies conducted by the General Accounting Office indicated the following:

First. In terms of the cost per year of expected active service from the graduates of the civilian scholarship program, the total cost to the Federal Government is $32,068. This covers the cost to all departments, Defense, and HEW. The cost per year for the scholarship program to the Department of Defense is only $21,444 which is the figure used by the Department for comparative purposes.

Second. On this same basis, the cost for the medical university per year is $26,236.

It should also be noted that the GAO report indicates that the total cost to train a physician at the university would be about $184,000 as compared to $188,000—the national average for civilian medical schools.

Commonsense also indicates that there could not be much merit to the cost argument. Construction costs are about the same whether the buildings are to be used as a military or civilian medical school. The same equipment is used in all hospitals. The faculty by law is paid on a scale equivalent to that prevailing in the District of Columbia for similar jobs.

Incidentally, as I have already indicated, the total cost of these two buildings will be over $13 million below the appropriated figure of $79.9 million.

SO-CALLED ONE TIME SAVINGS

Mr. President, the so-called one time savings from termination are highly questionable. About $40 million in construction has already been obligated. There would be costly termination expenses involved with any contract cancellation. On the other hand, it is possible that efforts would be made to complete the buildings which would result in no savings at all, but additional expenses if converted to other use.

TWO SCHOLARSHIP STUDENTS REQUIRED FOR EACH UNIVERSITY STUDENT

Another cost factor that has not been considered is the fact that about 1,500 scholarships in civilian medical schools would be required to equate to 700 students in the medical university. This 2:1 ratio would be required due to the longer military service which could be expected from those graduating from the university. In other words, two students must be in the pipeline in civilian scholarships for each one student in the medical university.

Putting it another way, it would take three civilian medical schools of 500 students each to provide the same number of physicians for the Armed Forces as the medical university.

In summary, the executive branch has presented no case on the cost argument.

OPPOSITION WITHIN THE EXECUTIVE BRANCH

Mr. President, from the time of its original consideration in the Congress, there has been constant and determined opposition by certain civilians within the executive branch. Mr. Nixon received advice which he did not accept to veto the original legislation authorizing the university. The same opposition has continued.

I would like to quote from the program/budget decision memorandums for fiscal year 1978:

> It is an inappropriate role for the Federal Government to play. The Federal Government should not be competing with private institutions and state governments to produce and have licensed physicians.

This PBD, as it is called, was approved and resulted in the pending recommendation to the Congress to close the university. This decision, according to testimony, came up only through the budget channels. Those having substantive responsibility were not consulted.

ISSUES OF FEDERAL FINANCIAL PARTICIPATION

Mr. President, if the concern of OMB is with Federal financial assistance to health care, the pending appropriation item of some $12 million is hardly the place to start.

I would like to cite a few figures, all taken from the official fiscal year 1978 special analyses budget document:

In 1978, Federal spending for health programs will total $56 billion. This sum includes, of course, the medicare and medicaid programs. Included within this sum are also some other significant amounts: $1.9 billion for health training and education, mainly for students; $1.24 billion in funds for medical schools; $1.3 billion for health care facility construction; $308 million for health planning and statistics, including $42 million for general purpose statistics.

On page 204 this document states:

> The Federal Government now pays almost one-third of all health expenditures in the country. That includes more than 60 percent of the costs of medical research, 45 percent of health facilities, 40 percent of medical education and 30 percent for health services.

These figures speak for themselves.

THE ISSUE OF WHO SPENDS THE FUNDS

Mr. President, also without merit is argument that something is wrong with expending the funds directly to a Federal agency rather than going through the grant process. The medical university is controlled by a stautory Board of Regents, most associated with civilian medical education except the Chairman, Mr. Packard, Former Deputy Secretary of Defense.

There has never been any indication that this school would be other than first rate, in terms of faculty, curriculum and student body. The only funding difference would be that the Federal money goes directly to universities rather than through grants to civilian medical schools. I have heard of no complaints from civilian medical schools that the medical university poses unfair competition.

TOO MANY DOCTORS?

There has been some intimation that in the years ahead too many doctors will be graduated from civilian medical schools and the university constitutes unfair competition as the PBD indicates. In view of today's health care problems, that is certainly a risk that I, for one, am willing to take. One purpose of the medical university was to assist in a small way with its 175 yearly graduates in relieving the civilian medical schools of the complete burden of medical training for the Armed Forces. This relief will provide for additional spaces to the other special civilian programs, such as rural physician problems. It will also relieve the States and private institutions of whatever financial burden the absence of the medical university will impose.

At any rate, the annual output of 175 physicians could not under any stretch of the imagination contribute to flooding the market with physicians where the output is now about 13,000 per year.

NO RENEGING ON COMMITMENT

Mr. President, the Medical University was debated at length about 6 years ago and the issue was settled with the permanent law authorizing the institution. The 1972 statute contained no language

that the university would be created only until the "OMB decided it should be closed."

Commitments have long been made. The faculty has been appointed; the first year students have been admitted; the second year accepted; construction is partially completed. The medical university should not be an annual political football to be fought over as a part of each annual budget. Under this premise, the Congress each year could question whether to close the Military Academy at West Point and the Naval Academy at Annapolis on the theory that all the career officers could be acquired through the ROTC program.

NEED FOR RAPID DECISION

Mr. President, I commend the Appropriations Committee for including these funds as a part of the supplemental appropriation. If the fate of the medical university is not to be determined until the regular Department of Defense appropriation is passed by the Congress late this summer, the indecision during this period will be most damaging. It places the entire institution in limbo. Faculty members already appointed cannot afford to wait until the end of the summer to see if they are to be retained. Students may not wish to wait. All sorts of decisions will be hanging in the balance for several months.

The Congress should decide this issue now and should decide in the affirmative.

CONCLUSION

Mr. President, the continued existence of the university is not only crucial for military medicine, they are also important issues for the Congress.

It would be a mistake for the Congress to place sole reliance on civilian scholarships for providing military physicians. If this school is closed, it could not be recreated at any time in the foreseeable future. We would not know for years whether the civilian scholarship program alone could completely satisfy military needs.

Every Senator knows that adequate medical care must be provided for the men and women of our Armed Forces as a matter of military necessity.

If this school is closed and the day should come when the doctor draft must be reinstated, the Congress will have only itself to blame. The termination of the university can only contribute to the necessity of the draft renewal in the future.

Mr. President, this medical institution should be developed as the Congress mandated in 1972—not terminated.

Mr. PROXMIRE. Mr. President, before exploring some of the myths surrounding the arguments in support of the Uniformed Services University of the Health Science, I want to compliment my friend from Kentucky (Mr. FORD) for his persistent leadership in guarding the public's purse while seeking more efficient ways of increasing the number of physicians available to our society. After all, that is the principal issue here—what is the best way to educate and graduate physicians. No one disputes the need. No one argues against the requirement for military physicians. No one claims we can do without more physicians. The issue simply is what is the most efficient way of getting these physicians into military life.

PHYSICIAN SHORTAGES?

We are likely to hear many stories here today about the lack of physicians or the maldistribution of physicians or the needs of military families or the desperate condition of health care in the United States. Every one of these statements will be extraneous. That is not the issue. The issue is tax funds and physicians. How to get more physicians for less money.

Now the easiest thing we could do would be to say that we do not care about economy—that we do not care about costs, that we do not care about savings recommended by the President and Secretary of Defense—that we do not care about the burden on the taxpayers. That is the easy answer—simply spend tens of millions of dollars for military physicians without regard for efficiency or effectiveness or costs. Just open the Federal coffers and let the money roll out. And hope that by spending more and more money that will solve the problem. We could throw money at the problem until it goes away.

Mr. President, we could just ignore the economies that the President has requested—just turn our backs on the projected savings of $14 million this year and $112.6 million by 1982. We could raise the defense budget by putting funds for the university back in.

ECONOMY VOTE

But I hope we would be more responsible than that. How can I say more responsible? Because of a simple fact. Every impartial study of the university program versus the scholarship program indicates that it is far less costly to train our military physicians by scholarship than by operating a huge $80 million military university which at its peak will only produce 17 percent as many graduates. Think of it. We are investing $80 million into a building and $14 million a year in operating costs for a graduating class of only 175 students while at the same time the scholarship program graduates 988 a year.

How do we compare the costs of the two programs? Well, the General Accounting Office has compiled a 50-page report going into every conceivable variable. For example, they specifically looked at the difference in the retention rates required by the university, which is 7 years, compared to the scholarship program which is 4 years. They drew the conclusion that even considering the expected return based on staff years of service, even figuring in the different retention rates—still the scholarship program was much more economical than the university.

DEFENSE MANPOWER COMMISSION

Now does the GAO stand alone? No, indeed. Several years ago the Senate created a special Defense Manpower Commission and funded it at about $2 million. Senators BAKER and BENTSEN were the cosponsors of this legislation. The idea was to find ways where we could save money in defense manpower.

And what did this national commission conclude? They concluded that the university program was so ineffective that you could go ahead and build the $80 million building, let it stand idle, and still operate the scholarship program more cheaply.

No one is proposing we let that building stand idle. But that is just an indication of the magnitude of difference in the efficiency of producing physicians under each program.

Do the GAO and Defense Manpower Commission stand alone? No. They have been joined by Secretary Richardson when he was the Secretary of HEW and also when he was at the Defense Department. He looked at the university program and found it wanting. He opposed it.

Anybody else? Well, the President and Secretary of Defense oppose the university on economic grounds. Even under President Ford, the Office of Management and Budget recommended the university be killed, but the Ford administration did not accept this position.

There are other reports, of course. The House Appropriations Committee surveys and investigations staff report for one. And reports by various health consultants to HEW and DoD.

I point out these facts to emphasize that what the Senator from Kentucky is doing here is backed up by the most exhaustive analysis you would want on any project.

This is an economy vote—pure and simple. This is a vote of the big spenders versus the economy-minded advocates. This is a vote based on thorough analysis by several Federal and legislative organizations.

Unfortunately, Mr. President, a discussion of the specifics of the university versus the scholarship program have been clouded by propagation of a number of myths.

Let me take each in turn:

FACT AND FANCY

Myth No. 1: "The University is a less expensive means of procuring physicians for the services than the scholarship program." Now let us get right to the heart of this myth. It is built on a letter report to the House Armed Services Committee by the GAO. The House committee specifically instructed the GAO, over their vocal objections, to include in the analysis the fixed cost of the HEW budget going to civilian medical schools. The Comptroller General, in this very letter to the House committee, said although they were doing the computation the way the committee had forced them to, it was not valid. It is not a mathematically or economically correct comparison. It was a set up. The Defense Manpower report said the same thing. So these so-called facts that the GAO said the university is cheaper are a distortion. How can anyone check? Just ask the GAO. They put it in writing and they will say it in public.

The real facts are that the university is far, far more expensive than the scholarship program. Up to $160,000 more ex-

pensive per student per educational costs; $5,000 more expensive per staff year of experienced service.

Myth No. 2: "There is a shortage of military physicians." Listen for a moment to what the Defense Department has to say about this. And remember that if anyone knows about military physician shortages it should be the Defense Department:

The National supply of physicians will increase from 375,300 in 1975 to 517,200 in 1985 an increase of about 38 percent. The percentage of non-U.S.-trained physicians will decrease from 21% to 18% of the total supply. Graduates from 114 medical schools will increase from 13,961 in 1977 to 15,512 in 1981 an increase of 11% in just four years. Graduates from medical and basic science schools increased 79% from 1966 to 1976.

Retention rates for physicians in the military are swinging up because of the volunteer aspect of the program now under the scholarships concept. Those who enter the program in their first year of medical school will be obligated to serve a minimum of 5 years and up to 10½ years in payback.

I am quoting from the Department of Defense now:

In summary, the DOD is convinced that physician requirements can be met in the 1980's more economically through a combination of the scholarship program and direct recruiting. Notwithstanding the controversy over the federal subsidy, the bottom line of the federal budget will be a $20–$30 million less during the period FY 79–82 if the decision to close the University is upheld by the Congress.

Myth No. 3: Foreign-born physicians. The argument is going around that we should be worried about the number of foreign born physicians in our military. Foreigners actually treating our troops. Well, first of all the statistics show only an 8 percent foreign-trained recruitment for fiscal year 1976 and only 6 percent totally in DOD. The source of my figures is the Department of Defense.

Second, let us just think a minute about being worried about being treated by someone born in another country. There is an explicit prejudice involved here. All these physicians must be accredited for practice in the United States. They must all meet our tough standards.

Third, consider for a minute the contribution of foreign born scientists to our country. About half of the Nobel Prize winners were born overseas. Should we reject them—not let them contribute to our society?

In short, Mr. President, this argument about foreign-born physicians is just plain absurd—if not worse.

Myth No. 4: "We already have the building so why not keep going since $80 million has been sunk into the project."

In reality, Mr. President, construction of the primary building is only 15 percent complete. By turning this building over to another Federal tenant now projected to require a new building, there can be significant savings in future construction costs. In other words, the taxpayers are going to get a double savings by closing down the University. One savings by producing physicians through the cheaper scholarship program and one savings from not having to build a facility for some other Government agency.

(This concludes additional statements submitted on Uniformed Services University of the Health Sciences.)

Mr. FORD. Mr. President, I raise a point of order that on page 5 of the bill, lines 11 through 23, and page 6, lines 10 through 15, the matter contained therein is not authorized since it relates to operation and maintenance and military personnel accounts authorized for only 1 year and since the language contained therein expressly carries over to a second fiscal year in remaining available for obligation until September 30, 1978.

Further, I point out that under 10 U.S.C. 138 no funds for civilian or military personnel shall be approved until there is an end strength authorized for that fiscal year and in this case there is no such authorization.

Further, I point out that the first budget resolution for fiscal year 1978 has not yet been passed and incorporation of funding for fiscal year 1978 by the language "to remain available for obligation until September 30, 1978" is new spending authority which is not in order under section 303(a) of the Congressional Budget Impoundment and Control Act of 1974.

Further, I ask the Chair, should the Chair sustain point of order on the lack of authorization, whether or not a question of germaneness could then lie against the point of order in view of the fact that there is no House language on this matter.

Mr. JOHNSTON. Mr. President, I raise the question of germaneness. This provision is germane to the funding for the Defense Department provided in pages 5 through 7 of the bill and in my judgment is not a legislative matter since it adds no language but simply forward funds for fiscal year 1978.

Could I get an opinion from the Chair?

The PRESIDING OFFICER. Under rule XVI, paragraph 4, questions of relevancy of amendments to a general appropriation bill when raised must be submitted to the Senate and decided without debate. However, in submitting this question to the Senate, the Chair wants to advise the Senate that under the precedents the question of germaneness, when raised after a point of order has been made that the language is legislation on an appropriation bill, tolls the point of order if the Senate decides the question of germaneness in the affirmative, and those precedents have uniformly held in such a situation that "an amendment legislative in character is in order on a general appropriation bill if it is germane to the language as passed by the House." Thus, "if the House of Representatives opens the door by incorporating legislation in a general appropriation bill, the Senate has an inherent right to amend such proposed legislation, and to perfect that language, notwithstanding its rules."

Therefore, since there is no House language involved here, the Chair thinks that the question of germaneness is not properly raised, but submits the question as he must under the rule.

Mr. JOHNSTON. Mr. President, I ask for the yeas and nays.

Mr. McCLELLAN and Mr. FORD suggested the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. McCLELLAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. FORD. I object, Mr. President.

The PRESIDING OFFICER. Objection is heard.

The call of the roll was resumed.

Mr. FORD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSTON. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is, Is the committee amendment on page 5, lines 11 through 23, germane? On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from Indiana (Mr. BAYH), the Senator from California (Mr. CRANSTON), the Senator from Louisiana (Mr. LONG), the Senator from Washington (Mr. MAGNUSON), the Senator from Georgia (Mr. TALMADGE), and the Senator from Idaho (Mr. CHURCH) are necessarily absent.

I further announce that the Senator from Hawaii (Mr. INOUYE) is absent on official business.

I further announce that, if present and voting, the Senator from Washington (Mr. MAGNUSON) would vote "nay."

Mr. BAKER. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. HAYAKAWA), the Senator from Oregon (Mr. PACKWOOD), the Senator from Kansas (Mr. PEARSON), the Senator from Alaska (Mr. STEVENS), the Senator from South Carolina (Mr. THURMOND), and the Senator from Texas (Mr. TOWER) are necessarily absent.

I further announce that, if present and voting, the Senator from Alaska (Mr. STEVENS) and the Senator from South Carolina (Mr. THURMOND) would each vote "yea."

The yeas and nays resulted—yeas 56, nays 30, as follows:

[Rollcall Vote No. 95 Leg.]

YEAS—56

Allen	Hansen	Metcalf
Baker	Haskell	Morgan
Bartlett	Hatch	Nelson
Bellmon	Hatfield	Nunn
Bentsen	Hathaway	Percy
Brooke	Helms	Randolph
Burdick	Huddleston	Ribicoff
Cannon	Humphrey	Riegle
Case	Jackson	Sarbanes
Chafee	Javits	Sasser
Curtis	Johnston	Scott
Danforth	Laxalt	Sparkman
DeConcini	Leahy	Stafford
Dole	Mathias	Stennis
Domenici	Matsunaga	Stevenson
Eagleton	McClellan	Wallop
Eastland	McClure	Weicker
Gravel	McIntyre	Young
Griffin	Melcher	

NAYS—30

Abourezk	Ford	Muskie
Anderson	Garn	Pell
Biden	Glenn	Proxmire
Bumpers	Hart	Roth
Byrd, Harry F., Jr.	Heinz	Schmitt
	Hollings	Schweiker
Byrd, Robert C.	Kennedy	Stone
Chiles	Lugar	Williams
Clark	McGovern	Zorinsky
Culver	Metzenbaum	
Durkin	Moynihan	

NOT VOTING—14

Bayh	Inouye	Stevens
Church	Long	Talmadge
Cranston	Magnuson	Thurmond
Goldwater	Packwood	Tower
Hayakawa	Pearson	

The PRESIDING OFFICER. The Senate having decided that the amendment is germane, the point of order falls.

Mr. McCLELLAN. Mr. President, I move to reconsider the vote by which the amendment was found to be germane.

Mr. JOHNSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLELLAN. May we have order so I may ascertain whether there are any other amendments on this bill?

The PRESIDING OFFICER. The Senate will be in order. The question now recurs on the amendments.

The amendments were agreed to, as follows:

On page 5, beginning on line 11, insert:

MILITARY PERSONNEL

MILITARY PERSONNEL, ARMY

For an additional amount for "Military personnel, Army", $1,167,000, to remain available for obligation until September 30, 1978.

MILITARY PERSONNEL, NAVY

For an additional amount for "Military personnel, Navy", $888,000, to remain available for obligation until September 30, 1978.

MILITARY PERSONNEL, AIR FORCE

For an additional amount for "Military personnel, Air Force", $910,000, to remain available for obligation until September 30, 1978.

On page 6, line 12, strike "$1,200,000" and insert "$10,700,000, of which $9,500,000 shall be available only for the Uniformed Services University of the Health Sciences, this $9,500,000 to remain available for obligation until September 30, 1978";

UP AMENDMENT NO. 129

Mr. HEINZ. Mr. President, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

Mr. EAGLETON. Will the Senator from Pennsylvania yield?

Mr. HEINZ. I am happy to yield if I know who is asking me to yield.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania (Mr. HEINZ), for himself, Mr. PACKWOOD, and Mr. BIDEN, proposes unprinted amendment numbered 129.

On page 28, line 20, immediately after the numeral "III", add ", X".

On page 28, line 21, strike "$68,479,000" and insert in lieu thereof "$73,479,000".

Mr. EAGLETON. Mr. President, I want to address a question to the Senator from Pennsylvania.

Twenty Missourians are in town to meet with the Secretary of Defense on a base closure in my State. The Senator from Pennsylvania can appreciate the sensitivity of that. I have an amendment of which Senator BELLMON is aware which was requested by the President for agricultural benefits. Will he yield for 30 seconds so we may run this through?

Mr. HEINZ. I yield to the Senator as long as I do not lose my right to the floor.

Mr. EAGLETON. Mr. President, I send to the desk an amendment to the bill and ask for its immediate consideration.

The PRESIDING OFFICER. It will take unanimous consent to lay the amendment of the Senator from Pennsylvania aside.

Mr. EAGLETON. I ask unanimous consent that the amendment of the Senator from Pennsylvania be temporarily laid aside to take up my amendment, and that his amendment, upon disposition of mine, be the next order of business.

Mr. ALLEN. Will the Senator yield for a moment?

Mr. EAGLETON. Yes.

Mr. ALLEN. With respect to that request, would he request that it be laid aside for 5 minutes?

Mr. EAGLETON. That will be fine.

I amend my request to ask unanimous consent that the amendment of the Senator from Pennsylvania be laid aside for not to exceed 5 minutes.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

UP AMENDMENT 130

The PRESIDING OFFICER. The clerk will state the amendment of the Senator from Missouri.

The assistant legislative clerk proceeded to read as follows:

The Senator from Missouri (Mr. EAGLETON) proposes Unprinted Amendment 130.

Mr. EAGLETON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Following Line 26, P. 4, insert the following:

FARMERS HOME ADMINISTRATION

RURAL WATER AND WASTE DISPOSAL GRANTS

For an additional amount for "Rural Water and Waste Disposal Grants," $75,000,000.

RURAL DEVELOPMENT INSURANCE FUND

For an additional amount for the "Rural Development Insurance Fund" for "water and sewer facility loans," $150,000,000.

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

AGRICULTURE CONSERVATION PROGRAM

For an additional amount to carry out the Agricultural Conservation Program, $100,000,000, to incur obligations for the period ending September 30, 1977, and to liquidate such obligations for soil and water conserving practices in major drought areas as designated by the President or the Secretary of Agriculture: *Provided*, That not to exceed one per centum of the amount herein may be withheld and allotted to the Soil Conservation Service for services of its technicians in the designated drought areas: *Provided further*, That emergency assistance herein authorized shall be made available in accordance with standards and criteria as developed and approved by the Secretary of Agriculture.

Mr. EAGLETON. Mr. President, this amendment is a three part amendment. The first part would add $75 million in new budget authority for the rural water and waste disposal grant program within the Farmers Home Administration in the Department of Agriculture. The second part would provide an additional $150 million in loan authority to enable the Farmers Home Administration to increase its water and sewer facility loan program for the current fiscal year. The third and final part of the amendment would provide $100 million by direct appropriation for the agricultural conservation program for the balance of this fiscal year.

All of these amendments have been requested by the President and the committee has received the official budget estimates and justifications. These data were received too late, however, to enable these requests to be considered by the subcommittee and by the committee prior to the markup sessions. These additional requests are a part of the President's supplemental for designated drought areas.

For fiscal year 1977, Congress provided $200 million for the water and waste disposal grant program. The Ford budget proposed $50 million for fiscal 1978, but the original Carter revision increased this by $150 million and returned it to the 1977 appropriation level.

For the loan program, the 1977 level was $600 million, and this figure was proposed in both the Ford and Carter budget estimate for fiscal year 1978. These loan funds, of course, would be utilized in connection with the grant funds previously described.

For the agricultural conservation program, the 1977 appropriation bill authorized a program of advance contract authority of $190 million. The Ford budget proposed to eliminate this program for the forthcoming fiscal year, as previous administrations have been proposing for several years. The Carter budget proposed to restore the program at the $190 million level for fiscal 1978. The latest supplemental estimate would increase this by $100 million, and this would be by direct appropriation, rather than by contract authority as provided in the regular bill.

While the subcommittee has not had the opportunity to hold separate hearings on these individual supplemental estimates, we did go into these programs during our regular hearings on the regular bill for fiscal 1978 and the supplementals for the current fiscal year. The record will clearly show that the demand for each of these programs exceeds even the total amounts which would result from approval of these latest requested additions.

Mr. President, I understand that the Department is prepared to proceed immediately with the obligation of these additional funds upon passage of the bill. The potential projects are ready to proceed in the drought areas. This is clearly evidenced by the fact that the Department predicts that of the $75 million in water and waste disposal grants, we can anticipate actual outlays of $30 million before the end of this fiscal year. Of the $100 million for ACP, $33 million will result in actual 1977 outlays. The

remaining amounts for each program would result in outlays in fiscal year 1978.

These are programs which the Congress has considered many times before. They are proven programs and have been shown to be successful over a period of years. Given the added impetus of the drought situation and the emergency nature of it, I recommend that these funds be included in the pending supplemental.

Mr. President, I believe Senator BELLMON has cleared these amendments. I know the Senator from North Dakota has. I yield to my distinguished chairman.

Mr. McCLELLAN. This is a total of $325 million for the three items?

Mr. EAGLETON. Yes, $75 million for rural water and waste disposal, $150 million for water and sewer loans, and $100 million for the agricultural conservation program. This is a total of $175 million in new budget authority and $150 million for loans.

Mr. McCLELLAN. I thank the Senator.

Mr. EAGLETON. Mr. President, I move adoption of my amendment.

Mr. McCLURE. Will the Senator yield?

Mr. EAGLETON. Yes.

Mr. McCLURE. Is this within the ceilings of the budget already established in the existing resolution?

Mr. EAGLETON. It is within the overall total of ceiling limitations.

Mr. McCLURE. But when the Senator is talking about the ceilings that have been submitted, he is talking about the 1978 fiscal year. This is for 1977.

Mr. EAGLETON. They are within the 1977 total.

Mr. McCLELLAN. Will the Senator yield to me a moment?

Mr. EAGLETON. Yes.

Mr. McCLELLAN. I just talked to the distinguished chairman of the Budget Committee a while ago (Mr. MUSKIE), and he told me these are all within the budget authorization.

Mr. McCLURE. Did I understand the Senator from Arkansas to say that they are within the ceilings established within the third concurrent resolution?

Mr. McCLELLAN. That is what I am advised by Senator MUSKIE.

Mr. McCLURE. Does the Senator from Oklahoma agree that is the case?

Mr. BELLMON. Mr. President, there is room for this amendment, but this is going to make the budget limits very high. There will be no room for any additional funding after this has been approved.

Mr. McCLURE. I thank the Senator for yielding.

Mr. EAGLETON. Mr. President, I thank my distinguished colleague from Pennsylvania for yielding.

I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Missouri.

The amendment was agreed to.

Mr. EAGLETON. I move to reconsider the vote by which the amendment was agreed to.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. EAGLETON. Mr. President, the Agricultural chapter of the pending supplemental provides a total of about $1.5 billion—$1,521,835,000—in new budget authority. This is about $721 million—$720,741,000—over the budget estimate and about $52.8 million—$52,841,000—over the House bill.

The House considered budget estimates of about $751 million—$751,094,000—most of which was reflected in the food stamp program, $720 million. They approved those budget estimates in each case and added $717,900,000. Those additions consisted of:

1. $710 million for the Commodity Credit Corporation to reimburse for net realized losses. This amount was originally contained in the 1977 budget estimate and was eliminated from the regular bill for 1977. It is also contained in the budget estimate for Fiscal Year 1978. The effect of the House action is to move this appropriation up from the 1978 bill to Fiscal 1977 as originally budgeted.

2. $3,300,000 for the Federal Grain Inspection program. These funds will be used to provide initial capital for the inspection program which will be funded on a user fee basis and will provide training and administrative costs to get the program in operation.

3. $4,100,000 for Animal and Plant Health Inspection Service for its Mediterranean Fruit Fly control program. The Department originally requested this amount be made available by transfer from the Fire Ant control program. When this proposed transfer was objected to by the House, the House then provided this amount by new appropriations.

4. $500,000 for the Extension Service to begin implementation of the Farmer-to-Consumer Marketing Act which was enacted October 8, 1976, too late to be considered in the regular 1977 bill.

The committee recommends approval of these House-added items and has recommended the following additions:

1. $1,041,000 for Animal and Plant Health Inspection Service for the Citrus Black Fly control program. This is a serious problem in Florida and the estimates included $559,000. It developed that this amount was not sufficient to initiate an adequate program. With the recommended increase, total funding will be $1,600,000.

2. $1,500,000 for a control program for the Range Caterpillar in the Southwest, particularly New Mexico.

3. $300,000 for additional research for pseudorabies.

4. $50 million for Subscription to Capital Stock for the Federal Crop Insurance Corporation. Following House action on the bill, the Department submitted a supplemental estimate for an additional $50 million, conditioned on the enactment of pending legislation to increase authorization. So, this amount is over the House bill, but is the budget estimate.

That, Mr. President, highlights the agricultural chapter in the bill. If anyone has any questions, I shall be glad to have them.

UP AMENDMENT 129

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from Pennsylvania.

Mr. HEINZ. I thank the Chair.

Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HEINZ. Mr. President, I offer this amendment on behalf of Senator PACKWOOD, Senator BIDEN, and myself. The purpose of the amendment is really quite straightforward. It adds $5 million to the family planning project grants appropriation. In doing this, what I seek to achieve is to fulfill a commitment that I believe is widely shared throughout this Nation, that we must provide women with a viable and effective alternative to abortion.

For fiscal year 1977, the Congress authorized $115 million for family planning project grants under section 1001 of the Public Health Service Act. Thus far, we have appropriated only $107.5 million of that sum. This amendment seeks to add another $5 million in appropriations for fiscal year 1977 to that amount, bringing the total of $112.5 million, still under the authorized amount. That money, of course, would be for fiscal 1977, which, I point out to my colleagues, runs until September 30 this year. So we are only about half way through the year.

The reason that there is such a need is that there is an immediate pressing shortfall in funds that has forced women across the country to forego the benefits of family planning services.

We are reaching a point in too many areas of this country where the number of abortions is fast reaching the number of live births. I think it is a very tragic miscalculation to underfund family planning. But that is exactly what we have done this fiscal year. Right now, there are qualified, good, solid family planning programs in virtually every area of the country that are in grave danger because the money that they need simply is not there.

Let me give you a few examples. These are very troubling conditions.

HEW's office for region V reports that it will be unable to fund nearly $800,000 worth of family planning project grants that have already been approved as necessary and desirable.

HEW's office for region IX reports that at this point, it is unable to fund seven family planning projects that have already been approved because of a $700,000 shortfall.

In Iowa, HEW has been unable to meet requests for legitimate expansion of current services amounting to $100,000, even though those requests have already been approved for fiscal year 1977.

In Missouri and Nebraska, HEW has fallen $155,000 short of meeting approved requests just for maintaining services at their current levels.

The only way that HEW will be able

to fund a $1 million family planning project in Washington, D.C.—where abortions already exceed live births and where illegitimate births exceed legitimate ones—is by taking that money away from other approved requests in region III, which includes my own State of Pennsylvania.

Mr. President, I do not know whether these examples indicate that we are facing a crisis in the fight to provide alternatives to abortion—I think they do—but I know that we have not done the job we need to. It is a very minimal amount we are asking to get on with that job. We are falling behind in our commitment and we are falling behind in the work that needs to be done. I do not believe, no matter what we intend to do in fiscal 1978, that we can afford to fall any further behind on this job than we are right now and I do not believe we can afford to defer until next year a job we ought to be doing right now.

Mr. President, I am sure my colleagues are aware that the administration has expressed its full support for establishing a program of alternatives to abortion—a program which realizes the tremendous value of family planning. In his town meeting in Clinton, Mass., President Carter stressed this point. Secretary Califano has done the same since then. The administration's budget for fiscal year 1978 includes increases for family planning project grants—increases which incidentally I believe are insufficient to meet the task at hand. But in any case, if we allow our existing network of family planning programs to falter now—and I am talking about existing programs, Mr. President, not new programs—we will inevitably frustrate President Carter's hopes of making a fuller attack on the problems in the year ahead.

In closing, Mr. President, I do want to express my deep respect for the work of the Appropriations Committee. I know that the Senator from Massachusetts, the Senator from Washington, the distinguished chairman of the committee, have worked very effectively over a great many years, very hard, to achieve the very goals that I am discussing here today.

I do, in a sense, owe them a real apology that I was not able to come before Senator MAGNUSON's and Senator BROOKE's subcommittee when they were considering this matter and bring it to their attention. Had I been aware of it at the time, I would have done so. I wish I could have done a better job in that regard.

But I hope, Mr. President, that my failure, any shortcomings, to be able to bring this to the attention of the appropriate Subcommittee on Appropriations, will not cause the committee or this body to stand in the way of taking action on this matter of great urgency.

When we deny women access to family planning services, we force them into unfortunate and absolutely tragic choices.

To me, it is a matter of great urgency and concern, of great importance clearly, and I hope my colleagues will share that view and will accept this amendment.

Mr. BROOKE. Mr. President, I rise to speak on the distinguished Senator from Pennsylvania's amendment.

I certainly am not one to talk against adequate funds for family planning. I agree with the distinguished Senator that it is a very important, yes, a vital program.

The PRESIDING OFFICER (Mr. SASSER). May I interrupt and ask who yields time?

Mr. McCLELLAN. The Senator from Massachusetts may be in charge of the time on this amendment. It affects his committee.

Mr. BROOKE. I yield myself such time as I will use.

I thank the distinguished chairman of the full committee.

But, Mr. President, I think the record ought to be clear. In fiscal 1976 we appropriated $100 million for family planning specifically. In fiscal 1970, we raised that to $113.6 million. The Carter administration has come in with a request for fiscal 1978 for $123 million.

I have checked with Dr. Edward Martin of the Health Services Administration, because the distinguished Senator from Pennsylvania informed me that he was going to introduce such an amendment, to find out if additional funds were necessary. Dr. Martin pointed out that no additional funds are needed at this time to maintain in the service levels under the grants awarded, that grants are given for 1 full year, and that, if managed wisely, this would be sufficient.

But in addition to the $113 million that we have appropriated for this year, we also have some $145 million that is available for family planning. The other sources of income are maternal and child health services funded at $25 million; medicaid and social services funded at $55 million; State and local government, nonpublic agencies, and other sources, of $45 million; and direct care community health centers and migrant health centers at $20 million, approximately.

So we are talking about anywhere from $125 million to $145 million over and above the $113-plus million that we have already appropriated for family planning in 1977.

There just is not a need for it at this time.

I suggest to the distinguished Senator from Pennsylvania that he come before the subcommittee and make his request, if he does intend to increase the fiscal 1978 appropriation beyond the $123 million that the President has already requested.

But I want to assure him that we on the subcommittee do not find at this time a need for additional money. If there were a need for additional money, I assure the Senator that Senator MAGNUSON, who himself is a strong believer in family planning, I, as the ranking minority member, a strong believer and the committee itself, would be aware of it.

I have never felt it difficult within either the subcommittee or the full committee to get sufficient funds for family planning. I am going to assure the Senator that this is true of the distinguished chairman and the distinguished ranking minority member of the full committee, as well. If there were a need, as I said, we would be willing even to take this amendment to conference. But we just cannot appropriate this money or accept this amendment when the need has not been established.

Congressional witnesses will be heard on Tuesday, April 6, and we will welcome the Senator from Pennsylvania's testimony at that hearing if he feels very strongly that the appropriation request of $123 million is inadequate to do the job for fiscal 1978.

But again, I point out this is a supplemental and that there are sufficient funds available through the regular family planning program and elsewhere in the HEW budget to take care of the concerns the Senator from Pennsylvania has raised.

Mr. HEINZ. Mr. President, I want to agree with one thing in particular the Senator from Massachusetts has said. He has truly been a great supporter of family planning and our disagreement on this amendment probably arises because information has only in the last several days become available on this subject.

As I said to the Senator from Massachusetts a moment ago, I wish I had been able to appear before his subcommittee at the appropriate time to make this case. However, last week my office requested that HEW do a survey of their regional offices around the United States to find out what the situation was with respect to their family planning grant demands.

I also emphasize that we are talking only about the family planning project grants, not about the whole four pieces of the family planning program. A project grant appropriation for this year, for that particular title, is $107.5 million—not the figure for the entire program to which the Senator referred, which is correct for the entire program.

HEW surveyed not all but a number of their regional offices. On the basis of that survey, they determined that there existed as of today $7.5 million worth of projects—approved, desirable projects—that meet every criteria we would want them to meet and that we would normally like to see implemented. That $7.5 million is $2.5 million more than I am asking the Senate for today. I think that is a very conservative request.

I have checked to make sure that there is no problem with the budget here. Indeed, in the health function 550 we are in good shape, both in terms of budget authority and outlays.

I hope my colleagues will be sensitive to the fact that, while undoubtedly the Appropriations Subcommittee on Labor-HEW has done an excellent job, it is no attempt on my part to suggest that they overlooked something when the subcommittee hearings were held several weeks ago. This is new information. I know that HEW did not have it when the Senator held his hearings. For that reason, I can understand why the Senator feels that he has an obligation to oppose the amendment.

However, Mr. President, I believe we have to change in response to changed

circumstances. I submit that the information we have received from the HEW regional offices, although received lately, is accurate, and I think it is indicative of a serious problem and concern here.

Mr. BROOKE. The Senator is quite correct that a very limited survey was taken. I do not have the figures, but I will accept the Senator's figure of $7.5 million. That is relatively little, when we consider that available is some $145 million which can be utilized by those projects that concern the Senator.

I do not know about the difference in the information we are receiving; but we have received within the last few minutes, as I understand it, from Dr. Ed Martin of the Health Services Administration, information that they do not need additional funds to maintain the service levels under the grants awarded and that they do have additional funds for family planning elsewhere in the HEW budget.

I assure the Senator that his concern about funding those projects is my concern, and many of us are concerned about it, and they will be funded.

I do not know to whom the Senator has talked about the budget ceiling; but if he will read the Senate budget scorekeeping report, we are now more than $100 million over in the health function. I am sure that the distinguished chairman of the full committee and the distinguished ranking minority member will bear out that we are $100 million over. To request an additional $5 million at this time would take us that much further above the budget ceiling. I am sure that the Senator does not want that.

Senator MUSKIE, the distinguished chairman of the Budget Committee, supports the position we are taking in opposing this amendment for those reasons—not that Senator MUSKIE is opposed to family planning, because of budget ceiling problems. As I said, we are over the budget ceiling for the health function.

Mr. HEINZ. I respond to the Senator from Massachusetts, my good friend, by saying two things:

First, I understand that some $9.7 billion remains unspent in function 550.

Second, the total outlay authorized by the Budget Committee for that function is in the nature of $39.3 billion—not million, billion.

It seems to me that $5 million in a pot of $39.3 billion would have to be considered reaching, to say that this is a budget-busting amendment.

Mr. BROOKE. I do not know what the Senator is referring to; but Senator MUSKIE's assistant, who is a counsel on the Budget Committee, has reaffirmed the statement I have made to the Senator from Pennsylvania. He pointed out the 550 health function—I am looking at page 15 of the scorekeeping summary—as indicating $100 million over the ceiling.

The Senator can say it is not budget busting. I think we have busted the health budget, if we are $100 million over. If we add $5 million to that, it is just busting it further. I do not think it is the intent of the Senator from Pennsylvania to take us even further over the budget ceiling than we already are.

Mr. HEINZ. Referring to page 15 of the same document, my understanding is that this document does not include the numbers included in the second supplemental appropriation, which we now have under consideration. Is that not correct?

Mr. BROOKE. This is the first supplemental. We do not have the second supplemental.

Mr. HEINZ. This supplemental appropriation.

Mr. BROOKE. I refer the Senator to the distinguished chairman of the Budget Committee. I am reading from the same page as is the Senator from Pennsylvania. The "+0.1" means over the budget by $100 million. I do not see how we could possibly accept the amendment.

Mr. HEINZ. That number, of course, is not outlays. That is budget authority.

Mr. BROOKE. That is new budget authority; that is correct.

Mr. HEINZ. In any event, we are talking about a very small flea bite on what normally would be a very large elephant.

Mr. BROOKE. I am getting to the point where $5 million is no longer a flea bite. I have been known as a liberal-moderate, but $5 million is a lot of money, and I cannot consider it a flea bite, even though we are talking in terms of a total budget of $113 million for this year.

Perhaps the ranking minority member of the committee would like to comment.

Mr. YOUNG. I say to the Senator from Pennsylvania that I have never heard such a strong argument against a good program than that which the Senator from Massachusetts has put forth today. He would add another $100 million if he thought the money was needed. I agree with him.

I hope the Senator will withdraw his amendment and take up the matter when the next regular bill is considered, and I am sure he will get a sympathetic hearing. You have made a good case.

Mr. HEINZ. Mr. President, I have great respect for the ranking minority member of the Appropriations Committee, but I cannot oblige him by withdrawing the amendment. I am offering it on behalf of Senator PACKWOOD and Senator BIDEN, and I could not in good conscience withdraw it. I am not inclined to do so, and I do not think they are.

Mr. BROOKE. I have been informed by the Budget Committee that the document does include the supplemental as well, so we are $100 million over.

I do not think that anything further can be said. We agree in principle on family planning. We just do not agree that we can afford at this time to add any money for that purpose. However, we would be very pleased to consider it in the fiscal 1978 budget.

Mr. President, I believe the yeas and nays have been ordered, and I yield back the remainder of my time.

Mr. PACKWOOD. Mr. President, I rise as a cosponsor of the family planning amendment just offered by my colleague from Pennsylvania. I consider it a worthy amendment and a needed one.

I recognize that the trend is finally up for funding family planning, after 4 years of stagnation. And I am pleased to see this new direction: $100 million in fiscal year 1976, where it had stayed for 4 years; $113 million in fiscal year 1977; and $123 million proposed for fiscal year 1978.

However, it is important not to stop at figures which look good on paper. We have to translate what they mean on the program level, particularly in the face of inflation.

I want to be sure my colleagues are aware that there are regions all around the country which could use more family planning funds now; not as a whim, but effectively use funds either to maintain last year's service levels or to expand in order to meet the demand for services in their communities.

Admittedly, the fiscal year 1977 appropriations brought a welcome $13 million increase, but only $107.5 million went to family planning project grants, even though $115 million had been authorized. With 6 months still left to go in this fiscal year, a number of regions are falling short of funds. HEW did a sampling for me of five regions and found that legitimate requests had been filed in each for funds to: First, maintain last year's service levels; or second, to expand to meet the local demands for services.

My own region X, for example, has requested the following amounts to provide for approved but unfunded applications:

Oregon	$50,000
Washington	80,000
Alaska	7,500
Idaho	20,000
Total	157,000

Region I, which takes in New England, has requested $500,000 just to maintain last year's service level.

Region III, has requested: $3,380,000 for maintenance and needed expansion of services; $1,000,000 of this is for the D.C. area alone.

According to HEW, there is no question that $5 million in supplemental appropriations, as proposed by Senator HEINZ, could be effectively used. With 6 months left in this fiscal year, $5 million could be distributed easily, without fear of glutting the programs, and with the knowledge it would have a favorable and needed impact.

Some follow the argument that we simply cannot afford to fund family planning, or any other health program, as fully as we might like. But I say we cannot afford not to fund family planning well. This is one area where the cost benefits are unquestionable.

The short-term benefits are excellent: Out of what the Federal Government expends for family planning, it saves $2 each year for every $1 spent the previous year. This savings is offsetting the prenatal and postnatal hospital costs, plus the first 3 months of infant care.

The long-term cost-benefits are staggering: $26 is saved for every $1 spent on family planning.

It is clear Federal investment in family

planning is a tremendous saving measure, not a spending one.

Our family planning programs are directed toward approximately 10 million women—at 200 percent of poverty. But at this point in time, there are about 3.5 million women we are not yet providing services for. Add to this 2.2 million teenagers who are above the low-income level, but seeking services, and we have a total of 5.7 million women without any access to family planning services.

If we do not supply any supplemental appropriation today, this means some regions will drop below last year's level of services. Other regions will not be able to begin providing for an additional number of low-income women who need, deserve, and have requested services.

We still have a long way to go before we have fully met our family planning goals in this country. And every time we slip back in funding, it actually costs us more. Let us use some financial forethought and make a worthwhile, needed investment in these programs. I hope my colleagues will see the merit of this amendment and give it their strong support.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Pennsylvania. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from Indiana (Mr. BAYH), the Senator from Idaho (Mr. CHURCH), the Senator from California (Mr. CRANSTON), the Senator from New Hampshire (Mr. DURKIN), the Senator from Missouri (Mr. EAGLETON), the Senator from Mississippi (Mr. EASTLAND), the Senator from Minnesota (Mr. HUMPHREY), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Washington (Mr. MAGNUSON), and the Senator from Wisconsin (Mr. NELSON) are necessarily absent.

I further announce that the Senator from Hawaii (Mr. INOUYE) is absent on official business.

I further announce that, if present and voting, the Senator from Washington (Mr. MAGNUSON), and the Senator from Minnesota (Mr. HUMPHREY) would each vote "nay."

Mr. BAKER. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Oregon (Mr. PACKWOOD), the Senator from Kansas (Mr. PEARSON), the Senator from Alaska (Mr. STEVENS), the Senator from South Carolina (Mr. THURMOND), and the Senator from Texas (Mr. TOWER) are necessarily absent.

On this vote, the Senator from Oregon (Mr. PACKWOOD) is paired with the Senator from South Carolina (Mr. THURMOND). If present and voting, the Senator from Oregon would vote "yea" and the Senator from South Carolina would vote "nay."

I further announce that, if present and voting, the Senator from Alaska (Mr. STEVENS) would vote "nay."

The result was announced—yeas 11, nays 72, as follows:

[Rollcall Vote No. 96 Leg.]

YEAS—11

Biden	Leahy	Ribicoff
Case	Long	Riegle
DeConcini	Matsunaga	Roth
Heinz	Pell	

NAYS—72

Abourezk	Gravel	Morgan
Allen	Griffin	Moynihan
Anderson	Hansen	Muskie
Baker	Hart	Nunn
Bartlett	Haskell	Percy

Curtis	McClellan	Wallop
Danforth	McClure	Weicker
Dole	McGovern	Williams
Domenici	McIntyre	Young
Ford	Melcher	Zorinsky
Garn	Metcalf	
Glenn	Metzenbaum	

NOT VOTING—17

Bayh	Goldwater	Packwood
Church	Humphrey	Pearson
Cranston	Inouye	Stevens
Durkin	Kennedy	Thurmond
Eagleton	Magnuson	Tower
Eastland	Nelson	

So Mr. HEINZ' amendment was rejected.

Mr. LEAHY and Mr. JAVITS addressed the Chair.

The PRESIDING OFFICER. The Senator from Vermont is recognized.

Mr. JAVITS. Mr. President, will the Senator yield to me for a unanimous-consent request?

Mr. LEAHY. I yield for that purpose.

Mr. McCLELLAN. Mr. President, let us have order.

The PRESIDING OFFICER. The Senate is not in order.

The Senator may proceed.

Mr. JAVITS. Mr. President, I ask unanimous consent that Michael Shore of the Human Resources Committee staff be accorded the privilege of the floor during debate on this matter.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, I ask unanimous consent that Douglas Racine of my staff be accorded the privilege of the floor throughout all votes and consideration of this bill this afternoon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUDDLESTON. Mr. President, will the Senator yield?

Mr. LEAHY. Mr. President, may I have authority to yield 1 minute to the distinguished Senator from Kentucky, or 2 minutes, if he wishes?

The PRESIDING OFFICER. Until the Senator calls up his amendment, he is not entitled to yield.

UP AMENDMENT NO. 131

Mr. LEAHY. Mr. President, I call up my amendment on chapter 3 of the bill, which is at the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Vermont (Mr. LEAHY) proposes unprinted amendment No. 131.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 8 strike lines 14 through 21 and insert the following:

TRANSPORTATION

For an additional amount to enable the District of Columbia to meet its share of any operating deficit incurred in connection with the operation of the Phase I segment of the Metrorail system covering the period January 1, 1977, to June 30, 1977, $846,000, except that no such amount, or part thereof, shall be obligated until commitments have been made for the total operating deficit associated with the Phase I segment.

Mr. LEAHY. Mr. President, I yield such time to the Senator from Kentucky as he may need.

Mr. BROOKE. Will the Senator yield first for a unanimous-consent request?

Mr. LEAHY. Without losing my right to the floor, yes.

Mr. BROOKE. I ask unanimous consent that Jack Robinson of Senator HATFIELD'S staff, Marc Edelman of Senator DANFORTH'S staff, Dick Vodra of Senator SCHWEIKER'S staff, and Mike Maloof of Senator GRIFFIN'S staff be accorded the privilege of the floor during the consideration of this supplemental appropriation bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUDDLESTON. Mr. President, if I may have the attention of the distinguished Senator from Massachusetts, I would like to ask him a question, if it is agreeable, at this time.

It is my understanding that the committee has directed the Secretary of Labor to use discretionary funds to continue to the end of the fiscal year a number of programs for the elderly which were previously funded under title X of the Public Works and Economic Development Act. Is that correct?

Mr. BROOKE. The Senator is correct. Mr. President, may we have order, please?

The PRESIDING OFFICER. The Senate will be in order.

Mr. HUDDLESTON. Was it the committee's intention to continue programs for the elderly which were joint Community Services Administration-title X funded, as well as those which were Administration on Aging-title X funded?

Mr. BROOKE. Yes, it was the committee's intent to continue those title X programs which employ the elderly.

Mr. HUDDLESTON. I thank the Senator very much. I have great concern about these programs. We have two programs in Kentucky which I am very much concerned about. One is the Pennyrile older workers project, which employs 85 people over 65, and all under the poverty level I might add, for 24 hours a week to serve some 744 persons; the second, a project in the Big Sandy area which provides a variety of services including Outreach, information referral, and transportation for some 5,000 elderly

in the area. I am most anxious that these programs be continued.

I thank the distinguished Senator from Massachusetts.

Mr. BROOKE. I appreciate the distinguished Senator from Kentucky's clarifying the record in this matter and helping make the legislative record.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Mr. President, the amendment I have called up is a technical matter which does not change the dollar totals recommended by the commitee and is entirely consistent with the substantive positions recommended by the committee. My amendment would change the availability dates of funds recommended for Metrorail, and is necessary primarily because the District of Columbia Government and the Metro system operate on different fiscal years.

This amendment has been cleared with the ranking minority member of the D.C. Appropriations Subcommittee.

Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. Does the Senator yield back the remainder of his time?

Mr. LEAHY. I yield back the remainder of my time on this amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Vermont.

The amendment was agreed to.

Mr. LEAHY. Mr. President, the committee recommends a total of $40,144,300 for the District of Cclumbia and $1,500,000 for the Temporary Commission on Financial Oversight of the District of Columbia for chapter III of the bill. For the Temporary Commission on Financial Oversight, this amount is identical to the city request and the House allowance. For the District of Columbia, this amount is $43,500 more than the request from the city and $846,000 more than the House allowance.

I will not take the Senate's time by going into each and every item included in chapter III of the supplemental bill because I believe they are covered very thoroughly in our report. I would however, like to highlight two items:

First, the city did not include a request in the fiscal year 1977 bill nor did they make a request in the supplemental for the funds necessary to cover the city's portion of the projected operating deficit of Metrorail now operating in the city. The city has also not requested any funds to cover the city's share of the operating deficit of Metrorail in the fiscal year 1978 budget request.

The city continues to leave this item unfunded in the hopes of building pressure and gaining agreement from the surrounding jurisdictions for a commuter tax to be used to help fund Metrorail. As passage of a commuter tax in the foreseeable future is unlikely, the committee has included $846,000 in the bill to permit the city to pay its share of the operating deficit of the Metrorail system that has been operating during the last year. Without the provision of these funds, the continued operation of Metrorail is in great doubt. The committee has also recommended language on the face of the bill to give the mayor maximum bargaining leverage with the other jurisdictions to insure that the other jurisdictions commit their share of the operating deficit before the city obligates these funds.

The perfecting amendment to chapter III of the bill, which was just adopted by the Senate, was introduced to correct the dates for which the $846,000 subsidy for Metrorail applies. The confusion on the dates, which my perfecting amendment corrected, arises primarily because of the fact that the city and the Metro system operate on different fiscal years.

Second. The other item I would like to highlight is the committee recommendation to reduce the Federal payment to the city by $2 million below the level recommended by the House. Including the reduction in the Federal payment made by the House, the total reduction would be $4 million. The committee believes that local revenues, in addition to those previously estimated, can be raised to help finance the supplemental request and, thereby, offset the reduction in the Federal payment. One of the largest sources of funds available to the city for this purpose is the $15.2 million of deliquent parking ticket fines from calendar year 1976.

UP AMENDMENT NO. 132

Mr. ABOUREZK. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from South Dakota (Mr. ABOUREZK) proposes an unprinted amendment numbered 132:

On page 10, line 7, strike out "15,500,000" and insert in lieu thereof "31,000,000".

On page 10, line 11, before the period insert a comma and the following: "and $28,000,000 shall be allocated for a contribution to the United Nations Relief and Works Agency".

Mr. LEAHY. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order. Senators will take their seats, or kindly retire to the cloakrooms.

Mr. ABOUREZK. Mr. President, I have discussed this amendment with the chairman of the Foreign Relations Appropriations Subcommittee, and the ranking Republican member has cleared it. It is just an add-on to the UNRWA appropriation, to increase it from $15.5 million to $31 million, with $28 million allocated to UNRWA.

The distinguished Senator from Vermont, as I understand, is standing in for the Senator from Hawaii (Mr. INOUYE), and may wish to comment.

Mr. LEAHY. Mr. President, the committee recommendation was to reduce the supplemental request for the United Nations Reconstruction and Works Agency from $28 million to $12.5 million. The reasons prompting this reduction are set forth in the committee report, and I ask unanimous consent for the pertinent portion to be reprinted at this point in the RECORD:

There being no objection, the excerpt from the report was ordered to be printed in the RECORD, as follows:

United Nations Relief and Works Agency (UNRWA).—In October of 1976 the Congress appropriated $38,700,000 to provide for a voluntary U.S. contribution to UNRWA The history of this appropriation is complex and needs to be recounted in some detail if the Committee's current recommendation is to be understood. It may be recalled that the President's original fiscal year 1977 budget submission requested funding of a $26,700,000 contribution to UNRWA. This amount was later amended (June 16, 1976) and the request rose to $66,700,000. In supporting documents, presented with the amended budget estimate, the administration said that the additional funding was required in order to help UNRWA "meet its operational requirements and in order to meet the fiscal crisis, its worst ever, facing the Agency." The administration contended that the additional funding would "demonstrate that the United States is willing to do its share and this hopefully will encourage others, particularly the Arab States, to increase their contributions."

In response to the administration's request for increased contributions, this committee recommended that the Senate provide for the appropriation of $38,700,000, an amount which was less than the administration's amended budget estimate but $12 million greater than the original request. We noted in our report that, "Should UNRWA be unable to underwrite its projected deficit from other sources the Committee will sympathetically review a request for supplemental funding."

That request is now before the Senate. Once again the argument is made that ". . . prompt action on our part will encourage them (other donors) to act more generously than might otherwise be the case." This argument differs little from that made in support of the June 16 1976, request or, indeed, from arguments made in prior years. Always we are told, if the United States does its share and contributes generously, others will follow suit.

This Committee has grown weary of this tired refrain. We know of the valuable services provided by UNRWA and of its importance to the preservation of peace in the Middle East. We also know of the plight of the Palestine refugees and we are aware (as we noted in our Report on Further Continuing Appropriations in fiscal year 1975) that, "Too frequently have they been the pawns in the international political process."

The primary concern of this committee with regard to contributions to UNRWA is that U.S. contributions should strengthen the Agency. Our position remains unchanged from that voiced in our fiscal year 1976 Report on the Foreign Assistance and Related Programs Appropriations Bill.

UNRWA's finances remain troubled. The United States is doing its part to ease UNRWA's distress. The measure of the United States' contribution is large. And, if that measure is taken with a rule which also measures the total contribution of the United States to peace and stability in the Middle East, it is immense. Therefore, if UNRWA is to continue to provide essential services and to play its positive role in the Middle East, new and generous contributors must be found.

The Committee has recommended the appropriation of $12.5 million which, when added to the previously appropriated amounts for UNRWA, will bring fiscal year 1977 U.S. voluntary contributions to UNRWA to a total of $51,200,000. Those who doubt that this is less than a fair share for the United States need only look at the table which follows:

UNITED NATIONS RELIEF AND WORKS AGENCY CONTRIBUTIONS BY GOVERNMENTS, CALENDAR YEAR 1976

[Figures rounded]

Country	Contributions		
	Regular	Special	Total
Argentine	$5,000		$5,000
Australia	369,000		369,000
Austria	70,000		70,000
Bahrain	15,000		15,000
Belgium	943,000	$54,000	997,000
Canada	3,351,000	294,900	3,645,900
Chile	2,000		2,000
Congo	5,000		5,000
Cyprus	508	242	750
Denmark	1,386,000	165,000	1,551,000
EEC	13,864,000		13,864,000
Finland	247,000	52,000	299,000
France	1,306,000	300,000	1,606,000
FRG	2,914,000	398,000	3,312,000
Ghana	5,000		5,000
Greece	17,000		17,000
Guinea	1,000		1,000
Holy See	3,000		3,000
Iceland	13,000		13,000
India	13,000		13,000
Indonesia	6,000		6,000
Iran	30,000		30,000
Iraq	122,000		122,000
Ireland	89,000		89,000
Israel	1,119,000		1,119,000
Japan	5,000,000	500,000	5,500,000
Jordan	243,000		243,000
Kuwait	600,000	1,000,000	1,600,000
Lebanon	103,000		103,000
Liberia	5,000		5,000
Libya	600,000		600,000
Luxembourg	6,000	47,000	53,000
Malaysia	2,000		2,000
Mauitania	8,000		8,000
Mauritius	1,000	1,000	2,000
Morocco	45,000		45,000
Netherlands	1,450,000	387,000	1,837,000
New Zealand	122,000		122,000
Nigeria	6,000		6,000
Norway	1,799,000	181,000	1,980,000
Oman	25,000		25,000
Pakistan	21,000		21,000
Philippine	2,000		2,000
Qatar	60,000	500,000	560,000
Republic of Korea	10,000		10,000
San Marino		6,000	6,000
Saudi Arabia	1,200,000	10,000,000	11,200,000
Singapore	2,000		2,000
Spain	1,000,000		1,000,000
Sri Lanka	1,000		1,000
Sudan	6,000		6,000
Sweden	5,618,000	454,000	6,072,000
Switzerland	1,251,000	333,000	1,584,000
Syria	36,000		36,000
Trinidad and Tobago	3,000		3,000
Tunisia	7,000		7,000
United Arab Emirates	270,000		270,000
United Kingdom	5,490,000	1,468,000	6,958,000
United States	26,700,000	12,000,000	38,700,000
Upper Volta	2,000		2,000
Venezuela	5,000		5,000
Yugoslavia	25,000		25,000
Total	77,619,508	28,141,142	105,760,650

Mr. LEAHY. Mr. President, there is a valid point to be made that the world community has too long let the United States shoulder a disproportionate share —43 percent—of the rapidly increasing costs of UNRWA's undertakings. Nevertheless it is a crucial time in the Middle East and under the urging of my colleagues I am prepared to accept the amendment if it is agreeable with the floor manager of the bill.

Mr. McCLELLAN. I have no objection.

Mr. ABOUREZK. Mr. President, in proposing my amendment to the 1977 supplemental appropriations bill, H.R. 4877, restoring the U.S. contribution to the United Nations Relief and Works Agency, UNRWA, I would just like to make a few additional comments about this particular piece of legislation.

The need for $28 million specifically earmarked for UNRWA is extremely compelling, not only from a humanitarian point of view, but also because in this way the United States is able to indicate a concern for the welfare of refugees all over the Middle East. A concern which has not diminished over the past month despite some public statements.

We have come to a delicate time in our negotiations with the Middle East and without some sort of positive response from the United States to all parties of a Middle East settlement, our progress in achieving a settlement will be even more tortuous than ever.

The $28 million request which was originally requested before the Congress and subsequently cut by the Subcommittee on Foreign Operations was developed realistically and carefully by the U.S. Government. The amount maintains the level of contributions of the United States over the past years, but does not increase it. Support for UNRWA has been and continues to be an integral part of the overall U.S. approach to the Middle East. Its sole purpose is to maintain minimum subsistence for over a million and a half persons dislocated by events in the Middle East and most recently 12,000 alone from the civil war in Lebanon. By the way, the sum of $28 million in fiscal year 1977 can purchase two F–15 Eagle fighters, a cheap, capable plane while the same amount of money, $28 million, can provide food, medicine, shelter, training, and health services for about 1,600,000 people.

If UNRWA receives no more funds, its operations will effectively cease in August or September. Continued American support is necessary to induce other nations to contribute further and this has worked in the recent past. I know the subcommittee cited this as an old refrain: that the United States has given more than its share, but, in the past years alone, contributions from Arab nations have increased significantly.

The displaced persons of the Middle East are a problem we must face and deal with, not only because we as Americans consider ourselves to be a moral people having compassion for the less fortunate, but because I firmly believe when these people can resume their normal lives in a decent place to reside, they can make an invaluable contribution to a fair and just settlement to the Middle East.

Therefore, I urge my colleagues to adopt this amendment to provide this $28 million for the United Nations Relief and Works Agency, to sustain its operations among these dislocated persons of the Middle East. The United States, as well as the rest of the world, has a great stake in seeing a fair and honest resolution to the conflict in the Middle East.

Mr. LEAHY. Mr. President, Appropriations Committee action on items relating to foreign assistance is reflected in the committee report on pages 28 through 41 and the dollar effect of these recommendations is shown on the table reprinted on pages 42 and 43.

Principal committee changes from the President's budget request include: a reduction in UNRWA of $15.5 million; an increase in MAP for Portugal of $4.5 million.

For migration and refugee assistance, the committee bill:

Allows full funding of President's request—$8.325 million—for Soviet refugees not settling in Israel.

Allows the full amount of the President's budget request of $7.4 million for Indochina refugees which was transmitted subsequent to House action.

Allows $3 million included by House for resettlement of Soviet refugees in United States but removes earmarking for refugees "from the Soviet Union and other Eastern European countries * * * and for the movement of baggage." In this regard, the committee stated in its report

We are sympathetic to the early resettlement needs of refugees, particularly those who have fled repression and persecution. These funds will assist them in making the cultural transition to American life. The Committee believes that funds made available for these reception grants should not be legislatively restricted to special groups of refugees but believes that all refugees who come to our shores seeking a new life of freedom and hope should be equally eligible for assistance.

An amendment to the House bill deleted the words "from the Soviet Union and other Eastern European countries * * * and for the movement of baggage" while retaining $3,000,000 for reception grants was approved by a vote of 16 to 3.

The committee also recommends: Full funding for World Bank's soft loan window—IDA, $55 million; full funding for Asian Development Bank—$25 million; partial funding of the request for the Inter-American Development Bank—$326 million of $460 million requested for IDB. This includes an increase of $10 million for IDB callable capital above the House.

Finally, Mr. President, the committee, after noting such excesses as an increase from $9,720 to $37,850 in the annual leasing cost for the AID Mission Director's residence in Cairo, proposed bill language—page 13—to turn over all AID leasing in Cairo to the Department of State's Foreign Building Operations.

Mr. ABOUREZK. I yield back the remainder of my time, and move the adoption of the amendment.

The PRESIDING OFFICER. Does the Senator from Arkansas yield back his time?

Mr. McCLELLAN. I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Dakota.

The amendment was agreed to.

Mr. ABOUREZK. I move to reconsider the vote by which the amendment was agreed to.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from South Carolina is recognized.

Mr. HOLLINGS. Mr. President, I am prepared to go immediately to the items for chapter X and we have some add-ons since we have heard from the President——

The PRESIDING OFFICER. Who yields time to the Senator from South Carolina?

Mr. HOLLINGS. I yield such time as

is necessary, if we are on controlled time.

The PRESIDING OFFICER. The Senator has no time.

Mr. McCLELLAN. He has time on his amendment.

The PRESIDING OFFICER. He has not called up an amendment.

Mr. HOLLINGS. Well, I was ready to explain the amendments. We can call up the amendments; they are at the desk.

I call up the first amendment, relative to the drought assistance program of the Economic Development Administration, $225 million.

The PRESIDING OFFICER. The amendment will be stated.

UP AMENDMENT NO. 133

The legislative clerk read as follows:

The Senator from South Carolina (Mr. HOLLINGS) proposes an unprinted amendment numbered 133:

On page 62 after line 19 of the bill insert the following:

DROUGHT ASSISTANCE PROGRAM

For expenses necessary to carry out the Community Emergency Drought Act of 1977, $225,000,000: *Provided*, That this appropriation shall be available only upon enactment into law of authorizing legislation.

Mr. HOLLINGS. Mr. President, the committee recommends a total of $359,722,249 for chapter XI of the bill. This is approximately $28.8 million more than the House bill and is $2,161,500 less than the budget estimates.

I will not delay the Senate by going into each and every item, they are well explained in our report, but will highlight our major recommendations:

First. For the Department of State, a total of $103,916,749 is recommended. We have provided the 1975 and 1976 contributions for the United Nations Educational, Scientific, and Cultural Organization—UNESCO. As the Senators will recall, the Foreign Assistance Act, 1974, prohibited further U.S. contributions to UNESCO until the President certified UNESCO's compliance with the requirements of that act. President Ford issued the certification last December and Secretary Vance has affirmed the Carter administration's support of resuming our contributions. In the committee we came to an agreement with Senator CASE to pay the 2 years that we are in arrears and avoid a financial crisis for UNESCO.

We have also provided $10 million as the U.S. contribution to the eighth Pan American Games to be held in Puerto Rico in 1979. This is $4 million more than provided by the House and should be all the Federal assistance required in light of the organizing committee's ability to gain additional revenues from the TV rights.

Second. For the Department of Justice, we have included a total of $43,267,000 which in addition to covering a mixed bag of housekeeping items, also provides $22 million for a new youth correctional facility near Lake Placid, N.Y., that will be used initially to house athletes competing in the 1980 winter Olympics. This is a unique approach to overcoming the very expensive cost of housing the athletes, and we will not only meet those needs at a conversion cost of $1,500,000, but we will also be providing a much needed youth correctional facility for the northeastern United States.

The most volatile item under the Department of Justice is the $4,878,000 we recommended for the payment of private counsel fees. This will provide legal representation of Government officials in civil suits brought against them for actions arising out of the performance of their governmental duties. The House did not allow this item and a major portion of our hearing and deliberations were devoted to a discussion of this item. The new ranking minority member of the subcommittee, the distinguished junior Senator from Connecticut (Mr. WEICKER) contributed some excellent insights in these discussions as did three of our other new members, the junior Senator from North Dakota (Mr. BURDICK), the junior Senator from Vermont (Mr. LEAHY), and the junior Senator from Arizona (Mr. DECONCINI).

Without these funds, the Department could no longer represent the former and present Government officials who have been sued for invasion of privacy and other civil matters in nine pending civil damage suits. Accordingly we were constrained to recommend these funds even though we are gravely concerned about providing representation for persons already indicted for crimes such as former Attorney General Mitchell, Haldeman, Ehrlichman, and the rest of the Watergate crowd. Therefore, we have inserted language in the bill requiring the Attorney General to obtain the approval of the Senate Judiciary Committee of the Department's policy statement and regulations governing the Department's role in defending Government employees, before he provides representation for any defendants in suits commencing after the effective date of this act.

Third. For the Department of Commerce we recommend a total of $177,592,000, which is $42,686,000 more than the budget estimates, partially due to the replenishment of the Economic Development Administration's—EDA—title I funds that we reprogramed last month for the facilities for the winter Olympics at Lake Placid. It was my understanding that the administration would send us a budget estimate to cover this. I wrote Bert Lance about this and we now have a budget estimate from the President for only $20 million, due to a misunderstanding. The House has provided the $30,100,000 needed to replenish EDA's regular program and we should do no less ourselves.

I assure the Senate that I will be very reluctant to approve any such reprogramings in the future without a solid commitment from the administration in the form of a budget estimate.

Another major Commerce item in the coastal zone management program where we have added $14,024,000 above the budget and House-approved level. Senator WEICKER and I are both keenly interested in this program and during the hearings we found several instances where the budget inadequately provided for the program that we authorized last year. Accordingly we have added sufficient funds so that the States may obtain the up-to-80-percent planning grant that is authorized instead of 66⅔ percent Federal level that the OMB wants to require. We also put in additional funds for the energy impact formula grants; as well as providing for the unbudgeted environmental and planning grants that are necessary to plan for the $110 million in loans, guarantees, and repayment assistance going to the States from the coastal energy impact fund that we also provided for in this bill.

We were prepared to add $1 million for the Regional Fisheries Management Councils established pursuant to the Fishery Conservation and Management Act of 1976. However, the Department has sent us a reprograming request to use some of the funds we appropriated last year for two new ships to police the 200-mile limit. Apparently the ship that was to be constructed for the west coast is not necessary and we can obtain the funds from that source just as soon as we can complete the necessary paperwork.

Fourth. For the Judiciary, we recommend the full $33,250,000 requested for fees of jurors and the mandatory payment to the judicial survivors annuity program.

Fifth. Under related agencies, we recommend $1,696,500 and have included $413,500 for the Office of the Special Trade Representative for Trade Negotiations. As the committee knows, President Carter has nominated Bob Strauss to be the new Trade Negotiator and Mr. Strauss has asked for six additional positions which have been firmly supported by Senators LONG and RIBICOFF on behalf of the Committee on Finance. The President decided not to send us an estimate for the $300,000 but we were impressed by the need to strengthen the hand of the Special Trade Representative. We did not reduce the amount requested for representation and reception expenses so that the amount conforms to the annual level of the Secretary of Treasury.

Mr. President, as I started to say earlier, since the committee reported out the bill, we have received additional budget estimates from the President to provide relief to the areas of the Nation that have been victims of prolonged and severe drought. These estimates were transmitted pursuant to the President's message of March 23 that calls for new authorizations and funds for the EDA and the SBA.

For the EDA, new temporary authority is recommended to provide $225 million in low interest loans and grants to communities of 10,000 or more population in drought stricken States. This is for projects that can be completed quickly to augment community water supplies where there is a health and safety problem due to water shortage. We, of course, have held no hearing on this request but I have a justification statement that indicates the $225 million consists of $150 million for low interest loans and $75 million for grants.

For the SBA, an additional $50 million is recommended to provide emergency

drought assistance loans to assist small business concerns in overcoming the impact of actual or prospective injury suffered as a result of drought; and for a direct loan program for water conservation and drought disaster assistance.

Mr. President, both of these requests are unauthorized and in view of the Senate's action in holding up the Economic Stimulus Act until the necessary authorizations have cleared, I was at first reluctant to include these drought relief amendments in a Supplemental Appropriations Act. However, I am mindful of the terrible situation that exists in many of our States and on the basis that the appropriations will not be effective until the necessary authorizing legislation is enacted, I will offer two amendments that will provide for the requested drought relief programs of the EDA and SBA.

Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. Is all remaining time yielded back?

Mr. HOLLINGS. I yield back the remainder of my time.

The PRESIDING OFFICER. Does the Senator from Arkansas yield back his time?

Mr. McCLELLAN. I yield it back.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Carolina.

The amendment was agreed to.

UP AMENDMENT NO. 134

Mr. HOLLINGS. Mr. President, I now call up the $50 million amendment for the disaster loan fund for the Small Business Administration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from South Carolina (Mr. HOLLINGS) proposes an unprinted amendment numbered 134:

On page 65 after line 10 of the bill insert the following:

SMALL BUSINESS ADMINISTRATION
DISASTER LOAN FUND

For additional capital for the "Disaster loan fund", authorized by the Small Business Act, as amended, $50,000,000 for the purposes of carrying out the provisions of the Small Business Emergency Drought Disaster Loan Act of 1977, to remain available until September 30, 1978: *Provided*, That this appropriation shall become available only upon enactment into law of authorizing legislation.

Mr. HOLLINGS. Mr. President, I yield back my time and move the adoption of the amendment.

Mr. McCLELLAN. I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Carolina.

The amendment was agreed to.

UP AMENDMENT NO. 135

Mr. HOLLINGS. Now, Mr. President, I call up the final amendment, relative to the Department of Justice and the additional amount necessary for the support of U.S. prisoners.

The PRESIDING OFFICER (Mr. MOYNIHAN). The amendment will be stated.

The legislative clerk read as follows:

The Senator from South Carolina (Mr. HOLLINGS) proposes an unprinted amendment numbered 135.

On page 61 after line 20 of the bill insert the following:

SUPPORT OF UNITED STATES PRISONERS

For an additional amount for "Support of United States prisoners," $10,000,000.

Mr. HOLLINGS. Mr. President, on March 17, 1977, the Attorney General notified the subcommittee that the appropriation "Support of U.S. Prisoners" had overobligated its first quarter apportionment of $8 million by $1,475,558. Similar notification was provided to the House and the Director of the Office of Management and Budget—OMB. The Department has submitted to OMB a deficiency apportionment request for the second quarter to avoid the necessity for again reporting another overobligation.

This account is essentially uncontrollable. Most of the costs within this appropriation are incurred for maintaining Federal prisoners in local jails. These prisoners may be awaiting trial, awaiting removal from local jails to the Federal Prison System, or serving short sentences. The costs relating to these prisoners are a function of the number of prisoners being held and the contracts that the Federal Prison System negotiates with the local jails. The steady increase in per diem costs of the jail contracts has been the principal reason why the costs to this appropriation have been increasing.

Responsibility for administering this account is divided between the U.S. Marshals Service and the Federal Prison System. Although ultimate financial responsibility lies with the Federal Prison System, it is the U.S. Marshal's Service that administers the contracts with the local jails and that has responsibility for disbursing funds under these contracts. Presently, the Federal Prison System has no adequate way of maintaining controls on how the largest segment of this appropriation is spent.

Through February 28, 1977, obligations for this account totaled $16,221,058. At the present rate of expenditure, the appropriation would require approximately $39 million for fiscal year 1977. The requested supplemental of $10 million, when added to the $31,875,000 enacted would bring the funding level to $41,875,000. Since the monthly rate of expenditure still appears to be increasing, a supplemental appropriation for anything less than the amount proposed may be inadequate.

The Department has not yet sent a formal request for a supplemental appropriation to the Office of Management and Budget. The reapportionment request that was forwarded to OMB on March 24, 1977, identified a substantial fourth quarter deficiency and stated that a supplemental appropriation would be required. Although the Bureau of Prisons may be able to prepare a more refined estimate of total costs at a later time, the estimating procedures are not likely to be significantly different from the $10 million now proposed. Furthermore, the expected late enactment of the Second Supplemental Appropriation Act may leave this account without funds to pay its bills several months before corrective action can be taken.

Mr. President, to summarize, in the first quarter they were $1,475,588 over the $8 million apportioned for the care of prisoners. It is an uncontrollable section. We have to pay the various facilities where they are kept for the charges.

If there are any questions, I would be glad to answer them. Otherwise, I move the adoption of the amendment. I yield back all remaining time and move the adoption of the amendment.

The PRESIDING OFFICER. Does the Senator from Arkansas yield back his time?

Mr. McCLELLAN. I do.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. HOLLINGS. Now, Mr. President, on the time on the bill, there is one other item I am interested in.

We had a brief discussion with our distinguished colleague from Rhode Island (Mr. CHAFEE). The distinguished Senator is very concerned about a matter which concerns us all. Specifically, regarding OCS oil and gas development of Baltimore Canyon and Georges Bank, we are all familiar with the court decision which temporarily stays any further offshore drilling activities. We have put $5 million in coastal zone management environmental and planning grants and this is not affected by the court order. That is over and above what the President requested.

I will do everything possible to make certain that the areas affected, such as Rhode Island, receive the funds for which they are eligible between now and the end of the fiscal year to do the required planning for that area. The same is true of the coastal energy impact fund for loans and bond guarantees in that State.

I want to sympathize with the concern of our distinguished friend from Rhode Island. However, I do not want to add any further money since we are already $5 million over estimate of the President to provide for environmental and planning grants. I yield to the Senator from Connecticut.

Mr. WEICKER. I have nothing further on this. Does the Senator yield the floor?

Mr. HOLLINGS. Yes, I yield the floor. Let me thank my friend from Vermont. I think I interrupted the fine presentation he was making. I thought he had finished. I apologize for interrupting.

Mr. LEAHY. Mr. President, I was somewhat in error there. I advise the distinguished Senator from South Carolina there were two other amendments we were anticipating, but I understand that neither is ready to be brought up at this moment. Nothing was interrupted.

AMENDMENT NO. 179

Mr. WEICKER. Mr. President, I have an amendment at the desk. I ask that it be read.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Connecticut (Mr. WEICKER) proposes an amendment numbered 179.

On page 68, strike out lines 19 through 22.

Mr. WEICKER. Mr. President, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. WEICKER. Mr. President, I am today introducing an amendment to H.R. 4877, the supplemental appropriations bill for fiscal year 1977 for executive branch agencies. My amendment will strike $241,000, requested by the President for increased staffing for the Council on Wage and Price Stability. Both the AFL–CIO and the Chamber of Commerce strongly support this amendment.

On March 16, the House of Representatives reduced the President's budget request to $100,000. The House-approved increase brings the funding to the maximum level of authorization for the Council this year. However, on March 24, the Senate Appropriations Committee agreed to go ahead and appropriate the full amount of $241,000, which is $141,000 more than has been authorized by the Congress. This additional funding will result in a 50-percent increase in the Council staff, which would include 10 additional economists along with necessary support staff and facilities.

We are all aware of the President's recent economic message to the Congress proposing a "voluntary" prenotification system to cover significant price increases as well as wage hikes. Both business and labor have already emphatically rejected this proposal.

President Carter requests this major increase in staff so that the Council on Wage and Price Stability can "perform a more active job of monitoring wage and price developments." The words ring loud and clear to all segments of our economy. It is language which can only indicate great Government involvement in decisions which should be left to the free marketplace.

Control of inflation is closely linked to business and labor confidence. A strengthened Council of Wage and Price Stability will strike fear in the hearts of both business and labor. The haunting nightmares of controls will be rekindled.

Mr. President, I have been around this track before. I am 100 percent against wage and price controls. But that is a complete turnabout as far as LOWELL WEICKER is concerned. In 1971, I urged wage and price controls under former President Nixon and I was wrong. We went through a period of wage and price controls and it ended up in more confusion; it ended up with labor especially being penalized, and when the lid came off, the entire Nation faced a new flood of inflation.

I know now what I should have known then: Letting the free economy and the free marketplace operate is the best way—the only way—out of our long term economic troubles. Limited controls and partial restrains on any segment of the economy are not worth the paper they are written on. There is no middle ground—either you have a free economy or you manage it entirely.

Now, Mr. President, the words of President Carter are a total contradiction as to what is being requested in this supplemental. It is not a matter of economics or additional economic monitoring. Indeed, if that were the case he could ask for the additional support in the Council of Economic Advisers. That would be proper and it would raise no fears. The other agency where additional staffing might be required in the economic sense would be the Office of Management and Budget. Indeed, additional staffing will take place within that entity as a part of President Carter's reorganization plans. But why additional staffing for the Council on Wage and Price Stability?

It was readily admitted during the course of the hearings on this subject that just the very existence of the Council gives rise to the fear that eventually wage and price controls might be imposed. There is a certain inflationary aspect already present in the existence of the Council.

What do Members think the impact is going to be when we want to increase the staffing and the professional help of the Council 50 precent? This is not just mere economic advice. I repeat, that can be achieved through either the Council of Economic Advisers or the Office of Management and Budget.

The name of this entity is the Council on Wage and Price Stability. It is the Council that would have the authority to administer wage and price controls. I think it logical that if they are given this increased staffing, in both the business community and the labor community there is an anticipation that eventually such controls might come to pass. That is not without its impact today, as people start scurrying around to figure, "Well before that comes to pass, I will get my price increase" or labor, "I will get my wage demands in before such controls are imposed." That is what is involved here. It has a very important psychological effect on the entire subject of inflation.

I repeat to my colleagues that this amendment—and this is probably the first time I have seen this come to pass as long as I have been in the body—has the support of both the Chamber of Commerce and the AFL–CIO. Both labor and business know how badly they were hurt during the last round of controls. Both are well aware of this specter hanging in the background, a specter which some day might become a reality.

Aside from all the increases that are being voted around the Chamber today, here is an area where $241,000 can be saved. But, and more important, the Congress should make it very clear that economic monitoring is all right and reorganization is all right. Both can be done through the appropriate agencies in the Council of Economic Advisers and the Office of Management and Budget. But when it comes to wage and price controls, the answer is a clearcut "no."

Mr. President, I suggest the absence of a quorum and ask that the time be charged to the distinguished Senator from Florida, who is not in the Chamber right now.

Mr. McCLELLAN. I object. I suggest the absence of a quorum without the time being charged to either side.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The Clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. CHILES. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time? The Senator from Connecticut and the Senator from Arkansas have control of the time.

Mr. YOUNG. I can yield time on the bill.

Mr. McCLELLAN. I yield as much time to the Senator as he needs.

Mr. CHILES. I thank the chairman.

Mr. President, President Carter, in his January 31, 1977, message to the Congress, proposed a 2-year economic recovery program and indicated his desire for strengthening the Council on Wage and Price Stability. The President has requested the addition of 10 senior economists and 3 research assistants to the Council staff. At present there are 20 senior economists on the full-time staff of 47 personnel. Nine of these economists review and evaluate the economic impact of Federal regulations and rulemakings. The remaining 11 economists monitor the entire private sector of the economy. This is the area that the President proposes to increase the Council's analysis capability. The additional personnel would be available to analyze the supply and demand trends in particular industries so that bottlenecks and potential shortages could be identified—thereby allowing the administration to deal with them in a timely manner. This is not an excessive request as it takes a single economist anywhere from 3 to 6 months for an indepth industry study.

The Council has been in existence for almost 3 years—in that time they have not requested any personnel increases. This request is not to indicate that wage and price controls are being considered. The President has reiterated many times that he does not desire to have authority—including standby authority—to impose wage and price controls.

In the committee report on this item the following language was included:

> The Committee believes that the current monitoring role of the Council on Wage and Price Stability is appropriate, and the inclusion of funds for additional positions in no way anticipates the adoption of or movement to Wage and Price Controls.

President Carter and his economic advisers believe that recognition of supply shortfalls before they occur can lead to public and private actions to avert these shortages and the subsequent inflation that could develop. The Council on Wage and Price Stability is a unique organization to perform these studies. The additional funding will provide the personnel to enable them to perform their as-

signed mission. The 10 economists and 3 supporting personnel will increase the full-time staff of the Council to 60 personnel from the 47 they now have.

Mr. President, I recommend that the amendment not be approved and the committee recommendation of $241,000 be sustained.

The PRESIDING OFFICER. Who yields time?

Mr. PROXMIRE. Mr. President, will the Senator from Florida yield for just a minute?

Mr. CHILES. I yield.

Mr. PROXMIRE. Mr. President, I am concerned about the appropriation for the Council on Wage and Price Stability, which I think is under the jurisdiction of the subcommittee which the Senator chairs. It is my understanding that the committee went to $214,000, which is the request of the administration.

Mr. CHILES. That is correct.

Mr. PROXMIRE. However, the amount provided is substantially over the figure included by the House. My problem is that the Council is under the jurisdiction, for authorizing purposes, of the Banking Committee. The authorization is, I think, $1.6 million, and with this addition of $241,000, we would be about $140,000 or so over the authorization.

I have been told that this is in order, because there is a budget estimate. There is no additional language here. But I am concerned about it, and I wanted to verify the facts with the distinguished chairman to be sure that I understood what was being done here.

I frankly think that the Council on Wage and Price Stabilization could do a much better job if they had more professionals, which is the purpose of this appropriation. They have only 25 professionals, as I understand it, for the entire economy, of whom half are responsible for inflation in the governmental sector and only 12, or half of the 25, for the entire complicated American economy. So I would not object to the addition, but I am concerned about how it was done. The administration gave no notice to the Banking Committee, but just went right ahead and provided the appropriation without providing any kind of information to the authorizing committee. It seems to me that that is, at best, unusual.

I ask the Senator if he concurs with my concern and if he can give me any further justification for this increase?

Mr. CHILES. I do concur in that. The Senator from Florida really does not approve of the appropriations that come through without authorization. It is my understanding that the present authorization is $1,700,000. That does expire on September 22 of 1977.

It is my further understanding that H.R. 3184, introduced in the House, to raise to $2.2 million the authorization and extend it to September 30, 1978, has been introduced and is in the Committee on Banking and Currency in the House. Hearings are to be held there on April 19.

I do not have any note that the bill has been introduced in the Senate or that the Senator from Wisconsin has been notified of that. I certainly accept his statement.

Mr. PROXMIRE. I appreciate that. I do think a better way to operate in the future would be for the administration, when they are going to provide for a significant change in an agency, to do their best to see that the authorizing process has an opportunity to operate. Here is an agency has been proceeding for several years now at its present level.

Mr. CHILES. I concur with the Senator from Wisconsin. The only thing I point out is that we are in an administration change here. We have an administration that is coming in with an economic plan. They say this is a part of their economic and recovery plan, to try to do this additional monitoring in the private sector, to try to anticipate shortfalls or bottlenecks.

I think that perhaps we should put this administration on notice that we do expect to be given this information. I certainly would concur with the Senator from Wisconsin on that. I raised the point many times about appropriations going through without authorization.

Mr. PROXMIRE. I appreciate it.

Let me close by saying that I hope we will regard this as a rare exception and require in the future that the authorization process be given an opportunity to operate.

Mr. CHILES. The Senator from Florida certainly agrees with that.

Mr. WEICKER. Mr. President, how much time do I have?

The PRESIDING OFFICER. The Senator from Connecticut has 21 minutes. The Senator from Arkansas has 20 minutes.

Mr. WEICKER. Mr. President, I yield myself such time as I may need.

As an addendum to the dialog between the distinguished Senator from Wisconsin and the distinguished Senator from Florida on the proper procedures being followed, let the RECORD be very clear that in the sense of the "$50 rebate," the Appropriations Committee was asked to appropriate funding before there was any authorization from the Finance Committee.

I certainly like to accommodate new administrations and make it feel welcome and desirable in going ahead, not raising too much Cain too fast.

But I do think those procedures have to be followed.

We have been through other administrations where the procedures were circumvented, much to the regret of everybody in this Chamber and in the Nation. I just do not intend to see that process repeated—and it is being repeated and has been repeated on several different occasions.

Mr. President, one last comment and I am prepared to yield back the remainder of my time and get to the matter of voting.

I have followed this Council on Wage and Price Stability from the beginning, or rather from what was supposed to be its ending.

I remember very clearly when sitting on the Banking and Currency Committee that a very narrow vote occurred on the issue as to whether or not the Council should ever remain in being. We had all come through the experience of wage and price controls. It was rejected finally, not just by this body and the House, but by the people as being a failure, an experimental failure, and by the narrowest of margins the Council was allowed to remain in being, albeit just in an advisory capacity and with the smallest of staffs.

Now here it is, 3 years later, and we have a message from the President, according to the document in front of me, where on page 164, it states:

> The President, in his January 31, 1977 economic message, stated his desire for a substantial strengthening of the Council. This will provide the capability for the Council to be more active in wage-price monitoring as well as analysis of supply trends in basic industries.

I think the message is pretty clear. Let nobody sit in shocked surprise as to the final step.

We are the ones that kept the Council in being; two, gave it the necessary staffing; and then another step, gave it additional staff and professional help in the sense of monitoring.

I mean, what are we spending all this money for? To put it in the closet and forget about it, or is it being put there in the anticipation that some day it might be used?

I repeat my request of my colleagues to reject this item. It is not just a matter of dollars and cents. It is a matter of policy. It is a matter of direction.

If I had my druthers in it, I would not just like to eliminate the 50-percent increase in staffing, but what should have been done 3 years ago by the Banking and Currency Committee, eliminate the whole council; and if we want in-depth, adequate economic advice, get it from the Council on Economic Advisers, get it from the Office of Management and Budget.

The function of the Council on Wage and Price Stability, the ultimate function, is wage and price controls, and there is no ducking around that issue.

Mr. President, I am prepared to go to a vote on this matter. I am prepared to yield back the remainder of my time if my colleagues from Florida and Arkansas are.

Mr. CHILES. I yield back the remainder of my time.

Mr. McCLELLAN. I yield back the remainder of my time.

The PRESIDING OFFICER. All time is yielded back. The question is on agreeing to the amendment of the Senator from Connecticut. The yeas and nays have been ordered and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from Indiana (Mr. BAYH), the Senator from Idaho (Mr. CHURCH), the Senator from Washington (Mr. MAGNUSON), the Senator from South Dakota (Mr. ABOUREZK), the Senator from Missouri (Mr. EAGLETON), the Senator from Alabama (Mr. SPARKMAN), and the Senator from New Hampshire (Mr. DURKIN) are necessarily absent.

I further announce that the Senator

from Hawaii (Mr. INOUYE) is absent on official business.

I further announce that, if present and voting, the Senator from Washington (Mr. MAGNUSON) would vote "nay."

Mr. BAKER. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Oregon (Mr. PACKWOOD), the Senator from Kansas (Mr. PEARSON), the Senator from Alaska (Mr. STEVENS), the Senator from South Carolina (Mr. THURMOND), and the Senator from Texas (Mr. TOWER) are necessarily absent.

I also announce that the Senator from Missouri (Mr. DANFORTH) is absent on official business.

On this vote, the Senator from Alaska (Mr. STEVENS) is paired with the Senator from South Carolina (Mr. THURMOND). If present and voting, the Senator from Alaska would vote "yea" and the Senator from South Carolina would vote "nay."

The result was announced—yeas 35, nays 48, as follows:

[Rollcall Vote No. 97 Leg.]

YEAS—35

Baker	Griffin	Morgan
Bartlett	Hansen	Percy
Bellmon	Hatch	Randolph
Bentsen	Hatfield	Roth
Byrd, Harry F., Jr.	Hayakawa	Schmitt
Chafee	Heinz	Schweiker
Curtis	Helms	Scott
DeConcini	Hollings	Stafford
Dole	Laxalt	Wallop
Domenici	Lugar	Weicker
Garn	McClure	Young
	Metzenbaum	Zorinsky

NAYS—48

Allen	Haskell	Metcalf
Anderson	Hathaway	Moynihan
Biden	Huddleston	Muskie
Brooke	Humphrey	Nelson
Burdick	Jackson	Nunn
Byrd, Robert C.	Javits	Pell
Cannon	Johnston	Proxmire
Case	Kennedy	Ribicoff
Chiles	Leahy	Riegle
Clark	Long	Sarbanes
Culver	Mathias	Sasser
Eastland	Matsunaga	Stennis
Ford	McClellan	Stevenson
Glenn	McGovern	Stone
Gravel	McIntyre	Talmadge
Hart	Melcher	Williams

NOT VOTING—17

Abourezk	Durkin	Pearson
Bayh	Eagleton	Sparkman
Bumpers	Goldwater	Stevens
Church	Inouye	Thurmond
Cranston	Magnuson	Tower
Danforth	Packwood	

So Mr. WEICKER's amendment was rejected.

UP AMENDMENT NO. 136

Mr. SCHWEIKER. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Pennsylvania (Mr. SCHWEIKER) for himself and Mr. Stevens proposes an unprinted amendment No. 136:

On page 48, after line 10, insert the following:

(4) In the case of a Senator who is the chairman or ranking minority member of a subcommittee that receives funding to employ staff assistance separately from the funding authority for the full committee, if the amount of funds made available to him to employ staff assistance is less than the amount referred to in section 105(e)(1) of the Legislative Branch Appropriation Act, 1968, as amended and modified, then paragraph (1) shall not apply with respect to such subcommittee during the period March 1, 1977 through September 30, 1977.

Mr. SCHWEIKER. Mr. President, I will be very brief. This amendment is designed—I am offering it for Senator Stevens of Alaska and it is designed—to take care of just a few Senators who were on the Post Office and Civil Service Committee with the Senate Resolution 60 staffing money, and have been consolidated into another committee, and to treat them equally, the same way they were treated because they take their staff with them in the committee, and this is just to iron out that inequality.

I believe, I hope, the majority will find it acceptable.

Mr. HUDDLESTON. Mr. President, the subcommittee has examined this amendment and we agree that it just merely corrects an inequity, one of several, that occurred because of the reorganization we went through earlier this year.

Mr. SCHWEIKER. I yield back my time.

Mr. McCLELLAN. I yield back my time.

The PRESIDING OFFICER. All time is yielded back. The question is on agreeing to the amendment of the Senator from Pennsylvania.

The amendment was agreed to.

AMENDMENT NO. 169

Mr. ALLEN. Mr. President, I call up, on behalf of my distinguished senior colleague, Mr. SPARKMAN, and myself, amendment No. 169 which is at the desk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Alabama (Mr. ALLEN) for himself and Mr. Sparkman proposes amendment No. 169:

On page 30, between lines 12 and 13 add the following:

For Tuskegee Institute, Tuskegee, Alabama, for construction assistance for its School of Veterinary Medicine under the Health Professions Educational Assistance Act of 1976 (Public Law 94-484) and the Public Health Service Act—$1,000,000.

Mr. ALLEN. Tuskegee Institute seeks construction assistance for its school of veterinary medicine under title III—assistance for construction of teaching facilities under the supplemental appropriations bill for the fiscal year 1977. Funds in the amount of $1 million are sought to permit Tuskegee Institute's School of Veterinary Medicine to continue to serve as a regional health professions program designated for the training of students in veterinary medicine through the Southern Regional Education Board, Atlanta, Ga.—SREB.

BRIEF HISTORY

Tuskegee Institute's School of Veterinary Medicine was designated in 1948 as a regional service institution to provide regional training in veterinary medicine for students in 10 cooperating States. Through the SREB, the following States now contract for 31 of the 50 entering spaces in each first-year class: Arkansas, Georgia, Kentucky, Maryland, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia.

I might say, Mr. President, that the Tuskegee Institute is in danger of losing its accreditation if funds are not provided for it to update its buildings and facilities; it is in danger of losing its accreditation. This must be done before 1978.

Under this bill and the committee report, some $25 million, exactly $25 million, has been allocated to three institutions: Tufts College in Massachusetts, the University of Pennsylvania, and Washington State University. This does not take any of those funds away from those institutions, and I find no fault whatsoever, and certainly approve of the money going to those institutions. But this seeks $1 million for Tuskegee Institute.

THE PROBLEM

Current program efforts are being seriously curtailed due to inadequate and outdated facilities designed and constructed in 1950–51. The Council on Education, American Veterinary Medical Association—AVMA—the national accrediting body for all schools of veterinary medicine has given Tuskegee Institute until 1978 to complete a master physicial facility development plan designed to enlarge and upgrade the teaching and patient care facilities. Funds in the amount of approximately $6 million of Federal and non-Federal matching funds have been identified to initiate this construction/renovations project. An additional $2 million is required to complete the building program in keeping with Council requirements in order to maintain accreditation.

SUMMARY

Tuskegee Institute's School of Veterinary Medicine qualifying under the regional health professions program—Public Law 94-484—seeks to have $1 million earmarked for the construction—final phase—of its health teaching facilities—veterinary medicine.

These facilities when completed—two new buildings—a large animal care center and a learning resource center—four renovated buildings; preclinical, clinical anatomy, large animal ward and barn, and post mortem buildings—will permit the institute to increase its enrollment to 65 students from its present base of 45 students—increases of 5 in 1977 and 15 in 1978—thereby increasing its regional commitment to the training of more students in this most critical health profession.

I might say this, Mr. President, Tuskegee's School of Veterinary Medicine is the most integrated school of veterinary medicine in the United States, yet it continues to be the principal training resource for minority students in the field of veterinary medicine. I would like to call attention to this amazing statistic, that 90 percent of all black veterinarians in this country have had their training and their schooling at Tuskegee Institute's School of Veterinary Medicine. It is one of the outstanding schools of veterinary medicine in the country, but is hampered by a lack of facilities. This money will help.

I understand that, in all likelihood, they will be before the committee seek-

ing additional funds for 1978, but this would be a stopgap appropriation.

I have talked to the chairman of the committee, Mr. McCLELLAN, to Senator YOUNG, the ranking minority member, to Mr. BROOKE on the subcommittee, and I understand the staff has cleared the matter with Mr. MAGNUSON, the chairman of the subcommittee.

I have talked to Senator KENNEDY, and he supports the amendment. As a matter of fact, I found no opposition whatever to the amendment.

We wrote a "Dear Colleague" letter to all of the Senators, enclosing this fact-sheet, and I believe it is indeed a meritorious amendment.

Mr. SPARKMAN. Mr. President, the amendment offered by Senator ALLEN and me to provide $1 million in construction funds for the School of Veterinary Medicine at Tuskegee Institute, Tuskegee, Ala., is urgently needed.

The record will show that Tuskegee Institute's School of Veterinary Medicine was designated in 1948 to provide regional training in veterinary medicine in 10 cooperating States. Recently, however, the Council on Education of the American Veterinary Medical Association, which is the regional accrediting body for all schools of veterinary medicine, notified Tuskegee Institute that it must complete a master physical facility development plan to enlarge and upgrade the teaching and patient care facilities at the school of veterinary medicine in order to maintain accreditation. The council has mandated that Tuskegee Institute comply with its requirements by 1978.

The stature of Tuskegee Institute, and in particular its contributions to our amazing U.S. agriculture, is too well known for me to repeat here. The Tuskegee Institute School of Veterinary Medicine continues to be the principal training institute for black students in the field of veterinary medicine; and, in, fact, it has provided training for some 90 percent of all black veterinarians in this Nation.

I might add that veterinary medicine is also the training ground for new research scientists. Although animal disease research has not enjoyed the glamour and level of financial support accorded human health disease research, nonetheless the need for more veterinarians to cope with the major diseases of our animal population have direct human health implications. In short, we need to step up the increase in the number of veterinarians and veterinary research programs in our Nation. The modest request sought by Senator ALLEN and me in our amendment would go a long way toward accomplishing this important objective.

Mr. BROOKE. Mr. President, will the Senator yield?

Mr. ALLEN. I yield.

Mr. BROOKE. I would just like to say, Mr. President, I commend the distinguished Senators from Alabama (Mr. ALLEN and Mr. SPARKMAN) for introducing this amendment.

I have discussed it with Senator MAGNUSON and, in fact, Senator MAGNUSON is well aware of it. The Senator is quite correct, we have appropriated $25 million for the purposes he has indicated. I know first hand of the excellence of the Tuskegee Institute's School of Veterinary Medicine and its distinguished President, Dr. Luther Foster, and we agree that this is a stopgap, that there is an emergency, and that this is an important institution serving a large area of people.

As the Senator has said, it is the most integrated school of its kind in the country, but primarily it does serve minorities.

We are willing to accept this amendment, and I understand the distinguished chairman, Senator McCLELLAN, and the distinguished ranking member, Senator YOUNG, are willing to accept this amendment and, hopefully, we will hold it in conference.

Mr. ALLEN. I am certainly hopeful.

Mr. McCLELLAN. I think Senator YOUNG agrees with me, and we accept the amendment.

The PRESIDING OFFICER. Is all time yielded back?

Mr. McCLELLAN. I yield back my time.

Mr. ALLEN. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 137

Mr. JOHNSTON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Louisiana (Mr. JOHNSTON) proposes unprinted amendment No. 137.

Mr. JOHNSTON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 18, line 17, insert the following:

SERVICE CHARGES, DEPOSITS, AND FORFEITURES

For administrative expenses and other costs related to processing application documents and other authorizations for use and disposal of public lands and resources, for monitoring construction, operation, and termination of facilities in conjunction with use authorizations, and for rehabilitation of damaged property, such amounts as may be collected under sections 304(a), 304(b), 305(a), and 504(g) of the Act approved October 21, 1976, Public Law 94–579, to remain available until expended.

Mr. JOHNSTON. Mr. President, there is no additional appropriation attached to this amendment. It is simply authority for the Bureau of Land Management to establish a self-sustaining account with which to finance environmental impact assessments required by law whenever an application is filed for use of public lands. This fund, to be financed by deposits of the use applicant, will avoid the need for supplemental appropriations, reprogramings, or other devices to which the BLM has had to resort in the past.

In this instance, Mr. President, there is an imperative need for this account. The Northern Tier Pipeline Co., we are told, is filing an application with the Federal Power Commission. This would involve the proposed pipeline from the Pacific Northwest to the northern Midwest. It would be designed to bring Alaska crude oil to a section of the Nation that is not now adequately served.

There are a great many uncertainties surrounding this proposed project, Mr. President, including the question of whether it should be built at all. This amendment has nothing to do with that issue. This language would merely enable the BLM, using funds deposited by the applicant, to move forward with the required environmental impact study, which I am told will require about $500,000 for the balance of this fiscal year.

The account proposed in my amendment is identical to the BLM's request in its 1978 fiscal year budget submission. This amendment would merely advance the activation of that account.

I hope, Mr. President, that this amendment would be acceptable to the chairman of the Interior subcommittee, and the chairman of the full Committee on Appropriations.

Mr. ROBERT C. BYRD. Mr. President, as the Senator from Louisiana has pointed out, there is no additional appropriation involved in his amendment. The account it establishes is proposed for fiscal 1978 and has been looked into at the subcommittee's budget hearings for the Bureau of Land Management. It is something we will have to do sooner or later with the growing demand for energy transportation systems. I see no reason why it should not be done sooner.

The matter of the Northern Tier Pipeline application, which we were told will be filed within the next few days, came to our attention when Senator MELCHER and others brought it to my attention just prior to the markup of the supplemental.

I have discussed this amendment with the Senator from Louisiana, and I understand that my colleague, the ranking Member on the other side of the aisle, Mr. STEVENS, will be agreeable to accepting it.

I have no objection to its adoption, and I accept it.

Mr. JOHNSTON. I yield back the remainder of my time.

Mr. ROBERT C. BYRD. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. KENNEDY. Mr. President, I ask unanimous consent that Mr. Thomas Susman, of the staff of the Committee on the Judiciary, be accorded the privilege of the floor during the remainder of the debate on this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, we now move to chapter IX of the supplemental bill. Senator STENNIS, who is chairman of the Subcommittee on Public Works, and I have conferred on this chapter, and he has asked that I present it in his absence.

I wish to express my full support and that of Senator STENNIS for the public works chapter of the 1977 supplemental appropriations bill. The Public Works Subcommittee and the full committee have fully considered the items contained in chapter IX and agreed to them without dissent. There is, however, one amendment I wish to offer in behalf of the subcommittee.

UP AMENDMENT NO. 138

I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Oregon (Mr. HATFIELD) proposes an unprinted amendment No. 138.

On page 57, between lines 21 and 22, insert the following:

DROUGHT EMERGENCY ASSISTANCE

For necessary expenses for activities to mitigate the impact of the 1976–1977 drought, $100,000,000: *Provided*, That this appropriation shall be available only upon enactment into law of authorizing legislation.

Mr. HATFIELD. Mr. President, as ranking minority member of the Public Works Subcommittee and as a Senator from a State that is being affected by the drought now and will be severely affected as the dried seasons approach, I am pleased to offer an amendment which would add $100 million to the $30 million already contained in the committee recommendations for the Bureau of Reclamation's drought relief efforts.

This amount falls within the remainder of the allocation made to this subcommittee under the third concurrent budget resolution. The $100 million is for construction, management, and conservation activities, for deliveries of water to Indian reservation lands, and for operation of a "water bank" to purchase water from willing sellers for willing buyers at a negotiated price. These funds will provide low-interest loans—5 percent—to the purchasers of this water.

The Senate has already passed authorizing legislation—S. 925—for this purpose and I am advised that the House will take up the authorizing legislation on Monday.

While the committee did not have hearings on this specific request and amount, the committee has been made aware during our hearings on the fiscal year 1978 program of the severity of the drought and of the fact that the Energy and Natural Resources Committee and the administration had such a proposal under consideration.

Last week, after the committee reported this supplemental bill, we received the President's supplemental budget request for drought relief. I was pleased to see this recognition by the administration of the severity of the water shortages facing our Western States. I hope this action foreshadows further favorable actions by the President aimed at meeting the Nation's water needs.

The President's request included the $100 million item being offered as a committee amendment and the other two items already included in the committee recommendations before you. The first of these items already in the bill is $30 million for the emergency fund of the Bureau of Reclamation. These emergency funds will be used to install new wells in areas with available ground water supplies, to install pumps, to use water from drains in streams, to pump water from dead storage in reservoirs, for installation of pipes or concrete canal lining to conserve water and for technical assistance for improving system operation and irrigation scheduling procedures.

This supplemental item will enable the Bureau of Reclamation, under authority granted by the Emergency Act of 1945, to provide assistance to water districts served by the Bureau projects to alleviate severe water shortages resulting from the current drought in the 17 Western States.

Mr. President, at this time I move the adoption of the amendment.

Mr. JACKSON. Mr. President, will the Senator yield?

Mr. HATFIELD. I am happy to yield to the Senator from Washington.

Mr. JACKSON. Mr. President, I commend the distinguished senior Senator from Oregon (Mr. HATFIELD) for offering this amendment which will provide, as I understand it, $100 million for emergency drought assistance.

Colleagues will remember on March 15 the Senate approved S. 925, which was sponsored by members of the Committee on Energy and Natural Resources, with a record vote of 92 to 0.

The amendment offered by the Senator from Oregon, the distinguished ranking member of the subcommittee, will take us a long step forward in implementing the provisions of S. 925. As the Senator has mentioned, the House Interior Committee has approved an authorization which is for less than what we have approved in the Senate; namely we approved, as I recall, $400 million. But the House of Representatives has provided an authorization of $100 million.

That measure will come up on Monday under suspension of the rules so it will not be subject to amendment under the House rules.

I commend the chairman of that subcommittee, Mr. MEEDS, of Washington, and the chairman of the full committee, Mr. UDALL, of Arizona, for the expeditious manner in which they have moved to take action on the bill that we passed here in the Senate on March 15.

I must say, Mr. President, that there has been very fine bipartisan support all the way around on the problem that we face, particularly in the western part of the United States; namely, the worst drought since the 1930's.

I again extend my appreciation to the distinguished ranking minority member of the Subcommittee on Public Works (Mr. HATFIELD), and to the distinguished Senator from Arkansas (Mr. MCCLELLAN), chairman of the full committee, and the distinguished Senator from North Dakota (Mr. YOUNG) the ranking Republican member of the full committee.

Mr. HATFIELD. I thank the Senator from Washington for his comments. I also wish to indicate that it was through his initiative that we were able to get the authorization measure completed so exeditiously, in order to make way for this appropriation.

Mr. President, I move the adoption of the amendment.

Mr. McCLELLAN. We are willing to accept the amendment, and I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Oregon.

The amendment was agreed to.

Mr. HATFIELD. Mr. President, I would like to conclude the remarks concerning this particular chapter with the fact that the chapter also includes the President's request for $13.8 million for the Southwestern Power Administration for the purchase of thermal power to meet contractual commitments to market power.

The PRESIDING OFFICER. Who yields time to the Senator from Oregon?

Mr. YOUNG. I yield the Senator 10 minutes on the bill.

Mr. HATFIELD. Water shortages in the Southwest have sharply reduced the region's ability to produce hydroelectric power. It should be noted that the full amount of this appropriation for the Southwestern Power Administration will be repaid to the Federal Treasury with power revenues.

Mr. President, that concludes the remarks we have in explanation of chapter 9 of the supplemental appropriation bill.

Mr. PROXMIRE. Mr. President, I am responsible for chapter 5 of this legislation. Under the rules, will the chairman yield me time on that chapter?

Mr. McCLELLAN. I yield the Senator such time as he may require.

Mr. PROXMIRE. I thank the chairman.

Mr. President, chapter V of H.R. 4877, making supplemental appropriations for fiscal 1977, contains funding for the Department of Housing and Urban Development, the Environmental Protection Agency, the Veterans' Administration, and other independent agencies. The Senate Appropriations Committee has recommended total new budget authority of $19,498,956,000 for chapter V, which is $4,031,545,000 more than the House provided, but $2,467,412,000 less than the amount requested in the President's budget for the activities being funded.

The committee has concurred with the House recommendations in all but five instances. In all five cases we have added to the House-approved amount. Here is what the add-ons would accomplish:

An additional $4 billion for the Environmental Protection Agency's wastewater treatment plant construction grant program on top of the $500 million approved by the House, to provide the States and territories with additional Federal support for 75 percent of the total cost of building sewage treatment facilities. These funds would be disbursed on the basis of a formula set forth in S. 427 with slight proportional reductions reflecting the fact that we have provided only the $4.5 billion requested

by the administration rather than the $4,538,700,000 necessary to fully fund the formula.

Mr. President, I should add frankly that I opposed this large amount in the subcommittee and in the full committee, but was overruled by the majority both in the subcommittee and in the full committee. I proposed $2.25 billion for this item in full committee.

A total of $20 million for the Federal Disaster Assistance Administration to reimburse communities that have received emergency assistance for snow removal costs that occurred prior to the declaration of an emergency. This provision is subject to a point of order.

New funding of $1 million provided for a 1-year study by the National Commission on Neighborhoods of existing policies and new initiatives to conserve and revitalize existing city neighborhoods. This provision is also subject to a point of order since S. 1070, which authorized the Commission, has not yet passed the Senate.

The appropriation of $500,000 directly to the National Institute of Building Sciences so that the Institute can analyze and disseminate information on new building techniques, technology and materials. In the past the Institute has been living off the crumbs from the Department of Housing and Urban Development's table. The Department has provided the Institute with funding in the form of grants totaling $140,000 over the last 2 fiscal years.

An add-on of $10,045,000 to the $35,000,000 already appropriated by the Congress in fiscal 1977 for the Veterans' Administration program of assisting health manpower training institutions. This will allow the VA to support 28 projects under the program—projects that would otherwise have to be reconsidered on the basis of new submissions after June 30 of this year.

I would be remiss if I did not also point out that the great bulk of the $19.5 billion in budget authority contained in chapter V—$13,112,405,000 of it—is for assisted housing under the section 8 program, and that the total budget authority provided is far, far more than the administration will spend in a single year. In fact these funds will be spent over a period of 40 years.

I particularly want to call to the attention of the Senate the fact that the Budget Act has been interpreted as requiring, unjustly in my estimation, that the Department of Housing and Urban Development multiply by 10, 20, or 40 the assisted housing appropriations they have for a single year. That, in my judgment, is a very serious and unfair handicap for housing.

At any rate, chapter V funding will not have nearly as great an impact on the Federal deficit as appears at first blush.

Incidentally, we concurred with the House in settling on the Section 8 figure as well as all the other items not specifically mentioned in this statement.

Mr. President, this bill includes pay raises for virtually all Federal agencies in addition to a number of other vital funding recommendations. Consequently I hope that we can proceed to pass the legislation quickly, take it to conference, and have a bill on the President's desk for his signature before we leave on our Easter recess.

Mr. ROBERT C. BYRD. Mr. President. I notice on page 46 of the committee report that the Independent Offices Subcommittee has included, within chapter V of the supplemental appropriations bill, $20 million for the Federal Disaster Relief Administration to reimburse State and local governments for snow removal costs resulting from a winter storm for which the President issued an emergency declaration.

The committee report further States that this reimbursement appropriation is meant to cover costs of snow removal incurred by States and local governments which would have been borne by the Federal Government had the emergency declaration been in effect on the date of the winter storm.

I quote from the report:

States or portions thereof which received an emergency declaration as a result of a winter storm in the last week of January and the first week of February 1977 were Indiana, Michigan, Ohio and Pennsylvania.

My question to the distinguished senior Senator from Wisconsin is: Does this list of States constitute an exclusive list, or will other States which qualify also be eligible for these funds?

Mr. PROXMIRE. I can assure the Senator from West Virginia that the list is not, in any way, meant to be exclusive or restrictive. I am aware that West Virginia also experienced heavy snow removal costs and if West Virginia can qualify, then certainly the State would be eligible to receive any funds provided under this disaster relief title.

Mr. ROBERT C. BYRD. I thank the able Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I understand the Senator from New Jersey has an amendment to this chapter that he would like to offer.

UP AMENDMENT NO. 139

Mr. WILLIAMS. Mr. President, I have an amendment which I send to the desk. I ask for its immediate consideration.

The PRESIDING OFFICER (Mr. DECONCINI). The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Jersey (Mr. WILLIAMS) proposes an unprinted amendment numbered 139:

On page 14—

Mr. WILLIAMS. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 14, between lines 16 and 17, insert the following:

HOUSING FOR THE ELDERLY OR HANDICAPPED

The limitation on the aggregate loans that may be made under section 202 of the Housing Act of 1959 from the fund authorized by subsection (a) (4) of such section for the fiscal year 1977 is hereby increased by $150,000,000.

Mr. WILLIAMS. Mr. President, the amendment I am offering, for myself and Senator BROOKE, Senator KENNEDY, Senator CRANSTON, Senator CLARK, and Senator MATSUNAGA, would provide supplemental fiscal year 1977 lending limits for the section 208 housing for the elderly and handicapped program.

This amendment would increase these lending limits by $150 million.

For each of fiscal years 1976 and 1977, loan limitations of $750 million were established for the section 202 program through the appropriations process.

The Department of Housing and Urban Development granted fund reservations to 285 section 202 projects in fiscal year 1976.

These projects initially totaled more than 28,000 units.

HUD was able to reserve funds for such a high number of projects only because it held project size to 100 units.

Discovering that many projects required additional units to make them feasible, HUD has been forced to utilize a portion of the fiscal year 1977 lending authority of $750 million, committing auproximately $150 million to the fiscal year 1976 section 202 projects in order to provide for larger projects where necessary.

As a result, only $600 million of the fiscal year 1977 lending authority it left for the new round of projects soon to be invited by HUD.

It is clear that if $900 million was required for HUD to meet its fiscal year 1976 commitment, then the number of units which would be reserved with only $600 million in fiscal year 1977 will be severely reduced.

Consequently, if the Congress is to retain the 202 program at the intended fiscal year 1977 support level of $750 million an additional $150 million in lending authority must be approved.

Current treasury borrowing levels allow a total of $1.475 billion for the section 202 program through fiscal year 1977.

This figure will increase to $2,387 billion on October 1, 1977.

In addition, amounts in the program's revolving trust fund may be loaned to sponsors.

These amounts do not, however, apply to reservations for loans; they apply to the actual lending transactions.

Due to the snail's pace with which this program has operated in the past, HUD's 202 reservations are running more than a year ahead of the actual loan transactions.

Because of the time lag between loan reservations and loan transactions, HUD's treasury borrowing to cover reservations made in fiscal year 1977 will be charged against the borrowing authority that exists for the years in which HUD actually borrows the money.

During fiscal year 1977 HUD will use virtually none of its existing treasury borrowing authority to place loan money in the hands of approved sponsors.

As a result, HUD will not reach its maximum treasury borrowing level of $1.475 billion this fiscal year.

Depending on the speed with which

HUD moves in approving new applications, reservations made in fiscal year 1977 will not result in actual treasury borrowing until at least fiscal year 1978.

By this time the treasury borrowing limit will have reached $2.387 billion.

Thus, there is absolutely no danger that my amendment will deplete the treasury borrowing authorization, for at the very maximum HUD could commit no more than $1.650 billion for section 202 approved projects through fiscal year 1977.

This figure of $1.650 billion consists of $750 million in lending authority for fiscal year 1976, $750 million in lending authority approved for fiscal year 1977, and the $150 million provided by my amendment to make up for the amount committed from the fiscal year 1977 lending authority to projects approved in fiscal year 1976.

The Congress had expected that the newly rejuvenated 202 program would run a little faster than it has.

Personally, I had expectations that we would have seen elderly persons moving into section 202 units last year.

So it seems only fitting that we keep the program at a relatively consistent support level to insure that the program does not suffer setbacks in construction levels.

It is estimated that the amount my amendment would provide could fund an additional 5,000 units of excellent rental housing for the elderly in fiscal year 1977, and may provide as many as 10,000 badly needed jobs in construction and in related industries much earlier than would otherwise be the case.

In a 1976 speech regarding housing, President Carter stated:

> . . . Instead of production we have been given moratoriums and illegal impoundments . . . Many projects begun earlier have died lingering deaths due to administrative delays by HUD . . . Section 8 has provided the housing industry with neither sufficient incentives nor confidence in the Federal commitment to low-income housing . . . We must restore idealism and purpose to our housing programs . . . The Section 202 Program, which successfully provides housing for the elderly and the handicapped, must be expanded . . .

This supplemental lending authority would represent a beginning in meeting the President's stated goal by assuring that the section 202 program is funded at 100 percent of the authorized level.

I urge my colleagues to support this amendment which will signify our commitment to a better life for older Americans.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. WILLIAMS. Yes.

Mr. PROXMIRE. Mr. President, I am very happy to support this amendment. It is an excellent amendment. Housing for the elderly is one of the most popular programs we have in this country. It is a program that is not in the budget and should not be in the budget because the effect on the taxpayer is positive, not negative. This money is paid back in full with interest. It is a program that has worked extremely well all over the country, certainly in my State, and I am happy to support it.

I think in fairness to HUD, however, I should point out for the Record that the Secretary of Housing does oppose this amendment and has told me through staff that HUD does oppose it. They oppose it for three reasons, primarily: They feel that they do not have the staffing available to do the job that should be done. Therefore, they feel the program might not provide the 28,000 unit starts that the Senator from New Jersey has referred to. They feel they have enough lending authority now. Finally, they feel they would have to devote more section 8 money to house the section 202 recipients.

Mr. President, none of those arguments convince me. It seems to me we should put pressure on HUD to do the job. They have fallen short in the past in many respects.

We all know that publicly-assisted housing has been woefully deficient in this country. We have a goal of 600,000 starts and last year we had 41,000 starts, 7 percent of our goal. It is probably the worst record of any Federal program we have.

I am delighted to support the Senator from New Jersey. I think he has a good amendment and I am happy to accept it.

Mr. WILLIAMS. I appreciate that very much. I will say that the manager of this section of the appropriation bill has been a consistent fighter for the section 202 program. I believe that my amendment will truly put us on the road to a more active section 202 program and I feel confident that HUD will be able to handle the applications for 1977 that this amendment is designed to fund.

Mr. MATHIAS. Will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. MATHIAS. I agree with the Senator from Wisconsin. The arguments advanced against this proposition really do not hold water against the need which exists. I think it is not only appropriate but necessary to add the sum of $150 million, which the Senator from New Jersey has proposed. In fact, I would be glad to be a cosponsor of this amendment. I had some question whether, as a member of the committee, I should take that position. I believe clearly these moneys are necessary. I do not think there is any question that the need for these additional funds is there and that additional requests for funding housing for the elderly and handicapped projects are pouring into HUD. If we are going to be able to respond to the need which already exists, we are going to have to take this action.

The appropriation of these funds will keep us under the authorized amount for the program. Therefore, I am very happy to join with the Senator from Wisconsin and my chairman in supporting the amendment.

Mr. BROOKE. Will the Senator yield?

Mr. WILLIAMS. I am happy to yield.

Mr. BROOKE. Mr. President, I commend the distinguished Senator from New Jersey for offering this amendment. As a member of the subcommittee, I join with him and would like to be added as a cosponsor of this amendment.

Mr. WILLIAMS. I have listed the Senator from Massachusetts.

Mr. BROOKE. It is extremely important for us to provide additional funds for housing for the elderly and the handicapped. I will not belabor the point. I believe the Senator from New Jersey has made his case well, and I am very pleased that the chairman of the subcommittee, the distinguished Senator from Wisconsin (Mr. PROXMIRE) has agreed to accept this amendment.

Mr. WILLIAMS. Mr. President, I have no further requests for recognition.

The PRESIDING OFFICER (Mr. SASSER). Is all time yielded back?

Mr. WILLIAMS. I yield back the remainder of my time.

Mr. BROOKE. I yield back the remainder of our time. Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 140

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

> The Senator from Massachusetts (Mr. KENNEDY), for himself and Mr. BROOKE, proposes an unprinted amendment No. 140.
>
> On page 15, after line 4, insert the following:
>
> EMERGENCY HOMEOWNERS' RELIEF FUND
>
> For emergency mortgage relief payments and for other expenses authorized by title I of the Emergency Housing Act of 1975 (Public Law 94-50), $1,000,000.

Mr. KENNEDY. Mr. President, I yield myself such time as I might use.

Mr. President, I offer this amendment on behalf of myself and my colleague from Massachusetts (Mr. BROOKE). It is a very simple amendment. It provides $1 million appropriation for the emergency mortgage relief legislation which has been authorized and signed by the President into law. Actually, the Congress provided some $30 million for this legislation, and it was unexpended.

The reasons for this particular provision will be further elaborated upon during our discussion next week when the housing authorization legislation is considered.

The purpose of this amendment, Mr. President, is to provide assistance for mortgage payments by certain individuals in the Mashpee area of Massachusetts. Some individuals face the potential problem of not being able to meet the mortgage payments on their homes because of clouded title resulting from the Indian land dispute over 16,000 acres in Mashpee.

Senator BROOKE and I have felt the pain and the anguish experienced by a number of homeowners and small businessmen, particularly construction companies, because of the cloud of title which has been imposed by the lawsuit.

This has resulted in a dramatic increase in unemployment, and as a result those particular workers, as well as other individuals may face difficulties in making the mortgage payments for their homes and small businesses.

This amendment is to provide some degree of relief for those particular individuals.

It is my understanding that the moneys would expire by September of this year and that the procedures which have been outlined in the bill in terms of repayment and the standards which have been set in terms of eligibility would be enforced.

It will mean a great deal to those working people who are in danger of losing their homes and their small businesses, and who have been experiencing extraordinary hardship.

We are all hopeful, whether we are talking about Massachusetts or the few other areas or States which have been affected by challenges in terms of the Indian claims, that we are going to see an early resolution of those problems. This is purely a temporary remedy but, even though it is small in terms of dollar value, it is extremely important to a number of the small homeowners in a very special part of our State that are at this time being very heavily pressed. It will be for their relief and for the small businesses as well.

Mr. BROOKE. Will the Senator yield?

Mr. KENNEDY. I yield to my colleague.

Mr. BROOKE. Mr. President, I associate myself with all that the distinguished Senator from Massachusetts (Mr. KENNEDY) has said. It is a small amount that we are seeking for Mashpee, but it is vitally needed. The people who own homes in the town of Mashpee are experiencing grave difficulties. Indian claims, which have yet to be adjudicated, affect all of the homes and all of the small businesses in that town. The town has practically been brought to a standstill, because of this cloud on title. Many of the people have lost income because of this crisis and are unable to pay their monthly mortgage payments.

This action, Mr. President, will not resolve the most important question facing Mashpee regarding the cloud on title. We hope that this matter will be resolved through negotiations rather than long and protracted litigation. This kind of mortgage relief at this time would be most beneficial to the residents of that town who paid consideration for their homes, and are not responsible for the current situation. Certainly, they should not suffer because Congress may not have done its job to approve the transfer of land when it passed the Non-Intercourse Act of 1790.

This is a very serious problem and I am hopeful that my subcommittee chairman, the distinguished Senator from Wisconsin (Mr. PROXMIRE) will see fit to accept this amendment. Obviosuly, I am strongly in favor of it. I am cosponsoring this amendment with the distinguished Senator from Massachusetts (Mr. KENNEDY), because we think it is so vitally needed. It is a small amount of money and I am sure that we can amend the authorization legislation appropriately when that bill comes on the floor next week. These two provisions working together, I think, will make this a viable form of relief to the citizens of the town of Mashpee.

Mr. PROXMIRE. I have discussed this matter with both Senators from Massachusetts, Mr. President. I understand the urgent need in Massachusetts.

First, I wish to say that there is also a problem in Maine which is much more serious and quite different. This does not go to the problem in Maine. I have discussed the Maine situation with the Senators from Maine. They are very alert to this problem and concerned about it, but their particular difficulty would not be met by the measure that the Senator from Massachusetts brings up. This $1 million would be for the problem in Massachusetts with respect to mortgage payments.

In 1976, we appropriated $35 million under this provision of the law. It was never used by HUD. It requires an action by the Secretary of Housing and Urban Development to find an emergency. After we appropriate this money, we have to authorize a new program. It has to be passed by the House and Senate and signed by the President Then the Secretary has to make a finding. So there is a long path between the action that we take this afternoon and any assistance for the people in Massachusetts. This is certainly the first essential step.

There is one point I want to make clear. This appropriation will expire on September 30, 1977; that is, at the end of this fiscal year. With that understanding, I am willing to accept the amendment.

Mr. BROOKE. Will the Senator yield?

Mr. PROXMIRE. Yes.

Mr. BROOKE. I am hopeful we will reauthorize this program so that it will not expire on September 30, 1977.

Mr. PROXMIRE. Yes. What I am saying is that since the fiscal year expires on September 30, and since we are amending a 1977 supplemental, September 30 is the date on which the appropriation would expire. We would have an opportunity to provide an additional amount if we wished to.

Mr. BROOKE. Both my distinguished colleague from Massachusetts (Mr. KENNEDY) and I are aware of the procedure. We understand what has to be done and the length of time involved, but we have to begin that process now. We feel if we accept this amendment, we can make the necessary changes in the authorization bill next week. Then, the Secretary of Housing and Urban Development will be able to review this matter and make her determination that an emergency exists. If this situation in Mashpee is not an emergency, I cannot imagine what would constitute an emergency. I am hopeful that the Secretary of Housing and Urban Development will find that this crisis is an emergency that qualifies under the existing legislation.

Mr. KENNEDY. If the Senator will yield, we believe this particular resource will comply with provisions which have been included in the emergency mortgage legislation. My colleague and I shall have to work on some minor adjustments. But, yes, we do understand it.

We hope it will be used to a minimum extent. If it is used to the maximum extent, it means an enormous human tragedy to the people who will be utilizing it. There is no real requirement that the million dollars be utilized. The standards under the emergency act are extremely severe. What they will offer is a sense of hope, particularly at this time, which is such a crucial time to the people of that community.

Mr. PROXMIRE. Mr. President, I yield back my time.

Mr. KENNEDY. I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 141

Mr. KENNEDY. Mr. President, I send to the desk an amendment for myself and the distinguished Senator from New York (Mr. JAVITS).

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY), for himself, Mr. JAVITS, and Mr. HUMPHREY, proposes unprinted amendment No. 141:

On page 12, between lines 5 and 6, insert the following new paragraph:

"ROMANIA RELIEF AND REHABILITATION

"For relief and rehabilitation of Romanian earthquake victims, $10,000,000, to be available only upon enactment of authorizing legislation and to remain available until expended.".

Mr. KENNEDY. Mr. President, I offer this amendment in behalf of myself and the Senator from New York, as well as the Senator from Minnesota (Mr. HUMPHREY). This is an extremely modest amendment, really more of a symbol to the people of Romania, who have suffered one of the greatest human disasters that any nation has experienced in recent times: More than 1,700 people killed, tens of thousands wounded in the recent earthquakes; nine of their best and most important hospitals damaged or completely destroyed—a total of more than a billion dollars worth of damage to the country.

This is an effort to give a significant indication of the caring of the American people toward people who have suffered and are continuing to suffer in a most unfortunate manner because of the earthquake in Romania.

Mr. President, this amendment appropriates $20 million in earthquake assistance, subject to enactment of authorizing legislation—S. 1124—which Senator JAVITS and I introduced last Friday.

It is important that the Senate act now upon this amendment, in the context of the Supplemental Appropriations bill, in order for the United States to respond to the urgent rehabilitation and reconstruction needs caused by the massive earthquake which struck the people of Romania on March 4.

The Congress is clearly on record in support of humanitarian assistance to

Romania. On March 14, the Senate adopted Senate Concurrent Resolution 12, sponsored by Senator JAVITS and myself, with additional cosponsors, which stated:

The United States should do all that is possible to assist the people of Romania in their hour of need following the terrible natural disaster which has just afflicted them....

On March 17, the House concurred in the resolution.

The administration is also clearly on record in support of this amendment. On March 30 I received a letter from Acting Secretary of State Warren Christopher, stating the administration's support for $20 million in grant assistance to the victims of the Romanian earthquake. He noted that "we believe such aid would effectively demonstrate our country's readiness to act in accordance with our humanitarian concerns," and that "the amount of $20 million is fully justified."

Mr. President, I ask unanimous consent that the text of Secretary Christopher's letter be printed at that point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

MARCH 30, 1977.

Hon. EDWARD M. KENNEDY,
U.S. Senate.

DEAR SENATOR KENNEDY: I would like to express the support of the Department of State and this Administration for the legislation you and Senator Javits introduced on March 24, authorizing $20 million in assistance to the victims of the Romanian earthquake. We believe such aid would effectively demonstrate our country's readiness to act in accordance with our humanitarian concerns.

As you know, the earthquake that struck Romania on March 4 was a major disaster. The most recent reports available to us show over 1500 dead, 11,000 injured, and 34,000 families homeless. More than 32,000 buildings were destroyed or seriously damaged, and losses to the Romanian economy exceed $1 billion.

The Romanian Government has requested further assistance. We believe the United States should promptly take further steps, in addition to the approximately $600,000 in emergency assistance offered so far, to help Romania in the reconstruction phase of its recovery from the disaster.

In view of the severity of the earthquake, we believe grant assistance in the amount of $20 million is fully justified. These funds would be used in accordance with the following list of priorities:

1. Hospital, medical and similar equipment and commodities with a humanitarian purpose;

2. Equipment, commodities and technical services required for clearing damaged buildings and the rehabilitation and reconstruction and replacement in other sectors.

3. Equipment and commodities required for rehabilitation and reconstruction and replacement in other sectors.

We believe prompt action is appropriate to make FY 1977 funds available for these purposes. I appreciate your leadership in seeking rapid Congressional approval for an offer of $20 million in reconstruction aid to Romania.

The Department of State is reviewing the appropriateness of low-interest credits to help finance Romanian purchases of U.S. equipment to repair or replace items damaged or destroyed by the earthquake. We will be in touch with you after we have studied this matter further.

Sincerely,

WARREN CHRISTOPHER,
Acting.

Mr. KENNEDY. Mr. President, to date the United States has provided some $626,000 in disaster relief assistance, but this phase of assistance will be largely completed by April. As the emergency relief phase of the Romanian earthquake operation ends, it is particularly important that rehabilitation and reconstruction programs begin with assurances of support.

On March 10, the Romanian Foreign Minister asked our Ambassador in Bucharest for help in normalizing the lives of the victims of the earthquake. Since then, a number of areas of need have been identified to which the United States can appropriately contribute—and which have an urgent humanitarian purpose.

Although the $20 million to be appropriated by this amendment has not yet been fully broken down by projects, several areas of specific needs have been targeted.

The first, as I noted earlier, is in the medical field. The earthquake damaged nine important hospitals in Bucharest alone, plus many other medical facilities and clinics outside the city. Critically important medical equipment—some of which originated in the United States—has been destroyed. The administration intends to use a sizable portion of the $20 million in grant aid for hospital and medical equipment, and commodities with a humanitarian purpose.

A second area of need relates to technical services and commodities required for the clearance of damaged buildings and the rehabilitation and reconstruction of housing, schools, and other community facilities.

Finally, I am hopeful that after the authorization for this appropriation is passed by Congress, the administration will fully consider other kinds of assistance to Romania which may be appropriate to help its people overcome the human and social and economic hardships produced by the earthquake. As Secretary Christopher noted in his letter:

The Department of State is reviewing the appropriatenes of low-interest credits to help finance Romanian purchases of United States equipment to repair or replace items damaged or destroyed by the earthquake.

If such assistance is provided, Mr. President, and requires additional legislation, I want the record to clearly show that I am prepared to support its enactment.

For now, however, it is important that we move ahead on the amendment we are offering today, to provide an immediate and urgently needed humanitarian contribution to the rehabilitation and reconstruction efforts underway to help the earthquake victims in Romania.

Again, Mr. President, the $20 million is subject to an authorization to be considered by the Foreign Relations Committee. It will not be expended now. It amends a provision in the Foreign Assistance Act that only relates to humanitarian needs, not to the general concept of economic construction. It is limited and targeted purely to humanitarian needs. I hope it will be accepted.

REFUGEE ASSISTANCE

Mr. President, on another matter, I would like to commend the action of the Appropriations Committee, and the leadership of the chairman of its Foreign Operations Subcommittee, Senator INOUYE, in supporting the supplemental requests for the migration and refugee assistance account. I believe the action of the committee was both wise and timely in fully funding these requests.

At a time when our country is making a fresh beginning under President Carter in support of our Nation's traditional concern for human rights and humanitarian affairs, I believe it is important that we act in support of these efforts. The response of the committee in providing increased financial support to the migration and refugee assistance account is further evidence to all that the United States is taking seriously its concern for the homeless and the needy.

I also want to commend the committee for its action in eliminating the narrow focus of the funding for refugees—for broadening the scope of the migration and refugee assistance account beyond refugees only from the Soviet Union and Eastern Europe. The elimination of this narrow wording is a step in the right direction—toward treating all refugees entering the United States equally.

Further study will be required, Mr. President, to work out a comprehensive refugee resettlement policy for the United States, and I pledge my best efforts to assure that the newly constituted Judiciary Subcommittee on Immigration, Refugees and International Law will undertake a thorough review this coming year of all U.S. policies and programs in behalf of refugees—especially those entering the United States.

Again, I support and commend the committee for its actions in behalf of refugees.

Mr. JAVITS. Will the Senator yield?

Mr. KENNEDY. I yield to the Senator from New York.

Mr. JAVITS. Mr. President, the Foreign Relations Committee on my motion reported out a resolution which was adopted expressing sympathy with the people of Romania in this crisis situation of the earthquake, which was very damaging. The letter of the State Department, which has been printed in the RECORD, indicates the size of this disaster.

Mr. President, the important point here is that it is humanitarian, that it will be authorized with particularity, and that, therefore, it does not represent any difference in the U.S. policy respecting East-West problems and East-West trade.

Though it is a fact Romania has qualified for most-favored-nation treatment, even under the provisions of the statutes which we have today, what I think is critically important is that the Foreign Relations Committee has acted

on the question of the U.S. general policy which is involved and supported by the Senate. The fact is that this will be specifically for humanitarian purposes and that it does not change U.S. policy in East-West matters.

But rather, it represents the constant policy of the United States that where there is a disaster which affects people, as was the case here, this rises above governments and government policy and deserves to be handled on its own by us, as this very fine initiative by Senator KENNEDY would represent.

Mr. President, it is very important for us that Romania, which has shown itself in many respects independent in its policy, may be encouraged in the feeling that thereby it is making friendly relations with the American people, especially important when they have been struck by such a serious blow as this earthquake disaster.

I, therefore, take great satisfaction in joining with Senator KENNEDY in this effort and hope very much that it may be considered acceptable by the managers of the bill.

The PRESIDING OFFICER (Mr. DECONCINI). The Senator from North Dakota.

Mr. YOUNG. Mr. President, I yield myself 5 minutes.

Here is a $20 million proposal with no budget estimate, no hearings, no committee consideration, no authorization, no advice or consultation with the chairman, Mr. MCCLELLAN, on this type of spending, no contact with the staff.

A memorandum delivered to the committee this morning states that "the executive branch favors this amendment" but OMB advises that the matter of a budget amendment has not been presented to the President and that no budget amendment has been or will be transmitted prior to floor consideration of the bill.

Furthermore, it is subject to a point of order.

I am sure Romania is one of the more friendly Communist countries. But it seems to me, when we throw around $20 million, give it in other parts of the world, that it should be given more consideration than this. At least, the committee should have been advised at least a half hour before it was taken up and given just a little time to consider it.

Mr. KENNEDY. Mr. President, I just want to make it clear that I had the opportunity of speaking with the chairman of the Foreign Operations Subcommittee 2 days ago about this particular matter. I agree with the Senator about the emergency aspects of this particular proposal. But I did have a chance to indicate that it was not enormously complex and it is not a precedent-shattering proposal, either.

Not long ago I was on the floor when there was just about a full Chamber and the distinguished Senator from Rhode Island (Mr. PASTORE) waved through $25 million in earthquake assistance, not even being subject to an authorization, and I heard no objection about that when it was being devoted to Northern Italy when it experienced an extraordinary disaster.

So this amendment is subject to an authorization. There will be a time it will go through the nearing process in that respect, as it should.

But I think this is an important symbol to the Romanian people who have suffered very dramatic personal hardship, that the people of the United States have some degree of sympathy for their plight.

Mr. LEAHY. Mr. President, on behalf of the subcommittee, I have discussed this matter with the ranking minority member of the subcommittee, the distinguished senior Senator from Pennsylvania.

We are aware of the question on authorization. We are aware of the fact that if we appropriate this money, there will still have to be the hearings in the normal authorization process.

But we agree with the distinguished Senator from Massachusetts and the distinguished Senator from New York on the reasoning for this appropriation.

I have reviewed the correspondence from the State Department and I am perfectly willing, as is the ranking minority member of the subcommittee, to accept the amendment.

Mr. YOUNG. Mr. President, I yield myself 3 minutes more.

Mr. President, there are billions of dollars in this bill now that are not authorized. It is far beyond $32 billion.

The national debt now is estimated to reach $802 billion this year. Just the interest on our national debt this year will be about $46.5 billion.

The reason we are going in that direction is the procedure we are following now. No committee consideration, no authorization, no warning before one amendment after another, running into billions of dollars.

It is a good cause, but I think $20 million without hearings is too much for it. I oppose it.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. HART). On whose time?

Mr. YOUNG. On my time.

Mr. MCCLELLAN. Mr. President, I ask unanimous consent that the quorum call not be charged to either side.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, it is in order, I believe, for me to amend my amendment.

The PRESIDING OFFICER. When the time on the amendment has expired or has been yielded back.

Mr. KENNEDY. I yield back the remander of my time.

Mr. MCCLELLAN. I yield back the remainder of my time.

Mr. KENNEDY. Mr. President, will the Senator from Arkansas yield me 2 minutes?

Mr. MCCLELLAN. I yield.

Mr. KENNEDY. Mr. President, is it appropriate to amend the amendment at this time?

The PRESIDING OFFICER. The Senator can now offer an amendment to the amendment.

Mr. KENNEDY. I substitute $10 million for the $20 million.

Mr. LEAHY. Do I understand the Senator to say that he is substituting $10 million for $20 million?

Mr. KENNEDY. Yes.

The PRESIDING OFFICER. The amendment is so modified.

Mr. MCCLELLAN. Mr. President, this amendment came as a little surprise. As the distinguished Senator from North Dakota pointed out, we did not have any notice of it until yesterday, and I was under the impression that the administration did not approve it. They had no budget for it or any request for it. Now that the amendment provides that the money will not be available for expenditure until authorized, I think that is adequate protection for everyone who may have some doubts about it.

In view of the letter that came in today or yesterday from the Acting Secretary of State, I see no objection to accepting this amendment, at least taking it to conference. In the meantime, the authorization committees can hold hearings and determine whether it should be authorized. No money would be expended until authorized, and I am prepared to accept the amendment, if the Senator from North Dakota will agree.

Mr. YOUNG. Mr. President, I am willing to accept the amendment.

Mr. MCCLELLAN. I yield back the remainder of my time.

Mr. DECONCINI. Mr. President, will the Senator yield me 2 minutes?

Mr. MCCLELLAN. I yield.

Mr. DECONCINI. Mr. President, I associate myself with Senator KENNEDY's amendment. I believe it is a fine compromise and a fine gesture. I thank the Senator for the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. JAVITS. Mr. President, I ask unanimous consent to have printed in the RECORD Senate Concurrent Resolution 12, relating to the earthquake disaster in Romania and expressing the sympathy of the United States, and the determination that we shall do all possible to assist the people of Romania in this disaster.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

S. CON. RES. 12

Whereas Romania has suffered a disastrous earthquake which resulted in a significant loss of life, much human suffering, enormous physical destruction, and major economic disruption; and

Whereas it is in the tradition of the United States to provide humanitarian assistance to the victims of such disasters; Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the United States should do all that is possible to assist the people of Romania in their hour of need

following the terrible natural disaster which has just afflicted them; and should join with other nations and international organizations and with public and private organizations for that purpose; and that the people of the United States express their deepest sympathy to the victims and to their bereaved families.

Mr. JAVITS. Mr. President, will the Senator yield me 2 minutes on the bill?

Mr. McCLELLAN. I yield.

Mr. JAVITS. Mr. President, there are two items with respect to the bill to which I desire to call the attention of the Senate.

One is a provision of $2 million for the parks system to proceed with acquisitions in respect of the Fire Island National Seashore. This is a critically important recreation facility, almost literally in the very heart of the New York City area. It is a remarkable idea to thread together many very important watering areas for wild fowl and recreation.

I am deeply indebted to the Senator from West Virginia (Mr. ROBERT C. BYRD) for helping us include this provision in the bill. It is extremely helpful and extremely useful to that area of the country and generally to our situation.

The second item I would like to offer is my support for the Senate committee recommendations on the fiscal year 1977 general supplemental appropriations bill. I believe the Senate committee has responded effectively to the overall funding needs for which these proposed supplemental appropriations are intended, and I shall vote to approve their recommendations. The total of $32.1 billion in new budget authority, and additional funds available through interaccount transfers, recommended by the Senate committee reflect necessary funding to maintain and improve a wide range of Federal programs and services.

I note with particular interest the levels recommended for programs and activities in labor, health, education, and welfare. In these areas, the Senate committee provides $5.9 billion, or funding of $950 million above the President's supplemental request, and $100 million above the House recommendations. These proposed levels reflect a continuing and necessary commitment to Federal efforts to provide direct benefits to all our Nation's people.

In health, for example, the Senate committee recommendations include fiscal year 1977 regular appropriations for health manpower programs, and important increases over the House in programs to fund alcoholism grants throughout the States, as well as allied health and public health programs. In education, the Senate committee proposes increases above the House for innovative programs to assist school district desegregation under new provisions of the Emergency School Aid Act, as well as in several programs providing student and institutional assistance in higher education, including restoring recommended 1977 appropriations for the national direct student loan program to their full 1976 level of $321 million. Important increases above the House are also recommended for programs to assist our Nation's college and university libraries, and to improve activities in educational guidance, counseling, and testing.

I am also pleased to note that the Senate committee has recommended a total of $282.5 million to help low-income families respond effectively to their basic energy needs under programs administered through the Community Services Administration.

In short, the Senate committee has developed recommendations that reflect effective funding levels for a number of programs designed to provide social benefits for our Nation's people. I commend the members of the committee for their efforts, and urge their continued consideration in these vital areas.

UP AMENDMENT NO. 142

Mr. McCLELLAN. Mr. President, if no one else has an amendment, I call up my amendment which is at the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Arkansas (Mr. McCLELLAN) proposes an unprinted amendment numbered 142:

On page 104, strike out lines 11 through 17.

Mr. McCLELLAN. Mr. President, this section on page 104 of the bill was adopted on the House floor, and it reads:

None of the funds appropriated or otherwise made available in this Act shall be obligated or expended for the termination or deferral of any project, activity or weapons system approved by Congress, except specific projects, activities, or weapons systems for which, and to the extent, budget authority has been rescinded or deferred as provided by law.

Mr. President, the administration is very much opposed to that language. I am offering this amendment to strike it, so that the matter can go to conference and we can give further study to it.

I have a letter from the Director of OMB, dated March 23, and I will read the pertinent paragraph:

In effect, the provision would modify the Impoundment Control Act of 1974 by preventing use of funds in the bill to take any action to defer or stop projects or activities approved by the Congress. Since the Supplemental Bill provides funds to cover pay raises for virtually all Federal civilian and military personnel, the total salaries of nearly all personnel are affected. The amendment would have the effect of prohibiting all personnel receiving any salary payment under the Supplemental Bill from taking any action—even to place a call—to withhold or delay use of any Congressionally approved funds. For example, a routine deferral of any project, made to await the results of a study to determine the most desirable use of funds, would be prohibited. The majority of deferrals have not been overturned presumably because the Congress recognizes that they represent normal or desirable management of funds.

That is the issue. I feel that the matter should have some study and discussion. Therefore, I propose to strike it, so that we can debate it in conference and try to resolve it.

Mr. President, I ask unanimous consent to have printed in the RECORD the letter from the Director of OMB.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

EXECUTIVE OFFICE OF THE PRESIDENT, OFFICE OF MANAGEMENT AND BUDGET,
Washington, D.C., March 23, 1977.

Hon. JOHN L. McCLELLAN,
Chairman, Committee on Appropriations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: As you know, your Committee will be considering the 1977 Supplemental Appropriations Bill (H.R. 4877) during this week. I want to express my opposition to section 304 of the bill as approved by the House. This provision is as follows: "None of the funds appropriated or otherwise made available in this Act shall be obligated or expended for the termination or deferral of any project, activity or weapons system approved by Congress, except specific projects, activities, or weapons systems for which, and to the extent, budget authority has been rescinded or deferred as provided by law."

In effect, the provision would modify the Impoundment Control Act of 1974 by preventing use of funds in the bill to take any action to defer or stop projects or activities approved by the Congress. Since the Supplemental Bill provides funds to cover pay raises for virtually all Federal civilian and military personnel, the total salaries of nearly all personnel are affected. The amendment would have the effect of prohibiting all personnel receiving any salary payment under the Supplemental Bill from taking any action—even to place a call—to withhold or delay use of any Congressionally approved funds. For example, a routine deferral of any project, made to await the results of a study to determine the most desirable use of funds, would be prohibited. The majority of deferrals have not been overturned presumably because the Congress recognizes that they represent normal or desirable management of funds.

The provision is likely to raise substantial questions of interpretation as to whether an action constitutes termination or deferral of a project or activity approved by Congress. The determination of what activities or projects have been "approved by Congress" is clear only when amounts for such activities or projects are specifically designated in appropriations language.

In summary, I believe the Senate should not include this provision in an approved supplemental bill because of the difficulties it would create.

Sincerely yours,

BERT LANCE,
Director.

The PRESIDING OFFICER. Is all time on the amendment yielded back?

Mr. McCLELLAN. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Arkansas.

The amendment was agreed to.

ADDITIONAL STATEMENTS SUBMITTED ON H.R. 4877

SCHOOLS AT FORT RILEY

Mr. DOLE. Mr. President, I have prepared an amendment to provide an additional appropriation of $12.5 million for the construction of urgently needed schools at Fort Riley, Kans. After discussing this matter with the Senator from Massachusetts, I believe we can

take care of it with a colloquy to follow my explanation of the problem.

LACK OF FUNDS

The problem is very simple. In the last few years, the Army has spent $27.3 million to construct 1,101 new family housing units at Fort Riley. This will eventually add more than 1,700 children to the student population there. The result is a severe shortage of school facilities.

The soldiers at Fort Riley who may have children of school age cannot understand why we spend over $27 million to build new housing units and not a single penny to build additional school facilities or even to expand the existing schools.

The present school facilities at Fort Riley have a capacity of 2,275 students. The student population at Fort Riley is presently 2,937. This figure will increase to about 3,994 as the additional housing units are completed and filled.

This problem has arisen because getting the funds appropriated has apparently "fallen through the cracks." The Army has the jurisdiction over constructing the housing units. HEW has jurisdiction over construction of the school facilities. The Army has built 1,100 housing units. HEW has not requested a single penny for school facilities. It looks like a matter of the left hand not being coordinated with what the right hand is doing.

In order to build adequate schools, the school district superintendent has advised me an appropriation of $12.5 million is needed.

SCHOOL IN WORLD WAR II BARRACKS

Mr. President, as a result of the lack of funding, we now have 140 children going to school in World War II-era barracks. I am appalled that we have to send the sons and daughters of our military families to school in World War II barracks. And the number is going to increase unless we provide some supplemental appropriation.

The Army has provided the World War II barracks as a temporary facility. As I understand, this is the best that can be done since the Army is specifically barred from using Defense appropriations for school construction.

Needless to say, there are many problems resulting from this situation. There are no special education facilities. There is no auditorium. The playground facilities are minimal, and that is significant since grades 1 through 6 are being taught in these facilities.

The lack of better facilities has required that more than an optimum number of students are placed in each class. As I understand, about 30 children are being placed in each class. Classes cannot be held on the second floor of these buildings because of the danger of fire. Due to poor insulation, these buildings are very expensive to heat, which uses up funds that could be better spent in providing a better education.

There is no cafeteria. Food must be prepared in a kitchen some place else and transported to the facilities.

The alternative to the temporary solution of using World War II barracks would be double sessions. Double sessions would require half of the students going to school from 7 a.m. to 1 p.m. and the other half from 1:30 p.m. to 7:30 p.m. I believe this is totally unacceptable for children in grades 1 through 6.

In addition to those classes being held in World War II barracks 232 children of grades kindergarten through 6 are being bused into schools in Junction City. These students are being assigned to schools on a space-available basis, which means they are rotated from one school to another on a year-to-year basis. Again, the lack of stability in the school environment adds to the difficulty of getting a good education.

At the junior high school level, the school at Fort Riley, which was constructed for about 400 students, is being attended by 563 students. Due to the crowded conditions, there is no library and no special education facilities. Three temporary buildings have been constructed to accommodate additional students.

EFFECT ON MILITARY PERSONNEL

Mr. President, this situation is intolerable. The students we are talking about are dependents of professional military people. These career soldiers are the core of the Army. I believe that those who stand foremost in defense of our Nation are reasonably entitled to expect an education for their children at least equal to that provided elsewhere in public facilities.

The shortage of school facilities at Fort Riley did not occur suddenly. As I, understand, HEW inspected the existing schools in May 1975, and found numerous deficiencies. However, there has been no appropriation to expand or modernize the existing facilities or to build new facilities. It is puzzling to me that HEW has not seen fit to give a high enough priority on this problem to request an appropriation. Instead, the Department of HEW is apparently willing to have first-grade through sixth-grade level children going to class in World War II-era barracks.

OTHER INSTALLATIONS

Mr. President, when I inquired into this matter I learned that a number of other installations are having a similar problem. Consequently, I prepared a letter to the subcommittee on new appropriations which I have circulated to Senators from the respective States where those installations are located. This letter has been signed by Senators THURMOND, FORD, and HUDDLESTON. I ask that this letter and attached chart be inserted in the RECORD.

Again, I would just stress that this is a very urgent matter. If we could appropriate the funds today, and start building the schools today, it would not be too soon. For, it takes some time to build a school and we already have young students in an unacceptable classroom situation.

Many people including the commanding general at Fort Riley, the superintendent of the school district, and others in the community have contacted me to advise of the seriousness of this matter.

There are a number of other school districts that are affected by the shortage of school facilities at military installations. I ask unanimous consent that a list of the civilian superintendents and their respective school districts be inserted in the RECORD.

I, also have a brief summary of the conditions existing at the seven most severely affected installations in the Department of the Army. I ask unanimous consent that this summary be inserted in the RECORD.

As indicated in the summary, there are 4,015 students presently attending schools in temporary buildings, most of which are World War II-era barracks that are totally inadequate to serve as modern school facilities. Mr. President, there has also been a great deal of correspondence back and forth between the Department of Army and the Department of HEW. This correspondence may be instructive as to how we have come to this position of lacking school facilities. I ask unanimous consent that it be inserted in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., February 28, 1977.

Hon. WARREN G. MAGNUSON,
Chairman, Labor-HEW Appropriations Subcommittee, Washington, D.C.

DEAR MR. CHAIRMAN: We would like to ask your assistance in solving a critical shortage of school facilities for thousands of children of military families in our states.

It appears the problem has arisen because getting funds appropriated has "fallen through the cracks". At the seven most severely affected installations, the Army has spent over $128 million building about 5,000 new on-post family housing units in the last ten years. But the Army is specifically barred from spending DOD funds for school facilities—that authority falling under HEW (Section 10, Public Law 81-815).

During the construction of these new housing units, no funds whatsoever have been provided at five of the seven posts for building schools to accommodate the children of families moving in. As a result, there are now several thousand Army children being educated in over-crowded classrooms and often in previously abandoned buildings, mess halls, hospitals, churches, or whatever type of makeshift facility can be obtained. As housing units are filled, the number of students without a proper school building will exceed 7,000. Plans are being developed for double sessions which will further aggravate education problems with early morning and late evening school hours. The attached chart shows specific details of the problem at Forts Riley, Stewart, Bragg, Buchanan, Campbell, Jackson, and Leonard Wood.

We are especially concerned about the lack of schools for these dependents because it will cause the greatest detriment for those military professionals who make up the core of our armed services. It seems to us that those who stand foremost in defense of our nation are reasonably entitled to expect an education for their children at least equal to that provided elsewhere in public facilities. At a time when we are concerned about

inadequate military manpower, it seems especially inappropriate to deprive the career families of their basic needs.

As a first step, we believe there should be an immediate supplemental appropriation of $67 million to solve the most critical problems under Section 10, P.L. 81-815 at the above-named seven installations. Secondly, there should be on-going appropriations to meet other school facility requirements for military dependents. It appears that since spending authority already exists, comprehensive hearings in the Labor-HEW Appropriations Subcommittee should be held to better determine what our long-range requirements are for the construction of schools on military bases. The Army Chief of Staff has indicated a projected school shortage for over 15,000 students by 1980. We understand that extensive remodeling is needed at a great many on-post schools to bring them up to existing state and federal education standards.

We ask your help in appropriating funds on a first priority basis for the seven installations where dependent children are presently without school facilities.

Sincerely yours,

BOB DOLE,
U.S. Senate.
STROM THURMOND,
U.S. Senate.
WENDELL FORD,
U.S. Senate.
WALTER HUDDLESTON.
U.S. Senate.

SUMMARY OF CRITICAL ON-BASE SCHOOL CONSTRUCTION NEEDS AT ARMY INSTALLATIONS IN THE UNITED STATES

Army installation	Fiscal years 1967 through 1976: On-post family housing units approved	Funds approved for construction of such housing	Pupils after completion of additional family housing	Capacity of on-base school facilities	Unhoused pupils after completion of additional family housing	Funds needed for school construction on-base (millions)
Fort Riley, Kans.	1,101	$27,305,500	3,994	2,275	1,719	$12.5
Fort Stewart, Ga.	1,150	35,348,700	1,726	722	1,004	2.5
Fort Bragg, N.C.	786	18,517,000	5,017	3,619	1,398	20.0
Fort Buchanan, P.R.	0	0	1,913	1,140	773	6.7
Fort Campbell, Ky. and Tenn.	1,300	36,491,700	4,692	3,580	1,112	10.0
Fort Jackson, S.C.	540	11,190,000	1,150	700	450	2.5
Fort Leonard Wood, Mo.	0	0	3,010	2,397	613	10.8
Total	4,877	128,852,900	21,502	14,433	7,069	65.0

SUMMARY OF CONDITIONS AT INSTALLATIONS WITH GREATEST NEED FOR SCHOOLS

1. Fort Bragg, NC. Currently there is an actual shortage of 1,622 student spaces. Presently there are 827 students in Army wooden hospital type buildings, with a burn time of 8 minutes or less. They will probably be on double session by September 1977. Application (USOE) 1972 and 1976—no action.

2. Fort Buchanan, PR. Presently there are 650 students housed in termite infested WW II type buildings, Application was submitted (USOE) 1966—never funded—will have to be closed for safety reasons by 1987.

3. Fort Campbell, KY. There is a shortage of 1,112 student spaces. There are 912 students scheduled to attend classes in Army wooden hospital barracks facilities. They will be on double sessions by 1978. Application (USOE) for new high school submitted 1974.

4. Fort Leonard Wood, MO. Space shortage 613. Students are now housed in temporary facilities, the current ones are very much in need of repair and a new middle school is needed immediately. Application (USOE) submitted July 1872.

5. Fort Jackson, SC. There are 450 kindergartners and 6th graders attending class in WWII hospital-chapel complex with burn time of 6 minutes or less. Application for new elementary school submitted 1974. No action.

6. Fort Riley, KS. There is a shortage of 1,179 adequate student spaces at Fort Riley. Presently there are 141 students attending classes in Army barracks (7) and mess hall (1) and a supply building. A new middle school is urgently needed now. Extensive renovation is needed on current buildings. Application school construction (USOE) July 1973—no action.

7. Fort Stewart, GA. Shortage of 787 spaces. Presently 422 students attending classes in temporary wooden building. Double sessions by September 1977. Application (USOE) new elementary school submitted July 1976.

Total shortages: 6,953.

Total students presently in temporary buildings: 4,015.

ADDRESSES FOR ARMY-OPERATED SCHOOLS IN THE CONTINENTAL UNITED STATES

Fort Bragg, Dr. Haywood Davis, Superintendent, XVIII Airborne Corps and Fort Bragg, Fort Bragg, N.C. 28307, 919-396-3934.

Fort Buchanan, C. Robert Englbrtson, Superintendent, Antillies Consolidated Schools, District 809-783-2424, Fort Buchanan, Puerto Rico 00934.

Fort Campbell, Dr. Leon R. Sitter, Superintendent, 101st Airborne Division (Air Assault) and Fort Campbell, Fort Campbell, Ky. 42223, 502-729-2550.

Fort Jackson, Dr. Thomas Silvester, Superintendent, United States Army Training Center, Infantry, Fort Jackson, S.C. 29207, 803-782-2720.

Fort Leondard Wood, Mr. Lavaga Claiborn, Superintendent of School District R-6, Waynsville, Mo. 65583, 314-774-6121.

Fort Riley, Harold Deever, Superintendent of Geary County Unified District 475, Junction City, Kans. 66441, 913-238-6184.

Fort Stewart, Mr. John N. Wall, Superintendent, Headquarters, Fort Stewart, Fort Stewart, Ga. 31313, 912-876-6094.

DEPUTY SECRETARY OF DEFENSE,
Washington, D.C., October 8, 1974.

Hon. CASPAR W. WEINBERGER,
Secretary of Health, Education, and Welfare, Washington, D.C.

DEAR MR. SECRETARY: I am writing to solicit your assistance in the solution of a critical dependent education and morale problem for our service families residing on Government installations in the United States.

Due to inadequate funding levels under Public Law 81-815 since 1967, and the increased numbers of school age dependent children residing on DOD installations in CONUS, student space has become critically deficient. The purpose of Public Law 81-815, as you know, is to provide Federal financial assistance for the construction of school facilities for children affected by Federal activities. The absence of such funding, particularly for Section 10 of the Act, is impacting adversely on the morale of our service members and is depriving student dependents assigned to installations of adequate education opportunities due to inadequate and antiquated facilities.

This situation will continue to worsen if we do not take action immediately to obtain some Fiscal Year 1975 funding relief and to begin now to plan for obtaining Congressional support for subsequent Fiscal Years funding.

I solicit your support in solving this problem and stand ready with my staff to render any assistance you may need.

Sincerely,

BILL CLEMENTS.

THE SECRETARY OF HEALTH, EDUCATION, AND WELFARE,
Washington, D.C., December 2, 1974.

Hon. WILLIAM CLEMENTS,
The Deputy Secretary of Defense, Washington, D.C.

DEAR BILL: Thank you for your letter of October 8 concerning difficulties experienced by service families due to the low funding of Public Law 81-815 during the past seven years. Please accept my apology for the delay in responding.

We are aware of the serious problems affecting some military schools which have eligible but unfunded applications under P.L. 815; however, as you are aware, both the Public Law 815 construction program and the Public Law 874 school maintenance and operation program carry a relatively low priority with the Administration.

It would seem probable that the only relief which might be anticipated in this area would be through establishment of higher priorities for the Section 10 program. We are reluctant to encourage full Federal funding of on-base installations if it tends to move us away from State and local assumption of the administration of education programs for on-base children.

However, it would undoubtedly be of assistance for the Office of Education, in cooperation with the Department of Defense, our Office of Facilities Engineering and Property Management, and appropriate State and local education agency representatives, to make an up-to-date analysis of school construction needs on Government installations. This would give us a sound basis for any decisions relative to a policy change in the facilities program.

Under the circumstances, I cannot be too encouraging concerning any immediate changes in the situation; however, I can fully appreciate the seriousness of your concerns and will be happy to meet with you or arrange meetings of our staff to discuss the matter further.

Sincerely,

CAP,
Secretary.

THE DEPUTY SECRETARY OF DEFENSE,
Washington, D.C., Feburary 27, 1975.

Hon. CASPAR W. WEINBERGER,
Secretary of Health, Education, and Welfare, Washington, D.C.

DEAR CAP:

I appreciated receiving your 2 December 1974 response to my letter concerning the impact that the insufficient funding level of Section 10, Public Law 81-815 is having on our base schools.

With your recommendations at hand, I asked Bo Callaway to represent the Department of Defense by having members of his staff meet with your Commissioner of Education to discuss this mutual problem. They did so on 16 December 1974. From this meeting has come the inclosed package of the most critical construction needs as they now see them.

Cap, I want to assure you that we in Defense agree completely with HEW's desire to place the onus for support of these schools on the state and local communities. The only caveat we would place on our support of your position on this question is that we must have assurance that there would be no degradation in the overall educational product provided to our youngsters. It is in attempting to achieve our mutually desired end that we run into the horns of the dilemma on which Defense now finds itself. Our dilemma is that we cannot use Defense appropriations to build or renovate installation schools nor can we get sufficient Section 10 funds to bring the schools up to the standard required by local communities as a prerequisite to acceptance.

As you see from the Inclosure, our needs are immediate and, although I agree with you in principle that a joint, in-depth analysis into the problem is the logical approach, I do not think it is the most prudent one if we are concerned with the immediate welfare of the children. I say this for I feel the analysis may provide a long-term solution but will not assist in solving the present critical problem at the six Department of Defense installations.

I am confident in my own mind that it is not the intent of the administration to deny the children of our volunteer military force an opportunity for an adequate education. I, therefore, solicit your assistance in raising the priority of these children within the overall HEW perspective through a request for additional or reprogrammed funds in FY 75 and 76. I stand ready to assist you in every way in this immediate endeavor and will provide whatever DOD help is required when you are prepared to begin your in-depth, long-range analysis.

Sincerely,

BILL CLEMENTS.

THE SECRETARY OF HEALTH, EDUCATION, AND WELFARE,
Washington, D.C., June 6, 1975.

Hon. WILLIAM CLEMENTS,
The Deputy Secretary of Defense,
Washington, D.C.

DEAR BILL: Thank you for your response of February 28 to my letter of December 2 concerning the schoolhousing condtions existing at several Federal installations. Please accept my apology for the undue delay in responding.

I, too, share your concern for the educational welfare of children of personnel in the Uniformed Services. Consequently, I have asked Office of the Secretary and Office of Education personnel to review the alternatives available to alleviate critical situations existing at military installations where school facilities are provided under Section 10 of P.L. 815 and address the problems which will be appearing further down the road. The following actions, therefore, are being taken:

(1) Dr. Theodore H. Bell, the Commissioner of Education, has been requested to restructure the priority determinations under Section 10 of P.L. 815 to give higher priority to construction of facilities for unhoused children. This will be done by issuing revised Federal Regulations concerning the determination of priorities as soon as possible.

(2) Action will be taken to reprogram funds requested to be appropriated in Fiscal Year 1976 in order to permit $3 million to be utilized for Section 10 school facilities.

(3) The Office of Education will utilize these funds to meet emergency repair requirements, if any, and to provide relocatable and/or preengineered school facilities in order to alleviate the most critical overcrowded conditions at military installations, such as Fort Bragg. Relocatable facilities have proven in the public education sector to be valuable and worthy means of coping with rapid growth and changing pupil populations.

(4) The Department also will seek means of reprogramming additional funds for the above purpose or requesting supplemental funds in Fiscal Year 1976 for the purpose of providing school facilities for dependents of military personnel.

As you probably already know, the Commissioner initiated in April of 1974 an in-depth analysis of all school facilities located on military installations constructed under Section 10 of P.L. 815, which are under the cognizance of the Commissioner. Two installations, identified by you as critical have been visited thus far—Fort Bragg and Fort Riley. School facilities at Fort Jackson and Fort Campbell will be evaluated prior to July 1. While I do not expect a full report relative to the in-depth analysis prior to January 1977, I do believe that interim reports will provide sufficient guidance for policy decisions relative to the Fiscal Year 1977 budget.

With respect to this latter effort, it is requested that you authorize the services of Base Engineering Personnel to cooperate fully with the Director, Office of Facilities Engineering and Property Management (OFEPM), DHEW, in developing the necessary data (e.g., school facility analyses and cost estimates) which must be obtained for school facilities at each Federal installation to be involved in the study. Such services should be available to the Director, OFEPM, upon request, for such time or times as may be necessary during the conduct of this study. Appropriate notification to military commanders of your decision and direction concerning this request will be helpful in moving the study forward.

Would you please advise Commissioner Bell of your concurrence with this request. Mr. William Stormer will serve as his principal representative on this matter, and his telephone number is 245–8427.

Sincerely,

CAP,
Secretary.

THE DEPUTY SECRETARY OF DEFENSE,
Washington, D.C., February 9, 1976.

Hon. T. H. BELL,
U.S. Commissioner of Education, Department of Health, Education, and Welfare, Office of Education, Washington, D.C.

DEAR MR. BELL: Thank you for your letter of January 9, 1976, concerning recent developments in Impact Aid legislation and appropriations for the construction of on-base school facilities.

Although the appropriation of $10 million for PL 81–815 proposed in the 1977 fiscal year is disappointingly low, it is encouraging that the Section 10 portion of the total has noticeably increased.

Your past efforts and continuing interest in this matter are sincerely appreciated.

Sincerely,

W. P. CLEMENTS, Jr.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE,
Washington, D.C., January 9, 1976.

Hon. WILLIAM P. CLEMENTS,
The Deputy Secretary of Defense,
Washington, D.C.

DEAR MR. CLEMENTS: Earlier in the year, we discussed the possibility of increasing the contribution made by the Impact Aid appropriation to on-base school facilities construction (Section 10 of P.L. 81–815). At that time we agreed to shift our priorities so as to allow construction of facilities for unhoused children as well as seek an increase in the appropriation.

While we have requested appropriation language to enable us to change program priorities, OMB has disallowed our requested increase in this account for Fiscal Year 1977, allowing us a total of $10 million for all P.L. 81–815 purposes. Of this total we expect to use $3 million for Section 10. Although this is an amount less than the $5 million (out of a total appropriation of $20 million) allowed for Fiscal Year 1976, it nevertheless represents a significant increase in the proportionate amount allotted Section 10 in recent years. Unfortunately, given other programmatic requirements and the OMB allowance, we will be unable to honor our previous agreement to seek a further increase in this badly needed item during Fiscal Year 1977.

Needless to say, I regret the situation and wish that we had some other option.

Sincerely,

T. H. BELL,
U. S. Commissioner of Education.

SECRETARY OF THE ARMY,
Washington, D.C., February 14, 1977.

Hon. EDWARD AGUIRRE,
U.S. Commissioner of Education, U.S. Office of Education, Department of Health, Education, and Welfare, Washington, D.C.

DEAR MR. AGUIRRE: There is a critical need for additional school facilities for dependents of Army personnel stationed at several locations in the United States and in Puerto Rico. On 16 September and again on 4 November 1976 the Adjutant General wrote to the Honorable Dr. William Pierce, the Acting Commissioner, concerning the acuteness of this problem at Fort Campbell, Kentucky, and elsewhere.

The Adjutant General's letters to Dr. Pierce pointed out that the situation we face has resulted from four factors: the present school buildings were built in the early years of the PL 81–815 program and are now educationally obsolete; the development in recent years of modern fire codes, and other changes in law such as that for handicapped accessibility; increased numbers of on-post children as a result of increased on-post family housing; and the lack of adequate funding for PL 81–815 in recent years.

I am aware that your office is conducting an in-depth survey in order to ascertain the full cost of correcting all known deficiencies of all the schools on federal property for which you are responsible. Although your survey will not be completed before next spring, from our perspective it has already confirmed the fact that there are a number of installations on which there are extremely critical facilities needs now. Our own survey, which has been completed, has verified Forts Bragg, Buchanan, Campbell, Jackson, Riley, Stewart, and Leonard Wood as requiring immediate attention. It is suggested that supplemental FY 1977 funding be sought to solve these needs on an emergency basis. We estimate that approximately $70M are required. The balance of the requirements could be submitted for FY 1978 funding consideration.

The budgetary constraints under which you must operate are fully understood, and I have been informed that increased PL 81–815 funding has been denied due to a higher priority being assigned other Office of Education program needs. I feel that classroom space, which the Federal Government is responsible for providing, should receive a high priority. Immediate action should be taken so that our military children will not have to attend schools in overcrowded classrooms, abandoned makeshift wooden troop barracks, or eventually double sessions.

I stand ready to assist you in any way to obtain adequate school facilities for our children.

Sincerely,

MARTIN R. HOFFMANN.

THE SECRETARY OF HEALTH,
EDUCATION, AND WELFARE,
Washington, D.C., March 16, 1977.

Hon. CLIFFORD ALEXANDER,
Secretary of the Army,
Washington, D.C.

DEAR MR. SECRETARY: I am responding to a letter I received from the former Secretary of the Army, Martin Hoffmann, concerning the need for immediate funding to undertake school construction projects that would correct deficiencies in school facility needs on certain specified military installations. He urged that action be taken now, as opposed to delaying the consideration of funding until the results are known of a complete study of the needs on all government installations for which the Commissioner of Education has responsibility under the provision of Section 10 of Public Law 81-815.

When this in-depth survey was undertaken, it was believed that my office could expect to receive a complete report on it by January 1, 1977. That report is expected to show the scope of construction needs as developed by the survey and an estimated amount of funds, based on preliminary engineering analysis, that will be needed to accomplish them. However, limitations imposed on those conducting the study by other work requirements, as well as the size of the undertaking itself, have delayed its completion. I expect to receive the final report by May 15. We cannot consider funding until the survey is completed.

I do expect to receive a very abbreviated version of the report containing projected estimates of our potential involvement within the next four weeks. This should permit me to consider the funding problems further.

Existing regulations require that all applications filed under the Public Law 81-815 school construction program must be ranked in an order of relative priority with respect to all other applications. Further, applications under Section 10 of that Act must be grouped into four subclassifications and funded in that order. This being the case, we could not guarantee that any specific situation could receive immediate assistance, even if funds were available. Action would depend on the priority status of the individual project in its relationship to all projects.

In my judgment, therefore, we will be better advised to wait until the findings of the in-depth survey are known, rather than to make an appeal for funds to accommodate selected installations at this time. Indeed, we may find that the applications of such selected installations are outranked by others which may not be on the list cited in Mr. Hoffmann's letter.

In sum, while we regret the inconvenience that some military children are experiencing, we request you to bear with us a little longer until the entire scope of the problem is known.

Sincerely,

JOSEPH A. CALIFANO, Jr.

Mr. DOLE. Mr. President, the Senator from Kansas wishes to address a question to the junior Senator from Massachusetts. In the committee report on the supplemental appropriations bill, the following instructions were stated:

> The committee, therefore, directs the Office of Education to complete and submit to Congress by May 1, 1977 its on-going study of this problem. The committee can then properly assess the priorities and funding requirements in a future appropriations bill.

We are very pleased to see the committee direct that the study be completed by May 1. The funding for the schools at Fort Riley and other installations have been awaiting the completion of this study. It was originally due to be completed on January 1, 1977, but has been repeatedly postponed. Apparently, the priority given to this study by HEW is not too high and hopefully this will stimulate some greater effort.

The Senator from Kansas is wondering, after the study is completed on May 1, will the Labor-HEW Appropriation Subcommittee then be able to provide funding for these urgently needed schools in the second supplemental appropriation bill, if there is one, or in the first appropriation bill where this will be germane?

As I indicated, the lack of school facilities and the overcrowding problem is severe. If we started building the schools today, it would be some time before we could get the grade school children out of World War II barracks. It seems to me that we should make every effort to move quickly on an initial level of appropriations. Can the Senator from Massachusetts comment on this matter?

Mr. BROOKE. Mr. President, the Subcommittee on Labor-HEW Appropriations shares the concern of the Senator from Kansas (Mr. DOLE) about the urgent need for school facilities at Fort Riley and other installations. The Senator from South Carolina (Mr. HOLLINGS), the Senator from Missouri (Mr. EAGLETON), and the Senator from Kentucky (Mr. HUDDLESTON) are all on the Appropriations Committee and I believe they have similar situations at installations in their respective States. It is our intention on the subcommittee to assess the study and then to consider the need for additional funding. In the absence of a second supplemental appropriation, we could take up this matter for funding in the regular appropriation bill for fiscal year 1978.

Mr. DOLE. Mr. President, it appears that in the case of Fort Riley, the information upon which the study is being based may be somewhat out of date. We have contacted the school superintendent of that district and the other persons at the installation directly in charge of the on-post schools. As I understand the last HEW inspection was in May 1975. Since the original problem with the lack of school facilities apparently developed because of a bureaucratic slipup between the Department of Army and the Department of HEW, the Senator from Kansas is wondering if there would be any merit in hearing directly from those persons involved in each installation. Does the Senator from Massachusetts (Mr. BROOKE) feel it would be possible to hold hearings or to allow the civilian school superintendents for each district to present their views in writing on the need for additional facilities?

Mr. BROOKE. Mr. President, although we have already completed our hearings for the regular appropriation bill, we would be happy to hear from the school superintendents for each district at the most severely affected installations. That would allow us to hear directly from the grassroots as to how severe the school facility problem is at each installation.

Mr. DOLE. Mr. President, I thank the Senator from Massachusetts. It is my hope that we can provide some funding at the earliest possible date so as to alleviate the severe lack of school facilities.

NATIONAL TRANSPORTATION POLICY STUDY COMMISSION

Mr. WILLIAMS. Mr. President, I rise today to speak in favor of continued adequate funding for the National Transportation Policy Study Commission. The Appropriations Committee has recommended a $1 million supplemental for this Commission and I strongly urge my colleagues to support it.

The National Transportation Policy Study Commission has a broad legislative mandate to make recommendations to Congress and the President on a transportation policy to meet the needs of the Nation through the year 2000. Frankly, I am delighted that Congress had the foresight last year to establish such a Commission to look at our entire transportation network.

Yesterday, Mr. President, the Commission held its monthly meeting here in Washington and I am glad to report that it is making considerable progress in formulating its basic theoretical and conceptual approach for attacking the policy issues ahead. It was particularly heartening to note that the Commission is striving to maintain a close liaison with both the executive branch and the Congress. In fact, the Commission is attempting to structure its study to coincide with the congressional timetable for upcoming legislation.

Mr. President, last year Congress worked its will by authorizing this vital Commission. It would be irresponsible not to provide an adequate appropriation to allow the Commission to carry out its congressional mandate. Therefore, I urge the Senate to support the Appropriations Committee's recommendation of $1 million for the National Transportation Policy Study Commission.

Mr. BROOKE. Mr. President, I am glad to recommend the Labor-HEW chapter—chapter VII—of the fiscal year 1977 supplemental appropriations bill.

Our chapter totals $5,931,601,000, or $953,390,000 more than the budget request and $106,670,000 above the House level.

The Labor-HEW chapter covers a wide spectrum of items, a number of which lacked authorization at the time we considered the regular fiscal year 1977 Labor-HEW bill and could not be funded. This included, in particular, a number of items in the health area, occupational and vocational education, and higher education.

Let me enumerate some of the highlights section by section:

LABOR

We have provided more than $23 million for Department of Labor items. These include funds to provide for more staff for special investigations under the pension program and for handling, among other matters, the increase in age discrimination complaints. Additional funds are provided for mandatory higher benefit costs under the Federal Employees Compensation Act.

HEALTH

Under health, we go along with the House allowances of $3 million for home health services; $25.3 million for the National Health Service Corps and $40.1 million to continue the work of establishing a nationwide network of self-supporting regional emergency medical services. In another part of the bill we provide $6 million for training people for work in the emergency medical services field.

Our bill provides $12 million to step up the effort against venereal disease and to expand the program to immunize children for measles, rubella, polio, mumps, diphtheria and pertussis. We also provide funds for educational resource centers to train people in occupational medicine, nursing, toxicology, industrial hygiene and safety.

The bill provides an increase of $6.2 million over the House allowance for the National Institute of Arthritis, Metabolism and Digestive Diseases to assist a number of research programs which received no additional funding in the fiscal year 1977 Labor-HEW bill because of a special emphasis on diabetes research.

For alcoholism, we have increased funding for project grants and grants to the States by $17.9 million over the House. We continue to be concerned about problem drinking, particularly among teenagers and women. The additional funds in the bill will help to reach these groups and to maintain grants to the States at their 1976 level.

For health professions our committee provided $101.1 million for capitation grants for medical, osteopathic, and dental—MOD—schools, the same level as the House. There was a tentative decision in subcommittee to reduce MOD capitation grants by $9.1 million in favor of more emphasis on scholarships. From the start I opposed the effort to cut capitation and am glad that the full committee agreed with my amendment to restore the House level. The committee vote was 12 to 4. The capitation grants presently benefit some 82,000 students attending MOD schools, stabilizing tuition and other costs. But capitation already is lower than in previous years and any further cutback would only serve to drive up tuition costs.

Scholarships are an important source of funds, but they do not help as many students as capitation. Yet we need a balance of both scholarships and capitation in the effort to provide sufficient numbers of health professionals.

In this connection the committee provided $40 million for National Health Service scholarships, $1 million more than the House.

Also, I was pleased the committee agreed to my amendment to restore $8.9 million for the D.C. medical and dental manpower program, a special form of capitation for medical and dental schools in the Nation's Capital.

I would also mention that the committee agreed with my request to provide $4 million for grants for professional health schools facing financial difficulties, particularly minority institutions. This is $1 million above the House level. Requests for these financial distress grants now total more than $8 million.

The bill includes $25 million for establishment or expansion of regional veterinary medicine schools at Washington State University, Tufts University in Boston, and at the University of Pennsylvania. New England needs its own veterinary medicine school, and I am pleased to help in having one located at Tufts.

The committee also provided increases over the House for both allied and public health programs.

EDUCATION

Our bill provides nearly $3.7 billion for education programs, mostly for vocational and higher education. Our recommendation is $43.6 million more than the House allowance. More specifically:

We recommend $10 million in supplemental funds for emergency school aid to help cities undergoing voluntary desegregation. There was no House recommendation for this program, but the large concentrations of minorities in States with low overall minority populations receive inadequate assistance under the present formula for distributing these funds. We believe the additional funds should help correct this inequity.

We are also concerned about encouraging cities to get an early start on magnet schools, which is a promising new desegregation tool for which Federal aid was authorized in the 1976 education amendments. We recommend $25 million for this program.

For vocational education programs, for special educational projects, for studies on handicapped children, and for the operations of the National Institute of Education, we concur with the House allowances.

I was particularly pleased that the committee agreed to my amendments for supplemental educational opportunity grants and for direct loan programs totaling $41 million.

As a result of the success of our basic opportunity grants program—BOG's—there has been a tremendous increase in the number of disadvantaged students who now can get a college education. Nothing could please me more. But we must not forget that by law BOG's can pay only half of their costs. The other half must come from somewhere else, and for the poor that other half is not available from their families. My amendment helps by providing the first increase—$20 million—in 2 years for SEO grants and by continuing the direct loan program at least at its current level.

For work study, we provide $390 million which, together with carryover funds, also will provide an increase for the next school year in this program.

I also was pleased that the committee agreed to my amendment for an additional $2 million for training for minority librarians, for which there is still a very strong demand, and for much needed increases in foreign language training and cooperative education.

Cooperative education is a highly successful, proven program which permits college students to gain practical work experience while they attend school. As wage earners, they pay taxes, giving the Government a return on its investment. The program could lead to permanent jobs for many participants.

OTHER AREAS

In other matters, the committee provides $1.2 billion, the same level as the House, to make up a shortfall in public assistance funds.

The committee also recommends $282.5 million for emergency energy programs under the Community Services Administration. Some $82.5 million is primarily for purchasing materials to insulate the homes of low income families. The funds will enable the CSA to substantially expand this program which has been operating since fiscal year 1975 and thus to reach additional homes before the onset of next winter.

The other $200 million is to assist poor families and individuals in continuing to obtain energy and fuel supplies.

Our report provides a thorough explanation of how the committee wishes this program carried out, and I commend it to your attention.

I believe we have developed a responsive and responsible Labor-HEW chapter, and I urge its adoption.

Mr. HUDDLESTON. Mr. President, the total amount recommended in chapter VIII for the legislative branch is $4,447,250, a decrease of $1,272,105 below the budget request and $2,484,350 over the House allowance.

The increase over the House is composed principally of Senate items which, by custom, the House does not consider. Virtually all of the Senate increases are for relatively mandatory costs such as the increased costs associated with the general pay increase of October 1, 1976, the gratuity of 1 year's salary to the widow of Senator Hart and various costs associated with Senate Resolution 17 which established the Office of Deputy President Pro Tempore.

The bill does not include any funds related to the March 1, 1977 executive pay raise. Funds to cover these costs will be considered in connection with a later supplemental budget request.

The bill also includes a number of housekeeping provisions which are explained in detail in the body of the report.

I urge my colleagues to support chapter VIII of the bill.

Mr. HOLLINGS. Mr. President, I am very pleased that this bill contains my amendment which was supported by Senator BURDICK and others adding $10,045,000 to the VA account for additional funding for the Medical School Assistance and Health Manpower Training Act of 1972. The purpose of this program is to assist educational institutions which affiliate with VA medical facilities to expand and improve their programs of education in the health professions and occupations.

Adding these funds will serve to diminish the backlog of approved but unfunded programs which has built up mainly because through the past few years we have appropriated only about one-half of the $50 million authorized per year to fund titles II, III and IV of this act. Adding this $10,045,000 to the fiscal year 1977

VA appropriation of $25,800,000 for these titles will still leave funding for fiscal year 1977 $14,155,000 under the authorization.

This add-on will fund 28 projects which are now approved but would be scratched from the VA list of projects under active consideration on June 30, 1977. This would result in many of these projects being resubmitted for approval and then competing with an additional 12 projects which are approved but unfunded and which would be dropped from the VA approved list on December 31, 1977.

I ask unanimous consent to have printed in the RECORD at this point the list of the 28 projects which will be funded by the additional $10,045,000 and the 12 additional projects that are also in the backlog of unfunded projects.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

VETERANS' ADMINISTRATION MEDICAL SCHOOL ASSISTANCE AND HEALTH MANPOWER TRAINING ACT OF 1972 (PUBLIC LAW 92-541)—ASSISTANCE TO AFFILIATED MEDICAL SCHOOLS AND OTHER HEALTH MANPOWER TRAINING INSTITUTIONS (SUBCHS. II, III, AND IV)

APPROVED BUT UNFUNDED APPLICATIONS REMAINING UNDER ACTIVE CONSIDERATION UNTIL JUNE 30, 1977

Institution, location	Application No.	General category	Total amount approved [1]
Eastern Virginia Medical School, Hampton, Va.	0266-S1	Subch. II	$766,067

[1] Includes indirect cost and subch. IV.

Mr. KENNEDY. Mr. President, I want to express to the chairman my support for many of the actions taken by the committee during what I know was the largest supplemental appropriations bill that we have considered in many years.

While there are some areas which I hope the committee will maintain a close watch so as to be able perhaps to provide some assistance in a subsequent supplemental, I want to express my accord with many of the actions taken by the committee. I am particularly pleased that in a substantial number of programs in which I had expressed by own views to the committee, additional appropriations were provided.

In that regard, I want to express particular appreciation to the distinguished Senator from Washington, the chairman of the Labor-HEW Appropriations Subcommittee for its action in the area of providing energy relief for the poor through the appropriation of some $200 million for the Community Services Administration's crisis intervention program.

Senator MUSKIE and I first suggested this program a month and a half ago and we have recevied support from the Governors, from the mayors, and from the community action programs around the country, not to mention from private citizens.

Just as the drought in the West had justified a national response, so too has the unusually severe winter presented enormous economic burdens on individuals in my State, in the Northeast, the upper Midwest and many other sections of the country.

We believe this action may permit some modicum of relief to a number of poor families around the country.

I should also note that the committee should be commended for including $82.5 million in the weatherization program within CSA which has been enormously successful and which I believe holds out substantial potential for conservation.

Also, let me express to the chairman of the subcommittee my appreciation concerning his action on several health programs.

HEALTH

Health care costs escalated 15 percent in the last year. If we are going to control inflation of this magnitude, we must improve our health care system. We can begin to do this by making some cost effective investments which will have a major impact on the entire system. The Senate Appropriations Committee version of H.R. 4877 does an excellent job of addressing this need.

The Health Professions Educational Assistance Act of 1976, Public Law 94-484, is a sweeping revision of existing law and was specifically designed to come to grips with three of the major health manpower problems which plague the Nation—the geographic maldistribution of health professionals, the maldistribution of physicians by specialty, and the Nation's significant dependence upon foreign medical graduates for the provision of medical care. In order to effectuate these goals, the committee has recommended: $119,100,000 for capitation; $24 million for student assistance loans; a full $40 million for National Health Service Corps scholarships and over $25 million for the National Health Service Corps. I was particularly pleased with the committee's recommendation of $10 million for the development of a regional veterinary school at Tufts University in Massachusetts.

Under the Health Planning and Resource Development Act—Public Law 93-641—State health planning and development agencies play a pivotal role in the distribution of limited health resources. The committee's recommendation of an additional $5 million for SHPDA's will better enable these State agencies to do the job mandated by the legislation.

As chairman of the Subcommittee on Health and Scientific Research, I am pleased with the committee's sensitivity

to the particular needs facing our Nation in providing better health care for all Americans. The eventual success of a national health insurance plan is dependent on the effective operations of the programs addressed in this bill. I would particularly like to express my support to Senator MAGNUSON for the fine work done by the Labor-HEW Appropriations Subcommittee in the consideration of these matters.

However, I would note that the committee decision to defer an additional $2 million for the migrant health program is of some concern. This action will mean a cutback in the hospitalization program which was begun as a direct response to the past failure to migrants to have access to hospital care.

I strongly urge the chairman to reconsider this matter at the time of a second supplemental appropriation bill.

EDUCATION

I want to commend the chairman for the overall actions of the committee in the area of education, providing funding for vocational and higher education programs which were awaiting the enactment of Public Law 94-482.

In that regard, I also want to express special appreciation to the chairman for the committee's favorable action on my request for some $35 million in appropriations for the emergency school aid program and for an increase in the special services programs. The additional magnet school, neutral site, and pairing provisions, as well as the follow the child provision, were provisions which I had sponsored in the authorization bill. They have been given strong support by many communities and by education authorities, including the Great City Schools Association, and by the U.S. Civil Rights Commission. I know that Boston and the other communities cited by the committee in its report are in great need of this assistance to improve the quality of their educational programs.

In that regard, I would note that the additional appropriations for the special services for the disadvantaged program to fund the New Service Learning Centers program is of special interest and concern to me. I was the author of the provision extending and expanding the traditional "TRIO" programs and these additional appropriations will permit additional students to receive aid in acquiring a postsecondary education.

My two concerns in this area relate to the committee's decision, at this time, not to increase the title I compensatory education program. Although the regular appropriations for this year of more than $2 billion represented an increase over the previous administration's request, the program remains underfunded. Title I of ESEA accounts for 47 percent of all Federal elementary-secondary spending and 75 percent of spending for compensatory education nationwide.

Since 1968 price inflation has resulted in a decrease of 30 percent in real spending for all elementary-secondary and vocational education programs.

In 1968 the title I program served 7.6 million children at an average level of $378 per child. In fiscal year 1977 only 5.2 million children were served at the same average service level.

In order to maintain 1968 service levels State and local agencies have been forced to reduce the number of children served by 34 percent.

The tragedy here is that this program works. It is working in rural communities and it is working in inner cities. We have conclusive evidence that title I is producing learning gains across the country.

In many school districts, title I has been a catalyst for change in other areas of education. Title I has resulted in new approaches, and better educational methodology, and renewed commitment to individual student achievement.

HEW audit reviews find that 99.4 percent of title I ESEA funds are accurately targeted and spent.

The need for this funding is even more apparent when we look at the fact that one in every four young people do not complete the planned, formal program of secondary education in this country.

And high school students are not making the transition from school to work. Unemployment figures for high school youth are generally double the national figures.

Unemployment figures for blacks and urban young people are four times the national average.

There are few expenditures which better serve the security of this Nation than these funds which improve educational skills of young people regardless of economic or racial background.

I hope that the committee will review this matter in the light of the great need for services around the country, as well as the impact on school systems of declining allocations, and consider some additional funds before the next school year begins.

Similarly, with regard to the teacher corps program, I do believe that the failure to increase their funding over the previous 3 years is unjustified. They have aids students, individuals, and communities, and it should be expanded. Again, I tie and it should be expanded. Again, I urge a reconsideration of this issue during a subsequent supplemental appropriations bill.

FOREIGN ASSISTANCE

I want to commend the committee anew with regard to migration and refugee assistance where the committee acceded to the request for assistance of The United National High Commission for Refugees program in Thailand providing relief to Vietnam refugees. This program funding as well as the emergency refugee and migration assistance fund represent important humanitarian actions by the United States. In addition, I want to express special approval of the committee's decision to provide some $3 million for assisting in refugee resettlement in the United States. The transition period for refugees is enormously difficult, particularly those fleeing repression under emergency circumstances, such as Chilean, Uruguayan, and Argentinian refugees. I am hopeful that they and the refugees from the Soviet Union will be seen as individuals with similarly difficult human problems. That is the committee's decision and it is a decision I fully support.

I also want to concur in the decision to provide additional assistance at this time to Portugal which is in the process of securing its transition to a democratic regime.

We will be joining our NATO allies in a joint program of assistance and we will be demonstrating as well to many nations our willingness to respond positively to countries which have committed themselves to democratic values and principles.

HOUSING

In the area of housing, the committee has strongly registered its concern to the administration at the pace of new housing construction, particularly in the 202 housing for the elderly program. I have sent a letter along with the distinguished chairman of the Senate Housing Committee, Senator PROXMIRE, to our new HUD Secretary and I do hope that the message contained in the committee report to spur the 202 program forward will be acted on.

Mr. President, the combined effort of this vital supplemental appropriations bill, at the same time the committee had to deal with the emergency stimulus appropriations measure was enormous.

The chairman and the committee deserve our commendation for their determined efforts.

Mr. ROBERT C. BYRD. Mr. President, I would like to mention briefly an item that the Senator from California (Mr. CRANSTON) hoped could be funded under moneys made available to the Forest Service in this supplemental appropriations bill.

The Forest Service recently purchased the Meeks Bay Resort at Lake Tahoe to provide for public recreation and marina activities. Because of the current drought, the water level in Lake Tahoe has dropped 5 feet and the docks are over land instead of water. To remedy this situation and make the marina usable this summer, the Forest Service needs $70,000 to dredge under the docks. Senator CRANSTON understands this dredging work ordinarily would be done two seasons from now.

Unfortunately, the request of the Senator from California did not reach me until March 25, which was the day after our subcommittee markup. Obviously, we did not have time to look into this proposal and check it out with the Forest Service.

It would seem that $70,000 for needed dredging at the Meeks Bay marina is a meritorious request. As soon as the staff can look into this matter, we may be able to assist the Senator.

In all, the committee has recommended some $24 million in additional appropriations to the Forest Service for recreation management, maintenance and development. If this dredging project is desirable and feasible, I see no reason why the Forest Service could not accommodate it within this generous addition to its recreation budget.

I shall do what I can to accommodate the Senator from California, and if it is not possible to provide for this in the supplemental we shall certainly give it high priority in our consideration of the 1978 fiscal year budget.

Mr. CASE. The Senate Appropriations Committee, in considering the 1977 Sup-

plemental Appropriations bill, concurred with the House action in adding $2,000,000 for the newly authorized National Alcohol Research Centers. In its report accompanying this bill, the committee stated:

This additional funding will allow the NIAAA to create several National Alcohol Research Centers at established and experienced alcohol research schools and/or institutes. The Committee clearly recognizes the growing problem of teenage and women's alcoholism programs and is hopeful that Centers such as these will contribute to finding a solution to a disease which afflicts over 10 million Americans.

In my own State of New Jersey, the internationally known Rutgers Center of Alcohol Studies is dedicated to the solution of all alcohol problems. Is this the sort of center the Senator has in mind for designation as a national center?

Mr. BROOKE. That is exactly the type of center the committee has in mind. The Center of Alcohol Studies, at Yale University from 1948 until it moved to Rutgers in 1963, has pioneered in many areas of alcohol-related research. Senator MAGNUSON concurs that this is the type of center the committee meant?

Mr. CASE. I thank the Senator.

Mr. GLENN. Mr. President, I particularly wish to commend the chairman and ranking minority member of the Labor-HEW Subcommittee of the Appropriations Committee, Senators MAGNUSON and BROOKE, as well as the distinguished committee chairman, Mr. MCCLELLAN, for providing $35 million in additional funding for the Emergency School Aid Assistance Act for the remainder of fiscal year 1977.

ESAA is perhaps the single most important program of Federal assistance to school districts undergoing school desegregation. ESAA funds help local communities defray some of the expenses associated with large-scale school desegregation plans. Typically, communities receive funding subject to a State apportionment formula. However, there are several sections of ESAA which allow direct funding for certain purposes to districts that are in most need of immediate assistance in carrying out desegregation plans. It is in these areas that the committee has wisely chosen to recommend additional fiscal year 1977 funding. This recommendation of $10 million for special projects and $25 million for magnet schools, pairing of schools, and neutral site schools, represents soundly directed expenditures that should help reduce tensions while helping to provide high quality, constitutionally sound educational opportunities. This additional $35 million should provide extra assistance to many of the large school districts in Ohio that are currently in various stages of the school desegregation process. Cleveland, Cincinnati, Dayton, Columbus, Youngstown, and Akron are among the larger Ohio communities that stand to be assisted by these new funds. Smaller Ohio communities, such as Warren, Lorain, and Lima, among others, might also benefit.

Mr. President, I am most gratified that the committee has chosen to provide $25 million to encourage development of innovative desegregation methods such as magnet schools, pairing of schools, and neutral site schools. The authorization for this appropriation is essentially the School Integration Innovation Act which I introduced last year and which became law as an amendment to the Education Amendments of 1976. In this act, we sought to encourage greater use of desegregation remedies that attract integrated student bodies voluntarily by virtue of their educational attractiveness. The beauty of this approach is that these remedies may be used independently of, in conjunction with, or as part of court-ordered desegregation plans. When operated soundly, these features offer hope of reducing some of the necessity for large-scale mandatory transportation plans.

Mr. President, on March 10, I had the honor of delivering the keynote address to the international conference on magnet schools in Dallas, Tex. It was especially gratifying to meet educators and administrators from across the Nation and to hear their overwhelming endorsement for properly designed and well-administered programs in magnet schools. The conference agenda produced voluminous testimony about exciting new magnet programs being developed throughout the country in an atmosphere of calm and cooperation. Surely, we at the Federal level should provide support and encouragement to these efforts. Importantly, this relatively small expenditure has the potential of contributing to the long-range development of our central cities and metropolitan areas by helping to stabilize and even renewing many of our urban communities.

Mr. President, this is the type of positive activity that we should have engaged in long ago. I would like to compliment the committee for its action and express my complete support.

Mr. THURMOND. Mr. President, I rise in support of the fiscal year 1977 supplemental appropriation bill, reported by the Senate Appropriations Committee, and specifically the $12.5 million added to support the Uniformed Services University of the Health Sciences.

If there is one central and critical problem in the personnel area of our military forces today, it is the lack of medical personnel to care for those individuals in military service.

VISITS SHOW NEEDS

Staff investigations by the Senate Armed Services Committee show that personnel in the military, particularly enlisted personnel, place the lack of medical services at the top of their list of complaints.

A visit last year by several staff members to Fort Carson, Colo., revealed that sessions with junior enlisted personnel, noncommissioned and junior officers uncovered an attitude that medical care in the Army had hit an all-time low.

While those interviewed found the medical care adequate when they could obtain it, every group complained that the waiting time for medical care ran from a few days to weeks and even months.

A number of enlisted personnel told the staff investigators that they had been forced to go to civilian doctors and pay the cost out of their pockets for fear serious illnesses would occur before they could see a military doctor.

Mr. President, this problem was no surprise to those of us who have been close to this problem for many years. The situation has been bad for some time, now it is simply worse and deteriorating rapidly. There is simply a serious shortage of doctors in the military.

Coupled with this, I hear complaints in the Congress that we are paying doctors too much in bonus pay. Yet, these same critics offer no real solutions to this serious problem.

UNIVERSITY BADLY NEEDED

The solution in part, lies in funding the badly needed Uniformed Services University of the Health Sciences. The Congress undertook this program several years ago, and today it is near reality. It is badly needed, and if canceled as some propose, will only deepen the already serious morale problems in our all-volunteer forces.

There are those who argue we can procure enough doctors for the services through scholarships at medical schools. This source has proven inadequate and is one reason we are faced with acute shortages of medical personnel in the military today.

SCHOLARSHIP PLAN INADEQUATE

Take for instance my own State. We have one medical school, and hundreds of applicants each year. The primary purpose of the South Carolina Medical College is to provide doctors to meet the medical needs of our State. Many State applicants are rejected due to the shortage of classroom space. Our State college is naturally reluctant to give its few spaces to young people who plan to enter military service and practice medicine.

Mr. President, the situation in the Medical College of South Carolina is typical of that across this country. For instance, in the 1973–74 school year 40,506 applications were received in medical schools in the United States and 14,335, about 8 percent of the applicants, were accepted. Unfortunately, of this number it is estimated only about 11,000 will graduate.

FOREIGN STUDENTS RECRUITED

To meet this problem the Defense Department has been forced to attempt to enlist large numbers of foreign doctors. In the current year statisticians expect that 35 percent of those recruited will be foreign medical students, 70 percent of whom will be noncitizens.

Furthermore, the recruiting shortages result in huge costs because military personnel are then forced to obtain medical services through the CHAMPUS program. For each doctor not recruited,

costs of about $83,000 annually are incurred in the CHAMPUS program.

These are but two of the many problems involved in providing adequate numbers of physicians for the military services.

SCHOOL MEETS REAL NEED

The Congress designed the university program to meet the needs of the services as the doctor draft ended several years ago. The university, coupled with the continued scholarship program, is programed to enable the services to begin meeting that medical shortage by the mid-1980's.

Mr. President, there are many other reasons this university should be supported. I will list a few of these reasons.

First. The military university provides a base for medical specialty training vital to improve treatment of combat wounds;

Second. Recruiting plus civilian scholarships has not provided the numbers of doctors needed for the military services;

Third. Superb clinical teaching facilities are already in place at Bethesda Naval Hospital and Walter Reed Army Hospital;

Fourth. Four-year costs show the expense of a military university graduate is about equal to that of the civilian school graduate;

Fifth. Thirty-two students are already enrolled and in training;

Sixth. A faculty has been hired, many of those individuals giving up good positions to assist the military in training doctors;

Seventh. Construction funds have already been approved by Congress and obligated. The construction program is about 50 percent complete; and

Eighth. If the university is closed, millions of the taxpayers dollars will be wasted in termination costs of a program approved earlier by Congress.

Mr. President, I urge the Senate to give its endorsement of the Appropriation Committee's action in providing $12.5 million in this bill. The committee members went into this matter in detail, and under the able leadership of the distinguished junior Senator from Louisiana (Mr. JOHNSTON), the funding was approved by a 18-to-4 vote.

If the Senate wants to meet the medical needs of military personnel, if the Senate wants to stand by its decision of past years, if the Senate wants to improve morale in the military, then a vote in favor of these funds is essential.

Mr. STEVENS. Mr. President, as the distinguished chairman of the Interior Subcommittee, Mr. BYRD, has presented a comprehensive view of the Senate committee recommendations for this portion of the bill, I will make my statement brief.

Although our recommendations are $95.7 million over the House allowance for Interior and related agencies, this amount does not represent across-the-board increases. Rather, all of this amount can be attributed to two programs in which the committee has taken special interest. The first is $55 million over the House allowance for the weatherization program within the Federal Energy Administration. This is the same as the budget request. We are aware that this duplicates funding made available to the Community Services Administration in the HEW chapter of the supplemental. Hopefully, we will be able to work out this jurisdictional problem in the near future. In the meantime, however, there is a tremendous backlog in winterizing homes of low-income citizens, the handicapped, and the elderly; so, we are of the opinion that even if the program is funded through two different sections of the bill, the money can be well utilized this summer to better prepare us for another cold winter with its accompanying fuel shortages.

The other large item which we have funded that is not included in the House bill is $75 million for Indian Health Service water-sewer construction projects. All of these funds can be obligated during the current fiscal year and will provide some 3,200 man-years of employment on Indian reservations. The current unemployment rate among Native Americans ranges from 20 to 50 percent which is greatly in excess of the national average. The construction funds will provide necessary sanitation facilities both to existing Indian homes and to new units being constructed by the Bureau of Indian Affairs and the Department of Housing and Urban Development. Thus, while providing employment, essential facilites will also be made available to Native Americans in many parts of our country. I do hope that the Senate will be able to maintain the $75 million level in conference with the House.

We have made some reduction to the House bill, primarily for positions which cannot be filled as early as originally anticipated when the supplemental request was presented to Congress. Thanks to the leadership of our subcommittee chairman, I feel that we are presenting a balanced bill for Interior to the Senate, and I urge its adoption.

Mr. DURKIN. Mr. President, I am pleased that the supplemental appropriations bill which is before us today will allow the families of policemen, firefighters, and other law enforcement officials who were killed in the line of duty to receive benefits due them under the public safety officers' benefits program, a bill which many of us cosponsored last year.

The Public Safety Officers' Benefits Act of 1976 authorized the payment of a $50,000 death benefit. But it also prevented the awarding of these benefits until specific appropriations for the program were made. Funds were appropriated for the Law Enforcement Assistance Administration, which is responsible for administering the PSOB program, several months before the act was signed into law. Therefore, fiscal year 1977 LEAA money could not be used to compensate the survivors of policemen, firefighters, corrections officers, game wardens, and other law enforcement officials who were mortally wounded while in the performance of their duties.

On October 2, 1976, 3 days after the Public Safety Officers' Benefits Act of 1976 was signed into law, Ralph W. Miller, a young patrolman with the Manchester, N.H., Police Department was brutally murdered while providing vital services to his community. Since then, 120 other families have filed claims for the benefits authorized for them last September. These families look to us to insure that the Federal Government lives up to its commitment and to expeditiously pay the $50,000 benefit required by law. Today's legislation will fulfill this obligation.

The first supplemental appropriations bill will allow funds which are already appropriated for the LEAA to be used to pay benefits authorized by the PSOB Act. By removing the restriction on these funds, families which have suffered the loss of a family member may promptly receive the compensation promised them.

Mr. ROBERT C. BYRD. Mr. President, on chapter VI for the Interior Department and related agencies, the subcommittee is recommending total appropriations of $1.029 billion. This includes some $503.1 million for the Interior Department and $526.2 million for the Forest Service, Federal Energy Administration, Indian Health Service, and other related agencies. The total for chapter VI is $181.8 million over budget estimates and $95.7 million over the House allowance.

For the most part, Mr. President, the recommended increases are directed at job-intensive programs. We have supported some $87 million in additions to the Forest Service, for instance, to fund recreation and resource development projects in the national forests and the public lands. For the Indian Health Service, as another example, we have recommended $75 million to accelerate needed water and sanitation facility construction for Indian homes.

For the Interior Department, we are recommending increases for drought mitigation in the West and mine subsidence control in the East, and for airport construction in the Trust Territory of the Pacific. We have also added $4.5 million to the National Park Service for emergency roof repairs at the Kennedy Center for the Performing Arts.

Except for selected reductions to adjust for authorizations and personnel compensation needs and for certain program cutbacks, we have basically approved the budget estimates before the subcommittee. Since there does appear to be some interest in the new payments-in-lieu-of-taxes program, I should mention we are recommending the full $100 million budget request.

Mr. CHURCH. Mr. President, I would like to call attention to an item in the fiscal year 1977 supplemental appropriations bill which I support, and I hope my colleagues will support. The Appropriations Committee recommends an additional $2.7 million for model projects under the Older Americans Act to provide partial support for public broadcast television programing for older Amer-

icans. This amount has been approved by the House to support an innovative television series, "Over Easy," produced by KQED in San Francisco. The pilot shows in this series received very favorable review and widespread support from elderly viewers and professionals in the field of aging. I feel this type of programing can make an important contribution.

I am also pleased that H.R. 4876 would provide funds for an additional 10 personnel to strengthen enforcement of the Age Discrimination in Employment Act. Approximately $200,000 of this $285,000 appropriation would be available to improve activities for presenting evidence for age discrimination cases.

Congress enacted the age discrimination law nearly 10 years. However, job bias because of age is still a real and serious problem today. Quite clearly, the Department of Labor must be vigorous in enforcing the law evenhandedly and conscientiously.

Finally, H.R. 4876 includes an additional $2 million for the National Institute on Mental Health to develop a more comprehensive research program concerning mental health and illness of the aged. These funds will be allocated to the Center for Studies of Mental Health of the Aging.

The Committee on Aging, of which I am chairman, plans to issue a working paper soon on protective services and the elderly. This report will also examine public policy concerning the treatment of the mentally and physically infirm.

One of the major points in the working paper is that the institutional treatment of the infirm aged—perhaps more so than anything else—symbolizes our Nation's neglect of the elderly. This failing in public policy takes its tragic toll in many ways: Economically, psychologically, and socially.

Research is needed to develop innovative and sound solutions to correct the shortcomings in existing public policy. I am glad to see this need recognized, at least in part, in the appropriations bill.

SEWAGE TREATMENT GRANTS

Mr. DOLE. Mr. President, this supplemental measure will provide $4.5 billion to continue the highly beneficial Federal sewage treatment construction grant program, which I fully support.

The program provides 75 percent Federal funding of costs involved in constructing municipal sewage treatment plants, and my own State of Kansas has greatly benefited from these funds in past years.

The Water Pollution Control Act Amendments of 1972 mandated the cleanup of our Nation's waters through the elimination of direct discharges of municipal and industrial sewage. It became necessary for the Nation's communities, both large and small, to construct or upgrade existing sewage treatment facilities in order to comply with the new Federal regulations. Congress, in its wisdom, recognized the limited financial capabilities of municipalities to undertake such construction, and authorized a very helpful 75 to 25 percent Federal-local cost-sharing program for the treatment plants. Many communities have already benefited from the grants, and many more will benefit in the future.

There are still a number of rural communities in Kansas which both want and need to upgrade their sanitation facilities. Under the allocation formula authorized in this legislation, Kansas will stand to receive $54,878,000 in Federal construction grants prior to October 1977, and will have 3 years in which to obligate those funds.

There is no question that this assistance will be both welcome and put to good use in Kansas. I support the full appropriation as recommended by the committee, and urge its expeditious approval.

Mr. MUSKIE. Mr. President, I urge passage of the Supplemental Appropriations Act of 1977, which includes $282.5 million for the Community Services Administration for weather-related aid to low-income families.

Part of this amount, $82.5 million, would be used to continue the CSA's weatherization program to help insulate and otherwise improve the fuel economy of low-income homes. This program is designed to protect low-income families from ruinous fuel bills in future winters.

But the remaining $200 million would be used to alleviate the lingering effects of this year's severe winter—more specifically, the enormous fuel bills that thousands of poor families have yet to pay.

The funds would be allocated to States, which in turn would provide eligible families assistance in paying their fuel or utility bills. Payment in most cases would go directly to the utility company or fuel oil dealer involved.

Just because the worst of the winter is over—and the relief of spring is upon us—does not mean that this winter's emergency can be forgotten.

In fact, nothing could be farther from the truth. Funds are needed now for the unpaid fuel bills accumulated this winter.

My Subcommittee on Intergovernmental Relations polled State utility commissions and utility companies recently and found that, typically, utility companies allowed financially strapped customers to accumulate fuel bills over the winter months, rather than discontinue service during severe weather.

This was due both to the independent decisions of companies—and I consider this a constructive exercise of corporate responsibility—and because many State utility commissions ordered temporary bans on service cutoffs.

Now, however, as the weather has warmed up, State utility commissions have relaxed these bans and companies have begun to discontinue service.

At the same time, many thousands of low-income families are no more able to pay these accumulated bills than they were 2 months ago.

For example, my subcommittee found that a Wisconsin gas company recently sent out 25,000 disconnect notices to customers in the Milwaukee area, effective April 2, the day after the State commission's disconnect moratorium expires.

And this is just one example of an alarming and growing problem that will overcome the already strained finances of poor families—unless we can provide needed help immediately.

To give you an idea of the dimensions of the problems, let me add some information.

This winter was the coldest in 60 years, 40 percent colder than last year, and it affected States in virtually every section of the country.

Seven Governors declared states of emergency. Natural gas shortages idled over a million workers, and as far south as Dade County, Fla., crop damage ran into the hundreds of millions of dollars.

Nationally, energy consumption was 32 percent higher this winter than last, according to the Library of Congress. In New England, energy consumption was 25 percent higher.

With increased consumption came higher prices, as well.

Fuel oil customers in New England faced a 5-to-7-cent-per-gallon increase since last summer, and natural gas prices across the country increased over 7 percent during the winter.

That resulted in a winter fuel bill of almost $1,000 for the average New England family.

In all, the Library of Congress estimates that the total heating bill for the Nation was $8.4 billion this winter, "a 49-percent increase nationwide over last year * * * equivalent to an average of more than $139 per housing unit."

However, these financial burdens fall heaviest on those least able to pay. According to the Community Services Administration, energy costs have risen more than four times faster than average welfare payments since 1973. And even before this winter, many poor and elderly persons were paying 60 to 80 percent of their income for shelter and heat.

In order to meet the needs of those who have been unable to shoulder this burden, I and a number of my colleagues in both Houses began work several months ago to secure this supplemental appropriation for the CSA. Our plan is simply to provide the funds through existing authorizations to the CSA, which in turn would allocate the $200 million among the States. The Governor of each State would then be responsible for using the best delivery systems at his disposal to put the financial assistance into the hands of those who most need it.

In order to qualify, individual or family income would have to be within 125 percent of the poverty level. Further, the recipient would have to provide the administering agency with proof of need.

Each eligible household would be limited to a maximum payment of $250. This payment, for fuel, would be made directly to the utility company or fuel oil dealer. Eligible recipients could, however, receive a $50 cash payment for other energy-related expenses resulting from this winter's cold.

The formula which has been developed

to allocate these funds among the States is designed to target the assistance where it is most needed. It takes into account the severity of this winter's cold in each State, the number of those who need assistance in each State, and the relative cost of buying fuel.

So that my colleagues can see how the $200 million would be divided among the States, I ask that the allocation list by State be printed in the RECORD at this point.

Alabama	$2,300,000
Alaska	960,000
Arizona	420,000
Arkansas	1,960,000
California	3,380,000
Colorado	2,720,000
Connecticut	2,860,000
Delaware	660,000
District of Columbia	820,000
Florida	1,400,000
Georgia	2,760,000
Hawaii	140,000
Idaho	1,160,000
Illinois	14,160,000
Indiana	5,900,000
Iowa	4,420,000
Kansas	2,140,000
Kentucky	4,600,000
Louisiana	1,380,000
Maine	3,000,000
Maryland	2,440,000
Massachusetts	5,060,000
Michigan	13,760,000
Minnesota	8,780,000
Mississippi	1,700,000
Missouri	6,000,000
Montana	1,460,000
Nebraska	2,340,000
Nevada	360,000
New Hampshire	1,680,000
New Jersey	5,080,000
New Mexico	1,120,000
New York	21,880,000
North Carolina	4,000,000
North Dakota	1,740,000
Ohio	13,800,000
Oklahoma	2,180,000
Oregon	1,880,000
Pennsylvania	14,600,000
Puerto Rico	680,000
Rhode Island	1,400,000
South Carolina	1,520,000
South Dakota	1,620,000
Tennessee	3,440,000
Texas	4,180,000
Utah	1,260,000
Vermont	1,460,000
Virginia	3,200,000
Washington	2,700,000
West Virginia	2,840,000
Wisconsin	8,240,000
Wyoming	460,000

Mr. President, earlier this year my Subcommittee on Intergovernmental Relations held hearings on this proposal and heard from Governor Grasso of Connecticut, Governor Carroll of Kentucky, Governor Shapp of Pennsylvania and Lieutenant Governor O'Neil of Massachusetts. These witnesses all supported the assistance proposal.

As Governor Carroll testified:

. . . in time of trouble, it is always the poor who suffer most. Kentucky is no exception. To a family who is just scraping by on a fixed income, unemployment insurance and food stamps, a fuel bill that is double or triple what they normally pay can be back breaking. . . . Federal programs that provide aid to these needy families don't have contingency clauses for days of sub-zero weather and soaring fuel bills. We need a special kind of help—the kind that this committee is considering today.

In an effort to further determine the need for this kind of assistance in other States and how each Governor might administer this program, my Intergovernmental Relations Subcommittee wrote to each Governor. So far, we have received responses from 24 States. Each Governor from whom we received a response strongly endorsed the proposal. And almost all said that the funds were desperately needed in their State. I ask unanimous consent that these responses be printed in the RECORD.

I also ask unanimous consent that the complete text of the study of fuel bills and cutoffs prepared by my Intergovernmental Relations Subcommittee be printed in the RECORD.

Mr. President, this $200 million appropriation represents the best Federal/State response to the financial disaster that this winter's severe cold has meant to so many people. It comes at the end of the winter, but at a time that it is needed by many of our citizens. I urge my colleagues to lend their support to this worthwhile proposal.

There being no objection, the responses were ordered to be printed in the RECORD, as follows:

[Telegram]

MONTGOMERY, ALA.,
March 9, 1977.

Hon. EDMUND S. MUSKIE,
U.S. Senate,
Washington, D.C.

Reference is made to your letter of March 1 concerning funding of a Federal program providing financial assistance to low-income families unable to pay high fuel bills. It is my belief that this legislation is needed and I am responding to the questions contained in your letter as follows:

1. There is a need for financial assistance in Alabama for those unable to pay increased fuel bills.

2. These funds are still needed.

3. The community action agencies have been designated as the delivery system to provide such a system.

4. We can provide timely assistance if legislation is enacted and will assume accountability for this program. We are now completing our State plan and have conducted initial training of personnel who will administer this program. Furthermore, we are prepared to set our program in motion upon receipt of these funds.

Sincerely yours,

GEORGE WALLACE.

STATE OF ALASKA,
Juneau, March 11, 1977.

Hon. EDMUND S. MUSKIE,
U.S. Senate, Committee on Government Operations, Washington, D.C.

DEAR SENATOR MUSKIE: It was my understanding that the federal program for emergency financial assistance for low income families unable to pay high fuel bills this winter was to be targeted for those states in the eastern U.S. experiencing unusually severe winter conditions this year.

Alaska has been having a warmer than usual winter this year; however, as you know, our usual winter weather conditions are much colder than what is experienced in the lower 48 states. Normal Alaskan temperatures combined with very high and continually rising fuel costs inflict serious hardships on poor families in this state year after year. My administration has, and will continue, to work for a more equitable distribution of federal funds for the energy needs of the poor which would give recognition to the special needs of low income Alaskans who regularly face the effects of extreme and long winters.

We do have an effective delivery system for winterization of homes and emergency bulk fuel loan assistance through Community Services Administration grantees in the State. Emergency fuel assistance funds could be immediately made available to those in need by those same grantees, were such funds available to Alaska. However, because of the "emergency" nature of these fuel assistance funds and because this year Alaska has experienced an unseasonably warm winter, Alaska is not seeking a portion of the special $200 million federal appropriation. It is our desire to see these emergency funds go to help poor families in the eastern and southern states suffering from one of the most difficult winters in their history.

Sincerely,

JAY S. HAMMOND,
Governor.

[Telegram]

SACRAMENTO, CALIF.,
March 14, 1977.

EDMUND S. MUSKIE,
Chairman, U.S. Senate, Committee on Governmental Operations, Subcommittee on Intergovernmental Relations, Washington, D.C.

The request for funds to assist low income families unable to pay high fuel bills accumulated during the bitter cold winter would not be applicable to California at this time due to unusually dry and moderate temperatures. However we do support this action for areas where the need has been demonstrated. California is in the process of evaluating the high cost of energy due to the severe drought conditions.

STEVEN YBARRA,
State of California,
Health and Welfare Agency.

STATE OF IDAHO,
Boise, February 4, 1977.

Hon. EDMUND MUSKIE,
Special Energy Committee, U.S. Senate, Senate Office Building, Washington, D.C.

DEAR SENATOR MUSKIE: It was heartening to hear your recently televised statement that there is a possibility that Federal funds will be made available to assist low income people with their fuel needs.

Here in Idaho we are having a colder than usual winter with its attendant problems for persons with low incomes. We can only imagine the hardships faced by persons with limited means as they try to cope with the viciously severe weather being experienced in the eastern sections of our nation. While our public and private agencies are severely strained trying to assist people to secure and maintain fuel supplies we know that some of our fellow Governors and citizens are faced with fuel problems of catastrophic proportions.

We urgently request that you make every effort to make funds available to assist low income people to secure adequate fuel in this severe winter. Such funds should be made available in proportion to need based upon population and severity of weather and be made available as quickly as possible to those States facing the most severe problems.

Sincerely yours,

JOHN V. EVANS,
Governor.

OFFICE OF THE GOVERNOR,
Indianapolis, Ind., March 7, 1977.

Hon. EDMUND S. MUSKIE,
U.S. Senator,
Washington, D.C.

DEAR SENATOR MUSKIE: The following is in response to your letter of March 1, 1977, regarding Federal Crisis Intervention Legislation to provide financial assistance to low income families to pay high fuel bills accumulated during the bitter cold this winter.

1. Very definitely. The Indiana Office of Community Services Administration has already served more families with Crisis Intervention assistance in December and January than was served in all of the previous year. Present funds have been depleted and other program funds have been diverted to meet the need, with no assurance of replacement funds.

Indiana has 145,384 families (11% of state) at or below the 125% low income level. The following projections have been made:

	Average expenditures per family	*Total*
Total families:		
145,384	$250	$36,346,000
145,384	200	29,076,000
145,384	150	21,807,000
145,384	100	14,538,000
145,384	50	7,269,200
29,768 (20 percent)	250	7,442,000

The Indiana Community Action Program Executive Directors have requested $20,000,000 of Emergency Energy Assistance funds to meet the emergency energy needs of low-income Hoosiers.

2. The need still exists and will continue during the next 3 to 6 months in order to pay bills in arrears and re-establish credit with fuel suppliers. Many low-income families are on deferred payment plans and will continue to pay excess bills each month.

3. Indiana has designated the Office of Community Services Administration to administer this program. A delivery system is in place to cover all 92 counties.

4. Indiana has spent considerable time and energy to provide this form of assistance to our citizens. The delivery system assumes optimal accountability of funds, verification of income and need.

I am confident that Indiana is prepared to insure that this program successfully meets the needs of our low-income citizens. Your sponsorship of this legislation is greatly appreciated.

Kindest personal regards,

OTIS R. BOWEN, M.D.,
Governor.

OFFICE OF THE GOVERNOR,
Des Moines, Iowa, March 21, 1977.

Hon. EDMUND S. MUSKIE,
Committee on Government Operations, Subcommittee on Intergovernmental Relations, U.S. Senate, Washington, D.C.

DEAR ED: I would like to acknowledge your letter of March 1 concerning financial assistance to low-income families unable to pay high fuel bills. To answer your specific questions, there is some need for financial assistance to poor and near poor families and individuals in Iowa who were unable to pay increased fuel bills during the past winter. Our Community Action Agencies have been using part of their weatherization funds from the Community Services Administration for this purpose. They have also negotiated with fuel suppliers for installment payments of back bills in cases where families were able to do so.

While some of the needs have been alleviated already, it is still possible to provide meaningful assistance. However, it seems more fair to expand emergency assistance to low-income families who have paid their utility bills but were forced to sacrifice in another area.

If provided with federal funds we would rely on my Office for Planning and Programming, in which the State Office of Economic Opportunity is located, to coordinate the effort. This office has been working with the Community Action Agencies on weatherization and the fuel crisis intervention program. It also provides state money for weatherization and has furnished Comprehensive Employment and Training Act enrollees to help with the program. We would expect to continue to use the Community Action Agencies' delivery system with, perhaps, referrals from the county social services departments and area agencies on aging.

We are confident that Iowa can provide this assistance in a manner to assure accountability and timeliness.

Sincerely,

ROBERT D. RAY,
Governor.

[Telegrams]

TOPEKA, KANS.,
March 16, 1977.

Senator EDMUND MUSKIE,
Captitol 1 D.C.:

In regard your letter 3-1-77: fuel bill as sistance needed for low income Kansas, can be distributed through increase in GA, AFDC, SSI grants within 15 days of notice. Cannot supply verification that funds are spent specifically on fuel bills, more likely increase will replace food money spent on fuel earlier in year.

ROBERT F. BENNETT,
Governor of Kansas.

GOVERNOR OFFICE,
Frankfort, Ky., March 11, 1977.

Hon. EDMUND S. MUSKIE,
U.S. Senate,
Washington, D.C.

DEAR ED: We appreciate the efforts on the part of you and your colleagues to alleviate some of the problems incurred by our low income citizens as a reult of this winter's inclement weather, we are very hopeful that you will be able to secure fundings to assist in fuel costs to these families. In response to the specific questions you posed:

1. There is no doubt that a need still exists for financial relief to low income families to compensate for their increased fuel bills.

2. The impact of the high cost of recent fuel bills will mean that low income budgets will be severely restricted for several months if some financial support is not provided. Although the intended benefits of this program would be delayed, provisions of assistance at this time would still be meaningful.

3. Should federal funds be provided, the existing welfare payment systems or offices would be utilized.

4. I have been assured by the department for human resources that they will have the capability of providing this special assistance to active welfare recipients through its regular payment system and in taking applications for non-recipients through its local office structure which is available in every county in Kentucky.

Please feel free to contact this office if we can be of further assistance in your endeavors.

Sincerely,

JULIAN M. CARROLL,
Governor of Kentucky.

AUGUSTA, MAINE,
March 4, 1977.

Senator EDMUND S. MUSKIE,
Capitol One, D.C.:

Your letter of March 1, 1977, to Governor Longley has been forwarded for attention on item 1. Yes, definitely. Item 2, yes, still needed, not too late. Item 3, local community and State resources already in existence Item 4, most certainly.

DAVID E. SMITH,
Commissioner of Human Services.

STATE HOUSE,
Boston, Mass., March 7, 1977.

Senator EDMUND S. MUSKIE,
Committee on Government Operations, Subcommittee on Intergovernmental Relations, Washington, D.C.:

In response to your question concerning the $200 million emergency appropriation:

1. There is definitely a need for financial assistance to low-income families and individuals because of increased fuel bills this winter. The combination of higher energy prices and a colder than average winter has caused hardship for both the poor and the near poor.

2. Funds are still needed: (A) Social service agencies often expended other program money to assist families during the coldest weather and should be reimbursed for these costs. (B) Utility companies and oil retainers have often been reluctant to cut off service during the middle of winter. Unless bills in arrears are paid, many families will now be cut off.

3. Massachusetts will use its existing network of community action agencies and the State welfare department to deliver funds.

4. This network has been in use for a number of years. It is accountable and effective and will be able to ensure a timely delivery of assistance to those most in need. There are already established procedures for handling emergency fuel requests, and this network has been shown to be the most effective system for our State. As an example, the network was able to deliver 300,000 gallons of donated oil to needy households in February.

Sincerely,

MICHAEL S. DUKAKIS,
Governor, Commonwealth of Massachusetts.

MARCH 9, 1977.

Senator EDMUND S. MUSKIE,
Committee on Government Operations, the Senate, Washington, D.C.

Thank you for your letter regarding the proposal for Federal financial assistance to low income families to help offset their high heating fuel bills. We have clearly defined the need for such assistance in Michigan, estimating that roughly 260,000 households are below the poverty level and budget for their own fuel needs. The average annual fuel bill this year will be about $100 above last year's total. Financial assistance to these most vulnerable households is still needed and could efficiently be provided through the State Department of Social Services. The relief could most efficiently be provided through direct vendor payments to the utilities, if Congress grants the States that authority. I can assure you that Michigan has an administrative structure geared to channeling this support quickly, effectively, and accountably to those low income households most in need. Again, the scale of the problem and its national impact dictates that Federal action be taken, and if there is anything that my office can do to assist you in winning congressional approval of the program, please let me know.

WILLIAM G. MILLIKEN,
Governor of Michigan.

MARCH 11, 1977.

To: David Johnson.
From: Cindy Warren.
Subject: Fuel Assistance.

I received a telephone call today at 10:00 a.m. from Herman Wells on behalf of Governor Finch (Miss.) concerning the fuel assistance questionnaire. In response to your questions as follows:

1. Yes.
2. No, it's not too late.
3. CSA.
4. Yes he is confident the funds would be used with accountability. Their delivery system is well established.

EXECUTIVE OFFICE,
Jefferson City, March 9, 1977.

Hon. EDMUND S. MUSKIE,
The United States Senate, Russell Senate Office Building, Washington, D.C.

DEAR SENATOR MUSKIE: As Governor of Missouri, I heartily endorse your proposal to appropriate two-hundred million dollars for emergency aid to help low income persons pay their heating bills.

Missouri has been especially affected this past winter as it has been one of the coldest winters in the state's history. Consequently, customers of utilities in this state have incurred very large heating bills.

I realize that your proposal is a short-term solution to a long-term problem, but I feel that your proposal will bring relief to those people most in need. Also, it is unlikely that the combination of factors, the cold winter and the FPC Opinion 770, will occur again, at least in the foreseeable future.

I endorse your proposed appropriation and qualified utility customers in Missouri look forward to benefiting from this appropriation as soon as possible.

Again, thank you for your help.

Sincerely yours,

JOSEPH P. TEASDALE,
Governor.

STATE OF NORTH CAROLINA,
Raleigh, March 16, 1977.

Senator EDMUND S. MUSKIE,
U.S. Senate, Russell Senate Office Building, Washington, D.C.

DEAR SENATOR MUSKIE: I appreciate the opportunity to comment on the proposed $200 million appropriation to provide financial assistance to low income families faced with inordinately high winter fuel bills. Our responses to the four questions posed in your letter of March 1 are summarized below.

(1) There is a definite need for an appropriation of this kind. A recent sample survey of local agencies in North Carolina indicated that there were still a considerable number of low income families experiencing difficulties in paying their fuel bills.

(2) The immediate need for these funds has decreased in the past several weeks. However, there is still a residual need as indicated above. I would question whether or not the proposed $200 million could be spent effectively in a limited period of time. A smaller appropriation might be in order or the Congress may wish to appropriate the full amount with the provision that it remain available until expended. This would allow us to respond quickly to any similar emergencies next year.

(3) Fortunately, we have several program delivery systems at our disposal. Seventy-eight of our one-hundred counties are served by Community Action Agencies and this year through a state level Economic Opportunity office we expect to be providing low income energy assistance to the other twenty-two counties. These agencies have played an important role in the Federally assisted low income home weatherization program. Each county in the state is also served by a department of social services. Collectively, these agencies have an effective outreach capability and considerable experience in dealing with the needs of lower income families.

(4) I believe we have the capacity to maintain accountability and to deliver these services in both a timely and effective manner. I would urge the Congress to allow states to choose among existing delivery mechanisms in administering this program.

I would also suggest that the Congress make every effort to assure that the low income home weatherization program which was authorized by the 94th Congress as part of the Energy Production and Conservation Act be implemented as soon as possible. Swift action on this program will permit us to spend this summer winterizing the homes of low income families. We hope to use this approach to avoid some of the hardships experienced this winter.

Your consideration is greatly appreciated.

JAMES B. HUNT, Jr.,
Governor.

Hon. EDMUND S. MUSKIE,
U.S. Senate,
Washington, D.C.

Answers to questions regarding Federal fuel assistance program—

1. Not a great need now in North Dakota some aid would be appreciated.
2. Funds will be needed to offset economic conditions of the poor in light of worsening drought conditions.
3. The Division of Economic Opportunity is in conjunction with CAP's and social services will administer funds.
4. North Dakota State Government will assure both accountability and timeliness.

Letter to follow.

ARTHUR L. LINK,
Governor of North Dakota.

[Telegram]

Hon. EDMUND MUSKIE,
U.S. Senator,
Committee on Government Operations Subcommittee on Intergovernmental Relations, Washington, D.C.

In response to your questions concerning congressional appropriation of $200,000,000 for financial assistance to the poor unable to pay increased fuel bills the following replies are given:

1. There is a definite need in New Mexico for financial assistance to poor and near poor in payment of increased fuel bills this winter. In the previous year, New Mexico community action agencies assisted 4,020 families in payment of utility bills. At least the same number of families are still critically in need of such help.

2. New Mexico's northern counties experienced inclement and harsh weather conditions through late spring months, therefore such assistance is still badly needed.

3. Such funds received by New Mexico would be channeled through the office of the Governor.

4. I am confident that this arrangement would insure accountability and timeliness in the delivery of these vital services. In the event that we are given a short time period within which to expend the funds, it may be necessary to enlist the support of other social services delivery programs to assist in the distribution of such assistance. Dependent on the amount of funding to be allocated to New Mexico, we may be unable to expend the funds within a specified time limit. In this case, provision should be made for funds to be carried over until the need for such assistance increases during the fall and winter months.

The New Mexico State Legislative has displayed a willingness to commit state resources to emergency energy conservation efforts through appropriation of $250,000 for winterization which does not allow for crisis intervention. Funding made available through your legislation would complement the services made available through the legislative appropriation. In order to fully evaluate our role in administering these funds, we would appreciate being advised of the approximate dollar amount that New Mexico would receive.

JERRY APODACA,
Governor, New Mexico.

[Telegram]

Senator EDMUND MUSKIE,
U.S. Senate,
Washington, D.C

Ohio strongly supports your proposal to provide assistance to low income families in meeting the unusually high costs of heating this winter. I urge that you consider raising the proposed amount per family from $250 to $350. This additional amount will cover other emergency assistance such as furnace repair, repair of broken water lines, and associated repairs. Please consider also the plight of our elderly citizens dependent upon social security benefits. This group will also require assistance. Cases have been reported where in the heating costs alone has exceeded the total funds available to these elderly citizens.

JAMES A. RHODES,
Governor of Ohio.

[Mailgram]

Hon. EDMUND S. MUSKIE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MUSKIE: Thank you for your kind letter. I appreciate your concern for the severe impact that the winter has had, particularly on the poor and those with fixed incomes.

Here in Oklahoma we have already begun moving in the direction which you propose. Three weeks ago, I recommended to the legislature that the monthly state supplemental grant be increased to adult categories of assistance and AFDC households. Hopefully this will help meet some of the financial problems created by rising fuel costs.

In answer to your question, there is a definite need for financial assistance in Oklahoma. Any funds which the Federal Government could provide would give meaningful assistance to those in need. If Federal funds are made available, I am confident that the welfare dept. will use current delivery systems to get the most effective use of the monies, while insuring both timeliness and accountability.

Thank you for your consideration and concern.

Sincerely,

DAVID L. BOREN,
Governor, Oklahoma.

[Telegram]

HARRISBURG, PA.

Hon. EDMUND S. MUSKIE,
U.S. Senate,
Capitol One, D.C.:

Responding your March 1st letter regarding financial assistance to low income families unable to pay high fuel bills:

1. There is need in Pennsylvania for financial assistance to poor families unable to pay increased fuel bills.

2. These funds still needed and can be used in meaningful ways.

3. Pennsylvania would use its public assistance system for distribution of these funds.

4. We can provide this assistance in timely manner with full accountability.

MILTON J. SHAPP,
Governor.

STATE OF RHODE ISLAND
AND PROVIDENCE PLANTATIONS,
Providence, R.I., March 15, 1977.

Hon. EDMUND S. MUSKIE,
Chairman, Subcommittee on Intergovernmental Relations, Washington, D.C.

DEAR SENATOR MUSKIE: In reply to your letter of March 1, 1977 requesting information to assist you in preparing an informational package for backup documentation on the 200 million dollar appropriation for state governments under the Community Services Administration program, my staff has prepared the following responses:

(1) There is a great need in my state for financial assistance to the poor and near-poor families who are unable to pay fuel bills. Through our Department of Community Affairs, we operate a monumental Crisis Intervention Program to prevent many families from utility and oil shutoffs. We initially received $98,000 from the federal government. Our State legislature appropriated an additional $300,000. We also had a statewide private contribution program called Project HEAT (Heat Emergency Action Team) which accumulated $256,000 and the Division on Aging allocated $37.800 for Crisis Intervention. This is a grand total of $691,800. We prevented about 8,000 shutoffs.

(2) Funds are still needed and it is not too late to provide meaningful assistance. At the writing of this letter, we are not in the grips of a severe cold spell. However, many of these families over the course of the next few weeks are going to be faced with a utility shutoff or an oil shutoff due to the lack of funds. Meanwhile, our Crisis Intervention Program only allowed us to provide enough money to keep the utility on or oil in the tank. It did not allow us to pay back bills. It is not uncommon, as a result of this, that many of these people have enormous back bills ranging from $200 to $500. Because of these back bills, the utility companies will shut off if payment is not forthcoming. This will of course leave them without heat for the balance of the spring and into next winter because they certainly will not be able to accumulate the money they will need to have their utility turned on. Any additional funds will at least allow the families to get out of debt and start over fresh.

(3) Our existing delivery system used our local Community Action Agencies to disburse the money, take care of the intake, and determine the need of the families. Due to the extreme amount of need, our agencies had to forego most of their other activities in order to provide this assistance. The Community Action Agencies were just not equipped to handle the number of families who were in need. We developed a system in Providence that allowed us to utilize our State Welfare Department to assist in qualifying families in need. I believe that our Community Action Agencies and our State Welfare Department would be able to handle this type of program and provide maximum service to those in need.

(4) I can assure you that our system will provide accountability and promptness in disbursing the money because we have been involved in this program for the past four years, and we have demonstrated both accountability and efficient delivery of services to our needy families in Rhode Island.

This program has been operated through the Department of Community Affairs, Division of Human Resource Development, and any additional information can be obtained through Mr. Frederick C. Williamson, Director, Department of Community Affairs. His telephone number is (401) 277-2850.

Sincerely,

J. JOSEPH GARRAHY,
Governor.

Senator EDMUND MUSKIE,
U.S. Senate,
Capitol One, D.C.

Your March 1, 1977 letter regarding financial assistance for fuel bills of low income families. Question 1. Need exist particularly if funds could be used to pay the crude bill. Question 2. Funds still needed and it is still not too late to provide meaningful assistance. Question 3. Social welfare and community action systems which would assure both accountability and timeliness. Question 4. Yes.

GOV. RICHARD A. SNELLING,
State of Vermont.

[Mailgram]

Senator EDMUND S. MUSKIE,
Chairman, Subcommittee on Intergovernmental Relations, U.S. Senate, Washington, D.C.

Governor Godwin has asked me to respond on his behalf to your letter of March 1 concerning proposed legislation which would provide financial assistance to low income families to pay high fuel bills accumulated during the winter months. As you know, Virginia was one of the States hard hit by the severe winter.

Although there were funds available in Virginia to provide emergency fuel assistance from several sources, a quick survey has indicated that most of the resources have been depleted. Information provided from community action agencies, State agencies and public utilities indicate that a need exists in Virginia. Some families in need can be readily identified in that they have delinquent fuel or utility accounts. Other families have paid their large fuel bills and are unable to adequately meet their food, housing, insurance, health and other needs.

While funds are needed in Virginia the delay in congressional action will make the program extremely difficult to administer. Certification of need will be especially troublesome.

Should Federal funds become available Virginia will continue to utilize a mechanism which includes local welfare departments, community action agencies, area agencies on aging and other local service providers.

I am confident that assistance could be provided insuring the accountability of the administering agency. The timeliness of our actions will depend upon the length of time it takes for legislation to be passed and signed by the President as well as the degree of flexibility and practicality present in the legislation and program guidelines. Obviously it will be a relatively simple matter to determine eligibility for those families and individuals who have delinquent fuel or utility accounts on record. We should also consider serving those persons in need who no longer have a fuel problem but rather a housing or health problem aggravated by their attention to their fuel bills. Determining their eligibility may be a long and arduous task.

MAURICE B. ROWE,
Secretary of Administration and Finance, Office of the Governor.

CHARLESTON, W. VA.

Hon. EDMUND MUSKIE,
U.S. Senate,
Washington, D.C.:

Thank you for your letter to discuss plans to appropriate $200,000,000 to assist low-income families to pay high fuel bills.

This is a worthwhile undertaking, because almost every family has felt the economic pinch caused by excessive heating costs during the extreme winter weather this year.

In response to your specific questions, I would like to provide the following:

(1) Welfare Commissioner Leon Ginsberg advised that emergency fuel funds were adequate to assist most families with desperate needs through February. More money could be used and applied, but some relief was available to those who sought assistance.

(2) Since heating bills are still being received by our citizens, additional relief would be welcomed, and the Department of Welfare is still receiving requests for emergency assistance.

(3) We would use any additional funds through the Department of Welfare, working in conjunction with community action agencies. I am advised, however, that these agencies serve only 41 of our 55 counties.

(4) There is some question about ability to provide accountable and timely relief through existing welfare mechanisms. Dr. Ginsberg specifically requests that SSI recipients be included in such relief, since no direct assistance is offered to persons in West Virginia by the State.

We would endeavor to obtain such accountability in any special program, and I am sure that this could be done, since funding processes would be different.

GOV. JOHN D. ROCKEFELLER IV,
State of West Virginia.

STATE OF WISCONSIN,
OFFICE OF THE GOVERNOR,
Madison, Wis., March 14, 1977.

Hon. EDMUND S. MUSKIE,
U.S. Senate, Committee on Government Operations, Subcommittee on Intergovernmental Relations, Washington, D.C.

DEAR SENATOR MUSKIE: Thank you for your letter of March 1 regarding the congressional proposal to appropriate $200 million for state governments to provide financial assistance to low income families unable to pay high fuel bills accumulated during the bitter cold this winter.

As you will recall, we presented testimony to your committee on February 3 in support of such a program and have worked with Representative David Obey from the 7th Congressional District in Wisconsin to get the proposal introduced in the House of Representatives. We were disappointed, of course, in the outcome of the House Appropriations Committee vote on March 10 and support Mr. Obey's efforts to have the appropriation restored by the full house.

Our response to your specific questions regarding this proposal are as follows:

1. Is there a need in your state for financial assistance to poor and near poor families and individuals who are unable to pay increased fuel bills this winter?

As we indicated in our testimony for your committee, the average cost of all heating fuels in Wisconsin increased 54% between January 1976 and January 1977. In addition, the heating season has been 29% colder this year than previous year resulting in a 29% increase in fuel use for space heating as a result of the bitter cold. Recent statistics suggest that approximately 10,500 Wisconsin households have requested emergency fuel assistance this winter with thousands more crises forestalled by a Public Service Com-

mission moratorium on shut-offs by regulated utilities.

2. Are these funds still needed, or is it too late to provide meaningful assistance?

The above mentioned moratorium expires on April 1, 1977 and we anticipate many more crises with several months of the heating season still ahead in Wisconsin. During the winter of 1976, over 5,000 households were affected by the expiration of that year's moratorium and the increased cold coupled with the 62% increase in the price of natural gas can be expected to significantly increase that number in three weeks when the current order expires.

3. If provided Federal funds, what existing delivery system would your state use to make assistance available to those in need?

In Wisconsin, the state is the grantee for the current Community Services Administration weatherization/emergency fuel assistance programs and has contracts with all of the Community Action Agencies in the state for administration of the program on a statewide basis. We would anticipate continued utilization of that delivery mechanism for the proposed program.

4. Are you confident that your state government could provide this assistance in a manner that assures both accountability and timeliness?

Because the program is already administered on a contractual basis in the state and because we have an existing formula for distribution of funds within the state, we would expect to be able to make the funds available by amendments to our existing contracts as quickly as we receive them. We held a training program for all Community Action Agencies on February 24, 1977 to acquaint them with the proposed procedures they will be expected to follow to assure both timeliness and accountability if these funds become available.

Thank you again for your concern in this very important matter.

Sincerely,

PATRICK J. LUCEY,
Governor.

FUEL BILLS AND FUEL CUT-OFFS

(A survey of the impact of this winter's below normal temperatures on utility customers, by the staff of the Subcommittee on Intergovernmental Relations of the Governmental Affairs Committee, Mar. 21, 1977)

INTRODUCTION

In order to determine the plight of people unable to pay their fuel bills this winter, the staff of the Senate Subcommittee on Intergovernmental Relations surveyed 48 State utility commissions and 46 utility companies in 44 States. The survey was conducted by telephone during the period between February 16 and March 18, 1977.

SUMMARY

In summary, the subcommittee staff found that—

1. There is substantial evidence that amounts owed utility companies in unpaid fuel bills have increased dramatically this winter over last;

2. There is evidence that, in many States, utility companies substantially reduced the number of utility consumers cutoff for failure to pay during the height of the winter, but there is a growing indication that cutoffs will increase this spring;

3. Twenty-eight States have no regulations or agreements with utility companies which prohibit cutoffs of utilities for failure to pay;

4. Only 11 States have regulations which prohibit utility cutoffs for failure to pay; and

5. Eight States have informal agreements with utility companies which have the effect of limiting cutoffs.

BACKGROUND

This winter's cold has resulted in much higher energy consumption throughout the nation—23 percent higher than last year. Also, throughout this winter, energy prices have continued their upward spiral.

This combination of higher prices and increased consumption has caused utility bills for residential consumers to sky-rocket. The Congressional Research Service of the Library of Congress estimates, in fact, that U.S. consumers will spend $8.4 billion more to keep warm this winter than last—an average increase of $139 per household.

Such dramatic increases in fuel bills have inevitably led to an increase in the number of families and individuals unable to pay them.

THE STUDY

As was indicated above, this staff study is based on data collected from two sources—State utility commissions and utility companies. The survey of State commissions was conducted first, during the week of February 16–23. In this survey the subcommittee staff tried to collect information about commission rules and regulations on utility cutoffs as well as information about the number of cutoffs and the amount owed utility companies this winter. While the State commissions were able to provide information about their own rules and regulations, they had little information about the number of cutoffs and the amounts owed utilities.

To collect this additional data, the subcommittee staff began a telephone survey of large utility companies. An effort was made to contact at least one such company in each State. Data from 46 companies in 44 States are included in the study.

For the purpose of this study the subcommittee staff was only able to contact a limited number of electric and gas utilities. And while this staff survey does not represent a scientific sample of the gas and electric utility companies, it does include sufficient information to draw conclusions about broad trends.

Further, it is important to note that this survey only includes information about residences heating with natural gas and electricity. It does not include information about homes heated by other fuels such as coal and fuel oil. Because these fuels are often distributed by small dealers, the staff concluded it would be difficult to ascertain reliable data about them. In all, more than one-fourth of the homes in the nation are heated by fuels, other than gas and electricity, mostly number 2 fuel oil.

The poor rely even less on natural gas and electricity for home heating than do more affluent segments of the population. According to statistics compiled by the Washington Center for Metropolitan Studies, 54% of the poor use natural gas for home heating, 8% use electricity, 23% use fuel oil including kerosene, 9% use bottled gas, and 9% use other fuels or none. (The different fuels add to more than 100% because some households use more than one fuel for heating.)

All of this means that this study represents only a portion of the problem that resulted this winter.

THE SURVEY OF STATE UTILITY COMMISSIONS

State governments have broad powers to regulate the activities of utility companies. Through State utility commissions, almost every aspect of utility activity is scrutinized and controlled.

The staff began its efforts to determine the effects of this winter's severe cold on utility customers by surveying the State utility commissions with the questionnaire below. The staff was able to obtain a response from States with its telephone survey. However, as mentioned before, the State commissions were in general unable to answer questions about amounts owed utility companies and the number of cutoffs made by utilities this winter. So, only questions 1 and 2a, b and c are treated in this part of the study.

THE QUESTIONNAIRE

(1) Has your commission ordered a moratorium on utility disconnects for failure to pay bills this winter?

(2) If yes, (a) When was it first put into effect?

(b) When will it expire?

(c) Has any such action ever been taken previously in your State?

(d) How many consumers have been affected by the order (that would have had their utilities cutoff otherwise)?

(e) How much money is owed to the utilities because of this order?

(f) What percentage of consumers in your State use fuels whose suppliers are not covered by your commission?

STATES WITH NO REGULATIONS AGAINST UTILITY CUTOFFS

The following twenty-eight States reported that they have no regulations prohibiting utility cutoffs—

Arizona, Arkansas, Colorado, Delaware, Florida, Idaho, Iowa, Indiana, Kansas, Louisiana, Michigan, Missouri, New Hampshire, Nevada, New York, North Carolina, North Dakota, Oregon, Rhode Island, South Carolina, Tennessee, Texas, Utah, Vermont, Washington, West Virginia.

While these States have no moratorium regulations, seven—Idaho, South Carolina, Vermont, Maryland, New Hampshire, West Virginia and Texas—indicated that utilities must give notice or contact the Welfare Department before cutting off service. This barrier serves as a cushion and gives some consumers the opportunity to take advantage of programs designed to assist those unable to pay their bills.

Michigan prohibits cutoffs for families with illness.

Three of these twenty-eight State commissions—Tennessee, Iowa and Indiana—said that utilities in the States were attempting to help people faced with enormous fuel bills by allowing them to pay out their accounts over an extended period. While no other specific information was collected, there is evidence that this practice exists in many other States.

Two State commissions, Missouri and West Virginia indicated that at the time the study was conducted they were considering regulations which would prohibit utility cutoffs for failure to pay bills.

STATES WITH REGULATIONS PROHIBITING CUTOFFS

Alabama, Illinois, Mississippi (only a resolution urging no cutoffs), New Jersey, Wisconsin, Ohio and Pennsylvania have taken action this winter to prohibit fuel cutoffs this winter. Four other States, Oklahoma, Maine, Minnesota and South Dakota have had rules which prevent cutoffs under certain circumstances existing before this winter.

Typical of those States which acted this winter to prohibit cutoffs, is the short duration of the moratorium periods. In Illinois, the moratorium lasted 15 days, from February 1 to February 15 and has since been replaced by a voluntary program. In Alabama, the moratorium ran from January 18 to February 15. Mississippi's action, which was in the form of a resolution urging utilities not to be cut off covered only the month of February. New Jersey's regulation was put in plan January 31 and was in effect until March 1. Ohio's runs from January 23 to the end of March. Wisconsin's regulation covers

the period between November 30 and April 1. Only Pennsylvania has regulations which will stay in effect until removed by the Commission. The Pennsylvania rule took effect January 18, 1977.

Those States which are relying on regulations put in place before this winter, have more general prohibitions on disconnects which do not expire. Oklahoma, for example, prohibits cutoffs when the temperature is below 10 degress or on weekends. Minnesota prohibits cutoffs at temperatures below zero. South Dakota, simply prohibits cutoffs during the winter months.

STATES WITH INFORMAL AGREEMENTS WITH UTILITY COMMISSIONS

Eight States, California, Georgia, Kentucky, Massachusetts, Montana, Virginia, Connecticut and New Mexico have, as was charatcerized by the Montana Commission—"Gentlemen's Agreements"—not to cut off service during the cold months.

The Massachusetts example is fairly typical. In Massachusetts, no actual rules against cutoffs have been made. But, the utility companies have "promised" not to turn off residential users. This promise notwithstanding, the Commission reported that the utilities" retain the rights to threaten."

None of the States with these informal agreements with utility companies indicated that they monitored the activities of the companies in this regard.

(Attached is a company by company breakdown of the information provided the subcommittee by each utility company responding with substantive information to the subcommittee's telephone survey.)

THE SURVEY OF UTILITY COMPANIES—AMOUNT OWED

The subcommittee staff found that utility companies in 28 States are owed more this winter than last. The average increase in these 28 States was found to be 34.12%. In some States, Illinois for example, the increase was relatively minor—3.39%. But in others, the increase in amounts owed is dramatic. In Ohio, Pennsylvania and Utah the increase is approximately 41%. In Louisiana the increase is 57% and in Kansas, the utility company is owed 72% more this winter than last.

The staff found that eight States had the amounts owed decreased. In general, these decreases were small, averaging only 3.32%. The largest decrease in amounts owed was found in the Idaho utility company which had a decrease of 4.1%.

The staff found four States which reported that accounts receivable were the same this winter as last.

No figures were available from 12 States which were contacted by the staff.

From this information the staff has concluded that amounts people owe for fuel bills are much higher this winter than last, particularly in those States which experienced colder than normal temperatures this winter. Reinforcing this conclusion is the fact that of those eight States that reported to the subcommittee that their accounts receivable had decreased, six—Arizona, Montana, North Dakota, Oregon, South Dakota and Idaho—had above normal temperatures for most of this winter. Another of the eight, Illinois, attributes its decrease in accounts receivable to a widespread and sophisticated media program urging customers to take advantage of the company's deferred payment program.

It is further important to note that this survey, made in late February and early March, reflects only information available to the companies at that time. This means that most companies provided the subcommittee staff with accounts receivable information through the month of December. As a result the figures represent a period which preceded the most severe impact of the cold this winter, which occurred in late December and throughout January. Several company representatives predicted accounts receivable for many utility companies included in the survey would increase dramatically when figures become available for the months of January and February.

DISCONNECTS THIS WINTER

As the second part of this survey of utility companies, the staff sought to determine the number of customers disconnected from service this winter for failure to pay as compared to the number of customers disconnected last winter. The staff found that in 15 States the number of customers disconnected this winter had decreased compared to last winter. In these States, disconnects have decreased almost 37% from last year.

In some of the States, Alabama for example, with a decrease of 3%, the reduction this winter over last has been slight. But in others like Pennsylvania where disconnects have dropped almost 60% this winter, the reductions have been dramatic.

In four of these States, Alabama, Illinois, Oklahoma and Pennsylvania—this reduction is attributed to State utility commission regulations prohibiting cutoffs for at least part of the winter. Two other States—Oregon and Washington—report fewer cutoffs this winter because the weather this winter has been warmer than it was last winter.

The staff found that in 10 States disconnects for failure to pay have increased this winter over last. Disconnects have increased an average of 22.6% in these States.

At the low-end, North Carolina reports an increase in disconnects of 11%. But in Montana, the utility company reported an increase of 48.5% (the utility company in Florida supplied the State commission with no hard data).

Important to note, however, is that in two of these States, California and Montana, the weather has been relatively warmer this winter than last. And the New York utility reported that its disconnects had increased this winter primarily because of a new liberalized payment program. Under that plan, customers are allowed to pay small amounts on outstanding bills, but are immediately cut off if they pay nothing. The result of this new program has been an increase in the number of disconnects. Further, in at least one State, Vermont, while the percentage increase in disconnects is significant at 38%, this percentage represents only 23 more actual disconnects this winter than last.

Twelve States reported that the number of their disconnects is about the same this winter as last.

This information from utility commissions, though mixed, indicated that in several States, utility companies have reduced the number of those disconnected for failure to pay. However, in recent days, the staff has found increasing information that this trend may not continue and that, in fact, utility companies may soon increase the number of cutoffs of those so far unable to pay their fuel bills this winter.

Most recently the staff has gathered the following*—

The Wisconsin Gas Company of Milwaukee has sent out 25,000 disconnect notices effective April 2, the day after the State's moratorium on cutoffs expires. According to company officials, this 25,000 is only part of the 58,000 customers in the Milwaukee area behind in their payments, representing over $7 million in outstanding bills.

The Washington Gas Light Company in Washington, D.C. told the subcommittee that through the winter no customers had been cutoff for failure to pay. But, that for the month of February, 40,000 customers were eligible for cutoff (compared to 35,000 in February 1976) and that while the company had not decided when to begin to cut these customers off, according to a company spokesman, it is simply a matter of time;

A Columbus Gas Company representative in Ohio told the subcommittee that beginning April 1, the company would resume disconnecting those unable to pay. While no specific figures were available from the company, the spokesman said disconnects would be increased over last year;

On April 1, the Valley Gas Company of Rhode Island will begin disconnecting customers who have not paid so far this winter. According to a company spokesman, the number of cutoffs will probably be triple the number of cutoffs last year.

A representative of the Pennsylvania Utility Commission told the subcommittee that while the cutoff moratorium is still in effect in the State, as soon as it is lifted, cutoffs will begin and many thousands of customers are likely to be affected.

*This information was collected March 18, 1977, and does not appear in the charts appended to the study.

SUMMARY TABLE OF INFORMATION PROVIDED BY COMPANIES SURVEYED

	No. of disconnects this year compared to last year	*Amount owed*	*Other*
Alabama:			
Alabama Gas Corp.	Only about 1,000 less 23,118—Calendar year 1975 22,414—Calendar year 1976 decrease 3.05 percent Jan. 1977	Calendar year 1976 $11,425,000 (this amount higher than normal)	Bills are 40 percent above normal this winter
Arizona:			
Arizona Public Service Co. Customers: Electric—394,930 Gas—312,564	Calendar 1976—14,281 98 percent residential	1975—83,000 delinquent accts. 1976—85,532 delinquent accts. 2.96 percent increase *Write-offs:* 1975—$1,300,000, 1976—$1,545,729, 16 percent increase	32 percent warmer (Oct.-Feb.) than 1975; Only 10 percent of those who receive notices are actually cut-off

SUMMARY TABLE OF INFORMATION PROVIDED BY COMPANIES SURVEYED—Continued

Arkansas:			
Arkansas-Louisiana Gas Customers: 345,185	No disconnects Dec., Jan., and Feb.	No record	Consumption up 30 percent
California:			
Public Utility Commission Customers: 3,000,000		Jan. 1976—$26,184,000, Jan. 1977—$29,770,000, 12.5 percent increase	Winter period is warmer (Nov.-Apr.)
Colorado:			
The Public Service Co.	About the same as last year (2060 Jan. 1976)		Bills up about 20 percent above last year
Delaware:			
Chesapeake Utility Co. Customers: Residential 14,000—67 percent Delaware 33 percent Maryland	No record. Never disconnect in extreme cold	Increase in amount owed	36 percent colder
Florida:			
Florida Gas Co. Customers: 76,473	Jan. 1977-984	Jan. 1976—$390,856 Jan. 1977—$588,508 commercial, retails, hotels 33.59 percent increase	29.7 percent increase in revenues this year. Average bill up 30.7 percent degree days increase 71.46 percent
	No. of disconnects this year compared to last year	*Amount owed*	*Other*
Georgia:			
Atlanta Gas & Light	Jan.-Feb. 1976-4052; Jan.-Feb. 1977-969; decrease 76 percent	Jan. 1977—$54,651,000 Only about 20 percent delinquent (Apr. 1976 only $38.7 million)	Disconnects this year occurred before Jan. 13 or after Feb. 15
Idaho:			
Intermountain Gas Co. Customers: 85,016	Jan. 1977—209; Jan. 1976—Slightly higher	Jan. 1976—$901,446 24.69 percent (of total revenue) Jan. 1977—$978,519 20.59 percent (of total revenue)	Average bill increase 21.3 percent—degree days increase
Illinois:			
Northern Illinois Gas Customers: 1,300,000	Jan. 1976—32,500 eligible Jan. 1977—26,000 for cut-off—percent of actual cut-offs this year low because of Feb. 1-15 moratorium and voluntary program afterwards company said only 11-14 percent eligible were actually cut-off—Jan. 1977 583 cut-offs	Jan. 1977 $2.8 million down from $3.3 million for Jan. of 1976 decrease 16 percent	Attribute lower amounts owed and lower numbers eligible for cut-offs to media program urging budgeting
Commonwealth Edison Co. Customers: 2,777,618	Approximately 9,000 in Jan. 1977—Dec. 1976—10,901. (11,-209 in Dec. 1975) decrease 2.75 percent (Dec. 1975-76) decrease 17.44 percent (Dec. 1976-Jan. 1977)	Jan. 1976 $11.4 million Jan. 1977 $11.8 million increase 3.39 percent	40 percent increase in average bill
Indiana:			
Northern Indiana Public Service Co. Customers: 484,067	Jan. 1976—1194; Jan. 1977—720; decrease 39.7 percent	Increase of 20 percent in past due accounts	No policy regarding disconnects but weather conditions are taken into account. 42 percent increase in average bill
Iowa:			
Iowa-Illinois Gas & Electric Customers: 205,000 gas 160,000 electric	Jan. 1976—93; Jan. 1977—57; 38.71 percent decrease	Jan. 1976—$1.4; Jan. 1977—$1.9; 26.32 percent increase	Average bill increase 29.77 percent
Kansas:			
The Gas Service Co. Customers. Approximately 800,000	Jan. 1976—848; Jan. 1977—284; decrease 66.51 percent	$9 million in delinquent accounts up 3½ times over normal	Consumption up 20 percent Cost to customers up 50 percent from last year
Kentucky:			
Louisville Gas & Electric Customers: Gas 215,000 Electric 200,000	No cutoffs this winter—self-imposed policy	Unpaid bills up 41 percent	Sales up to 32 percent—deal with problems on a case-by-case basis
Louisiana:			
Louisiana Gas Service	Jan. 1976—1205; Jan. 1977—1468; increase 17.92 percent	Jan. 1976—$21,000; Jan. 1977—$49,000; 57.14 percent increase (This is amount of money due at point of disconnect)	Normal degree days: Jan. 960—actual this year 1561. Average bill up 26 percent
Maryland:			
Baltimore Gas & Electric	Jan. 1976—2,535; Jan. 1977—2,014; 20.55 percent decrease	Jan. 1976—$10,468,349 17.33 percent (of total Jan. 1977—revenue) $12,036,977 17.05 percent (of total revenue)	Average bill up 15.44 percent
Massachusetts:			
Boston Gas Co. Customers: 480,000, 50 percent are heating	None (delinquent accounts up to 30,000 from 28,000 last year) increase 6.66 percent	Bills due have increased by 35 percent	Bills up 10 percent
Minnesota:			
Minneapolis Gas Co. Customers: 390,000	None during winter months	Delinquent accounts are slightly higher	Consumption up 22 percent Bills are up 33 percent ½ of customers are budget accounts

SUMMARY TABLE OF INFORMATION PROVIDED BY COMPANIES SURVEYED—Continued

Mississippi:			
Valley Gas Co. Customers: Residential 180,000	Dec. 1976–Jan. 1977—1,171; cut-offs before Feb. moratorium (no figures for last year)	Dec. 1975—$241,354 Dec. 1976 $422,718 increase 42.9 percent. (However decrease 26.39 percent actual no. delinquent acct.)	Bills have increased 40–42 percent over last year
Montana:			
Montana Gas Co. Res. customers 175,296 electric 89,672 gas	Jan.–Dec. 1975–268; Jan.–Dec. 1976–521; increase 48.56% (includes commercial/industrial customers)	1975—$123,824; 1976—$123,501 (decrease .25%)	Temperature 16 percent warmer Decrease MCF usage: Jan. 1976–23.4; Jan. 1977—21.4
New Hampshire:			
The Public Service Co. 27,000 electric space heating customers.	December 1975—101; December 1976—47 (decreased 53.47%)	NA	Customers unable to pay bills are generally carried over till warmer months
New York:			
Brooklyn Gas; 1,100,000 customers	Jan. 1976—3,400; Jan. 1977—4,096	NA	34.4 percent increase in bills this winter

NOTE.—75 percent of customers are on budget plan which allows bills to be paid out over 12 months. According to company officials, budget billing has served to decrease number of delinquent bills and increase number of cutoffs.

	No. of disconnects this year compared to last year	*Amount owed*	*Other*
North Carolina:			
North Carolina Public Service Co. 95,929 residential	Jan. 1976—331; Jan. 1977—372 Increase 11.02 percent	Jan. 1976—$569,432; Jan. 1977—$823,480 (increase 30.85 percent)	22 percent increased consumption
Ohio:			
Columbia Gas Co. Customers: 1,841,865 in Ohio, Kentucky, West Virginia, Virginia, Maryland, Pennsylvania, and New York	NA	Jan. 1976—$16,848,862; Jan. 1977—$11,376,010; increased 33 percent.	Amount billed up 26.5 percent.
Oklahoma:			
Oklahoma Natural Gas Customers: 124,000 Tulsa area	Nov.–Feb. 1975–76—5,869; Nov.–Feb. 1976–77—4,160; decrease 29.12 percent	Higher than last year although total number of delinquent accounts is down. Precise data is not available	Tulsa is area of low unemployment
Oregon:			
Northwest Gas Co. Customers: 205,190	Jan. 1976—844; Jan. 1977—519; 38.51 percent decrease	Jan. 1976—$2,293,081; Jan. 1977—$2,160,270; 1.94 percent decrease	Average bill up 17.28 percent use per customer—down this winter
Pennsylvania:			
Peoples' Gas	Nov.–Feb. 1975–76—397; Nov.–Feb. 1976–77—162 (6 cut-offs Jan. 1977—0 cut-offs Feb. 1977) decrease 59.19 percent	Jan. 1976—$2.5 million; Jan. 1977—$4.2 million; increase 40.48 percent	Bills up average of 54 percent this winter 6.2 MCF usage increase Temp: 25 percent colder
Rhode Island:			
Valley Gas Customers: 25,000 heating	None this winter. Period of two months. Will increase drastically Mar.–Apr.	Writeoffs: 1975—$61,000; 1976—$109,000	62 percent increase in consumption; Average bill up 50–30 percent colder CAP help pay bills
Providence Gas Customers: 96,000 Residential	Shutoff constant from last year	Writeoffs: 1975—$482,000; 1976—$859,000; Increase 44 percent	Increase in use of budget plan
South Carolina:			
South Carolina Electric & Gas Co.	Feb. 1976—2,678; Feb. 1977—3,151; Increase 16.6 percent	Feb. 1976—$2,646,344; Feb. 1977—$3,120,426; Increase 15.19 percent	
South Dakota:			
Northwest Public Service Co. Customers: 47,500	No disconnects for nonpayment	Jan. 1976—$1,205,925; Jan. 1977—$1,196,628; Decrease 0.77 percent	Improved collecting process
Tennessee:			
Nashville Gas Co.	Feb. 1976—1,359; Feb. 1977—1,147; Decrease 15.6 percent; Jan. 1977—only 417	Feb. 1976—$1,061,721; Feb. 1977—$1,381,387; Increase 36.85 percent	Due to extremely cold weather, the company only cutoff five days during Jan. average bill up 22.31 percent
Texas:			
Lone Star Gas Customers: 1,000,000	Never cut-off residential customers	Uncollectable amounts seeing substantial increase	38 percent colder. No type of "budget" program for bills
Utah:			
Mountain Fuel Supply Customers: Covering Wyoming and Utah	Jan. 1976—434; Jan. 1977—352; Decrease 18.89 percent	Jan. 1976—$1,299,013; Jan. 1977—$2,231,881; Increase 41.8 percent	22 percent increase in amount of bill
Vermont:			
Vermont Gas System, Inc. Customers: 10,000—90 percent residential	Dec. and Jan. 1975–76—38; Dec. and Jan. 1976–77—61; increase 38 percent	No increase	CSA and OEO drastically reduced the number of potentital shutoffs this winter
Washington:			
Washington Natural Gas	Jan. 1976—1,600; Jan. 1977—1,100; decrease 31.25 percent	Jan. 1976—$1,635,178; Jan. 1977—$1,807,901; increase 9.55 percent	25 percent warmer. 7.5 percent increase in average bill
Wisconsin:			
Madison Gas & Electric Co. Customers: 94,439; 2.65 percent increase over last year	Jan. 1976—4,872; Jan. 1977—5,783; increase 15.75 percent	No figure for dollar amount. Number of delinquent accts. Jan. 1976—11,516; Jan. 1977—13,530; increase 14.89 percent	Increase in average bill 29.1 percent

ON WATER POLLUTION FUNDING

Mr. MUSKIE. Mr. President, I would like to take this opportunity to commend Senator PROXMIRE, chairman of the subcommittee, and the members of the full Senate Appropriations Committee for responding to our Nation's critical need for funds for construction of sewage treatment facilities. As many as 34 States are on the verge of running out of funds for this program. As I have said on several occasions in the past few months, and most recently in a committee discussion on March 30, failure to provide funds promptly for this program would have a disruptive effect on State and municipal programs which have geared up over the years to levels which require and deserve a continued Federal commitment.

The Senate committee recognized this need, and this bill includes a full appropriation. President Carter also recognized this need, and requested $4.5 billion in supplemental budget authority. The inclusion in this measure of $4.5 billion for construction of sewage treatment facilities is recognition of both the environmental and economic importance of this program. This is a legitimate and integral part of an economic stimulus package. This money can move quickly into the economy to initiate construction of sewage treatment plants, plans for which are ready and waiting to go. Jobs can be quickly created—at least 40,000 direct jobs result from each billion dollars expended in this program. The ripple effects are substantial, but difficult to exactly calculate. And, equally important, we achieve water quality benefits at the same time.

Unfortunately, the House appropriations measure provides only for $500 million to assist the House Public Works Committee in their effort to force the Senate to accept their water pollution bill. This amount is totally inadequate, especially in light of a survey released by the National Governor's Conference which shows over $3 billion in immediate needs among 34 States—3 billion which could go to work immediately making 120,000 jobs. In addition, this $500 million is to be distributed to each of the 50 States regardless of need according to an allotment formula provided in the bill so that no State would receive enough to even begin work on the backlog of projects ready to start construction.

For example, my own State of Maine, which has an immediate backlog of at least $23 million, would receive only $2.7 million. The State of Illinois, which indicates the greatest immediate needs—over $400 million—would receive only $26.3 million under the House language. These amounts are, as a practical matter, of little value. Also, since every State would receive a portion of the $500 million, and since not every State can use that money, it is certainly a poor use of limited funds to tie up allotments in States which are not running out of money. Since this is an "emergency" situation, it seems eminently logical, if funds are limited, to put them where the most need it.

I know that conference negotiation can be difficult and that Senators on the conference committee may be faced with demands to compromise on the amount to be provided for the construction grant program. I believe that a strong case can be made for appropriation of the full $4.5 billion. The Senate Committee on Environment and Public Works was convinced; the Senate Appropriations Committee was convinced; and the President was convinced. Full allotment to all 50 States can be justified if there is full appropriation on the basis that adequate funds can be made available to all States.

However, if the Senate committee is forced to accept an amount less than $4.5 billion in conference, I would urge that it be made available only to those States who have exhausted allocations of previously authorized funds. This procedure would assure that funds are directed to the areas where they can be used to clean up water and put people to work. It would avoid tying up needed funds in States unable to use them.

I hope my colleagues in the Senate who responded so well in committee will continue to support full funding of this important program; if you are forced to compromise, I hope you will make the funds available on a first come-first served basis.

Mr. STAFFORD. Mr. President, as the ranking minority member of the Senate Committee on Environment and Public Works, as well as the Environmental Pollution Subcommittee, I would like to take this opportunity to make some observations of my own on the appropriation of funds for the Environmental Protection Agency's construction grants program.

In recent weeks my colleagues on this committee and I have worked to authorize sufficient funds for this fiscal year and next to provide for States which have run out of their allotments and need a new infusion to continue the momentum of the construction grants program. While many of the States find themselves in this position, others will not have exhausted their shares until the end of this fiscal year. However, they still must rely on an allocated share to demonstrate to local communities that it is indeed worthwhile to press ahead with plans and local financial arrangements. It is a fact of life that if there is no assurance that funds are waiting for the projects once they are ready to go to construction, there is little incentive to make the often difficult planning and financial decisions at the local level. The majority of States will find themselves in this predicament.

It is for this reason that it is imperative that the full $4.5 billion recommended by the President for this fiscal year, and allocated by the Senate Appropriations bill's formula, be retained in conference. I would hope that the members of the Appropriations Committee who will serve on the conference with the House on the bill before us will insist on the Senate's version. I congratulate the members of the Appropriations Committee for including the President's full request in the fiscal year 1977 supplemental appropriation bill, and I urge that this amount be retained in conference.

However, should a lesser amount be required in order to reach agreement with the House, I would urge that, whatever the appropriated amount, it be allotted to all States on the basis of the Senate's formula. I do this on behalf of those States which have not yet run out of funds, but will by the end of this fiscal year.

The Appropriations Committee recognizes that because of varying circumstances at the local level some States take longer than others to get projects to the point of a grant award. Often, it is EPA rather than the States which are the cause of the lag in the obligation rate. Recognizing this, the Senate bill provides that these funds be made available for obligation to projects for 3 years from the date of enactment. Whatever the reason, it is clear that all States will be in need of a new allotment beginning in October or soon thereafter. The funds which are being appropriated today must be adequate to fund these States, as well as those which are already out of money.

The Environmental Pollution Subcommittee has always relied on a carefully considered formula for the fair and practical distribution of construction grant funds. In order to keep the program working in an orderly fashion, it is important that the formula in the Senate's bill be used to distribute this appropriation.

If we resort instead to awarding grants on a first come basis we will undo the careful work we have pursued for the past 4 years in this program, and we will place the majority of States at a disadvantage in sharing the limited funds available for this program.

SUPPORT FOR SECTION 306

Mr. DOLE. Mr. President, I want to express full support for section 306 of the supplemental appropriations bill for 1977, which restricts the use of funding included in this bill from use in implementing the Presidential pardon of draft evaders. I urge my colleagues on both sides of the aisle, who are concerned about the blanket pardon of draft violators, to support this section of the appropriations bill.

On January 21 of this year, President Carter issued an Executive Order requesting the Attorney General to dismiss pending indictments and terminate pending investigations relating to violations of the Selective Service Act between August 4, 1964, and March 28, 1973. At the same time, the President ordered that all persons in actual or apparent violation of Selective Service laws during that period be permitted to reenter the United States. Neither the U.S. Senate nor the House of Representatives has yet had an opportunity to directly express its support or lack of support for that blanket pardon. As an Executive order, the pardon required no congressional consent. But it is nevertheless disappointing that we have not had the chance to place this body on record with respect to the Executive order.

The section in question simply states that no funding in this bill shall be used for salaries or expenses in carrying out the terms of the Executive order. This

section does not reverse the pardon, nor does it impose any additional duties upon the executive branch. In effect, however, it will finally place Congress clearly on record as disfavoring the blanket pardon of draft evaders last January.

ATTACHED AS HOUSE AMENDMENT

When the supplemental appropriations bill was discussed on the floor of the House of Representatives on March 16, Congressman JOHN T. MYERS of Indiana offered this provision as an amendment to the bill. At that time, Congressman MYERS made it clear that the provision does not challenge the constitutional authority of a President to issue a pardon for draft law violations, but instead is a simple exercise of the clear congressional authority to appropriate funds and to stipulate how those funds may or may not be used. A point of order was raised at that time, suggesting that this provision might constitute a form of "legislation" on an appropriations bill. That issue was carefully considered and completely rejected by the presiding officer of that body, who overruled the point of order. It is my understanding that the same point of order cannot now be raised against the provision on the Senate floor since it was ruled in order and finally approved by the House of Representatives.

TO REGISTER PUBLIC OPINION

The primary purpose of this provision is to register a legitimate congressional opinion about the arbitrary executive action taken by the President in January. I do not want to overstate the practical impact of the provision. At the same time, I would not want to see its symbolic significance diminished. The House of Representatives, on a rollcall vote of 220 in favor to 187 against, clearly expressed support for the provision and, therefore, objection to the blanket pardon of draft evaders. I believe that action likewise reflects the attitude of the majority of American citizens.

While the restriction and limitation on funding for implementation of the pardon apply only to the supplemental appropriations provided by this bill, the intent of the action is much broader. It is not a challenge to the President's authority, but only to his judgment on this particular matter. It is a legitimate expression of congressional discretion as to how appropriated funds can be used. It will apply only to supplemental appropriations for the Office of the Attorney General and for the Immigration and Naturalization Service, with regard to actions that might be taken to carry out the blanket pardon for draft evaders.

Insofar as this may be the only opportunity for Congress to place itself squarely on record with regard to the blanket pardon issue, I believe it is useful for the Senate to give strong support to section 306 at this time.

Mr. President, I ask unanimous consent that the text of section 306 be printed at the completion of my remarks.

There being no objection, the section 306 was ordered to be printed in the RECORD, as follows:

"SEC. 306. None of the funds appropriated or otherwise made available in this Act shall be obligated or expended for salaries or expenses in connection with the dismissal of any pending indictments for violations of the Military Selective Service Act alleged to have occurred between August 4, 1964, and March 28, 1973, or the termination of any investigation now pending alleging violations of the Military Selective Service Act between August 4, 1964, and March 28, 1973, or permitting any person to enter the United States who is or may be precluded from entering the United States under 8 U.S.C. 1182(a)(22) or under any other law, by reason of having committed or apparently committed any violation of the Military Selective Service Act."

Mr. PACKWOOD. Mr. President, in reading the Senate report accompanying this bill, I noticed that the report indicates that $10,000,000 is being distributed to "Washington State University and the Pacific Northwest" for the development and expansion of a regional veterinary school. This appropriation is authorized under section 301 of the Health Manpower Act of 1976.

As a matter of clarification, it is my understanding, Senator BROOKE, that the $10,000,000 in construction funds are being distributed not just to Washington State University, in particular, but to a Northwest Regional program located at Washington State University, Oregon State University at Corvallis, and the University of Idaho. It is also my understanding that it is anticipated that the major portion of the funds will be used for the construction of a clinical facility at Oregon State University and the remainder for remodeling and rehabilitating existing facilities at the Washington State and University of Idaho campuses. Am I correct in these assumptions?

Mr. BROOKE. Yes, that is correct.

Mr. MUSKIE. Mr. President, the bill before us today, H.R. 4877, supplemental appropriations for fiscal 1977, consolidates supplemental recommendations from 12 of the 13 appropriations subcommittees into a single bill involving 14 of the 17 functions of the Federal budget. This bill and the economic stimulus supplemental, reported on March 17, will probably be the two major supplemental appropriations bills for fiscal 1977. This supplemental provides 1977 budget authority of $32.1 billion to fund numerous items, most of which could not be included in the regular appropriations bills last summer, such as the increased civilian and military Federal pay costs; the EPA construction grant reauthorization, which passed the Senate on March 10, and is presently awaiting conference; the emergency fuel bill assistance program necessitated by this winter's severely cold weather; and certain higher education and health programs which were not reauthorized in time for inclusion in the regular Labor-HEW appropriations bill for 1977.

As chairman of the Budget Committee I would like to bring to my colleagues' attention the latest issue of the Senate Budget Scorekeeping Report No. 77-18, dated March 28, 1977. That report estimates that the potential status of the Federal budget, including the amounts in this bill, the Senate-reported economic stimulus supplemental and tax reduction bills, and a few other possible later requirements, is $2.4 billion in budget authority and $1.5 billion in outlays below the ceilings set in the third budget resolution for fiscal 1977. Mr. President, I ask unanimous consent to place in the RECORD a table indicating the status of the congressional budget

The PRESIDING OFFICER. Without objection, it is so ordered.

SUMMARY TABLE 3.—*Fiscal year 1977 budget authority and outlays*

[In billions of dollars]

	Fiscal year 1977 direct spending jurisdiction	
	New budget authority	Estimated outlays
I. Third concurrent resolution ceiling	$472.9	$417.45
II. Action to date:		
A. Enacted in prior years	476.6	457.7
B. Enacted this session	0.2	0.2
C. Passed Congress but not signed	−0.7	(1)
D. Conference agreement	------	------
E. Passed Senate	------	0.1
F. Reported in Senate	50.2	15.8
G. Offsetting receipts	−61.2	−61.2
Total action to date	465.2	412.6
III. Current status:		
Under (−) or over (+) 3d Con. Res. ceiling	−7.7	−4.8
IV. Possible later requirements: [2]		
Appropriations Committee	2.5	1.5
Authorizing committees	2.5	1.4
Not assigned by committee: Offsetting receipts	0.3	0.3
Total possible later requirements	5.3	3.3
V. Potential status:		
Under (−) or over (+) 3d Con. Res. ceiling	−2.4	−1.5

[1] Less than $50 million.

[2] This listing includes items that in the judgment of the Senate Budget Committee staff may require funding later in the fiscal year. The dollar amounts in this section are tentative and subject to change. See details in part II of the report.

Mr. MUSKIE. I want to commend the Appropriations Committee for reporting a bill which will leave the committee $2.9 billion in budget authority and $1.9 billion in outlays below the committee's allocation, even after all possible later requirements are taken into account. The Appropriations Committee has once again demonstrated its ability to help the Senate live within the congressional budget, and I urge my colleagues to assist further in that effort as we debate this supplemental and the economic stimulus supplemental that may come to the floor in the near future. There are several amendments to the bill before us today, amendments that may use up a good part of the funds potentially available under the budget ceilings. I ask that Senators consider the budget situation and other possible future spending they may have in mind as they decide on the amendments to this supplemental.

I understand that amendments aimed at alleviating the problems of the Western drought, if adopted, could add $700 million to the budget authority in this bill. Other possible amendments of which I am aware could add another $450 million. I know some of my colleagues are interested in adding substantial funds to GNMA, possibly as an amendment to the economic stimulus supplemental. And, there is a possibility of a second regular supplemental appropriations bill later this year.

While I believe that the amendments to aid in the Western disaster relief are essential to the economic health of that area and the entire Nation, I cannot in good conscience support any other costly amendments to this bill. Simple arithmetic, the kind that we learned before the days of the new math, clearly shows that the amount which remains below the ceilings of the third budget resolution is unacceptably low. If we subtract the $700 million in budget authority for the drought amendments from the $2.4 billion of unclaimed budget authority which remains in the resolution—assuming enactment of this bill, the economic stimulus supplemental and possible later requirements—the available budget authority for the last 6 months of the fiscal year is only $1.7 billion. Only $1.7 billion.

Mr. President, this is a dangerously low margin. The situation is extremely tight. The Congress cannot and, I believe, should not entertain any additional amendments which could drive us closer or even over the current ceilings. We must be very prudent in our actions today and in the days ahead, for I assure you the Budget Committee plans no further revisions to the budget resolution.

Mr. President, I urge the members of the Appropriations Committee and indeed all the Members of this body to reject amendments to this bill which will shrink the limited budget authority that remains in the third budget resolution. There is barely enough room to cover a second regular supplemental.

Let me be quite plain, Mr. President. Without serious restraint on the part of every Member of Congress we will erode the very foundations of the budget process. Without diligent efforts on the part of every Member of the Senate we will be on a direct collision course with the binding ceilings of the third budget resolution. The Congress has adopted a fiscal policy for 1977. We must make it work if we are to achieve the fiscal discipline that the voters of my State and yours expect of us.

JOB-CREATING RENOVATION OF FEDERAL BUILDINGS

Mr. DOMENICI. Mr. President, I am very pleased to note that H.R. 4877, the Supplemental Appropriations Act for 1977, as reported from committee contains $125 million for additional alteration and major repair activities of the General Services Administration.

In addition to the Agency's already funded program for fiscal year 1977, the General Services Administration has identified a list of authorized repair and renovation projects totaling $125 million that are within its capability for implementing between 60 and 180 days and essentially completing within 1 year. This work—which is far more labor intensive than most other public works—would create an estimated 200 to 250 jobs per $1 million expended.

During consideration by the Committee on Environment and Public Works of S. 427, the Public Works Employment Act of 1977, I stated that these projects contain the features most important to a public works jobs program by creating productive, highly labor-intensive jobs almost immediately and that this work conforms closely to the objectives and spirit of S. 427. Upon my motion the committee included language in the Senate report on S. 427 (Report No. 95-38) expressing hope that funding for this quick-start work can be addressed by the Appropriations Committee in the fiscal year 1977 supplemental appropriation bill. Mr. President, I ask unanimous consent that the referenced report language be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objections, it is so ordered.

(See exhibit 1.)

Mr. DOMENICI. The Committee on Environment and Public Works addressed those projects—totaling about $80 million—among the total list that have already been authorized or else do not require authorization under the Public Buildings Act of 1959. I am pleased that the Appropriations Committee has provided full funding of the entire list—totaling $125 million—in view of the fact that the Appropriations Committee stated in its report on the supplemental (Report No. 95-64) that—

> The recommended funding is to be used only for projects authorized by approved prospectuses and for small projects for which a prospectus is not required by law.

The Appropriations Committee goes on to say—

> This appropriation would not exempt GSA from the requirement to obtain Environment and Public Works Committee approval for individual projects in accordance with the provisions of the Public Building Act.

This language would require GSA to obtain committee approval prior to commencement of work of any projects in the list that have not yet been authorized.

[Excerpt from Senate Report No. 95-38]

EXHIBIT 1

JOB-CREATING RENOVATION OF FEDERAL BUILDINGS

In the past, the committee has stated its judgment that employment can be stimulated directly and rapidly by repair and renovation work on Federal buildings, while improving the efficiency of existing buildings.

In addition to the agency's already funded program for fiscal year 1977, the General Services Administration has identified a list of authorized repair and renovation projects totaling about $80 million that are within its capability for implementing between 60 and 180 days and essentially completing within year. This work—which is far more labor intensive than most other public works—would create an estimated 200 to 250 jobs per $1 million expended, and is spread through every State. The projects are among a backlog of General Services Administration repair and renovation work which exceeds $1 billion. The projects have been postponed due to lack of funding, and they will have to be undertaken eventually.

This work includes badly needed basic repairs to correct deterioration, malfunction and obsolescence, and alterations of space to promote efficient utilization. Moreover, work which includes special projects for energy conservation and environmental protection would further national priorities and goals. Improvements mandated by the Congress such as special aids for the handicapped and special fire safety facilities would be advanced.

These projects contain the features most important to a public works jobs program by creating productive, highly labor-intensive jobs almost immediately. While this work conforms closely to the objectives and spirit of this legislation, these projects already have been authorized or else do not require authorization under the Public Buildings Act of 1959, as amended. The committee hopes funding for this quick-start repair and renovation work can be addressed by the Appropriations Committee in the fiscal year 1977 supplemental appropriation bill to the full extent possible within the constraints of Senate Concurrent Resolution 10.

The committee urges the Office of Management and Budget to reevaluate this program in terms of its ability to put people to work quickly in relation to the sums expended, while protecting the Federal investment and improving the efficiency of Federal office buildings.

Mr. ROBERT C. BYRD. Mr. President, for the information of the Senate, there will be no more votes today.

Mr. McCLELLAN. Mr. President, if there are no further amendments, I ask for third reading of the bill.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill

having been read the third time, the question is, Shall it pass? (Putting the question.)

The Chair is in doubt.

Mr. CURTIS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk called the roll.

(At this point Mr. MATSUNAGA assumed the chair.)

Mr. ROBERT C. BYRD. I announce that the Senator from Indiana (Mr. BAYH), the Senator from Idaho (Mr. CHURCH), the Senator from California (Mr. CRANSTON), the Senator from New Hampshire (Mr. DURKIN), the Senator from Washington (Mr. MAGNUSON), and the Senator from Mississippi (Mr. EASTLAND) are necessarily absent.

I further announce that the Senator from Arkansas (Mr. BUMPERS) and the Senator from Hawaii (Mr. INOUYE) are absent on official business.

I further announce that, if present and voting, the Senator from Washington (Mr. MAGNUSON), the Senator from New Hampshire (Mr. DURKIN), and the Senator from Arkansas (Mr. BUMPERS) would each vote "yea."

Mr. BAKER. I announce that the Senator from Utah (Mr. GARN), the Senator from Arizona (Mr. GOLDWATER), the Senator from Utah (Mr. HATCH), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Kansas (Mr. PEARSON), the Senator from Alaska (Mr. STEVENS), the Senator from South Carolina (Mr. THURMOND), and the Senator from Texas (Mr. TOWER) are necessarily absent.

On this vote, the Senator from South Carolina (Mr. THURMOND) is paired with the Senator from Utah (Mr. GARN). If present and voting, the Senator from South Carolina would vote "yea" and the Senator from Utah would vote "nay."

I further announce that, if present and voting, the Senator from Alaska (Mr. STEVENS) would vote "yea."

The result was announced—yeas 69, nays 15, as follows:

[Rollcall Vote No. 98 Leg.]

YEAS—69

Abourezk	Haskell	Moynihan
Allen	Hatfield	Muskie
Anderson	Hathaway	Nelson
Baker	Hayakawa	Nunn
Bentsen	Hollings	Packwood
Biden	Huddleston	Pell
Brooke	Humphrey	Percy
Burdick	Jackson	Proxmire
Byrd, Robert C.	Javits	Randolph
Cannon	Johnston	Ribicoff
Case	Kennedy	Riegle
Chafee	Leahy	Sarbanes
Chiles	Long	Sasser
Clark	Lugar	Schweiker
Culver	Mathias	Sparkman
Danforth	Matsunaga	Stafford
DeConcini	McClellan	Stennis
Domenici	McGovern	Stevenson
Eagleton	McIntyre	Stone
Ford	Melcher	Talmadge
Glenn	Metcalf	Weicker
Gravel	Metzenbaum	Williams
Hart	Morgan	Zorinsky

NAYS—15

Bartlett	Griffin	Schmitt
Bellmon	Hansen	Scott
Byrd, Harry F., Jr.	Helms	Wallop
Curtis	Laxalt	Young
Dole	McClure	
	Roth	

NOT VOTING—16

Bayh	Garn	Pearson
Bumpers	Goldwater	Stevens
Church	Hatch	Thurmond
Cranston	Heinz	Tower
Durkin	Inouye	
Eastland	Magnuson	

So the bill (H.R. 4877), as amended, was passed.

Mr. McCLELLAN. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLELLAN. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make any technical and clerical corrections in the engrossment of the Senate amendments to H.R. 4877.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLELLAN. Mr. President, I move that the Senate insist on its amendments and request a conference with the House of Representatives thereon and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to, and the Presiding Officer (Mr. MATSUNAGA) appointed Mr. McCLELLAN, Mr. MAGNUSON, Mr. STENNIS, Mr. ROBERT C. BYRD, Mr. PROXMIRE, Mr. INOUYE, Mr. HOLLINGS, Mr. BAYH, Mr. EAGLETON, Mr. CHILES, Mr. JOHNSTON, Mr. HUDDLESTON, Mr. LEAHY, Mr. YOUNG, Mr. CASE, Mr. BROOKE, Mr. HATFIELD, Mr. STEVENS, Mr. MATHIAS, Mr. SCHWEIKER, Mr. BELLMON, and Mr. WEICKER conferees on the part of the Senate.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for routine morning business with no resolutions coming over under the rule.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MATHIAS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE MIDDLE EAST

Mr. MATHIAS. Mr. President, on Sunday President Anwar Sadat of Egypt arrives in Washington on his second visit to the United States. Three weeks ago, we again welcomed Prime Minister Itzhak Rabin of Israel, and later this month King Hussein of Jordan will be here for his first discussions with President Carter on the Middle East. At the same time, consulations continue between the United States and Saudi Arabia, Syria and other nations of the Middle East whose vital interests are tied to success or failure of our efforts to assist the parties concerned in reaching a final settlement of the Arab-Israeli conflict.

The Senate can only approve of the energy with which a peace settlement is now being pursued. It is essential not only to our welfare but to world peace, that Israel and her Arab neighbors enter into negotiations that can lead to final settlement of this conflict which is now in its thirtieth year.

Successful negotiations hold the hope that a social and physical rebuilding and a resurgence of human creativity in the Middle East will occur and that the region's vast wealth and human resources will be wedded in prosperous and mutually beneficial endeavor. If negotiations fail, however, we can look forward to even greater conflict and destruction, to further squandering of precious resources and, quite possibly, to a cataclysm of global proportions. We must do what we can to insure that this cannot, and does not, happen.

As President Carter's efforts to attain a Middle East settlement proceed, we should ask ourselves what more can be done at this critical time to enhance the prospects of peace: What useful contribution can we make to the process of peace seeking?

I think that one element of the solution that needs reinforcing is the long range economic interests of the entire Middle East which impose certain common obligations and offer certain common opportunities to the nations of the area.

The job that the fireman does in extinguishing the flame and preventing the spread of fire is vital and necessary but it is a separate role from that of the architect, the engineer, the carpenter, and the mason. While we admire the skill and courage of the one, we do not have to neglect the positive virtues of the others.

Examination of the area's needs and its resources, in the light of our own technical capabilities, suggests one answer which I believe merits serious consideration.

I have visited Sinai several times. I have flown over its historic, arid, empty surface and can testify that the area today is one of the world's most desolate places. It is also a bitterly contested piece of real estate in the Arab-Israeli conflict. Between the time that Moses came down from the mountain and the signing of the 1975 agreement between Egypt and Israel, the Sinai was not of great political significance. Today, it is a meeting ground where Egyptians and Israelis jointly resolve the practical problems attendant on the still uneasy truce.

It is also a zone of disengagement where American citizens and American technology serve to reinforce the strategic buffer between the two countries. These two elements of the 1975 accord continue to function smoothly and suggest to me a possible mode for future cooperation in the area to buttress a durable peace.

Within the context of a final settlement, I envisage a project in Sinai of tremendous scope and potential which would employ the talents of both the Egyptians and the Israelis, both immensely creative peoples, and the world's most sophisticated technology—that of the atom—to benefit the entire area. I have in mind a nuclear generating plant capable not only of meeting the current power needs of the people of the immediate Gaza area, but also of providing electricity for new industry, for a sizable desalinization facility, and for export throughout the Middle East to the rebuilt cities along the Suez Canal, to lower Israel and to the towns on the west bank of the Jordan River.

The site I have proposed is not the only feasible location for such a project. But it does offer some unique advantages. Prior to 1967 it was sovereign territory of Egypt. Today it is occupied and controlled by Israeli troops. President Carter's suggestion for a final settlement would see it restored to Egypt. But whatever the political complexities of Sinai, it is a harsh, barren, and unproductive land. Yet like other deserts, much of it may be made to flower.

Sovereign rights need not be affected by the presence of a multinational institution. In fact, it should enhance the prestige of any nation to be the host to a facility that would produce both water and energy for an entire region.

It is clearly time for us to think seriously about a project of this nature which would be of vital interest to the countries of the Middle East and could be a keystone in a stable Arab-Israeli peace. A Sinai nuclear project promises profound benefits for all its participants because it symbolizes the commonality of interest that exists, but must be recognized in order to effect a change of attitudes. The American technicians, who today scan the Sinai passes with weary watchfulness, could be replaced by an industrial team making an investment in the desert with dividends for the entire world.

For Egypt, this project could be a linchpin in a comprehensive and creative economic development program designed to restore Egypt to prosperity and prominence. It would signify our recognition of that country's development needs, and our willingness to underwrite with our technological expertise Egypt's continued reconstruction. It would demonstrate the U.S. intention to bind our skills and resources to Egypt's future and signal our support for Egypt as a strong, moderate and productive leader in the Middle East.

For Israel, a Sinai project could provide a critical element in a stable peace—the true peace which Israel must have if substantial territory is to be ceded as part of a final settlement. A venture of this magnitude, initiated and sponsored by the United States in combination with other economic, political and, perhaps, security arrangements, would be a visible and concrete investment by the United States in the durability of a final settlement, possibly rivaling in importance any other form of U.S. participation in a final agreement.

For Egypt and Israel, the time has come when each must decide whether to live in isolation from the other, or in cooperation. It is to the advantage of each to bring the other into its fold, to create a framework in which all the states of the area can reach accommodation with, and live upon the terms of the other. A Sinai nuclear project would be part of that framework.

For the United States, an economic link in a chain of commitments between Israel and her Arab neighbors, within and supportive of a final settlement, can only be advantageous. And for the nations of the West, participation in the technical development of a Sinai nuclear project would demonstrate their support for a peace whose benefits all would share. A working partnership in this project would advance the development of a multinational community of nuclear interest, the need for which is felt in many areas of the world.

The ability of a Sinai nuclear project to pay for itself in time is an essential element in consideration of the project. It would be neither wise nor justifiable to ask other nuclear nations to join with the United States in providing the technological know-how for such a project unless its economic feasibility were reasonably assured. Nor, should we propose that the countries of the region with great financial resources cooperate in a Sinai project fund without first demonstrating its economic practicality.

But, once this is done, it is quite clear that a strong and significant commitment to a Sinai nuclear project would serve the interests of all the nations in the Middle East, and particularly those for whom the absence of a stable Middle East peace would only encourage the forces of radicalism. For them, as for the United States, support of such a project would be a form of enlightened self-interest. While none of them may feel that it is possible to break the path in this direction, more than one may wish to travel it.

Mr. President, in my mind this proposal for a cooperative venture between the Arabs and Israelis need not be confined to the area of nuclear power. I have used nuclear power as an example but, in fact, climatic and geographic features of the Sinai might well dictate the exploitation of quite different forms of energy.

Today the lead time for a nuclear powerplant is between 8 and 9 years, while certain solar and wind energy projects require a lead time of only 5 years. For instance, within 5 years there could be operating in the Sinai a 10 megawatt-electric solar powerplant that, combined with a backup system, could generate enough electricity for a city of 10,000. This type of system is easily susceptible to expansion and by 1985–1995 could be enlarged to supply power to much of the area.

Another lively possibility is the use of solar cells for irrigation pumping and small power systems or the use of wind power for electric generation. We also have the technology at hand to put in operation 5 years from now a large scale water desalinization plant based on solar energy.

Selecting one or a combination of these solar or wind options for such a project would have the added advantage of giving impetus to the development of the new technologies so sorely needed in the energy field.

Our own pilot model in the solar thermal field at Barstow, Calif., has been drastically cut back recently by President Carter. Funds for this project have been reduced from $61.25 million in President Ford's budget to $6.25 million, with the $55 million reprogrammed into exploration and development of near-term space heating for buildings. Obviously both types of energy development are desirable and a project, such as I am proposing, could give new impetus to the development of long range, high risk technology.

One of the greatest advantages of a solar project is that the Israelis and Egyptians already are actively exploring the potential of solar energy and each has a number of technicians trained in the field. Saudi Arabia's interest in solar energy is visible in our own backyard. If you take a short jaunt to Reston, Va., you can now see a solar school in operation financed by the Saudi Arabian Government. Other countries now actively pursuing solar energy research include Australia, Germany, France, Italy, Switzerland, Sweden, the Netherlands, and Japan. An internationally supported and funded project in the Sinai—an optimum location for a solar project—would not only demonstrate global concern for a stable and durable peace in the Middle East but could lead to breakthroughs in the field of energy production which the entire world so desperately seeks.

Obviously, this kind of a project cannot be a substitute for concrete political and security arrangements within a final settlement: It would be integral, but complementary and reinforcing. Some may object on the ground that it is not practical to suggest that a cooperative energy project be undertaken before there is a final agreement and implementation of it has begun. But, peace is woven of dreams as well as won by work. If we wait until the settlement we seek is at hand, we simply lower the symbol of our faith that the Arabs and Israelis can work together in constructive harmony, or that the states of the region will be willing to contribute from their resources to such a project, or that the technologically advanced nations of the world will join to support and develop such a project.

So careful thought, and careful prep-

aration, can begin now. We can start to explore the feasibility and evaluate the potentiality of various energy systems.

President Carter has spoken out boldly on his vision of a Middle East peace. He has expressed his conviction that the parties to the conflict should agree at an early point on the shape of a final agreement, and then proceed to negotiate on the timing and method of its implementation.

I propose that we now carefully explore the development of a Sinai energy project which could be part of that final agreement—a project which would lend its strength to the stability and longevity of an Arab-Israeli peace. The rewards of such an idea—for the nations of the immediate area, for the participants themselves, for the United States and for all the peace-loving nations of the world—could be rich indeed.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Chamber?

The PRESIDING OFFICER. Those in the galleries will desist from any displays.

Mr. CURTIS. Will the Senator yield?

Mr. MATHIAS. I yield.

Mr. CURTIS. I commend the Senator for his imaginative and creative statement. It is very worthy of consideration.

Mr. MATHIAS. I thank the Senator for his generous comment.

TIME LIMITATION AGREEMENT—NOMINATION OF PETER F. FLAHERTY TO BE DEPUTY ATTORNEY GENERAL

Mr. ROBERT C. BYRD. Mr. President, as in executive session, I ask unanimous consent that at such time as the nomination of Mr. Peter F. Flaherty to be Deputy Attorney General is called up and made the pending business before the Senate, there be a time limitation thereon of 2 hours, to be equally divided between Mr. EASTLAND and Mr. THURMOND.

Mr. CURTIS. Reserving the right to object, may I inquire, has this been cleared with the minority leader?

Mr. ROBERT C. BYRD. It has been cleared with the minority leader and I assume he has made clearance all around.

Mr. CURTIS. Very well. I shall not object.

The PRESIDING OFFICER. Is there objection?

Without objection, the request, as in executive session, is agreed to.

Mr. CURTIS. Mr. President, will the distinguished majority leader tell us about next week's schedule?

Mr. ROBERT C. BYRD. Yes, I will be glad to, through Tuesday, which is as far as I can see at the moment. I will respond to the distinguished Senator by making the following unanimous-consent requests, which have been cleared with the distinguished minority leader and Senators on both sides of the aisle.

ORDER FOR CONSIDERATION OF S. 1070 ON MONDAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when morning business is concluded on Monday, the Senate proceed to the consideration of S. 1070, a bill to authorize additional funds for housing assistance for lower income Americans in fiscal 1977, and other purposes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS FROM MONDAY UNTIL 4 P.M. TUESDAY, APRIL 5, 1977, AND CONSIDERATION OF NOMINATION OF PETER F. FLAHERTY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business on Monday, it stand in recess until the hour of 4 p.m. Tuesday, and that at the conclusion of the orders for the recognition of the two leaders under the standing order on Tuesday, the Senate go into executive session to consider the nomination of Mr. Peter F. Flaherty. These requests have been cleared on the Senator's side of the aisle.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 12:30 P.M. MONDAY, APRIL 4, 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 12:30 p.m. on Monday.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR BARTLETT ON MONDAY AND DESIGNATING PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that after the two leaders or their designees have been recognized on Monday, Mr. BARTLETT be recognized for not to exceed 15 minutes, after which there be a period for the transaction of routine morning business of not to exceed 15 minutes with statements therein limited to 5 minutes each, and without any resolutions coming over under the rule.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR COMMITTEES TO FILE REPORTS UNTIL MIDNIGHT TONIGHT, AND THE SECRETARY OF THE SENATE TO TAKE CERTAIN ACTIONS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that committees may be authorized to have until midnight tonight to file reports, and I also ask unanimous consent that the Secretary of the Senate may be authorized to receive nominations until midnight and that authority may also be given to make appropriate referrals of messages.

The PRESIDING OFFICER. Without objections, it is so ordered.

ORDER FOR NO ROLLCALL VOTES PRIOR TO 3:30 P.M. ON MONDAY, APRIL 4, 1977

Mr. ROBERT C. BYRD. Mr. President, in order that committees may meet on Monday until well into the afternoon, if they feel it necessary to do so, without interruptions from the floor, I ask unanimous consent that if any rollcall votes are ordered on Monday prior to the hour of 3:30 p.m., they not occur until the hour of 3:30 p.m., with the exception of rollcall votes in relation to the establishment of a quroum if such there be.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, I make this statement of the program in response to the query by the distinguished Senator from Nebraska (Mr. CURTIS).

MONDAY, APRIL 4, 1977

The Senate will convene on Monday at 12:30 p.m. After the two leaders have been recognized under the standing order Mr. BARTLETT will be recognized for not to exceed 15 minutes after which there will be a period for the transaction of routine morning business of not to exceed 15 minutes, with statements limited therein to 5 minutes each, with no resolutions coming over under the rule; upon the conclusion of which period the Senate will proceed to the consideration of S. 1070, a bill to authorize additional funds for housing assistance for lower income Americans in fiscal year 1977, to extend the Federal riot reinsurance and crime insurance programs, to establish a National Commission on Neighborhoods, and for other purposes. There is a time agreement on that bill and I would expect rollcall votes to occur on amendments thereto and motions in relation thereto, and hopefully final passage on Monday.

When the Senate recesses on Monday, it will go over until Tuesday at the hour of 4 p.m. The reason for going over until 4 p.m. is to allow committees to meet all of Tuesday without interruptions from the floor. The leadership would express the hope that committees can take advantage of the full day on Tuesday beginning at 8 or 9 o'clock, if they possibly can meet that early, and going right on through until 4 p.m. Of course, under the Stevenson resolution, committees are permitted to meet even without consent for 2 hours after the Senate convenes. So committees should have a full day on Tuesday. Again I hope they will take advantage of the opportunity to meet without interruptions by rollcalls and quorum calls to the floor.

TUESDAY, APRIL 5, 1977

On Tuesday afternoon the Senate will take up the nomination of Mr. Peter F. Flaherty under a time agreement of 2

hours for debate. Undoubtedly there will be a rollcall on the confirmation.

I believe, in response to the distinguished Senator from Nebraska, I might also say that other matters that may be cleared for action by Monday and/or Tuesday will be taken up. Conference reports being privileged matters may be called up and rollcall votes may occur thereon.

RECESS UNTIL 12:30 P.M. ON MONDAY, APRIL 4, 1977

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until the hour of 12:30 p.m. on Monday next.

The motion was agreed to and at 4:34 p.m., the Senate recessed until Monday, April 4, 1977, at 12:30 p.m.

NOMINATIONS

Executive nominations received by the Senate April 1, 1977:

DEPARTMENT OF DEFENSE

Russell Murray II, of Virginia, to be an Assistant Secretary of Defense, vice Frank A. Shrontz, resigned.

Deanne C. Siemer, of New York, to be general counsel of the Department of Defense, vice Richard A. Wiley, resigned.

Edward Hidalgo, of the District of Columbia, to be an Assistant Secretary of the Navy, vice John J. Bennett.

CONFIRMATIONS—APRIL 1, 1977

Executive nominations confirmed by the Senate April 1, 1977:

SMALL BUSINESS ADMINISTRATION

Arthur Vernon Weaver, Jr., of Arkansas, to be Administrator of the Small Business Administration.

DEPARTMENT OF DEFENSE

William James Perry, of California, to be Director of Defense Research and Engineering.

David Emerson Mann, of Maryland, to be an Assistant Secretary of the Navy.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Mary Berry, of Colorado, to be Assistant Secretary for Education in the Department of Health, Education, and Welfare.

Ernest LeRoy Boyer, of New York, to be Commissioner of Education.

DEPARTMENT OF THE INTERIOR

Robert L. Herbst, of Minnesota, to be Assistant Secretary for Fish and Wildlife, Department of the Interior.

Guy Richard Martin, of Alaska, to be an Assistant Secretary of the Interior.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

EXTENSIONS OF REMARKS

COMMEMORATION OF THE 100TH BIRTHDAY OF THE NORTH CAROLINA DEPARTMENT OF AGRICULTURE

HON. WALTER B. JONES

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. JONES of North Carolina. Mr. Speaker, on April 2, of this year the North Carolina Department of Agriculture will celebrate its 100th birthday of service to the agricultural and consuming public of the State.

Today I would like to salute a century of leadership by this agency and recognize a number of its past and present contributions to the economic welfare, safety, and health of all North Carolinians.

I would also like to take this opportunity to express congratulations to our sister State, Virginia, in the celebration of the centennial of the Virginia Department of Agriculture and Commerce.

That North Carolina would become a great agricultural State seemed destined from the beginning. Explorers who came to the New World in the 1500's reported with exuberance on the bounty of the land that is now North Carolina. They were struck with its temperate climate, sweet flowers, and "faire fields and plains." Ralph Lane wrote in 1585 that this land had the "goodliest soile under the cope of heaven."

The State did, in fact, excel in agricultural production, and to this day, agriculture is the leading industry of North Carolina. The State has continued to produce high-quality agricultural commodities that meet the needs of North Carolinians, Americans, and the people of the world and that contribute immeasurably to the State's economy.

What is more, the agricultural and rural ways of life have become an important part of the thinking and lifestyles of nearly all the people of North Carolina.

One reason for the success of agriculture in the State is that farms have remained at a size moderate enough to allow farmers to exercise full control over their operations. Yes, we do have farms as large as 372,000 acres, but most average about 106 acres. With farms totaling 125,000, North Carolina currently ranks fourth in the Nation in the number of farms.

The impact of agriculture on the State's economy is significant. Last year farm income amounted to nearly $3 billion, and money paid out for items such as feed, seed, fertilizer, and labor accounted for $2 billion more of farm-generated income for the State.

North Carolina currently leads the Nation in the production of Flue-cured tobacco, all tobacco, and sweet potatoes. We are also a prime producer of cucumbers for pickles, turkeys, peanuts, broilers, eggs, layers, apples, and hogs. The most dramatic change in the agricultural picture has been the marked increase in the production of poultry, cattle, and swine. In 1975 these sources provided $1 billion in income.

The North Carolina Department of Agriculture has played an important role in this agricultural growth through its service and regulatory programs. In addition to administering agricultural programs such as marketing, soil testing, and crop reporting services, the Department has expanded into areas of consumer protection, including regulation of food and drugs and of weights and measures.

The need for a State agricultural agency first became apparent in the middle 1800's. Farmers were encountering a number of problems that could not be solved by individuals or by farm organizations. One such problem was the growing number of fraudulent fertilizers on the market. North Carolina farmers believed that the only answer was a State department with the specific responsibility of protecting and promoting their agricultural interests.

It was a concerted effort on the part of a broad base of citizens that led to the establishment of the North Carolina "Department of Agriculture, Immigration, and Statistics." The name has since been shortened by practice to the "Department of Agriculture."

The department was able to initiate effective programs immediately after its creation, primarily due to the leadership of an outstanding agricultural spokesman, Col. Leonidas Polk. Polk had been a leader in several farm organizations and a primary advocate of a department of agriculture. He was respected across the country for his gifts of speaking and writing. He later founded the Progressive Farmer, a farm magazine that is still a vital source of agricultural information today.

Talented, dedicated leadership has always been the good fortune of the North Carolina Department of Agriculture as demonstrated by the late Kerr Scott, who went from Commissioner of Agriculture to the Governorship, to the U.S. Senate, and by James A. Graham, who has served as Commissioner since 1964.

The achievements of the young department—as well as of the experienced agency have been numerous and outstanding.

The same act that established the department of agriculture established an agricultural experiment and fertilizer control station. The specific duties of the experiment station were the analysis of fertilizers for possible fraud, experiments on the nutrition and growth of plants, and the testing of soils. This was the beginning of the North Carolina Agricultural Experiment Station—the first

in the South and the second in the United States.

The following are a few examples of the progressive leadership demonstrated by the department's marketing programs over the years: The department was the first to have a Federal-State grading agreement on red meats; the first to have a Federal-State cooperative agreement on the market news service; and the first to have a full-time transportation specialist.

In the area of seed testing, the NCDA was the first State agency to require agricultural degrees and training in laboratory analysis for seed inspectors. These requirements enable inspectors to go beyond mere drawing samples for testing in a laboratory. The inspectors are prepared to make on-the-spot analysis of seeds, at the points where problems occur.

Departmental seed specialists are currently devising more critical classification for seed germination analysis.

The department of agriculture has always maintained its high reputation in the control of animal diseases. In 1928, North Carolina was the first State determined to be "modified accredited" as free from tuberculosis. In 1942, the State was the first to be declared "modified-certified" for cattle brucellosis.

The laboratory of the NCDA agronomic services division is the only facility in the Nation where three important areas of analysis are made—soil testing, plant analysis, and nematode assay. The work of the agronomic staff is so well respected by the citizens of the State that more soils are tested at this lab than in any soil testing facility in other States.

The pest control division has also displayed leadership in numerous ways. Out of this program the first State biological organism law was developed, and is now being used as a model for Federal legislation. Because North Carolina is a leading State in numbers of private beekeepers, an active program is maintained for controlling bee diseases. In addition, the division has one of the outstanding pesticide programs in the country. This is especially true in the areas of licensing pesticide dealers and taking field samples at the point of pesticide sale and use.

In a few days, the staff of the food and drug protection division will be moving out of their cramped quarters into a modern facility that will allow for increased services by this program and greater safety in operation.

Those of us who know and respect the department of agriculture in North Carolina have reason to be proud on this occasion. Thank you for letting us share our pride with you today for 100 years of service by the North Carolina Department of Agriculture.

RALPH OSBORN, JANICE SALMON—LA PUENTE, CALIF., CITIZENS OF THE YEAR

HON. GEORGE E. DANIELSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. DANIELSON. Mr. Speaker, this week the Greater La Puente, Calif., Valley Chamber of Commerce will honor two 1977 Citizens of the Year and I wanted to bring their accomplishments to the attention of my colleagues.

Both Ralph Osborn and Janice Salmon have outstanding records of community service, leadership, and concerned involvement. Ralph Osborn was sponsored by the La Puente-Industry Kiwanis Club and the Chamber of Commerce, and Janice Salmon by the local Campfire Girls organization. Both are most deserving of this special recognition by the people and the community where they are known and admired.

Others whose community service was recognized by various community organizations by being nominated for this honor were Jane Ferris, Leonor Avila, Leona Bourdet, James N. Gibbs, and Delia Rivera.

HERMAN KAHN: THE UNTHINKABLE OPTIMIST

HON. HENRY S. REUSS

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. REUSS. Mr. Speaker, on April 20 in the evening, the Congressional Clearinghouse on the Future will present its fourth "Dialogue on America's Future," and Herman Kahn, director of the Hudson Institute, will be our speaker.

In an effort to introduce Mr. Kahn to my colleagues, I am inserting into today's RECORD excerpts of an article about him which was recently published in Resources Directory for America's Third Century: An Introduction to the Study of the Future.

Mr. Kahn is an entertaining and thought-provoking man, Mr. Speaker, and I urge all of my colleagues to participate in our meeting with him on the 20th of April.

The excerpts follow:

HERMAN KAHN: THE UNTHINKABLE OPTIMIST

Kahn was born in 1922, in Bayonne, New Jersey, one of the three sons of Abraham and Yetta Kahn. The family lived in New York City for some years before moving to California, where Kahn graduated from Fairfax High School in Los Angeles in 1940. He enrolled at the University of Southern California but later transferred to the University of California at Los Angeles. While in college Kahn worked as a ship steward, checker in a supermarket, and machinist in a camera shop to help pay his expenses. His studies were interrupted by World War II and two years' service in the Army, but Kahn eventually won his bachelor's degree from U.C.L.A. and began work with the Douglas Aircraft Company as a mathematician. While working for Douglas, he became a teaching assistant at U.C.L.A. and attended classes at the California Institute of Technology.

After a brief stint for the Northrop Aviation Company, Kahn returned to Douglas in 1947 to work as a laboratory analyst for Project Rand, a unique experimental institution that Douglas had set up in 1945 in collaboration with the U.S. Air Force. In 1948 Kahn became Senior Staff Physicist for Rand. His primary task was a study of the relations between weapons and tactics. Thus did Kahn become an expert in military strategy and weapons design, and soon he was conducting lectures and seminars for selected military and civilian leaders and advising some top U.S. decisionmakers.

A series of lectures Kahn delivered at the Princeton University Center of International Studies as a visiting research associate in 1959 became the foundation for On Thermonuclear War. The "evil and tenebrous" book argues that there exists a strong possibility, even probability, of nuclear war sometime in the future, because disarmament talks and deterrence strategy probably cannot succeed for all time. On the other hand, the "realistic" possibility of nuclear war does not necessarily mean the end of human civilization, because such wars can have a number of "degrees of awfulness," partly depending upon degrees of preparation and tactics used. Kahn criticized as irresponsible those who argue against a "realistic civil defense program," which would greatly diminish the number of victims so that "normal and hopeful lives would not be precluded for the survivors."

Though it provoked much outraged criticism, the book helped decisionmakers on the Soviet as well as the U.S. side to think more flexibly about responses to nuclear threats and perhaps even consider moves toward detente.

In 1961, Kahn and attorney Max Singer established the Hudson Institute in White Plains, New York. (It was later moved to nearby Croton-on-Hudson.)

Kahn says that when he and Singer started Hudson they thought they would put down on paper during the first year everything that a good Secretary of Defense would want to know, the second year a good Secretary of State, the third year a good President, the fourth year a good Secretary General of the United Nations, and the fifth year a good God. The Institute would then close up shop.

"Unfortunately," chuckles Kahn, "in 1966 Singer pointed out that we were six years behind in the five-year program."

Small in size compared to "Mother Rand," Hudson now has about 50 permanent fellows and 100 consultants. The Institute's original motto was "National Security—International Order," but Hudson has decreased its dependence no military findings, and the present mix of about half military and half civilian work is reflected in its new motto: "Policy Research in the Public Interest."

KAHN'S PUBLICATIONS

From a futurist's standpoint, Kahn's principal books are:

The Year 2000: A Framework for Speculation on the Next Thirty-three Years (co-authored with Anthony J. Wiener, Macmillan, 1967). This 431-page volume, packed with tables and charts, was perhaps the first major statement of Kahn's views on the broad issues of the future. Widely hailed as one of the most impressive futurist works to appear, The Year 2000 presented Kahn's ideas about the "Basic Long-Term Multifold Trend" and his "surprise-free" scenarios.

Things to Come: Thinking about the 70s and 80s (co-authored with B. Bruce-Briggs, Macmillan, 1972). In this volume of 262 pages, somewhat shorter than The Year 2000. Kahn restated his case for the need to speculate on the problems and possibilities of nuclear disasters. He continued to refine and discuss the Basic Long-term Multifold Trend, described in the earlier work.

The Next 200 Years: A Scenario for America and the World (coauthored with William Brown and Leon Martel, Morrow, 1976). Kahn here states his optimistic view of the coming decades. (The title was chosen because of the U.S. Bicentennial celebration, but the focus remains primarily on the next 50 years.) This book offers a strong rebuttal to the "limits-to-growth" school, and argues that Americans will become increasingly prosperous in the years ahead. Improved technology will, Kahn believes, compensate for both the problems of pollution and the depletion of natural resources.

Kahn has become a sharp critic of the in-

tellectual and educational establishment which be blames for a condition he calls "educated incapacity." Education has, in his view, decreased many people's ability to deal with certain problems. For example, he says, for a long time the educated elite viewed public demands for law-and-order as appeals to racism, whereas such demands reflect simply the average person's desire not to be robbed or assaulted—a desire shared by black and white alike.

He believes the U.S. educational system now is failing to teach discipline and good work habits. "It's unbelievable how badly the schools are doing," he says. He also worries that young people are being led to believe that their parents' generation has immorally destroyed the basis of human life, "and that's just not true."

Kahn thinks that the idea that he is an optimist is "basically wrong," he claims that he is simply a realist.

"I'm looking for solutions and if you can find solutions, you're optimistic," he says. "Are we running out of energy?" The answer is absolutely no. No way. Are we running out of resources? Absolutely not. No. way. Are we running out of the ability to feed people from a technological and economic point of view? Absolutely not. No way. Can we retain clean air and clear water and a reasonably esthetic landscape? Absolutely.

Kahn concedes, however, that there will be tragedy, and the most likely kind is widespread starvation. "The big problem is stockpiles," he explains. "It doesn't pay any country to have enough stockpiles so that the poor won't suffer when you have a bad harvest year or bad weather. It's up to the food exporting nations to rise to the occasion and assume responsibility for such stockpiles."

In a period when many people feel that the world is only a few years from a nuclear or environmental Armageddon, Kahn talks exuberantly about an era of peace and prosperity. In an interview with U.S. News, he said:

I think there are good prospects for what the Europeans would call la belle epoque or, if you will, a good era similar to that experienced between the turn of the century and World War I—a worldwide period of growth, trade, peace, and prosperity on the whole, and a time, generally speaking, of optimism about the future.

LITHUANIAN INDEPENDENCE DAY

HON. LUCIEN N. NEDZI

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. NEDZI. Mr. Speaker, I am pleased to participate in this observance of the 59th Anniversary of Lithuanian Independence Day because I do not regard it as a meaningless, pro forma exercise. Real, flesh and blood people are involved.

I have made the point in the past, when joining in this observance, that even in the bleakest times, somebody has to continue to "make the record."

I have emphasized that Lithuania is not a make-believe nation. It has a long and frequently distinguished history dating back to A.D. 1009.

It is indeed remarkable that in the face of Russia's massive presence and its techniques of deportation, colonization, and propaganda, that the Lithuanian national spirit has endured.

Remember that Lithuania has a tradition as a nation state; as does, for example, the Ukraine. It is not some formless entity. Moreover, a vigorous Catholicism has apparently survived.

The Soviet Union has a variety of dissidents, and a variety of minorities. Indeed, there are at least 80 different nationalities in the U.S.S.R. and Russians are barely 50 percent of the total population.

As a broad generalization, the further west you go in the Soviet Union, the more the peoples involved identify with the humanist traditions of Western Europe and the goals of individual dignity. Lithuania is in this category. I believe we recognize the difficulties of Lithuania's situation, and without raising false hopes, we are doing the right thing by reaching out to touch and to understand the people of Lithuania.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the Office of the Senate Daily Digest will prepare such information daily for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

MEETINGS SCHEDULED

APRIL 4

9:15 a.m.
Human Resources
*Subcommittee on Child and Human Development
To hold hearings on S. 961, to promote the healthy development of children who would benefit from adoption by facilitating their placement in adoptive homes.
